WINSTON-SALEM, NC (JAN. 22) PR NEWSWIRE - R.J. Reynolds Tobacco Co. said today it will cancel its Philadelphia test market of Uptown, a new menthol cigarette.

The company said that it would be unable to receive an accurate test market reading on Uptown after the unfair and biased attention the brand had received.

"Our intentions in test marketing Uptown in Philadelphia have been misconstrued and misrepresented by the anti-smoking lobby. Our sole purpose, plainly and simply, was to test market a cigarette among smokers who currently buy competitive products," said Peter Hoult, executive vice president, marketing, for Reynolds Tobacco.

"It is unfortunate that the actions of the anti-smoking lobby have now made it impossible to conduct a reliable market test in Philadelphia.

"We regret that a small coalition of anti-smoking zealots apparently believes that black smokers are somehow different from others who choose to smoke and must not be allowed to exercise the same freedom of choice available to all other smokers. This represents a loss of choice for black smokers and a further erosion of the free enterprise system," he said.

DENVER (JAN. 22) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM), Englewood Colo., announced today that it has been advised that an entity identified as Carisbrook Investments (U.S.A.) Inc. (Carisbrook) attempted to file notification under the Hart-Scott-Rodino Antitrust Improvements Act with federal agencies for the acquisition of $15 million worth or more of Cyprus stock.

A spokesperson said the company understood that the filing by Carisbrook

had been rejected by the Federal Trade Commission as "deficient" in several unidentified respects. The company said it understood a revised filing would be submitted shortly.

It is the company's understanding that the deficient filing, if it had been correct and had received Hart-Scott-Rodino clearance, would have allowed Carisbrook to purchase up to, but not in excess of, 14.9 percent of Cyprus' common stock without making an additional Hart-Scott filing and satisfying an additional Hart-Scott waiting period.

Cyprus said it has reason to believe that Carisbrook is an entity affiliated with or controlled by Robert Holmes a Court.

Cyprus Minerals produces copper, molybdenum, lithium, coal, talc, barite, gold, silver, and soon, iron ore. The company operates in more than 50 locations in 23 states in the U.S. and seven other countries.

SEATTLE (JAN. 22) PR NEWSWIRE - Taiwan-based domestic carrier, Great China Airlines, has ordered two advanced-technology Boeing 737-300s, Boeing Commercial Airplanes confirmed today.

In operation for exactly one year today, Great China operates to four cities including Taipei, Kaohsiung, Tainan and Makung. The airline currently operates two Boeing de Havilland Dash 8-100s, with eight Dash 8s on order including two -100s and six -300s. Today's announcement is its first order for Boeing jetliners.

The first 737-300 rolled out of Boeing's Renton, Wash., plant on Jan. l7, l984, and made its initial flight Feb. 24. The longer fuselage of the -300 airplane provides seating for up to 21 more passengers than the 737 model which has been operating in Taiwan for the past 10 years.

Great China's order represents the first Boeing 737 firm order for l990 bringing total 737 orders (all models) to 2,729, and extending the twinjet's record as the best-selling commercial airliner in history.

The 737 fleet has carried more than 2.5 billion passengers, equal to nearly half of the world's population.

VANCOUVER, BRITISH COLUMBIA (JAN. 22) PR NEWSWIRE - Granges Inc. (AMEX, Toronto: GXL) today reported that its consolidated gold production for the year ended Dec. 31, 1989, was 102,000 ounces. Granges' share of this production was 68,200 ounces. In 1989 during the fourth quarter, consolidated gold output was 25,600 ounces, of which 21,600 was recovered at the Crofoot/Lewis Mine, owned by Granges' 59 percent subsidiary, Hycroft Resources & Development Corporation. The 1989 gold production at Hycroft's Crofoot/Lewis Mine totalled 82,300 ounces.

Granges Inc. also announced that Frederick Felder has agreed to join the company as its senior vice-president, Exploration. Felder has held a number of senior exploration positions with various international mining companies, culminating with his most recent position as executive vice-president of UMEX Inc. He brings to the company 22 years of experience in all phases of mineral exploration from grassroots exploration to mine development.

Colin F. Kaiser, president and chief executive officer, commented, "Mr. Felder will fill a new senior position with responsibility for all aspects of Canadian and U.S. exploration and property acquisitions. Granges is planning to spend $7.0 million on exploration in Canada during 1990, and Hycroft expects to spend a further U.S. $1.5 million on exploration for the Crofoot/Lewis property this year."

Granges Inc. is a Canadian gold mining company listed on The Toronto Stock Exchange, American Stock Exchange and London Stock Exchange under the ticker symbol "GXL."

#90019u0936 01/19/1990 ~United Press International

NEW YORK (JAN. 19) UPI - A new bid for United Airlines is being put together by Los Angeles investor Marvin Davis, Business Week magazine said Friday.

The business magazine, in its Jan. 29 issue, said Davis ''had recent discussions with officials of the airline's parent company, UAL, and will shortly make a new offer for the carrier.''

Davis made a first $240-a-share offer for the airline in August, which he upped to $275, the magazine said.

Davis's new bid, as discussed with Chicago-based UAL Corp, would be for $250, well below the $300-a-share bid made by a management-led group whose financing plan fell apart last fall, the magazine said.

The $250 offer, however, is close to what analysts say the company is worth and should attract the interest of Coniston partners, the group which owns 11.8 percent of UAL's shares and which is pushing for recapitalization, Business Week said.

UAL's board of directors earlier set a Jan. 25 deadline to study new offers but Davis' bid could result in a postponement, the magazine said.

#90019u1030 01/19/1990 ~United Press International

(JAN. 19) UPI - A number of mainline denominations are caught up in theological and ethical disputes over the nature of human sexuality and what sexual practices ought to be considered moral or immoral.

Often, these debates leave the church membership at large bemused, confused and, sometimes, just downright angry because generally such

issues are at sharp odds with their beliefs.

A recent survey among members of the mainline Presbyterian Church (USA) dramatically underscores that point.

For example, according to the Presbyterian Panel, as the continuing of the attitudes of 3,900 church members, pastors, elders and specialized clergy is called, most Presbyterians believe that homosexual sex is always wrong.

Members and elders were strongest in their beliefs, with 74 percent of general members and 80 percent of the elders (local church officials) saying homosexuality was always wrong and only 6 percent of members and 2 percent of elders saying same-sex relations are ''not wrong at all.''

The Presbyterian results track with surveys of the general population, which show that 70 percent of the population believes homosexual relations are ''always wrong'' and just 15 percent saying they are ''not wrong at all.''

At the same time, and suggesting how complex such issues are for people, the survey found Presbyterians more tolerant of homosexual relations if they could be viewed as ''loving, caring ones,'' with the half the pastors and 56 percent of the specialized clergy agreeing that ''the Bible teaches that it is possible to be both Christian and to engage in homosexual activities.''

On the delicate issue of the ordination of homosexuals to the ministry, there was also overwhelming disapproval, with 75 percent of members and 66 percent of pastors disapproving of the ordination ''of a person who engages in homosexual practices.''

Just as clearly, according to the survey, Presbyterians believe that sexual expression should be restricted to marriage and they are much more restrictive than the general population.

A majority of members (61 percent), elders (72 percent), and pastors (63 percent), said sexual relations before marriage are either ''always wrong'' or ''almost always wrong.'' Among specialized clergy, who tended to be more permissive on most issues, 48 percent said premarital sex was wrong. Just 28 percent of the general population hold that view.

And three quarters of all panelists said extramarital sexual relations are ''always wrong.''

The survey also indicated that a clear majority of the 3,900 panelists expected non-married pastors to remain celibate.

But the pastors' responses differ substantially according to whether they

themselves are currently married or not. While 70 percent of the currently married pastors said they agreed that a non-married pastor should remain celibate, only 18 percent of currently divorced pastors agreed and responses from currently widowed pastors were similar. Among the never married, 44 percent agreed with the celibacy standard and 27 percent disagreed and 29 percent were more uncertain.

''In sum, those pastors who currently are not married, and, thus, must personally come to terms with the matter of non-married sexuality, tend to hold different views on the sexual behavior of non-married pastors than do pastors who are currently married,'' the survey report said.

#90019u1314 01/19/1990 ~United Press International

NEW ORLEANS (JAN. 19) UPI - It didn't take too long for the pigeons at New Orleans International Airport to fall in love with the fake owls that had been placed outside the terminal to scare them off.

''They may have scared the pigeons at one time, but they're not scared anymore,'' said Aviation Board Chairman Steve Murray. ''Now you've got those ugly owls up there and the pigeons are making love to them, or whatever.''

After the pigeons got over their fright, they moved back in and are making a mess of the roadway below.

A few years ago, somebody came up with the idea of the fake owls to scare the pigeons away from the terminal. The pigeons were roosting in the arch that forms the facade of the main terminal at the airport.

Murray and others are thinking about doing away with the arch and its crosshatch structure where the pigeons have set up a bird condominium.

''That's the ugliest damn thing I've ever seen,'' he said.

An architectual firm recommended replacing the steel crosshatch framework with smooth reflective glass.

#90019u1315 01/19/1990 ~United Press International

CLEARWATER, FL (JAN. 19) UPI - A businessman's plan to offer a day cruise for nudists that will embark from the city's beach has some officials upset because they fear it will interfere with efforts to attract families to the beach.

''Nudism is just not something that I think is a positive role model for youth,'' Mayor Rita Garvey said Thursday.

''I think the image that's generally associated with it unfortunately is just a little bit on the strange side,'' Commissioner Don Winner said.

Businessman Dave Cutting said the cruise will embark from the city-operated Clearwater Marina on March 2.

Harbor Master Bill Held learned from police and the city attorney's office that nude cruises are legal. Police spokesman Wayne Shelor said city law prohibits nudity in businesses where alcohol is sold.

''Most nudists feel that they have a sense of freedom and healthy feeling about their bodies,'' Cutting said. ''You take the mystery out of the body and you look at people for what they are.''

Because it is near nudist resorts in Pasco County, Clearwater Beach is a good spot to organize such cruises, he said.

Commissioner Lee Regulski said he doesn't think the image of the beach will suffer because of the cruise, as long as the operation remains low-key.

Cutting, who owns a graphic arts business, placed an advertisement in a weekly newspaper with a headline that read, ''Nude Dance Party Cruises.''

He said he originally scheduled two cruises, the first set for Jan. 26, but not enough people registered.

#90019u1453 01/19/1990 ~United Press International

ATLANTA (JAN. 19) UPI - Even the president of the United States has car trouble sometimes.

On the way to speak Friday at the Omni arena, President Bush and his entourage had to be transferred to a backup limousine on Interstate 75 when his armor-plated Cadillac broke down.

The presidential motorcade was alone on the multi-lane expressway when the car began to spew smoke, bringing the entire procession to a stop.

''It overheated. These armor-plated vehicles are heavy,'' said Housing Secretary Jack Kemp, who was riding with the president. ''It's a problem.''

Kemp said that if the limos are not working perfectly, ''they change those cars right away.''

It only took a couple minutes for Bush and his aides to jump out of one limousine and into a backup car, another Cadillac. The disabled limousine was left on the side of the highway and the president sped off to deliver his address to a convention of the National Association of Home Builders.

Police had re-routed traffic off the busy highway for the motorcade. Bush was traveling to downtown Atlanta from Dobbins Air Force Base in suburban

Marietta, where Air Force One lands during presidential visits to the area.

The limos, adorned with American and presidential flags, are all driven by Secret Service agents with a second agent manning the passenger slot.

An aide said the limousine had suffered ''an unexplained mechanical failure. It was accompanied by a drop in oil pressure.''

Secret Service spokesman Rich Adama said agency repairmen will work on the limousine in Atlanta. A second limousine is always in the motorcade for such emergencies and sometimes for use as a decoy.

The limousines are part of the White House fleet ferried to the site of presidential visits aboard government aircraft.

The cars are not all Cadillacs.

The White House garage also boasts a $600,000 custom-made Lincoln presidential limousine. The most famous presidential automobile, the one used in Dallas when President Kennedy was assassinated, was given to the Smithsonian Institution.

#90019u1516 01/19/1990 ~United Press International
WICHITA, KA. (JAN. 19) UPI - The Boeing Co. said Friday it will reduce its Wichita, Kan., work force by 600 during first quarter and further reductions are possible this year because of shrinking military business.

The news followed Thursday's announcement by the Seattle-based company that it would lay off 5,000 workers in Washington state during 1990. Those layoffs were attributed to completion of start-up work on a new 747 model as well as reduced military spending.

Dick Ziegler, a Boeing spokesman in Wichita, said the work force would be reduced by the end of March through attrition and layoffs. Layoffs in Wichita will occur in a variety of positions, including administrative and management, he said.

Additional layoffs were possible during the year, Ziegler said, but it was difficult to pinpoint how many jobs would be affected.

''I can tell you that we look for the same downtrend for the rest of the

year. The downward trend is primarily on the military side,'' Ziegler said.

The Wichita plant employs 24,000 in three divisions of Boeing Commercial Airplanes, Boeing Miltary Airplanes, and Boeing Computer Services.

Among military projects at the Wichita plant are a program to re-fit the U.S. Navy's attack fighters with composite wings, an on-going Air Force One contract, and a contract to modify and upgrade the B-52 bomber.

Ziegler said several of the plant's military programs would be completed within the decade.

The Wichita plant also works on most of the commercial airplanes produced by the Boeing Co., Ziegler said. About 75 percent of the 737 aircraft is produced in Wichita.

Boeing is planning layoffs in Washington at the same time it is struggling to meet a backlog of commercial orders.

''We expect to see an increase in commercial work here in Wichita. The number of orders now on hand would indicate that someone has to do the work,'' Ziegler said. ''We are looking for a downturn on the military, but an upswing on the comercial side. It will be a rather unbalanced swap, with the military going down a little more quickly than the commercial will come up.'

Ziegler said Boeing officials were studying the possibility of moving workers from military to commercial lines in Wichita.

#90019u1608 01/19/1990 ~United Press International

BRIDGEPORT, CT. (JAN. 19) UPI - Great Northern Nekoosa Corp. will not fight an order by a federal judge to unseal documents outlining the company's financial position and a recommended break-up price, a company spokesman said Friday.

''This was a proprietary document of Goldman, Sachs & Co. and we have no objection to the parts of it that are being released,'' said spokesman Stephen M. Hill at Nekoosa headquarters in Norwalk.

U.S. District Judge Warren W. Eginton ordered the papers to be unsealed at 5 p.m. next Monday because of a motion filed by Stephen J. Humes, a business writer for The Bridgeport Post. Eginton issued the order late Thursday, court officials said.

The documents in question were prepared by Goldman, Sachs & Co. in November for Nekoosa, which is battling a $4.5 billion, or $63-a-share,

hostile takeover by rival paper company Georgia-Pacific Corp. of Atlanta.

Nekoosa, which claims the merger would violate antitrust laws, has filed suit in U.S. District Court seeking an injunction to block the takeover.

Humes also has requested access to a second set of sealed third-party documents that were gathered by Nekoosa under a protective court order from at least five competitors to bolster its case against Georgia-Pacific.

Eginton said he would rule on that motion after Nekoosa completed its court presentation which the company said could be next Wednesday. Some of the third-party material has been the subject of closed federal court proceedings in Bridgeport.

Also on Friday, Georgia-Pacific took out a full page newspaper advertisement in the Bridgeport Telegram and The Bridgeport Post, asking Nekoosa shareholders to support the takeover.

Hill said Nekoosa had no comment on the ads, which also have appeared in a number of other newspapers, including The Hartford Courant, The New York Times and The Wall Street Journal.

Hill said the company planned to send its own proxy statement to shareholders, opposing the takeover and a proxy fight by Georgia-Pacific.

Georgia-Pacific said Tuesday it had begun soliciting proxies in a bid to replace Nekoosa's board of directors with officers favoring the takeover. The company said as of Jan. 5, Nekoosa shareholders had tendered more than 75 percent of the shares.

Georgia-Pacific said it also planned to propose amending a number of anti-takeover provisions in Nekoosa's bylaws at an extraordinary shareholders meeting in Portland, Me., scheduled for March 2.

Nekoosa had set Jan. 12 as the deadline to list shareholders eligible to vote at the extraordinary meeting.

Legal challenges against the takeover also have been filed in U.S. District Court in Portland and in Maine Superior Court.

#90019u1645 01/19/1990 ~United Press International

DALLAS (JAN. 19) UPI - American Federal Bank, F.S.B., created from the merger of 12 failed Texas thrifts in 1988, Friday announced the resignation of its President William E. Gibson who had helped keep the institution profitable since its formation.

Lone Star Technologies Inc., which owns AFB, gave no reason for Gibson's resignation. Gibson was also AFB's chief executive officer and a director.

''Pending American Federal's appointment of a successor to Gibson, the bank's executive committee of senior bank officers, headed by Leonard J. Huber, executive vice president and chief financial officer, will manage the bank's operations,'' the announcement said.

AFB was formed in August 1988, one of the first such transactions under the so-called Southwest Plan through which several other failed thrifts were merged and sold to private investors.

The AFB bailout cost the federal government $1.3 billion. Loner Star Technologies, which is currently in Chapter 11 bankruptcy, contributed $48 million to acquire it from the former Federal Savings and Loan Insurance Corp.

Lone Start Technologies' bankruptcy does not affect AFB.

Gibson, a prominent banker and economist, was one of the organizers of the merger and managed the institution from the start.

Lone Star Technologies said AFB has ''operated profitably since its formation and in recent months has reversed the initial deposit outflow, streamlined operations, and reduced government obligations.'' Its assets currently exceed $3 billion.

Before coming to AFB, Gibson was senior vice president of the RepublicBank Corp. of Dallas and later was executive vice president of the Continental Illinois Bank and Trust in Chicago.

One analyst said while Gibson must get credit for his efficient management of AFB, the institution still faces the tough task of continuing as an ongoing profitable entity and developing values for its franchises that were insolvent to start with.

''After his departure, it is imperative AFB continues to make progress,'' the analyst said.

#90019u1924 01/19/1990 ~United Press International

ELIZABETH, NJ (JAN. 19) UPI - The city of Elizabeth filed a civil suit against the Exxon Corp. Friday for the oil spill that dumped more than half a million gallons of oil into the Arthur Kill.

City officials complained the spill has damaged the area's reputation and will make it more difficult to go forward with waterfront redevelopment plans, including a proposed 400-slip marina, said John Surmay, a spokesman for Mayor Thomas Dunn.

''We found that the magnitude of the damages from a long-term perspective is more than Exxon is willing to expend for the short-term cleanup,'' he said. ''They took care of obvious cleanup, but did little to clean up the piers, the boats and the wharves.''

The Jan. 2 spill leaked 567,000 gallons of home heating oil in the waterway between New Jersey and Staten Island, N.Y., over a period of about six hours. Exxon officials blame a faulty switch for allowing pumping operations to be restarted once the oil started leaking from the 6.7-mile pipeline.

The city's suit is expected to be added to the one filed by the state last week, Surmay said.

That suit charges the company with violating the state's Spill Compensation and Control Act, the Pollution Control Act and the city's municipal code.

#90019u2182 01/19/1990 ~United Press International

FAIRFAX, VA. (JAN. 19) UPI - A 5-year-old boy trapped 40 minutes in an icy drainage reservoir died in a Virginia hospital Friday, four days after his lifeless body was pulled from the pond and doctors revived the child.

George Sader died Friday morning at Fairfax Hospital from a lack of oxygen to the brain, a hospital spokeswoman said.

The boy was brought to the facility Monday afternoon after falling into the drainage reservoir, but he never regained consciousness and breathed with the help of a respirator.

''Our heart goes out to the family at this difficult time,'' hospital spokeswoman Mary Stuart Rizk said. The family was at his side when he died she said.

The child's temperature had dropped to 90 degrees and his heart had stopped beating when he was pulled from the reservoir behind a row of townhouses in Centreville, which is 20 miles west of Washington, D.C. Two older cousins had fallen in with him but were not seriously hurt.

Doctors and nurses struggled valiantly in the hours after George was brought to the hospital to revive him. His temperature rose to 102 degrees after doctors removed his blood, warmed it up and put it back in his body. Doctors were able to restart the youngster's heart, and it beat on its own until his death.

But doctors had said his prognosis for recovery was poor and he had less than a 2 percent chance of surviving without brain damage. He suffered damage to most of his major organs, and his brain had begun to swell.

The hospital spokeswoman said the family would announce funeral arrangements later. The family has not commented since the accident.

The ice-covered pond had begun to thaw when George and the girls, ages 12 and 14, walked on it and fell in.

Despite his submersion, doctors attributed George's survival to his age and the temperature of the water. In cold water, a reflex in the body shuts down non-vital organs, allowing oxygen to go to the essential organs - the heart, brain and lungs.

#90019u2225 01/19/1990 ~United Press International

NEW YORK (JAN. 19) UPI - U.S. Treasury issues recovered somewhat Friday after a week in which bond prices, already depressed by inflation fears and a selloff in the Japanese bond market, tumbled on word that the Federal Reserve won't send short-term interest rates any lower for now.

The benchmark U.S. long bond, the 8 1/8 of 2019, closed at 98 10/32 to yield 8.28 against 8.17 percent a week before, for a loss in the week of 1 1/4 points or $11.25 for each $1,000 face value.

Its yield, though off from Thursday, remained at levels not seen since last summer. Bond yields move up as prices decline.

The week's close represented a gain from Thursday prices, when the long bond was at 97 20/32 for a yield of 8.33 percent.

Joseph Plocek, senior vice president and chief economist for the McCarthy,

Crisanti & Maffei Inc. trading firm, said the recovery was ''mainly just a bounce from the huge selloff we saw yesterday.''

But he said a bearish local economic forecast from the Federal Reserve Bank of Philadelphia ''certainly was a plus.'' So were Bank of Japan indications that it would not hike interest rates. This steered capital away from Japanese instruments and back into U.S. Treasuries.

Still, prospects are anything but cheery.

''Right now the bond market is in a very bad mood,'' said Robert Dederick, the Northern Trust Co. Bank of Chicago's chief economist. ''It sees no sun in the sky and is prepared to have every cloud disturb it.''

Looking on the bright side, Smith Barney's Credit Market Comment said the yield rise ''solidifies our view that the economy will slow further over the months ahead'' and offers ''an excellent buying opportunity.''

Heavy selling put the long bond off nearly a point Thursday on a report that two key Federal Reserve Board governors who earlier urged easier credit now oppose lowering short-term interest rates. Investors had been hoping for more Fed easing, which could bolster long bonds.

Securities strategist James Kochan of Merrill Lynch Capital Markets said ''few investors anticipated a selloff of this magnitude.''

Inflation fears were undermining bond confidence. A Thursday consumer price index report showed a 0.4 percent increase in December for an inflation rate of 4.6 percent in 1989. The White House said this was below projections, but it was still the highest yearly rate since 1981.

Japanese investors were reported liquidating U.S. bonds to hedge their losses this week on Tokyo securities exchanges. There was concern about an investment shift from U.S. markets to booming Germany and Europe.

Oversupply loomed as a potential effect of the Treasury auction next week of $5 billion in 40-year Resolution Funding Corp. bonds. Refcorp, the federal agency overseeing the savings and loan association bailout program sold $4.5 billion of 30-year bonds in October in its first auction.

Dederick said investors were looking at the new issues and asking, ''Where are the buyers going to come from?''

Relief is some ways off in the form of a possible bond rally at the end of this quarter, said Plocek of McCarthy, Crisanti.

Ten-year Treasury notes closed at 97 18/32 to yield 8.24 percent against 8.092 percent last week. Five-year Treasury notes closed at 98 8/32 to

yield 8.16 against 7.97 percent a week earlier.

Two-year Treasury notes closed at 99 1/32 to yield 8.17 percent compared with 7.92 percent at the end of last week.

Six-month Treasury bills ended at a discount rate of 7.59 to yield 8.0 percent against 7.815 percent a week before. Three-month T-bills finished at a discount rate of 7.73 to yield 7.99 percent against 7.718 percent.

Shearson Lehman Hutton Inc.'s index of long-term Treasury bonds fell 11.53 points or 0.86 percent in the week, closing at 1,323.30.

The Federal funds rate was at 8 3/16 percent, just over the perceived Federal Reserve target rate of 8 1/4 percent. The Fed funds rate, what banks charge each other for overnight loans, underlies most other rates.

#90019u2377 01/19/1990 ~United Press International
By VERNON SCOTT

HOLLYWOOD (JAN. 19) UPI - There's no shortage of actresses in Hollywood but that hasn't dampened the resolve of Renee Soutendijk.

In town to co-star with Gregory Hines in the dual role of a scientist who becomes a robot in the new movie ''Eve of Destruction,'' Soutendijk, a Vermeer portrait come to life, has left her home in Amsterdam to further her career.

Although this is her first major role in Hollywood, Soutendijk may be familiar to American audiences through her performances in ''Spetters,''

and such productions as ''Inside the Third Reich'' playing Eva Braun, ''Peter the Great'' and ''The Murderers Among Us.''

Only a handful of European actresses have been able to overcome their foreign accents to succeed playing American roles. Even British stars find it difficult to fool American ears.

But Soutendijk could make the transition. She speaks almost flawless American style English, having learned the language as a schoolgirl and working on it ever since.

''Holland is a very small country with a very small film industry, so there are not many Dutch actresses around,'' she said recently while on location in the Wilshire District of Los Angeles.

''We only make 10 or 15 pictures a year, and all of them are in Dutch. The industry was too small for me. I had to get out.

''But with Europe changing so rapidly, people are trying to set up big international co-productions involving several European countries.

''The Dutch have mixed feelings about a united Europe. It will take years to find the right rules for it. Right now there is a big battle between England and France to dominate such a multinational political and economic alliance.

''A united Germany could make a big difference. Our system works so well in Holland there is some reluctance on the part of the Dutch to become part of a united Europe.

''Even though Europeans may use a common currency and most of us one day will be speaking English, I think we will keep our customs and traditions and cuisines. Things like that.

''More and more Europeans are speaking English as a second language. We tried Esperanto, but it didn't work. Actually, I speak German and French as well as English and Dutch.

''We're fortunate linguistically because we see movies from all over the world in their languages of origin - of course with subtitles. And we receive German, French and English television. It all helps.

''No doubt there are a lot of changes coming, including in show business.

''It's very exciting with Western and Eastern European film industries joining forces and resources as well as providing financing among French, German, Dutch, Scandinavian and Yugolavian industries.

''I've appeared in some big co-productions over there. One was an English-German-Polish picture, 'Wherever You are.' Somehow it didn't work because each country had something to say and ended up making concessions.

''A project loses its identity with all the conflicting influences.

The problem, she says, is that producers want their actors to speak English to attract international audiences.

''They also want performers with commercial value. And that means American stars, so it won't help European actors.

''I've been working all over Europe for the past dozen years making about 30 pictures. Until now, I've never taken the step of coming to Hollywood and waiting for something to turn up. I always perferred working.

''Fortunately, I've never been type-cast. I've been able to do whatever roles appealed to me. It's been a great learning experience.''

While she may sound like an American, she doesn't look like one. There is a distinctive European cast to her - prominent cheekbones, a Teutonic nose and an attitude that is clearly not American.

''I still work on my English so that if my appearance is slightly foreign, at least my speaking voice will not heighten the illusion,'' she said.

#90019u3880 01/19/1990 ~United Press International

(JAN. 19) UPI - Attorney General Dick Thornburgh says Congress is stealing some powers of the executive branch. Thornburgh told a conservative law group in Washington that continued power-grabs by Congress could threaten liberties and security. The attorney general cited a Congressional ban on aid to Panama which still remains, even with a new government there. He said the ban keeps President Bush from helping Panama quickly.

A coal mine strike that could have proven disastrous for Poland appears to be fizzling as workers return to their jobs at all but one of the troubled mines. Miners are going back to work following an appeal from Solidarity founder Lech Walesa who warned that strikes could hurt the government's economic reform program and lead to anarchy.

Reformist Soviet politician Boris Yeltsin says the people of the Soviet Union have had enough of their leader, Mikhail Gorbachev . Yeltsin says while Gorbachev may be a success internationally, he has done ''practically nothing'' inside the Soviet Union. Yeltsin says Gorbachev must work with reformists to get things done. Yeltsin also called for an

end to his country's Communist Party monopoly.

#90019u4085 01/19/1990 ~United Press International

(JAN. 19) UPI - A federal judge in New York today sentenced former New York Congressman Robert Garcia and his wife to three years each in prison with NO fines. The two were found guilty last year of taking thousands of dollars in payoffs from the Wedtech Corporation. The judge recommended both Garcias be eligible for parole in six months and said he was imposing the most lenient sentence possible. Garcia said he- quote- ''never deliberately tried to harm'' his constituency.

Washington, D-C, Mayor Marion Barry has relinquished his governing powers temporarily to a top aide after being charged with possession of crack cocaine. U-S Attorney Jay Stephens says Barry tested positive for cocaine following last night's arrest in a Washington hotel. And an F-B-I agent filed a court affadavit today saying he filmed Barry buying and smoking crack cocaine. The mayor didn't enter a plea today but his lawyer says he'll plead innocent.

A judge in El Salvador ruled today there's enough evidence to try eight Salvadoran military men for the November killings of six Jesuit priests and two women. A spokesman for the opposition Christian Democratic Party says the ruling ''sets a historical precedent.'' But he adds there are doubts that El Salvador's weak justice system will carry the case through. The opposition says officers implicated in past crimes have escaped justice.

A five-year-old boy who was trapped for 40 minutes in an icy Virginia pond died today, four days after his rescue. A hospital spokeswoman in Fairfax said George Sader died from a lack of oxygen to the brain. On Monday, the boy and two older cousins fell into a thawing, ice-covered drainage pond. George was lifeless when he was pulled from the water. His heart was restarted, but he never regained consciousness.

#90019u4116 01/19/1990 ~United Press International

(JAN. 19) UPI - President Bush says the 1990's must be- in his words- another decade of lower taxes and lower interest rates.'' He addressed the National Association of Home Builders convention in Atlanta, and called for Congress to vote, one way or the other, on his proposed capital gains tax cut. Bush said the government must adopt fiscal policies- in his words- ''as sound as those of the average American household.''

The shuttle Columbia is spending an extra day in space after a blanket of fog prevented its landing this morning at Edwards Air Force Base in

California. NASA had predicted the fog and called off the landing ahead of time. When the shuttle lands, it comes down without power and must find the runway the first time, so good visibility is crucial. Now the Columbia crew is to land early tomorrow morning.

The judge who solidified a liberal majority on the Supreme Court with his appointment in 1962, is dead. Former Supreme Court Justice Arthur Goldberg was found dead in his Washington apartment today at the age of 81. Goldberg sat on the high court for three years, and also served as ambassador to the United Nations under President Johnson. His resignation 25 years ago marked the beginning of the court's shift to the right. The cause of his death is NOT yet known.

-30- 1466

#90019u4312 01/19/1990 ~United Press International

(JAN. 19) UPI - Marion Barry... Robert Garcia... Peggy McMartin Buckey... Boris Yeltsin... Dick Thornburgh... names making the news tonight... from the world-wide wires of United Press International.

The persistent rumors of drug use that have plagued Washington Mayor Marion Barry for years may have caught up with him last night.

The three-term mayor was charged today with possessing crack cocaine following his arrest last night in a Washington hotel. F-B-I agents videotaped the mayor buying and using the drug. But Barry's lawyer says he will plead innocent to the misdemeanor charge of possessing crack cocaine.

U-S Magistrate Deborah Robinson ordered the 53-year-old mayor to undergo weekly drug tests and maintain contact with authorities once a week by telephone. Barry was released on his own recognizance. A status hearing has been set for early next month.

The embattled Barry later met with top city officials and turned over his governing duties to a top aide, City Administrator Carol Thompson. Under the city's charter, Thompson will preside over the city's day-to-day operations, but she won't have the power to sign legislation.

If convicted, the mayor could face a maximum sentence of NOT more than one year and 100-thousand dollars in fines.

Former Representative Robert Garcia of New York and his wife each were sentenced today to three years in prison for taking thousands of dollars in bribes from the Wedtech Corporation.

U-S District Judge Leonard Sand in New York said he imposed the lightest sentence he responsibly could. Sand made the unusual recommendation that both Garcias be eligible for parole after six months in a minimum security

facility.

Normally, the Garcias would have had to serve at least one year before being up for parole.

The couple claims to be destitute, and NO fines were imposed.

Garcia took responsibility for what happened. But he said he ''never deliberately tried to harm'' his constituency.

The couple was found guilty last year of taking payoffs from the now-defunct Bronx defense contractor Wedtech. The money bankrolled a lavish lifestyle that included a 65-acre horse farm.

Garcia... a Democrat... resigned earlier this month after 12 years in Congress.

-30- 2440

#90019u4329 01/19/1990 ~United Press International

(JAN. 19) UPI - The McMartin Pre-School case may NOT be closed yet. Yesterday, Peggy McMartin Buckey was acquitted of 52 molestation charges but today filed a one-Million-dollar federal civil suit against Los Angeles County, the city of Manhattan Beach, and others.

64-year-old Buckey says her civil rights were violated and claims the defendants named in the suit publicized allegations against her in a way that would pre-determine the outcome of the case. She further claims her character was defamed.

Buckey's lawyer says there's nothing worse than being wrongly accused of child molestation. James Davis adds if a person's civil rights have been violated, they have a right to sue.

Other defendants in the suit are the Children's Institute International which conducted videotaped interviews with the McMartin students, Capital Cities-A-B-C, and a former television reporter, who has been credited with breaking the McMartin story.

The Colombian government is saying NO to a recent conditional offer of surrender from a powerful drug cartel. The government of President Barco says it will continue its war against the drug traffickers and vows to continue extraditing suspects to the United States.

The ''Extraditables,'' a dangerous hit squad hired by the drug traffickers has been waging war against the Colombian government since August in response to a harsh crackdown on drug smugglers. The result has been a violent series of bombings, kidnappings, and assassinations.

The ''Extraditables'' offered to give up its war against the South American nation in return for ''legal and consititutional guarantees.'' But the government says it will to continue to- quote- ''apply the law and to bring the criminals to justice.''

-30- 1930

#90019u4336 01/19/1990 ~United Press International

(JAN. 19) UPI - A Salvadoran judge ruled today there's enough evidence against eight Salvadoran soldiers to try them for the slayings of six Jesuit priests and two women.

The top man charged is Colonel Guillermo Alfredo Benavides , director of the Armed Forces military academy at the time of the murders in November. The six Jesuits, their housekeeper and her 15-year-old daughter were pulled from their beds and killed.

The killings are widely believed to have been a right-wing reaction to a massive rebel offensive by leftists backed by the priests.

Defense attorneys say they will appeal the decision.

The U-S Embassy welcomed today's ruling as another affirmation of the Salvadoran government's determination to prosecute the case.

Opposition leaders also applauded the decision. But pointing to previous cases, they questioned whether El Salvador's weak justice system has the guts to see the case through.

Outspoken Soviet reform politician Boris Yeltsin says perestroika has failed.

Yeltsin says Soviet President Gorbachev has muffed a chance to improve life for his people through the economic restructuring program.

Yeltsin was the Communist Party boss of Moscow until 1988, and is a political maverick in his country.

In an interview in a Dutch weekly, Yeltsin says the people have NO interest in working harder for reform, so the process ''has come to a full stop.''

Gorbachev, Yeltsin says, is well-liked abroad for international success, but has done ''practically nothing'' at home. Yeltsin says Gorbachev's only hope is to side completely with reform, instead of waffling between reformers and conservatives.

Yeltsin also called for an end to the Communist Party's grip on power. He said that change should come at the party congress at the end of the month.

-30- 1988

#90019u4345 01/19/1990 ~United Press International

(JAN. 19) UPI - U-S Attorney General Thornburgh says Congress is blurring the principle of separation of powers and, in his words- ''ultimatley could threaten our liberties and our security.''

Thornburgh addressed an organization of conservative lawyers and law students in Washington today. He said Congress is encroaching on the executive branch of government. Thornburgh said the arm of the legislative branch has hampered the administration's ability to provide aid to the new Panamanian government.

Later, Thornburgh's spokesman said because General Noriega did NOT co-operate with U-S anti-drug control efforts, Congress arranged it so NO aid would go to Panama. Quoting the spokesman- ''Congress didn't allow for a change of government.''

Thornburgh also criticized the Office of the Independent Council which investigates possible wrongdoing by executive branch members. The attorney general said the office- quote- ''does raise legitimate concerns over separation of powers.''

President Bush today echoed the auto industry by saying a Senate plan for cleaner air won't do much more than his own plan, but costs twice as much.

The Senate is ready to begin debate on the Democrat-sponsored bill next week. Bush said in a letter that he wants the 1990's to ''be known as the clean air decade.'' Yet Bush says if the bill doesn't balance environmental and economic interests, he'll veto it.

Senate Democratic leader George Mitchell of Maine largely dismissed Bush's veto threat as bluster meant to please the business community. Mitchell says it's highly unlikely the president would veto a bill Congress approves.

Bush said he's willing to accept proposals for slightly more stringent car tailpipe emission controls. But he said a Senate bid for a further round of controls for the year 2003 would be too expensive.

But environmentalists say the extra restrictions are essential to cutting through urban smog.

-30- 2120

#90019u4450 01/19/1990 ~United Press International
(JAN. 19) UPI - The death toll from a week of ethnic warfare in Soviet Azerbaijan and Armenia is now more than 80, and Soviet leaders say if the fighting doesn't stop, it could lead to a ''national catastrophe.''

Strikes, protests and blockades shut down the capitals of the two republics on the Soviet Union's southern rim. President Gorbachev says the situation ''is NOT improving,'' despite the presence of 24-thousand soldiers and other forces.

City officials in Washington, D-C, voiced sadness about Mayor Marion Barry's arrest on drug charges, but few called for his resignation. Council member H.R. Crawford said ''continuous badgering'' and close scrutiny of the mayor's personal life may have led to Barry's drug problem.

Education Secretary Cavazos says he hopes that by the year 2000 all students who want to complete higher education programs will have an equal chance to do so. Cavazos spoke today in Washington, and called for a ''fundamental commitment'' to such a goal.

Nicaraguan President Ortega says the opposition newspaper has been ''distorting and manipulating'' economic stories ''to create mistrust among the population'' and undermine his government. Media reports say Ortega blames the opposition campaign in part on advice from U-S diplomats.

Authorities in Arkansas say a commuter jet crashed and burned at the Little Rock Regional Airport today, killing at least seven people. Seven bodies were recovered from the wreckage, but officials say there were eight people aboard. NO other details were available.

In Denver, a Continental Airlines jet slid past the end of a snowy runway at Stapleton Airport today, but NO damage or injuries were reported. Airport officials say Flight 18-oh-eight from Reno, Nevada, was landing when the mishap occurred. A storm dumped six inches of snow at the airport today.

-30- 2027

#90019u4623 01/19/1990 ~United Press International
(JAN. 19) UPI - District of Columbia Mayor Marion Barry has NOT resigned but has given temporary control of government to City Administrator Carol Thompson. Barry was arraigned today on charges of possessing crack cocaine. U-S Attorney Jay Stephens says the 53-year-old mayor tested positive for cocaine following last night's arrest in a Washington hotel. F-B-I officials say they videotaped Barry buying and using crack.

Former New York congressman Robert Garcia and his wife were sentenced to three years each in prison for their involvement in the Wedtech scandal.

U-S District Judge Leonard Sand said the sentence was the most lenient he could responsibly impose, and he recommended the couple be eligible for parole after serving six months. Quoting Sand- ''when this nightmare is over, I believe you'll have a lot to offer the community.''

President Bush's policy toward China is getting some strong criticism from Senate Democratic leader George Mitchell. The senator from Maine says the president's easing of the U-S attitude toward China is ''inconsistent'' with democratic ideals and sends the wrong message to Eastern Europe at a very crucial time. Mitchell says Bush is aligning himself with a- quote- ''regressive Communist regime of old men whose days are numbered.''

Witnesses say a corporate jet that was diverted to Little Rock, Arkansas, because of bad weather came in too low while trying to land and crashed short of a runway. All seven people aboard were killed. The flight originated in Kingsport, Tennessee... but was en route from Longview, Texas, to Batesville, Arkansas, when it was diverted to Little Rock. Airport officials say the plane was leased by Eastman-Kodak officials. Witnesses say there was a downpour just minutes before the plane went down.

-30- 1958

#90019u4627 01/19/1990 ~United Press International

(JAN. 19) UPI - Bucharest, Romania, rumbled with discontent today as the country's leadership canceled the first democratic referendum in 43 years. But an anticipated public backlash never materialized. The National Salvation Front canceled the planned vote on the nation's death penalty and the status of the Communist Party... claiming there wasn't enough time to organize a ballot. University students said they may demonstrate Sunday.

Egypt's foreign minister concluded a week in Washington today by saying he is ''cautiously optimistic'' there'll be peace talks on the Middle East next month. The foreign minister called his meetings this week with Secretary of State Baker ''very fruitful.'' Baker is trying to get the Egyptian, Israeli and American foreign ministers to meet to discuss Palestinian elections in Israeli-occupied territories.

A fourth former director of the failed Silverado Banking, Savings and Loan in Denver has been barred from the thrift industry for life. But a decision has NOT been reached on the fate of Neil Bush, the president's son, who also was a director. The U-S Office of Thrift Supervision says it still is investigating the younger Bush. The 34-year-old Bush has NOT been accused of any wrongdoing.

Even the president of the United States has car trouble- but unlike most people, he has a back-up car handy. Bush was on his way to speak at the Omni arena in Atlanta today when his armor-plated Cadillac began to spew smoke and overheated. Bush simply left the limousine on the side of

Interstate 75 and got into another limo.

#90020p0017 01/20/1990 ~PR Newswire
ATLANTA (JAN. 22) PR NEWSWIRE - Ronald Allen, Delta Air Lines' chairman of the board and chief executive officer, announced today that Delta's net income for calendar 1989 was $473,174,000, exceeding the previous record

results for either a calendar year or a fiscal year. The previous record for a calendar year was 1988 when net income totaled $344,523,000. The previous fiscal year record was $460,918,000 set in the fiscal year ended June 30, 1989.

Net income for the quarter ended December 31, 1989, was $64,234,000, down 25 percent from the $85,169,000 earned in the December 1988 quarter. Primary earnings per share were $1.13, while fully diluted earnings were $1.08 per share.

Operating revenues for the December 1989 quarter totaled $2.049 billion, an increase of 10 percent over the 1988 quarter. Passenger revenues grew 11 percent to $1.911 billion as passenger miles increased 11 percent to 14.278 billion. The passenger mile yield was 13.39 cents compared to 13.48 cents last year.

For the six months ended December 31, 1989, net income was $197.4 million compared to $185.1 million earned in the same period in 1988. Primary earnings per share were $3.65, and fully diluted earnings per share were $3.45. Earnings per share in the previous year's period were $3.76. Operating revenues totaled $4.222 billion, an increase of 13 percent. Passenger revenues grew 13 percent to $3.957 billion as passenger miles increased 13 percent. The passenger mile yield was approximately equal to last year. Operating expenses were $3.961 billion, up 14 percent while operating capacity rose six percent to 48.264 billion available seat Eires.

For calendar 1989, operating revenues totaled $8.572 billion, 17 percent or $1.248 billion over calendar 1988. Passenger revenues grew 18 percent to $8.048 billion. Revenue passenger miles increased 15 percent while the passenger mile yield rose two percent. Operating e3/40fnses totaled $7.900 billion, 16 percent above calendar 1988. The average cost per seat mile was 8.44 cents compared to 7.66 cents last year.

During the December 1989 quarter, the company issued 2,500,000 shares of common stock to Singapore Airlines Limited for approximately $181.4 million. Delta also purchased approximately 2. 8 percent of the outstanding stock of Singapore Airlines Company for about $181.4 million. Also during the quarter, Delta repurchased 2,152,862 shares of its common stock for $150.7 million. This brings the total shares repurchased to 3,267,462, for a total of $236.5 million. The weighted average of common shares outstanding for the December 1989 quarter was 50,298,732.

#90020u0617 01/20/1990 ~United Press International

EDWARDS AIR FORCE BASE, CA. (JAN. 20) UPI - The shuttle Columbia glided

to a ghostly predawn landing Saturday, bringing an otherwise-doomed science satellite back to Earth and successfully closing out a record 11-day rescue mission.

Running one 90-minute orbit late because of a minor glitch with an onboard computer, Columbia swooped out of an ink-black Mojave Desert sky and floated to a smooth touchdown at 1:36 a.m. PST on concrete runway 22 at Edwards Air Force Base, one day after fog blocked a landing attempt Friday.

''It's Miller time!'' cheered astronaut Michael Baker from mission control.

''Roger, Houston; it took a little while to get home today, but we're happy to be back,'' replied Columbia skipper Daniel Brandenstein.

It was the first night landing of the post-Challenger era - the third in the program's history - closing out a 172-orbit, 4.4-million-mile voyage that lasted 10 days, 21 hours and one minute, easily beating the previous shuttle endurance record by 13 hours and 14 minutes.

The astronauts, subjected to extensive post-landing medical checks, appeared none the worse for their 11 days in weightlessness, although they appeared to need more time than usual to get their ''land legs'' back.

''Welcome home,'' Baker told the crew as Columbia braked to a stop. ''Outstanding job! You showed the shuttle at its best deploying and retrieving satellites. Great way to start the decade.''

Hidden from view inside Columbia's cargo bay was the primary reason for the year's first shuttle flight: the Long Duration Exposure Facility, an 11-ton science satellite plucked from a failing orbit and saved from a fiery plunge back to Earth in early March.

With LDEF on board, Columbia tipped the scales at 228,400 pounds, eclipsing the previous landing weight record by 8,373 pounds, but Brandenstein had no problems piloting the spaceplane to an exceptionally smooth landing.

The ''LDEF'' satellite will remain in the shuttle's payload bay until Columbia is ferried back to the Kennedy Space Center late next week by a NASA jumbo jet. Once on the ground in Florida, LDEF will be carefully removed and subjected to a thorough analysis to find out how a variety of high-tech materials stood up to a 5 1/2 year sojourn in space.

Along with rescuing LDEF, Brandenstein and company successfully launched a Navy Syncom communications satellite Jan. 10 during the second day of the marathon mission and carried out a host of minor, in-cabin experiments.

The third major goal of the flight was to put Columbia and its crew

through their paces over a 10-day mission as part of an ''extended duration orbiter'' program to certify the space freighter for flights lasting up to 16 days. With the landing delay, engineers and doctors will get more data than expected.

Brandenstein, 47, co-pilot James Wetherbee, 37, Bonnie Dunbar, 40, Marsha Ivins, 38, and G. David Low, 33, stayed on board Columbia more than two hours after landing for medical checks and to readjust to gravity.

The astronauts then were subjected to more complete physical exams before boarding two NASA jets eight hours after landing for flights back to their homes in Houston.

''One of the objectives of the mission was to stay up there a long time and get some more data on how the human body adapts to zero gravity and comes back and readapts,'' Brandenstein told well wishers before departing for home. ''So we've been spending a lot of time with the docs doing a lot of grunts and groans and various other types of post landing stuff.''

Asked if any of the astronauts got sick after landing, shuttle chief William Lenoir said, ''Not that I know of.'' But he also said ''after 10 days you have a tendency to feel a little bit woozier'' than after shorter missions.

Columbia appeared to sail through its ninth mission in good condition with only minor damage to its fragile heat-shield tile system.

''Our initial assessment is the vehicle is in excellent condition,'' said Larry Ellis, in charge of Columbia's ground processing.

He said less than 100 tile showed noticeable damage - a little less than average - and while Columbia's brakes heated up more than usual to slow the heavy shuttle down, no problems were expected getting the ship ready for its next mission.

The 30-foot-long LDEF satellite was launched in 1984 on what was to have been a 10-month flight to expose high-tech materials and other experiments to the radiation, temperature extremes and vacuum of the space environment in research that will help engineers design longer-lived spacecraft.

But a series of shuttle launch delays, combined with the 1986 Challenger disaster, combined to delay the satellite's rescue until now, just in the nick of time.

''The opportunity for something to go wrong and for us to not get up in time before LDEF got lower and lower in the atmosphere, we don't have to worry about that anymore,'' Lenoir said. ''So I'm obviously, as is everybody, quite pleased we have recovered LDEF.''

#90021d5240 01/21/1990 ~French/German News Agency
BONN (JAN. 21) - The parliamentary group of West Germany's Christian Democratic Union and Christian Socialist Union called Sunday for a lifting of COCOM restrictions on exports of certain high technology items to East Bloc nations.

Matthias Wissmann, a spokesman for the group, said Coordinating Committee for Multilateral Export Controls (COCOM) restictions on some high-tech goods should be suspended in order to help East bloc nations rebuild their economies.

Mr. Wissmann also called in a statement for accelerated negotiations on reforming COCOM lists of restricted products. He said lifting restrictions on exports of certain items would be "a sign of confidence from the industrialized countries to the economies in central and eastern Europe engaged in the process of economic reform"

The parliamentary group listed three areas where some COCOM restrictions could be lifted: telecommunications, machine tools, and electronics. Eastern European nations need a modern telephone system in order to "integrate their economies into the world market," the group said, citing digital telephone technology in particular.

As for machine-tools, some restrictions remain on items which were innovative in 1972, it said. Certain electronic goods could be useful to East bloc nations in improving the safety of nuclear facilities and for environmental protection, the group added.

#90021u0128 01/21/1990 ~United Press International
(JAN. 21) UPI - No. 4 Missouri jumped to the top of the Big Eight standings Saturday and likely will move to the top of the national ratings as well.

Anthony Peeler scored 24 points, converting all 14 of his free throws along the way, to lead the Tigers to a 95-87 victory over No. 1 Kansas in a Big Eight showdown.

Saturday's victory also should merit Missouri heavy consideration for the No. 1 spot when the next ratings come out Monday. Of the top seven teams in the country, all but the Tigers lost Saturday.

No. 2 Georgetown suffered its first defeat Saturday night with a 70-65 setback at Connecticut, and No. 3 Oklahoma dropped its second game of the

week when the Sooners lost 78-74 at Arizona.

At Columbia, Mo., Doug Smith scored 23 points, Nathan Buntin pumped in 22 and Lee Coward added 20 to help pace Missouri, 17-1 overall and 4-0 in Big Eight play. But it was Peeler who drew the most praise from Coach Norm Stewart.

"To win big games you have to be able to go to the free-throw line and knock them in," Stewart said. "To do what Anthony did today is something." Peeler, who hit the winning free throw Tuesday against Oklahoma State, said he "was pretty relaxed and had confidence. I like to go to the line."

The Tigers have won 26 consecutive games at the Hearnes Center, which held a capacity crowd of 13,300. Last year, the Tigers knocked off then No. 1 Oklahoma at the Hearnes Center.

Kansas Coach Roy Williams said his players were disappointed to lose, but are keeping the game in perspective. "The kids are down, but it's just one game," Williams said. "We'll get another chance at them at our place and if not then, hopefully somewhere else. "We've never tried to build up being No. 1 or anything. We didn't have any pressure."

Mark Randall led Kansas with 18 points, and Rick Calloway and Kevin Pritchard scored 16 apiece.

At Hartford, Conn., Nadav Henefeld scored 21 points, including a 3-pointer down the stretch to put Connecticut ahead to stay, as the Huskies handed Georgetown its first loss of the season.

Henefeld's fifth 3-pointer of the game came with 3:31 left and put the Huskies ahead 62-60. Mark Tillmon's 3-pointer with 32 seconds remaining pulled the Hoyas within two points, but John Gwynn sank a pair of free throws to secure the victory for Connecticut.

Gwynn finished with 15 points for the Huskies. Alonzo Mourning scored 23 points and pulled down 13 rebounds to pace Georgetown.

At Tucson, Ariz., Jud Buechler scored 18 points and grabbed nine rebounds, and Sean Rooks added 18 points to guide Arizona past Oklahoma.

Wayne Womack added 14 points and nine rebounds for the Wildcats, who extended the nation's longest home-court winning streak to 41 games. Oklahoma has the second-longest home winning streak at 38.

Oklahoma, which averages 117 points a game, suffered its worst shooting half of the season when the Sooners connected on just 25 percent of their shots in the first half.

Skeeter Henry scored 14 points for the Sooners before fouling out with 1:28 left. Jackie Jones added 12 points.

-- AROUND THE NCAA --

Elsewhere in the Top 10 on Saturday, Providence upset No. 5 Syracuse 87-86 No. 16 Purdue upended No. 6 Illinois 81-68, Iowa toppled No. 7 Michigan 78-76 in overtime, No. 8 Duke routed Wake Forest 97-69 and No. 10 Louisville beat Memphis State 86-69.

Also, No. 12 Louisiana State thumped Notre Dame 87-64, No. 13 Arkansas pounded Texas A&M 100-84, No. 17 St. John's outlasted Boston College 65-59 No. 18 Xavier (Ohio) defeated St. Louis 83-74, co-No. 19 Michigan State topped Northwestern 91-80 and co-No. 19 La Salle nipped Holy Cross 84-81.

#90021u0177 01/21/1990 ~United Press International

BEVERLY HILLS, CA (JAN. 21) UPI - "Driving Miss Daisy" and "Born On The Fourth Of July" swept the 47th annual Golden Globe Awards Saturday, capturing best picture honors in their categories.

"Born On The Fourth of July," Oliver Stone's anti-war film based on the wartime experiences of Vietnam veteran Ron Kovic, took top honors in four categories, including best drama, best screenplay for Stone and Kovic and best director. Tom Cruise, who underwent a dramatic physical change to play the balding, wheelchair-bound Kovic, was named best dramatic actor.

Cruise was greeted with the biggest cheers of the night outside the Hilton as he arrived late without his estranged wife Mimi Rogers. In his acceptance speech, Cruise thanked Rogers for her support during the making of the film.

Cruise, who was just a baby when Kovic was first shipped to Vietnam, told reporters he was glad to be associated with the film and Kovic, whom he said had become very "dear and important" to him.

"It's an important picture because it tells the story of the two million men and women who were involved in Vietnam. Each has a story to tell," he said.

Stage veteran Jessica Tandy, 80, once again proved she can act just as well on the big-screen, winning best actress honors for her performance in the title role of "Driving Miss Daisy." Her co-star, Morgan Freeman, won a standing ovation and top acting honors in a musical or comedy for his role as Tandy's understanding chauffeur. The film was named best comedy or musical.

Michelle Pfeiffer won best dramatic actress for her performance as sultry and sassy nightclub singer Suzy Diamon in "The Fabulous Baker Boys." Best Suppporting actor in a drama went to Denzel Washington for his role as an embittered soldier in "Glory." Julia Roberts was named best dramatic supporting actress for her performance as a doomed southern belle in "Steel Magnolias."

"The Little Mermaid," Disney's animinated film of a classic story, won both music awards for original song and original score by Alan Menken. Italy's "Cinema Paradiso" was named best foreign language film for its tale of how a small-town movie theater changes the life of its inhabitants.

The Golden Globe Awards, often considered a bellweather for the Academy Awards, which will take place in March, handed out 24 statuettes for excellence in television and motion pictures at the Beverly Hilton Hotel's International Ballroom.

Some 2,000 Hollywood television and motion picture celebrities attended the glittering ceremonies, one of the few honoring the best of both television and film. "China Beach" and the newsroom spoof "Murphy Brown" took top honors for dramatic and comedy series, respectively.

Jamie Lee Curtis of "Anything But Love" and Ted Danson of "Cheers" took best acting honors in a television comedy series. In a dramatic series, "Wiseguy" Ken Wahl and Angela Lansbury of "Murder, She Wrote" fame won top honors.

Perhaps the biggest surprise of the night was for a film that didn't win. "Do The Right Thing," a film by Spike Lee that tops many critic's best film of the year lists, was shut out despite nominations for Lee as best director and best film.

The proceedings were interrupted by playfully disgruntled Billy Crystal and Steve Martin, both nominees for the best film comedy actor. They demanded to know who was runner-up to Morgan Freeman.

Gregory Peck presented the annual Cecil B. DeMille Award to Audrey Hepburn. Peck joined Richard Crenna and George Peppard in praising the actress, whose career has spanned 40 years. Hepburn, who won hearts for her portrayal of Eliza Doolittle in the screen version of "My Fair Lady," plays an angel in the film, "Always," currently in release.

#90021u0180 01/21/1990 ~United Press International

SANTA MONICA, CA (JAN. 21) UPI - Barbara Stanwyck, an orphan who became a Hollywood legend during an illustrious acting career that spanned 60 years, died of heart failure Saturday. She was 82.

The veteran of 88 movies and more than 200 hours of television died at 5 p.m. PST at St. Johns Hospital. She was hospitalized for several weeks because of reactions to medication taken for back problems.

Nominated four times, Stanwyck never won an Academy Award for a specific screen performance, but she took home a special Oscar in 1982 for her distinguished career. The American Film Institute later honored her with a similar award. She won two Emmy Awards for television roles.

"She was a human being with a great sense of humor and a fantastic actress. I think the industry has lost something very great when they lost her," said Dorothy Lamour. "She was Hollywood. She was a great, great actress and she would appreciate this: 'She was a wonderful dame."' Audrey Hepburn said, "A monument has left this industry, and she was so versatile. I knew her very little but admired her a great, great deal."

Stanwyck, whose dazzling red hair turned to shining silver over the years, was married to Frank Fay and then to Robert Taylor, and her list of leading men read like a Who's Who of Hollywood.

Among her movies were "Stella Dallas" in 1937, "Ball of Fire" in 1942, "Double Indemnity" in 1944 and "Sorry, Wrong Number" in 1948, for which she won Oscar nominations.

Her leading men included Clark Gable, Gary Cooper, Glenn Ford, Burt Lancaster, Kirk Douglas, William Holden, John Wayne, Humphrey Bogart, Henry Fonda, Erroll Flynn, and Taylor.

Born Ruby Stevens in Brooklyn, N.Y., on July 16, 1907, the youngest of five children, Stanwyck was orphaned at the age of 4. She was alternately cared for by her chorus girl sister, Mildred, and foster families.

She became a chorus girl herself at 15, working in New York cabarets and a bit in the Ziegfeld "Follies." A friend introduced her to Willard Mack, a playwright, producer, director and actor, who hired her for one of his shows, "The Noose." It was a hit, and during that engagement that Ruby Stevens became Barbara Stanwyck.

The name came from an old playbill advertising "Jane Stanwyck in 'Barbara Fritchie.'" The combination became Barbara Stanwyck.

In New York, the actress met and married Fay, an entertainer. Convinced of his wife's talent, Fay took her to Hollywood and helped her get a screen test. Eventually Fay's contacts led to a role in the 1930 movie "Ladies of Leisure."

By 1938, Stanwyck's movie career was in high gear, but her marriage to Fay

had foundered. The pair engaged in a bitter court battle for custody of their adopted son, Anthony Dion, then 6.

Mrs. Zeppo Marx, wife of the comedian, introduced Stanwyck to Taylor, then a rising young leading man. A long and well-publicized romance led to their marriage on May 14, 1939. In 1951, their 11-year union ended in divorce. She never remarried.

In later years she lived alone in a small house in Beverly Hills and devoted herself to her career, appearing in television shows, and starring in the 1960s series, "The Big Valley." She was considered something of a loner, was rarely seen at night clubs or even dinner parties.

An Emmy winner for her role as the family matriarch in "The Big Valley," Stanwyck won the honor again for her role in the 1983 mini-series "The Thorn Birds" with Richard Chamberlain. In 1985, she starred in the weekly television show, "The Colbys."

In 1987, Stanwyck became the 15th recipient of the American Film Institute's Life Achievement Award, joining the company of such distinguished performers as James Cagney, James Stewart, Fred Astaire, and Henry Fonda, and directors as Capra, John Ford, Orson Wells, and Alfred Hitchcock.

#90021u0181 01/21/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JAN. 21) UPI - Police found the bodies of four black men killed in separate incidents in strife-torn Natal Province, officials said Sunday. One of the men was killed when a gasoline soaked tire was placed around his neck and set on fire, a practice known as "necklacing."

The killings all occurred in black townships around the port city of Durban on the country's Indian Ocean coast, according to a report on the incidents released by officials.

Inter-communal fighting in Natal between Chief Mangosuthu Buthelezi's conservative Inkatha movement and the more radical United Democratic Front has claimed as many as 3,000 lives since erupting in September 1987.

In another incident in a mixed-race township near Cape Town, three members of the security forces were injured when a crowd of 300 overturned two police vehicles and set a post office on fire, police said. Security forces dispersed the mob with teargas and rubber bullets.

#90021u0182 01/21/1990 ~United Press International

BATAC, PHILIPPINES (JAN. 21) UPI - The mother of the late Ferdinand Marcos was entombed Sunday, 20 months after her death, in an emotional ceremony attended by more than 3,000 supporters of the former president.

The remains of Dona Josefa Edralin Marcos, who died at age 95 on May 4, 1988, were placed in an airconditioned wooden shed patterned after the mortuary in Hawaii where Ferdinand Marcos was laid to rest last October. Family members said they consider both entombments temporary measures until the two can be buried near each other in the Philippines.

The government of President Corazon Aquino had refused to allow the former president, whom she replaced in a 1986 popular uprising, to return to the Philippines for his mother's funeral. When Marcos died in exile in Hawaii on Sept. 28, 1989, the Aquino government refused to permit his remains to be returned to the country.

His mother's body was displayed in a metallic coffin in the Marcos family's ancestral home in Baltac, some 250 miles north of Manila, before it was entombed.

Thousands of supporters crowded into the back yard of the home, where the mausoleum was built, and spilled out into the street. Pacifico Marcos, brother of the former president, led the mourners, including former Cabinet officials and pro-Marcos politicians.

"We shall continue fighting until we have the president's remains here," said pro-Marcos Rep. Conrado Estrella Jr. "When a mother dies and the son cannot even take a look at her remains, is that not the highest form of oppression? Is that not a betrayal of love?"

Some people broke into tears when they heard a tape recording of Marcos' wife Imelda singing "Ave Maria," which was played during the three hour ceremony.

Members of a religious cult, to which Marcos' mother was rumored to have belonged, held banners with pictures of the mother and son. The corpse, dressed in a beige long-sleeved gown and clasping a rosary, was heavily made-up. An embalmer said the body would continue to be bathed in formalin and later would be placed in a freezer with glass walls.

"The last wish of the president was that he and his mother will be buried together," said Rep. Salvador Escudero. "We will all work for that. They shall be buried together here." Marcos was entombed in an airconditioned mortuary at Hawaii's Valley of the Temples Memorial Park in October.

Imelda and Ferdinand Marcos were indicted October 21, 1988, on federal racketeering charges, accused of defrauding U.S. banks in real estate

deals that involved millions of dollars plundered from the Philippine's treasury.

Imelda Marcos, who was prevented from traveling to the Philippine's to attend the entombment services, is scheduled to stand trial in New York in March.

Pacifico Marcos, the late ruler's only survivng brother, thanked supporters and eulogized his mother. "She will live in our hearts forever " he said. "I don't know if you know the true greatness of my mother. She was a teacher almost all of her life."

#90021u0217 01/21/1990 ~United Press International
WASHINGTON (JAN. 21) UPI - Text of Mayor Marion Barry's statement Sunday at St. Timothy's Episcopal Church:

"I would like to thank Father Downs, the pastor of the church here at St. Timothy's, the church of Effie and Christopher, for the use of this church. My special thanks to the men, the ministers who have come in fellowship and prayer with me this morning. Their presence has strengthened me greatly.

"Men who are here I have known over the years and needed their counsel and guidance because the past few days have been the most difficult of my life, more difficult than fighting my way out of poverty as a black youth born in the segregated Deep South, more difficult than the fear and the hatred I faced as a civil rights leader in the 1960s, more difficult than I could have imagined because this time I have come to face my deepest human failures.

"I've had to look my human weakenesses straight in the eye, had to realize that I've spent so much time caring about and doing for others, I've not worried about or cared enough for myself.

"How I wish I could trade this hour. I've had to realize that God made Marion Barry the same as he made other people, a flesh and blood creation who rises and falls just like any other human being.

"I've just spent the last hour or so with a group of clergy people, including my own minister, David Eaton. They have prayed and they have counseled me, and I have taken their counsel.

"They helped me feel good about the fact that in the final analysis it is not the title that a person holds that is important. It is not Marion Barry the mayor that counts; it is Marion Barry the person, a human being with a body, mind and spirit like any other person.

"I've felt for some time that I could do any and everything. But they have helped me to realize that God put each of us on Earth for a purpose. We may not always understand what that purpose is, but we put ourselves in God's hand so our way is made clearer. These ministers have helped me to keep the strength that I need to announce today that I'm going to find a way to begin to heal my body, mind and soul.

"To all the people who love me and worry about me, the best way to show your appreciation for me and our city and our family is to join together as a united community. We must at this hour be willing to forgive, to love to reach out to each other. I realize I'm going to have to walk this journey by myself. It's going to take Marion Barry walking this journey.

"But I say to others who are pained and hurt as I am: Join me brothers and sisters. We can make it. We can make it. We will make it. It's going to be a lonely journey, but I stand and God stands with me.

"Again, I want to thank my wife, Effie, and my friends for being with me, and particularly this morning, these ministers. Effie has been with me almost 12 years now as my wife. And she's just great."

BUDAPEST, HUNGARY (JAN. 21) UPI - Newspaper publisher Rupert Murdoch has purchased a 50 percent interest in two independent Hungarian newspapers for $4 million, the official MTI news agency said Sunday.

The Australian-born entrepreneur closed the deals Saturday amid signs he plans to expand his newspaper empire into Eastern Europe, where democratic reforms have spawned dozens of independent publications.

Murdoch purchased a controlling interest in another Hungarian daily two months ago, and also has been inquiring into business opportunities in Poland and Czechoslovakia. His next scheduled stop after leaving Hungary is the Romanian capital Bucharest.

MTI said Murdoch's firm The News Corp. signed contracts Saturday to purchase 50 percent of the shares of the daily newspaper Mai Nap (Today's Day), which has a circulation of 100,000, and the weekly Reform, with a circulation of 400,000.

In addition to the $4 million purchasing price, Murcoch agreed to set up a $750,000 development fund for the two newspapers, MTI said. Both are independent tabloids that already have a flashy style and sensational content not unlike many Murdoch tabloids in the West.

In November Murdoch purchased a controlling interest in another Hungarian daily, Magyar Hirlap (Hungarian Newspaper), making him the first Westerner to make a substantial investment in Eastern Europe's growing free press.

#90021u0261 01/21/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 21) UPI - Gheorghui smiled at Carol Stevens and wrapped his tiny fingers around one of hers. The little boy in a blue sleeper decorated with Snoopy paraded the fur-wrapped woman through the orphanage hallway.

The great-granddaughter of Romanian emigres was ready to resume her search for a child to take home with her to Detroit, but Gheorghui was reluctant to let go. "I'll take two like that, one to go," said her husband Joe. The Stevens are among many foreign couples seeking to adopt the unwanted children who are a legacy of deposed dictator Nicolae Ceausescu.

In order to increase Romania's population from 23 million to 30 million by the year 2000, Ceausescu made sex education a state secret, and outlawed birth control and abortion. Women were expected to have five children by the age of 45, and those who failed to produce were charged a celibacy tax.

Babies whose parents could not afford or did not want to care for them were left temporarily or indefinitely in children's homes. "When they had no money, no food, and no heat, they had no choice," said Liana Vulpe Traistaro, a lawyer with the College of Advocates, which oversees adoptions.

"To help a child in a difficult situation makes it even more worthwhile," Carol Stevens said. "You satisfy your own needs but also help someone." Today there are 730 youngsters, most younger than three, at St. Ecaterina, the largest children's home in Romania.

The Securitate, Ceausescu's fiercely loyal secret police, reportedly included many men recruited as youngsters from orphanages, loyal to no family but the Ceausescus.

"It is very possible these terrorists were taken from children's homes," Traistaro said. "I can't say if it is true or just gossip," said Dr. Margareta Creteanu, St. Ecaterina's clinical director.

"Only abnormal people could do such things," she said, showing gruesome photographs of the carnage from last month's uprising that the government said claimed 10,000 lives. A fetus ripped from his mother's womb was unearthed from a mass grave at Timisoara. Acid disfigured a dead man's face.

The ruling National Salvation Front is so incensed about reliable reports that Ceausescu's regime sold babies to foreigners to curry favor that it plans to endorse all adoptions to ensure children are not treated as a cash crop, Traistaru said.

"We do not sell children," she said. "Ceausescu sold babies for his diplomatic and political interests." The Front is trying to make adoptions easier and faster, Traistaru said.

It immediately repealed a 1987 law that forbade adoptions by foreigners. Forty children who had been promised to Israelis before that law joined their new parents this week, she said.

In a windowed wing decorated with Donald Duck and Minnie Mouse, Mihai Bacauanu bounces in his crib. An English woman would like to adopt the child, nicknamed Angel. A search is on for his mother to see if she will give up the child who has spent the first ten months of his life in an orphanage.

Adoptive parents are required to be married, healthy, at least one must be employed, and the mother must be younger than 45. The only charge - which like adoption procedures has not been specified - would be to cover administrative costs.

"The state says the Romanian people should take their children back," said Traistaru. "But if a new parent can love a child and offer him what he has never had, it doesn't matter what country he goes to."

The Stevens seem ideally suited to adopt a Romanian child, she said. Carol Stevens is keenly interested in her heritage, speaks the language and is active in the U.S. Romanian community.

She also was in Bucharest as a representative of the Romanian Relief Fund of Detroit, which is seeking to provide aid after the violent revolution that ousted Ceausescu Dec. 22.

The Stevens' yearlong effort to adopt a child in the United States had been unsuccessful. When they heard Romania had lifted the ban on foreign adoptions, they flew to Bucharest.

Unfortunately, the fledgling government is in disarray. "I thought there was a bureaucracy in the United States!" said Joe Stevens, a businessman of Italian-Polish descent. They hope to be the first foreign couple to adopt a child under the new government.

"I'm pretty flexible," Joe Stevens said. "I'd like to get a boy and a girl. We'll go with the flow. I don't know what is possible. It is frustrating. "I don't know if I could go through this twice." The emotional toll has

wearied Carol Stevens too. "It's hard. We'd like to play with the children get to know them ... there is so little time."

#90021u0263 01/21/1990 ~United Press International

PESHAWAR, PAKISTAN (JAN. 21) UPI - Armed men ambushed an American employeed as a security guard at the U.S. Consulate as he was walking home late at night early this month, Western diplomatic sources say.

They said the attackers accused the guard of working for the CIA and tried to force him into a waiting car. When he resisted, they beat him up. Police said the men identified themselves as belonging to the Hezb-i-Islami of Gulbaddin Hekmatyar, one of the most powerful and fundamentalist of the seven main Moslem resistance groups fighting the pro-Soviet government in the Afghanistan capital of Kabul.

Some Western journalists based in Pakistan say they have recently received threats from the Hezb-i-Islami for allegedly publishing anti-Mujahideen propaganda.

A little over a week ago, the sources said, armed intruders stole valuable equipment from the offices of the U.S. government radio network the Voice of America and a Western-funded research of group, the Writers Union of Free Afghanistan in the border city of Peshawar. The thieves were not identified, but police say they suspect fundamentalist Afghan guerrillas.

The incidents highlight the growing hostility toward the United States by hardline elements in the Afghan resistance. The United States, along with some Middle East nations, provides arms to the guerrillas in their 11-year-old war against the communist government in Kabul.

Analysts say the rising tensions between fundamentalist guerrillas and their U.S. backers are the result of rebel frustration at their failure to make any major advances since the Soviet withdrawal last year, differences over the composition of a future government in Kabul and a perceived weakening of American support for the Mujahideen.

The United States temporarily cut back on arms supplies to the resistance last year. In addition, the Hezb-i-Islami, which once received the lion's share of American aid as the strongest and best organized of the resistance groups, now gets only a small percentage of the weapons.

Indications that the United States supports a return of former King Zahir Shah, who has lived in exile in Rome since his ouster in a 1973 coup, have also fueled anti-U.S. sentiments among fundamentalist rebel leaders, who believe the former monarch to be un-Islamic.

There have always been anti-U.S. elements among the Mujahideen, said one Western diplomatic source, but they recently have become more vocal.

Hekmatyar has also accused the United States of backing the rival Jamiat-i-Islami guerrilla groups in a bloody conflict with his supporters so as to isolate the Hezb-i-Islami within the resistance. The feud has reportedly claimed hundreds of lives since it erupted last July. In the latest incident linked to the dispute, a Jamiat leader, Prof. Humayun Shormach, was abducted from his home in Peshawar last week.

Bomb blasts have caused hundreds of casualties in Peshawar and the surrounding Northwest Frontier province in the past few years and are increasingly being blamed by officials on disputes among the Mujahideen and not, as previously, on Afghan government agents.

Law enforcment agencies say they will be unable to provide adequate secuirty to Peshawar residents, including about 400 Americans and some 2,000 other Western expatriates, if the internecine violence continues to spill over into Pakistan.

Few Western journalists now venture into Afghanistan with the resistance following threats from fundamentalists, including Palestinians and other Arabs, hundreds of whom are now fighting with the guerrillas.

Hekmatyar last August ordered his supporters to detain any foreign journalists or doctors they found in Afghanistan, charging they are spying and trying to create differences among the rebels.

About 10,000 people chanting anti-U.S. slogans attended a rally in Peshawar last month during which Hekmatyar accused the United States of seeking to establish a government of its own choice in Kabul.

"The United States must realize that Afghanistan is not Panama, just as we showed the Soviet Union that Afghanistan is not Czechoslovakia," Hekmatyar told the crowd. "If Hekmatyar thinks he can force us to change our policies then he is mistaken," said one U.S. official who asked not to be identified.

Security around U.S. installations in Pakistan is already tight following an attack by Moslem fundamentalists on the American Cultural Center in Islamabad last February. But some Americans in Pakistan are worried. "I daren't even walk to my office any more," said one American resident of Peshawar.

#90021u0266 01/21/1990 ~United Press International

DUBLIN, IRELAND (JAN. 21) UPI - Foreign ministers from the 12 European

Community states have agreed to send about $70 million in emergency food and medical aid to Romania and Poland.

After a four-hour meeting Saturday night, the EC foreign ministers said they would send shipments of beef, butter, olive oil, grain, and medical supplies to Romania and food products to Poland.

The final details of the aid packages will be worked out by the EC in Brussels later this week, officials said. The EC already has sent a quantity of medical supplies and emergency aid to Romania and has sent food packages to Poland over the past year.

The thorny question of whether East Germany should be admitted to the EC was left undecided by the foreign ministers. Irish Foreign Minister Gerry Collins, who chaired the meeting in Dublin Castle, has said the EC would move slowly on the issue of East German membership. "The community will have to wait for democratic elections before making any decision," Collins said.

The foreign ministers also discussed a proposed East-West summit of 35 nations in Europe to hold talks on the changes in Eastern Europe. EC conference sources said such a summit had been suggested by Soviet President Mikhail Gorbachev and might take place later this year. "It is unlikely to occur during Ireland's presidency of the EC, which ends in June," a spokesman said.

The foreign ministers' meeting came after EC President Jacques Delors called earlier this week for fundamental institutional reform in the EC. Delors said in a speech to the European Parliament Wednesday in Strasbourg that there should be wide-ranging new powers for the European Parliament and the community leadership in Brussels to help it handle the changes in Eastern Europe.

Delors stressed the need for continued EC integration and again encouraged the future EC inclusion of East Germany. He also proposed dramatically increasing the EC budget in order to help new East European democracies.

HONG KONG (JAN. 21) UPI - Liberals Sunday accused China of steamrolling through a Beijing-dominated committee its own version of a legislative system for Hong Kong after 1997, calling the consulation process "a farce."

The committee, controlled by Beijing-appointed drafters, voted in a four-day meeting in the southern Chinese city of Canton to limit the number of directly elected seats in Hong Kong's legislature and to impose restrictions on who could hold high office after China resumes sovereignty

over the British colony in 1997.

China steadily has increased its hard-line approach to Hong Kong following mass support in the colony for the pro-democracy movement on the mainland, which was crushed by Beijing in June.

"People in Hong Kong understand that without democracy, protection of human rights and freedom will be very difficult after 1997," Yeung Sum of the Joint Committee for the Promotion of Democratic Government told reporters.

"I think the whole consultation is just a farce to the people of Hong Kong " he said. "They fully understand that the Chinese government has the base line and the Chinese government didn't listen to the wishes of the people of Hong Kong."

Throngs of students and liberal activists greeted Hong Kong members of the Basic Law Drafting Committee with shouts of "shame" upon their return late Saturday from talks with mainland drafters in Canton.

A political panel of the committee stood by an earlier decision to limit to 18 the number of directly elected seats in Hong Kong's 60-member lawmaking Legislative Council in 1997. Drafters said they would expand the number of directly elected seats to 30 by 2003.

The moves provoked charges that Beijing had ignored public opinion in Hong Kong and the colony's lawmakers, who demanded direct elections for least 20 out of the council's seats by 1991 and a majority by 1997.

"What has happened now has been in the cards for many, many months and certainly increasingly since June 4," Legislative Councilor Jimmy McGregor said.

"We have had people here spelling out to China in the most representative way possible ... reasonably democratic models," he said. "And we have seen China reject all of them and listen only to those people who for one reason or another proposed models which China can accept."

Drafters also said certain bills put before the legislature must be voted on separately in both a group of elected lawmakers and a another group of lawmakers representing what are called functional constituencies, mostly based on occupations or professions.

The bill would have to gain a majority from both groups before becoming law - a system that could nullify proposed laws unfavorable to Beijing.

The committee also said it would restrict to nine the number of foreign nationals allowed to sit in the legislature and said the colony's top

officials could not hold the right of abode overseas.

Both moves are seen in the colony as a harsh reaction by Beijing to a British plan that would grant 225,000 Hong Kong residents full United Kingdom passports ahead of 1997 in a bid to end a "brain drain" affecting the colony.

London announced its nationality package in a bid to stem a confidence crisis in the colony, which has seen tens of thousands of Hong Kong people - largely middle-class professionals - emigrating before the transition.

Beijing charged the plan was subversive and accused Britain of violating the 1984 Sino-British Joint Declaration on Hong Kong by allowing much of the colony's top talent to leave.

China has pledged to allow Hong Kong to retain it's capitalist system for 50 years after 1997, when Britain's 99-year lease on the colony expires.

#90021u0325 01/21/1990 ~United Press International

BHOPAL, INDIA (JAN. 21) UPI - Prime Minister V.P. Singh said Sunday his government would reinstate criminal liability charges against Union Carbide and its former chairman if the Supreme Court overturns the $470 million settlement of the Bhopal gas leak disaster.

Singh made the disclosure to reporters during a four-hour visit to the scene of history's worst industrial disaster, which has caused more than 3,300 deaths since it occurred Dec. 3, 1984.

"Human life and criminal liability cannot be compromised," Singh said. "There will be no compromise with the crime in the settlement for compensation with the company."

"No one has the right to bargain on the lives of people," said the prime minister, who took power Dec. 2 as the head of a minority government formed by his five-party National Front coalition after late November parliamentary elections.

Singh said his government would reinstate criminal liability charges in the case if a special Supreme Court review panel upholds petitions demanding cancellation of the Feb. 14, 1989, settlement of compensation between Union Carbide and the former Congress (I) Party administration of Rajiv Gandhi.

The settlement required the U.S.-based multinational corporation to pay $470 million. In return, the Gandhi government dropped criminal liability charges brought against Union Carbide, its former chairman, Warren

Anderson, the firm's Hong Kong office and its Indian subsidiary and seven officers.

The accord, negotiated by a three-judge Supreme Court bench, also required the Gandhi administration to drop a civil liability suit that claimed Union Carbide's negligence was responsible for the leak. New Delhi has been seeking $3 billion in damages. The pact imposed a blanket ban on further criminal or civil liability actions against the company.

Union Carbide, for its part, dropped a counter suit that claimed the leak was the result of sabotage and held the central government and the government of Madhya Pradesh state partially responsible.

The Singh government announced Jan. 12 that it would support the petitions before the review committee because it agreed with their claims that the accord was unconstitutional as it prohibited victims from exercising their individual rights to sue Union Carbide. The government also said it believed the settlement was too low.

"In principle, the government has decided against the settlement and to support the petitions," Singh said. "Criminal liability cannot be adjudicated."

Singh reiterated his position during a rally attended by some 10,000 survivors of the disaster, in which some 40 tons of methyl isocyanate spewed from the now-defunct Union Carbide pesticide plant and smothered large areas of Bhopal, 370 miles south of New Delhi.

Since then, more than 3,300 people have died from the immediate and lingering effects of the vapors. Doctors say that on average, at least five people die every week.

More than 200,000 were injured, most of them residents of impoverished squatters settlements, and many still suffer from health problems that render them unable to work.

"The accord was not proper," Singh said to cheers and shouts of "death to Union Carbide" by rally participants. He repeated his government's decision to provide interim relief to survivors, the amount of which currently is being decided.

Singh announced that in distributing funds, the government would waive a requirement for certification of medical problems, saying, "Relief has been unnecessarily been delayed. The victims need urgent help and they will be provided for."

Before the rally, Singh visited the squalid areas that were affected worst by the leak and was mobbed by residents who garlanded him and showered him

with flower petals.

Hundreds of people presented petitions to the prime minister complaining about inadequate medical help and lack of relief. "I have lost everything in the disaster. Please help me," 55-year-old Sunita Bai pleaded to Singh.

#90021u0423 01/21/1990 ~United Press International

WASHINGTON (JAN. 21) UPI - A Colombian indicted in Massachusetts on drug trafficking charges was extradited Sunday for trial in the United States, the U.S. Marshals Service said.

Joseph Amsili-Cohen, 38, was turned over by Colombian authorities to a team of the Marshals Service's Special Operations Group early Sunday in Bogota, said U.S. Marshals Service Director K. Michael Moore in a news release.

Amsili-Cohen, a native of Morocco and a naturalized citizen of Colombia, was indicted in Boston in 1988 on charges of participating in a cocaine trafficking ring. U.S. agents flew Amsili-Cohen from Bogota to Hartford, Conn., where he arrived at 7:40 a.m. EST. He was being held in police custody, pending arraignment in federal court in Boston.

The indictment, which was returned against 14 people, charged Amsili-Cohen with conspiracy to distribute cocaine in Massachusetts, Florida, Ohio, Belgium and Colombia.

Six defendants charged in the same indictment have been tried in Massachusetts. Evidence from the trials showed that in March and April 1988, defendant Shmuel David traveled to Bogota to arrage with Amsili-Cohen for the regular shipments of cocaine from Colombia for David's international drug distribution organization, the Marshals Service said.

David had told his associates he planned to import and distribute hundreds of kilograms of cocaine. He was convicted and sentenced to 30 years in prison. The Drug Enforcement Administration called David's organization one of the largest cocaine distribution rings ever prosecuted in Massachusetts. The ring also operated in New York, New Hampshire, Ohio, Florida, Belgium, and Colombia, the Marshals Service said. Colombian police arrested Amsili-Cohen on Nov. 19.

He was the 14th suspected drug trafficker sent to face U.S. justice following Colombia's reinstatement of its extradition treaty with the United States in August. The drug cartels responded by launching an all-out terrorist war of assassinations, bombings and kidnappings.

#90021u0441 01/21/1990 ~United Press International
ATHENS, GREECE (JAN. 21) UPI - Iran Sunday criticized the Soviet Union's use of force to crush Moslem demonstrations in Soviet Azerbaijan as thousands of Azerbaijanis continued to arrive in Iranian border towns in defiance of Moscow.

Iranian Parliament Speaker Mehdi Karubi said his government opposed the use of force in Soviet Azerbaijan. "Soviet officials and leadership should know that resort to violence is not the solution to the problem of Azerbaijan," he said.

The Iranian Foreign Ministry appealed for an end to the violence and a dialogue between Moslems and Moscow. "The Ministry of Foreign Affairs expreses deep regret over such improper measures and seriously wants the Soviet government to halt violent encounter with the people of Azerbaijan," the statement said.

The statement was issued after President Akbar Hashemi-Rafsanjani met with Iran's National Security Council to discuss the situation in Soviet Azerbaijan, which is adjacent to an Iranian region with the same name.

Tehran radio, monitored in Athens, said thousands of people arrived in the Iranian border city of Astara on the Caspian Sea during the weekend. Tehran's state-owned Islamic Republic News Agency said 20,000 Soviet Azerbajanis defied Moscow and crossed the closed border with Iran last week, but almost all returned home after a few hours.

An IRNA dispatch said the Soviet military closed the border crossing point opposite the town of Bileh Sowar, some 300 miles northwest of Tehran, where more than 5,000 people crossed over on Friday to attend mass prayer ceremonies. Soviet helicopters flew over border crossing points, the news agency said.

The newspaper Tehran Times denied reports in the Moscow daily Izvestia saying Iran had supplied the Soviet Azeris with arms.

#90021u0450 01/21/1990 ~United Press International
WASHINGTON (JAN. 21) UPI - House Speaker Thomas Foley, D-Wash., tried to slow a congressional stampede toward an election-year tax cut Sunday, warning that a politically attractive reduction in Social Security payroll taxes would only create "a very large increase in the federal deficit."

With Congress set to reconvene Tuesday for a session certain to be marked by sharp debate over taxes, Foley discouraged support for a move by Sen. Daniel Moynihan, D-N.Y., to stop using revenues from the Social Security

tax to camouflage the size of the deficit.

"If I had to make a decision today to do it or not do it, I'd probably say 'Don't do it,'" Foley said. "On the other hand, I agree very much with Senator Moynihan that the use of these funds - up to $55 billion this year $65 billion next year, $78 billion the year after - to, in effect, mask the true level of the deficit is wrong."

On the NBC News program "Meet the Press," Foley offered his first public reaction to Moynihan's suggestion late last month to roll back an increase in the Social Security tax and stop taking in huge surpluses that in effect subsidize the deficit.

The idea has caught fire among Republicans as well as Democrats, much to the consternation of the White House, where President Bush last week dismissed it as a "charade." Bush has been placed in the uncomfortable position of opposing the Social Security tax cut, which would most benefit lower- and middle-income Americans, while championing a capital gains tax cut that would be of greatest help to wealthier Americans.

Amid much political jockeying, Foley admitted the Moynihan plan, which would force Congress and the administration to look elsewhere for tens of billions of dollars in financing to meet deficit reduction targets, was worrisome to Democrats as well as Bush, who wants to phase out the use of Social Security funds, but at a later date.

While giving Moyhihan "a lot of credit" for raising the issue, Foley noted there was bipartisan agreement in 1983 to raise the Social Security tax to ensure future retirement benefits can be paid.

"We shouldn't tamper immediately with the financial structure of the system without looking carefully at all the options," Foley said. "Rightly or wrongly, these funds are used to meet the costs of the deficit, or part of them," he said. "And we'd have a problem, if we cut the tax, of having a very large increase in the federal deficit."

On the ABC News program "This Week with David Brinkley," Senate Democratic leader George Mitchell of Maine said the Moynihan proposal "does make a great deal of sense in terms of the mix of the tax structure," but agreed that "the one adverse aspect which has to be analyzed is the effect on the deficit and how we can deal with that."

"Perhaps we can come up with a way that does both, that ties deficit reduction to payroll tax reduction," he said without elaboration. Moynihan who plans to introduce his tax-cut legislation this week, stood his ground on the CBS News program "Face the Nation," vowing to "make people look into the face of truth about the deficit."

"If we can't get behind an issue like this, of principle, then I'm not sure who needs the Democratic Party," Moynihan said. "If we won't protect the integrity of the trust funds, then what are we?"

Last year, overflow from the Social Security trust fund enabled the government to artificially trim its budget shortfall by $50 billion. The Moynihan tax cut would complicate the deficit reduction picture by $7 billion this year and $55 billion next year.

The question of how to offset that loss - through additional borrowing, spending cuts or taxes - is at the heart of the battle that will be formally joined next week when Bush sends Congress his fiscal 1991 budget.

Last week, Sen. Ernest Hollings, D-S.C., proposed a five percent value-added tax - an indirect sales tax - to cover the cost of Moynihan's Social Security tax cut and Bush's capital gains cut. But Democrats have been reluctant to jump on any tax increasen bandwagon in an election year and Bush has vowed to reaffirm his "read my lips: no new taxes" campaign pledge in the budget he sends to Capitol Hill next Monday.

#90021u0456 01/21/1990 ~United Press International

SRINAGAR, INDIA (JAN. 21) UPI - Pro-secession Moslem protesters Sunday battled security forces in Srinagar in clashes that left at least 17 people dead, more than 100 injured and prompted the deployment of troops under orders to shoot rioters on sight, officials said.

The Press Trust of India, quoting reliable unofficial sources, put the toll at 32 dead and more than 200 injured in the bloodiest outbreak of violence since the start in August 1988 of an agitation to end Indian rule in the northern Himalayan region of Kashmir.

The fatalities, all demonstrators shot by security forces, brought to at least 22 the number of people confirmed killed since violent protests erupted late Saturday in Srinagar, the summer capital of predominently Moslem Jammu and Kashmir state, 400 miles north of New Delhi. More than 500 people were reported taken into custody.

The bloodletting came as officials in New Delhi prepared for talks Monday with Pakistan Foreign Minister Shahabzada Yaqub Khan in which India was expected to reiterate a demand that Islamabad end its alleged support for militants in the northern Kashmir region, which is claimed by both nations. Pakistan denies aiding the radicals.

Khan arrived late Sunday afternoon and was met by Foreign Minister Inder Kumal Gujral. A Foreign Ministry spokesman said the two would attend a dinner, but official talks would begin Monday.

The unrest began late Saturday after rumors swept Srinagar that police were raiding homes in searches for pro-secession radicals and firearms. Crowds gathered in streets to hurl abuses and rocks at security forces, which replied with gunfire that killed at least five demonstrators, officials said.

Security forces in jeeps announced over megaphones early Sunday the imposition of a curfew. But the move had little or no effect, with crowds in the hundreds converging in the pre-dawn hours before mosques and in markets to chant, "Indian dogs go home."

Throughout the morning and afternoon, security personnel launched tear gas and staged baton charges in street battles, but rock-throwing demonstrators refused to disperse. Officials said that, in some areas, militants fired at police from the cover of crowds, which included women and children.

Rioters set fire to at least one government office and one of the many wooden bridges that span creeks running through Srinagar. Where tear gas and batons failed to control the violence, police used bullets.

Authorities called on the army to help control the situation and hundreds of troops with orders to shoot rioters on sight were deployed across the strife-torn city.

The arrival of a late afternoon shower and intense cold quelled much of the unrest, but crowds remained in the sodden streets in definance of the curfew in some areas, shouting anti-Indian slogans.

Virtually all three million Moslem residents of Kashmir support demands for succession from India, contending the region has been long neglected by the Hindu-dominated central government and never was given an opportunity at partition in 1947 to decide whether to join India or Pakistan or be granted independence.

#90021u0500 01/21/1990 ~United Press International

LONDON (JAN. 21) UPI - An Argentine airliner landed at a British airport Sunday, marking the resumption of air links between the two countries for the first time since the Falklands War.

But the benchmark landing was a bumpy one, according to Independent Radio News, which said the captain of the Aerolineas Argentinas flight called for emergency vehicles to stand by as a precaution because he feared a problem with a tire.

Officials said the Boeing 747 jet landed safely. The first British Airways flight to Buenos Aires landed there at the same time, officials said.

The Argentine national airline's twice-weekly flight service to Britain was interrupted in April 1982, when Argentina invaded the Falkland Islands prompting the British forces to send a task force to defend Britain's dependency.

Both Aerolineas Argentinas and British Airways will offer two flights a week between the capitals.

#90021u0508 01/21/1990 ~United Press International

LIMA, PERU (JAN. 21) UPI - Fourteen guerrilla fighters were killed in recent days, bringing to 225 the number of people killed in Peru in anti-government fighting between leftists and government forces since the beginning of January, a report released Sunday said.

Police and army forces reportedly killed the rebels during three clashes in two mountainous Andean departments, a statement from the Ministry of Interior said. It did not say when the attacks occurred.

The statement reported no military or police casualties in the mountain skirmishes fought in the Province of Tarma, 105 miles northeast of Lima, and in the Province of Juliaca, near the Bolivian border.

According to the statement, the leftist groups were heavily armed. In one attack some 30 guerrillas battled police from the collective farm company Sais Sollocota, in the department of Puno near the Bolivian border, 500 miles southeast of Lima.

During three hours of intense fighting, police killed four rebels, three men and one woman, armed with three semiautomatic weapons, two grenades and ammunition, the report said. The report did not specify which of the country's rebel forces was responsible for the attacks.

More than 17,500 people have died in fighting between the government and Peru's two major terrorist groups, the Maoist group Shining Path and the Revolutionary Movement Tupac Amaru, since they began their attacks 10 years ago.

The groups have confined much of their activity to the Andean areas, attacking government buildings and police stations, slaughtering mountain villagers accused of harboring informants and occasionally killing vacationing tourists.

Since Jan. 1, 1990, the attacks have averaged 15 causualties per day. One

government official said he expects that number to grow as general elections, scheduled for April 8, draw near.

PUNE, INDIA (JAN. 21) UPI - Thousands of devotees danced and sang Sunday as the ashes of Osho Rajneesh, the self-proclaimed "rich man's guru," were installed in an opulent glass-paneled mausoleum that once served as his bedroom.

Meanwhile, a 21-member "inner circle" selected by the controversial guru before his death assumed full responsibility for running the commune he founded in Pune, 750 miles south of New Delhi.

Osho Rajneesh, who once was known as Bhagwan Shree Rajneesh and preached a combination of enlightment, free love, and capitalism, died Friday from a heart attack at the commune and was cremated five hours later at a nearby crematorium.

His ashes, sealed in a metal vessel, were carried back to the commune, Rajneeshdam, by his younger brother, Swami Vijay Bharati, Sunday morning along a short road lined by some 10,000 maroon-robed devotees.

The disciples, many of whom were foreigners, danced and sang to lively music as Bharati walked solemnly into the commune and carried the guru's remains to what was his bedroom before it was converted into an opulent glass-walled mausoleum christened the "Chaung Zsu Auditorium."

The container was placed in a marble container embosed with a gold-inscribed epitaph that read: "Osho - never born, never died, visited the planet Earth between Dec. 11, 1931, and Jan. 19, 1990." Later, a news conference was held at which the new "inner circle" commune administration was announced.

The committee chairman was identified as a U.S. citizen by the name of Jayesh. The vice chairman is Rajneesh's former British doctor, Amrito. "The committee is not to be involved in spiritual consideration, but should look to mundane work and the practical problems of the commune. The inner circle is not a club to discuss philosophy. It is a pragmatic and pratical way to decide things," Amrito said.

He said Rajneesh decided last April 6 that he no longer wanted to actively participate in running the commune and called for the formation of the committee to "reach unanimous decisions about the continued functions and expansions of the commune and his work." Amrito quoted the guru as saying at the time: "I am tired. I want to retire."

He said health problems prevented Rajneesh from eating properly for the past eight months and that, in the past four months, he was fed a liquid diet that consisted largely of soya bean milk. He also had an eye affliction that prevented him from reading or writing for the past few months, Amrito said.

The commune also issued a statement condemning the reactions to Rajneesh's death by officials in Oregon, where the guru in 1981 established a commune he was forced to leave because of legal problems in 1985.

"The people of Oregon will one day be deeply ashamed of the ugly way in which Oregon politicians have responded to the death of Osho," declared his former personal secretary, Ma Prem Hasya.

"It seems that Oregon is doomed to become like Athens after the death of Socrates. It will be remembered as the state that supported all the hatred and vengeance that led to Osho's poisoning and ultimate death," she said.

Rajneesh repeatedly had charged that he was poisoned in a U.S. jail after he was arrested on charges of violating immigration laws by arranging sham marriages between U.S. and foreign devotees. He eventually pleaded no contest and was forced to leave the United States, eventually returning to India.

#90021u0748 01/21/1990 ~United Press International

WEST BERLIN (JAN. 21) UPI - The deputy chairman of the East German Communist Party and the front-runner for the post of prime minister resigned Sunday, saying the party has politically, morally, and economically ruined the country and should be disbanded.

The move led a 40-person revolt against the party, which is already struggling to polish its image stained by 40 years of Stalinist rule and recent claims of corruption by former party officials. The party is known formally as the Socialist Unity Party of Germany-Party of German Socialism (SED-PDS).

The resignation of Deputy Chairman and Dresden Mayor Wolfgang Berghofer is particularly hurtful to the party. The 46-year-old pro-reform communist was considered the favored candidate for the post of prime minister in spring elections.

"The old SED and its leadership have, in a shameful way, ruined the GDR (East Germany) politically, economically, and morally," the 40 former party members said in a statement announcing their resignation.

"We link with this step the urgent demand that the SED-PDS be disbanded,"

they said in the statement distributed by the official East German news agency, ADN.

"We, who have actively worked for the radical renewal of the SED-PDS, do not see that this party has the political force to completely change itself and to overcome the deep crisis in our country together with the democratic forces," the statement said.

During a recent visit to Austria, Berghofer had said the communists had no chance of getting a majority in May 6 elections and that no other parties would form a coalition with them. The former party members said, however, they supported the coalition government of communist Prime Minister Hans Modrow.

The resignations followed an emergency congress of the Communist Party, which ended Sunday morning and at which former leader Egon Krenz and other officials were stripped of their membership.

On Sunday about 20,000 people carrying suitcases crossed the border to West Germany, near the southern town of Goettingen, in what was described as symbolic exodus to protest the SED-PDS policies. Organizers said the protest was aimed at demonstrating what would happen if the East German authorities did not speed up the pace of reform.

Party Chairman Gregor Gysi admitted at a news conference in East Berlin that "a not unsubstantial part of the population and members of the party themselves want the dissolution of the SED-PDS."

But he said that "the wasting of our party would amount to a falsification of the democratic relations of spiritual and political forces in our country."

He said the party executive had come to the conclusion that dissolving the party would not reduce the current polarization in East German society. Gysi said his party was prepared to offer to the opposition some ministerial portfolios currently held by its own members.

The offer came in the wake of widespread accusations that the Communist Party used its dominant position in the government to solidify its hold on power and gain advantage in a campaign leading to spring elections. ADN reported the SED-PDS ousted from its ranks Krenz and 13 former top officials, including the long-time party ideologist, Guenter Schabowski.

Widespread demands for a swifter pace of change and popular outrage over official corruption last month forced Krenz to give up the posts of party leader and head of state, barely two months after he took them over from the now-disgraced Erich Honecker.

In spite of some drastic changes under his leadership, including the dramatic Nov. 9 opening of the Berlin Wall, Krenz had been unable to shake off his reputation as a tough, orthodox communist.

(JAN. 22)

Auto Racing

Frenchman Didier Auriol won the first stage of the 58th Monte Carlo Rally, completing approximately 71 miles in six special sections in 1 hour, 19 minutes, 19 seconds. Carlos Sainz of Spain was 14 seconds off the pace.

Basketball

The Philadelphia 76ers released 6-foot-4 guard Corey Gaines after a 20-day trial. Gaines, 24, had signed to a 10-day contract with the Sixers on New Year's Day and was re-signed to a second interim contract Jan. 11. Sixers General Manager John Nash said he plans to activate Lanard Copeland from the injured reserve list.

Boxing

Heavyweight champion Mike Tyson worked on technique in training for his Feb. 11 title fight against Buster Douglas in Tokyo. He began the day at 3 a.m. with a three-mile run.

College

Clemson officials named Arkansas coach Ken Hatfield as the new head football coach, succeeding Danny Ford, who resigned under pressure last week in the midst of an NCAA investigation of the school's football program. Hatfield's appointment was announced at a hastily called afternoon news conference by Clemson Athletic Director Bobby Robinson. ... Connecticut forward Nadav Henefield and Providence guard Eric Murdock were named co-players of the week in the Big East. Henefield, a freshman native of Israel, paced the Huskies to upsets over Syracuse and Georgetown. Murdock hit the winning jumper to cap Providence's rally from a 10-point deficit against Syracuse.

Hockey

The NHL Players Association unanimously ratified the recommendation of its search committee by appointing Bob Goodenow as its deputy executive director. Goodenow, a 37-year-old lawyer and Harvard graduate, will understudy R. Alan Eagleson, the present executive director, who has been

under fire to step down.

Skiing

Vreni Schneider of Switzerland strengthened her hold on the World Cup slalom lead by breezing to victory in Maribor, Yugoslavia. Schneider posted the fastest time in the first run and sliced through the second leg 49-gate course covered with artificial snow in 39.29 seconds for a combined time of 1 minute 19.93. She finished more than half a second faster than Ida Ladstaetter of Austria. ... Austrian Rudolf Nierlich won his first slalom of the World Cup season while Pirmin Zurbriggen maintained his lead atop the overall standings with a victory in the combined event at Kitzbuehel, Austria. Nierlich, the 1989 world champion in slalom and giant slalom, overcame mistakes which he thought had ruined his chances on the Hahnenkamm course to win in 1 minute, 43.51 seconds.

Soccer

Napoli, Internazionale and AC Milan all won to hold the top three spots in the Italian League standings, but Sampdoria slipped from a second-place tie to fourth after losing 2-0 to Inter in the big match of the day. Dutch star Marco Van Basten scored both goals in Milan's 2-0 victory at Udinese, making him the league's leading scorer with 12 goals. Napoli retained its two-point lead over Inter by beating last-place Verona 2-0 in Naples. ... Second-placed Barcelona made up ground on runaway league leader Real Madrid by overcoming Valladolid 1-0 on a day the other nine first division Spanish games ended in draws. Real Madrid struggled to a 1-1 tie at Sporting de Gijon, snapping its five-game winning streak. Madrid leads Barcelona by five points. ... In the Belgian first division, Anderlecht crushed Waregem 5-0 to maintain its lead over FC Brugge on goal differential. Marc Vanderlinden scored twice for Anderlecht.

Speedskating

Dutchman Bart Veldkamp won the men's European All-round Speedskating Championship at Heerenveen, Holland, edging out the Swedish Olympic champion Tomas Gustafson, and Gunda Kleeman of East Germany won her second European Championship after scoring wins in all four women's events. Veldkamp finished an impressive 13 seconds ahead of Gustafson in a 10,000-meter duel.

#90021u0881 01/21/1990 ~United Press International

PITTSBURGH (JAN. 21) UPI - Mario Lemieux scored a hat trick on three shots in the first period Sunday en route to a four-goal performance that sent the Wales Conference to a 12-7 triumph over the Campbell Conference in the highest-scoring All-Star Game in NHL history.

Lemieux responded to the pressures of being the Wales captain, host team star and recipient of the most votes in fan balloting by registering his second All-Star Game hat trick in three years. He earned the game's MVP award for the third time.

An All-Star every year since his rookie appearance in 1985, Lemieux ran his career All-Star totals to 9 goals, 5 assists and 14 points.

Lemieux, struggling with back problems and the pressures of keeping alive his regular-season point-scoring streak (35 games), was the NHL's first rookie All-Star MVP in 1985. At St. Louis in 1988, he set the All-Star record with three goals and three assists.

Lemieux needed all of 21 seconds to reward NHL fans for giving him the most votes the past two years. One rush after he took the first shot of the game, Lemieux scored a wraparound goal on a backhander through Calgary starter Mike Vernon's legs.

The goal - missing the All-Star record for fastest into the game by two seconds - came before all of the sellout crowd of 16,236 was in the arena and appeared to stun most of those who were seated. Lemieux's multiple-point games have become so commonplace that the crowd did not become thunderous until his third goal put the Wales ahead 6-2.

The 7-2 score after one period broke the marks for one and two teams, set in 1983, at Long Island, when the Campbell led 6-1.

The 41st NHL All-Star Game featured the most goals - topping by five the output of the Campbell's 9-5 victory last year - and the most by one team as the Wales topped the nine-goal totals posted by the Campbell last year and in 1983.

Pierre Turgeon of the Buffalo Sabres scored two goals in the first period for the Wales. One was set up by his Sabres teammate Dave Andreychuk, who put the Wales ahead 2-0 at 5:13 with an unassisted slap shot through Vernon's legs.

Turgeon scored the first of his two goals assisted by Hartford Whaler Ron Francis to make the score 3-0 at 9:22.

At 11:01, Mark Messier of Edmonton scored the Campbell's first goal but Lemieux stemmed any comeback 1:59 later, putting the Wales up 4-1 with a slap shot.

Ninety-one seconds after that, Steve Yzerman of Detroit scored unassisted for the Campbell by intercepting Pittsburgh defenseman Paul Coffey's pass. His backhander beat Patrick Roy of Montreal at 14:31.

At 16:55, Philadelphia's Rick Tocchet flipped in a blueline slap shot from Ray Bourque of Boston, giving the Wales a 5-2 lead.

Lemieux scored his third goal 42 seconds later, thrilling the crowd with a three-fold treat: his prettiest moves; the hat trick, and an assist from Coffey, Pittsburgh's other representative.

Taking Coffey's pass on their brief two-man break, Lemieux put an inside-out move on Toronto defenseman Al Iafrate, drew Vernon across the crease and slipped in the puck into the far side.

Turgeon scored the period's final goal at 18:52.

In the four-goal second period, Coffey collected another assist, on New Jersey Devil Kirk Muller's short-handed goal at 8:47. Sixteen seconds later, Calgary's Al MacInnis scored for the Campbell on an infrequent All-Star Game power play, three seconds before the traditional mid-game switch of goaltenders.

Roy was relieved by Buffalo's Daren Puppa and Vernon came out for Vancouver's Kirk McLean, with the Wales ahead 8-3.

Joey Mullen of Calgary drew the Campbell within 8-4 at 13:00, and Montreal's Shane Corson responded for the Wales at 16:43, putting the score after two periods at 9-4.

Lemieux scored his fourth goal of the game - matching Wayne Gretzky's record total of 1983 - 67 seconds into the final period. Breaking into the slot, Lemieux split the legs of both the lone defender and McLean.

Cam Neely of Boston, who had set up Lemieux's fourth goal, scored at 11:20 to give the Wales an 11-4 lead and establish the two-team record.

The Campbell's leading vote recipient, Los Angeles left winger Luc Robitaille,scored two third-period goals within 62 seconds, both assisted by St. Louis' Brett Hull and Yzerman, to make the score 11-6. Muller scored his second goal with 2:10 left for the Wales and Winnipeg's Doug Smail scored the Campbell's final goal with 25 seconds remaining.

The game featured accuracy more than shooting as the Wales outshot the Campbell 16-9 and 15-11 in the first two periods and the Campbell held the edge, 22-14, in the third. The shot total of 87 topped by six the record set at Toronto in 1968.

LOS ANGELES (JAN. 22) UPI - Gasoline prices climbed nearly 2 cents in mid-January, but the unusual wintertime upward trend may be waning, industry analyst Trilby Lundberg said Sunday.

The average price of a gallon of gasoline on Jan. 19 was 113.06 cents, up 1.97 cents since Jan. 5, said Lundberg, who regularly surveys prices at 12,000 gasoline stations across the country.

The jump brought gasoline prices to their highest level since late July and was unusual for the winter season, when people generally drive less and demand is low.

But Lundberg said the increases may be coming to an end as cold weather and accompanying jump in heating oil prices that fostered the rise - and an increase of more than 4 cents two weeks before - appear to be lessening Lundberg said.

''Wholesale prices dropped in some places, which is more normal,'' she said. ''And if you're willing to speculate a little bit, it's unlikely there will be significant gasoline increases now that weather crisis seems to have passed.''

Lundberg's survey found prices at self-service stations were 101.65 cents per gallon for regular unleaded, 118.98 cents for premium unleaded and 100.19 for regular leaded.

At full-serve stations, prices were 129.42 cents for regular unleaded, 142.85 for premium unleaded and 126.58 for regular leaded.

#90021u2395 01/21/1990 ~United Press International

(JAN. 21) UPI - Washington, D-C, Mayor Marion Barry had planned to announce his candidacy for a fourth-term as mayor today. But Barry, who's facing a federal drug charge following his arrest last week, said today that he'll seek unspecified help to heal his- ''body, mind and soul.'' Confidants to Barry say he has admitted to a chemical dependency problem and will receive treatment as soon as possible.

A spokesman for Azerbaijan's Popular Front says the nationalist group will call a general strike across the republic... to last until Soviet soldiers leave. Soviet troops have been able to suppress unrest in the capital of Baku, but the troops have NOT met with success in other parts of Azerbaijan. Moslem rebels control the province of Nakichevan and the Caspian Sea port city of Lenkoran.

A high-ranking member of the East German Communist Party resigned today, saying the party has politically, morally and economically ruined the country and should be disbanded. The resignation of the party's deputy chairman, Wolfgang Berghofer, was just one of 40 resignations turned in today. The faltering party is trying to polish its image after 40 years of Stalinist rule.

The captain of the Exxon supertanker that spilled 11-Million gallons of oil into Alaska's Prince William Sound last March says he's been made a scapegoat. In an interview, Joseph Hazelwood speaks out for the first time since the accident. He says ''it gets kind of lonely'' being the only person charged with a crime as a result of the spill.

#90021u2552 01/21/1990 ~United Press International

(JAN. 21) UPI - President Bush says he favors a proposal put forth by Senate Republican leader Bob Dole last week that calls for shifting five percent of U-S foreign aid toward more needy countries. Bush says he's ''delighted'' with Dole's proposal. The bulk of American foreign aid now goes to five countries- Israel, Egypt, Pakistan, the Philippines and Turkey.

A Disneyland spokesman says firefighters extinguished a minor fire near the California amusement park's monorail system soon after it started today. NO injuries were reported, but the blaze shut down the transit system for almost two hours. The spokesman says the fire- which damaged a section of fiberglass awning near the Disneyland Hotel station- likely was caused by a spark from the track.

A national survey released in Washington today finds a growing number of college freshmen support legal abortion and stricter environmental laws. But the American Council on Education poll of more than 20-thousand freshmen indicates their views on crime and drug use are becoming more conservative. The survey also shows that more students are interested in political activism, and fewer are pursuing a business career.

According to most Britons, Prince Charles will make a good king, and Queen Elizabeth eventually should abdicate the throne and let her son take over. The published survey reports the queen mother is Britain's most popular royal, with the queen and the prince of Wales NOT far behind as second and

third. The poll holds some surprises though. Three out of four people surveyed say the queen should pay poll and income taxes.

#90021u2716 01/21/1990 ~United Press International

(JAN. 21) UPI - In the Soviet republic of Azerbaijan, members of the Popular Front say they'll call for a general strike until government troops leave.

Soviet soldiers control the Azerbaijan capital of Baku, but the 24-thousand troops deployed in the troubled republic reportedly have a long way to go before they calm the rest of Azerbaijan. The official news agency Tass says the Azerbaijanis are continuing their call for attacks against ethnic Armenians.

Tass says 57 civilians were killed and 500 injured yesterday when Soviet troops rolled into Baku. But Radio Moscow says 83 people were killed.

Azerbaijani militants still are blockading the Armenian enclave of Nagorno-Karabakh. The disputed territory's food supply is dwindling, and it's completely cut off from the rest of the world because of downed telephone lines.

East Germany's Communist Party was dealt a damaging blow today when the deputy chairman announced he was stepping down. Wolfgang Berghofer says the party has ruined the country and should disband.

Berghofer's resignation led a 40-person revolt against the party as other disgruntled members handed in their resignations. Berghofer was considered the party's favored candidate for prime minister in the spring elections.

During a recent visit to Austria, Berghofer said the ailing party has NO chance of getting a majority in the May elections. And he said NO other parties would agree to forming a coalition with the Communist Party.

Today's resignations came in the wake of an emergency party congress that led to former leader Egon Krenz and other officials' being stripped of their party memberships.

#90021u2732 01/21/1990 ~United Press International
(JAN. 21) UPI - Tomorrow marks the 17th anniversary of the landmark Supreme Court decision legalizing abortion. Today, activists around the country took part in marches, rallies and church ceremonies... and preparations were finalized for a major rally in Washington, D-C, tomorrow.

In Boston today, about 800 activists on both sides of the issue turned out to give speeches. And Planned Parenthood of New York says it will lead a pro-choice delegation to Albany tomorrow to present state legislators with 30-thousand signatures of abortion rights supporters.

The president of the anti-abortion March for Life in Washington, D-C, called tomorrow's anniversary- ''a black day.''

On the other side of the issue, the president of the National Organization for Women, Sheri O'Dell, said tomorrow's scheduled march in the nation's capital is especially important this year... following the Supreme Court's recent ruling giving states extra leeway in restricting abortions.

-30- 1130

#90021u2742 01/21/1990 ~United Press International
(JAN. 21) UPI - The skipper of a 400-foot Canadian-owned tanker says a ''judgment error'' caused the vessel to run aground at Burnt Reef in Wrangell, Alaska, last night, about 150 miles south of Juneau.

Coast Guard officials say the mishap punctured the ship's number one port tank, leading to a spill of more than 57-thousand gallons of gasoline.

The Frank H. Brown- which was carrying an estimated one-point-eight-Million gallons of mixed fuel products- was en route to Skagway, Alaska, from Vancouver, British Columbia, when the accident occurred.

A Coast Guard spokesman says the boat's captain underwent blood and urine tests to determine if drugs or alcohol contributed to the grounding.

Coast Guard officials say the owner of the vessel- Whitepass Transportation of Vancouver- has accepted responsibility for the spill and will take care of its cleanup.

A published poll indicates Britain's royal family is doing very well in the eyes of their subjects.

90 percent of one-thousand-75 adults surveyed approve of the queen mother and the queen, with Prince Charles next in line at 89 percent.

Charles also did well as far as the public's perception of his ability to

serve as the country's king- with 88 percent saying he's ready to reign.

More than two-thirds of those asked say the royals are ''important to Britain.'' But half of those polled say the royal family receives too much money from the public coffers... and another three-quarters say the queen should NOT be exempt from paying taxes herself.

#90021u2930 01/21/1990 ~United Press International

(JAN. 21) UPI - Friends of Washington, D-C, Mayor Marion Barry say he admits he has a chemical dependency problem and will receive treatment as soon as it can be arranged. Barry was to have thrown his hat into the ring for a fourth term today. Instead, he issued a statement saying he will seek treatment to- quote- ''begin to heal my body, mind and soul.'' Barry was arrested Thursday night after allegedly buying and smoking crack

cocaine.

The head of the Salvadoran Catholic Church is calling for the punishment of those who masterminded the plot to kill six Jesuit priests. The archbishop stopped short of saying high-ranking government officials ordered the attacks, but did imply he suspects higher-level involvement in the November slayings. A Salvadoran army colonel has been formally charged with ordering the attacks and eight soldiers are accused of carrying out the order.

The state of siege declared yesterday by Haiti's military ruler, General Prosper Avril, has enraged his exiled political opponents. Dr. Louis Roy is one of Avril's foes who was forced to board a plane to Miami in the aftermath of Friday's assassination of a military officer. He says he's NOT sure why he was forced into exile. The U-S State Department has criticized the state of siege, and urges Avril to keep his promise to hold free elections in April.

An estimated three-thousand students gathered today in Bucharest to remember those who died in last month's uprising that toppled Romanian dictator Nicolae Ceausescu. The youths also used today's forum to press their demand for reforms in the education system. Romania's student movement has avoided political allegiance... preferring to concentrate on educational issues such as a NON-dogmatic curriculum.

(JAN. 21) UPI - Newspaper magnate Rupert Murdoch appears to be expanding his publishing empire into Eastern Europe. The official Hungarian news agency says Murdoch purchased a 50-percent interest in two independent Hungarian newspapers for four-Million dollars. Recent democratic reforms in the East Bloc have spawned dozens of independent publications.

Doctors at Penn State University's Hershey Medical Center say they're ready to implant the world's first artificial lung. The doctors say the search is on for a patient to receive the new device that would be directly inserted in the body and take over lung function until the patient's own lungs can heal. Doctors say the artificial lung could help victims of serious respiratory failure caused by trauma or infection.

Oregon authorities spent part of the weekend searching the Beaverton home of a Japanese business executive... looking for clues in the slayings of his wife and two young children. 33-year-old Yoshio Morimoto was arrested Wednesday night, hours after the victims were found at a construction site. Morimoto's lawyer says his client will plead innocent to the aggravated murder charges, which carry a potential death penalty.

The folks around Lima, New York, are scratching their heads after yesterday's fire at Janet and Bob Howland's home. The only thing investigators can figure out that might have caused the blaze was the playfulness of one of the couple's four cats. The felines and the family dog were left alone in the family room when one of the kitties apparently began playing with long-handled matches. One of the matches lit, which in turn ignited a couch. All of the pets died in the flames.

DENVER (JAN. 22) BUSINESS WIRE - MinVen Gold Corp. of Denver Monday said it supports proposed legislation in South Dakota to impose an eighteen-month moratorium on permitting of mine expansions over 200 acres in the state's Black Hills region.

MinVen owns the Gilt Edge Mine and is a joint venture partner in the Golden Reward Mine, both in the Black Hills.

James A. Anderson, MinVen's president and chief executive officer, said, ''We're disappointed that the proposed moratorium will delay our expansion project at Gilt Edge, but we believe it demonstrates to the people of South Dakota that MinVen and the industry are listening to their environmental concerns about the Black Hills.''

He said that the eighteen-month ban ''is a feasible idea that would allow all parties concerned to carefully assess the economic and environmental effects of mining in the area.''

Anderson said the moratorium would delay for up to one year a planned expansion project at the Gilt Edge Mine.

MinVen Gold Corp. is a publicly held, Denver-based mining company with interests in five operating gold mines in the United States and Canada. Its shares are traded on the American and Toronto stock exchanges under the symbol MVG.

#90022b0015 01/22/1990 ~Business Wire

LOS ANGELES (JAN. 22) BUSINESS WIRE - H.F. Ahmanson & Co. (NYSE:AHM), parent company of Home Savings of America and The Bowery Savings Bank, Monday reported fourth-quarter earnings of $65,853,000, or 66 cents per share, compared with 1988's fourth-quarter net of $67,751,000, or 68 cents per share.

Pre-tax earnings rose by 12 percent, but the gain was more than offset by an increase in the effective tax rate to 39.6 percent from 30.3 percent in the 1988 period when non-recurring tax credits were recorded.

''Although after-tax profits were essentially flat due to the higher tax rate, core earnings increased substantially,'' said Richard H. Deihl, chairman and chief executive officer. ''On a pre-tax basis, core earnings rose by 86 percent to $92.2 million from $49.5 million in the fourth quarter of 1988,'' Deihl said. Core earnings exclude gains from loan sales and income from real estate development activities.

Net interest income -- the key componenet of core earnings -- rose by 32 percent to a record $296.3 million, on an 11 percent increase in the earning assets portfolio. The effective net spread, or margin of return, on earning assets increased by 12 basis points during the quarter to 2.78 percent at year-end -- the highest level in more than two years -- up 31 basis points from 2.47 percent at the end of 1988.

''Performance in the quarter reflected a significant shift in the composition of earnings, with after-tax profits from real estate operations accounting for less than 8 percent of net earnings for the period, compared with 39 percent in the fourth quarter of 1988 when record real estate profits were recorded,'' Deihl said.

Earnings for 1989 totaled $193,943,000, or $1.95 per share, compared with $201,960,000, or $2.04 per share, in 1988. The 4 percent earnings decline reflected a 47 percent decrease in after-tax income from loan sales and real estate operations, together with a 3.4 percentage point increase in the effective tax rate.

Net interest income was up 13 percent to a record $994.4 million and loan servicing income rose 14 percent to $48.4 million. Pre-tax core earnings increased $52.8 million from 1988.

After-tax gains on sales of loans in 1989 were down 67 percent to $6.9 million from $20.9 million in 1988, while net profits from real estate operations of $20.8 million were 34 percent below the $31.7 million reported in 1988. In addition, the company increased its loan loss provision by $23.9 million, or 39 percent, in 1989, including a $21 million increase in the fourth quarter.

''Home Savings of America's deposits grew by a record $3.6 billion during 1989 to $33.1 billion. Mortgage loan volume of $11 billion was the third highest in the company's 100-year history. The general and administrative expense ratio declined to 1.71 percent from 1.77 percent in 1988, and steps were taken to further reduce operating costs in 1990 and beyond.

The ratio of non-performing assets remained among the lowest in the industry, and loss reserves were further increased,'' Deihl said.

''As expected, mortgage lending volume moderated from 1988's record of $14.9 billion, reflecting Home's more stringent underwriting standards, fewer lending offices and our withdrawal on Jan. 1, 1989 from the commercial and industrial real estate lending market,'' Deihl said.

All of the loans originated in 1989 were on residential real estate properties; loans on single family homes accounted for 92 percent of total volume, with the balance on multiple residential properties. Loans on California properties accounted for 76 percent of 1989 fundings. The average loan amount on single family loans funded in 1989 was $124,200, compared with $118,800 in 1988. In California, the average loan amount was $141,300, up less than 5 percent from $135,100 in 1988.

''Contrary to published industry trends toward fixed rate lending, Adjustable Rate Mortgages comprised 94 percent of total loan volume in 1989, and margins on new loans increased significantly,'' Deihl said.

At year-end, monthly Adjustable Rate Mortgages made up 92.4 percent of the company's $38.1 billion real estate loan portfolio, up from 88.6 percent of the $34 billion portfolio at year-end 1988. The average spread over the Index on ARM loans, funded in 1989 was 2.47 percent, compared with 2.32 percent in 1988. At year-end, the average spread over the Index on the ARM loan portfolio was 2.31 percent, up six basis points from 2.25 percent at year-end 1988.

Secondary market sales of loans and mortgage-backed securities totaled $2.8 billion in 1989, down from $5.7 billion in 1988. The portfolio of loans serviced for investors passed the $13 billion mark for the first time. Loan servicing income rose 14 percent to a record $48.4 million from $42.5 million in 1988.

Non-performing assets -- non-accruing delinquent loans (primarily over 90 days) and foreclosed real estate -- totaled $504.2 million at year-end, equal to 1.13 percent of total assets, among the lowest ratios in the industry.

#90022b0016 01/22/1990 ~Business Wire

SEATTLE (JAN. 22) BUSINESS WIRE - Record earnings in its life and health operations and strong investment income highlighted SAFECO Corp.'s net income of $79.4 million, or $1.26 per share, for fourth quarter 1989.

Total net income for 1989 was $300.2 million, or $4.75 per share. This compares with $4.10 per share for 1988. Excluding realized gain on sales of investments, SAFECO earned $4.17 per share for 1989, compared with $3.59 per share for 1988.

''These very satisfactory corporate results reflect the increasing diversity of our SAFECO earnings base,'' said Chairman and Chief Executive Officer Bruce Maines. ''Our life company had a particularly strong year with pre-tax income of $106.9 million, compared with $68.0 million in 1988. This total exceeds our previous best of $76.7 million in 1986.''

Fourth quarter profits for the life and health operation were $26.0 million. ''Our real estate companies had a gratifying improvement from a $12.5 million operating loss in 1988 to a modest profit in 1989,'' Maines said.

SAFECO's property and casualty companies, its largest subsidiary, ended the year with pre-tax operating income of $211.2 million, despite total underwriting losses of $52.2 million. Pre-tax investment income was $263.4 million for the year, an increase of 19 percent, and 15 percent on an after-tax basis, over 1988.

''Commercial lines underwriting losses were $9.7 million for the fourth quarter, and $51.8 million for the year,'' Maines said.

''This is the result of continuing price competition and increasing claims costs.'' Personal lines results suffered in part from two fourth-quarter events, the Northern California earthquake and some unusually cold weather in Texas and other parts of the country, which together resulted in $9.1 million in claims.

''Personal auto was adversely affected by non-voluntary business (assigned risk) which has seen steadily increasing underwriting losses, especially in California,'' Maines said. Of the $17.7 million non-voluntary loss for the year, $15.4 million is attributable to California alone. Surety profits of $11.5 million for the year were a significant improvement over 1988.

The effect of Proposition 103 in California is still unknown. ''SAFECO is participating in various Department of Insurance hearings on a number of issues surrounding the initiative,'' Maines said. ''However, we continue to believe the insurance rates for our California property and casualty insurance business meet the requirements of Proposition 103 as interpreted by the California Supreme Court.''

SAFECO Credit Co. reported an increase of 33 percent in new business production for 1989 and pre-tax earnings of $6 million.

#90022b0021 01/22/1990 ~Business Wire

PALO ALTO, CA (JAN. 22) BUSINESS WIRE - Hewlett-Packard Co. Monday introduced the lowest-priced 3D models in its line of workstations based upon HP Precision Architecture (HP-PA), a leading RISC (reduced-instruction-set computing) technology.

The HP 9000 Series 800 Model 834 SRX and Model 834 TurboSRX offer users high-performance graphics at up to one-half the price of previous models with comparable performance. They are particularly suited for mechanical and electrical computer-aided-engineering applications that run on a single workstation or are shared on a network.

The new workstations produce realistic images at a processing speed of 14 million instructions per second. The Model 834SRX has a U.S. list price of about $35,000, which is half the price of the comparable-performance Model 835SRX. The Model 834 TurboSRX has a U.S. list price of approximately $38,000. This is 40 percent below the Model 835 with the same performance.

Both are available immediately.

The Model 834 differs from the 835 only in expansion capability. Model 835 workstations can be configured with up to four expansion slots. The 834 has one expansion slot.

Existing software for Model 835 can run without modification on the new workstations. All of the top mechanical- and electrical-design packages run on Series 800 workstations. More than 1,000 application programs worldwide run on HP-PA computers.

''The HP 9000 Model 834SRX and TurboSRX complete HP's 834 line of low-priced, HP-PA-based workstations,'' said Bill G. Kay, general manager of HP's Workstation Group. ''HP workstations now provide a range of 2D and 3D capabilities for users looking for high performance at a relatively low price.''

The workstations feature an optional configuration and user interface that automatically activate when the workstation is turned on. With this option, users immediately can begin working on the day's tasks, rather than spend the hours it normally takes to initially install software and configure the operating system.

The option incorporates a pre-installed and configured X Window System on a 304-Mbyte HP-IB hard disk and is available at a U.S. list price of approximately $5,700.

X Window System, a product of the Massachusetts Institute of Technology, uses overlapping windows to display applications available on other computers on a network.

Each model comes with 8 Mbytes of main memory (expandable to 96 Mbytes) and an expansion slot for increasing system capabilities. In addition, each can connect simultaneously to seven interface devices, such as a graphics tablet, mouse or knob box. (A knob box is a device with controls that can be hand-turned to rotate a 3D image on the computer screen.)

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 95,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

#90022b0026 01/22/1990 ~Business Wire

ALTADENA, CA (JAN. 22) BUSINESS WIRE - Irvine-based Southwest Diversified (SWD) Inc. and its partner, Altadena-based Cantwell- Anderson, have announced a joint venture with Pasadena-based Community Bank to proceed in the development of a residential community on the 220-acre former site of La Vina Hospital in the scenic mountains overlooking Altadena.

Community Bank will provide the equity financing for the development and SWD will continue its role as managing partner and home builder.

In making the joint announcement, Tim Cantwell, president of Cantwell-Anderson said: ''We now have a complete team that can carefully develop the beautiful and sensitive La Vina site. Community Bank adds it own local expertise to ours to insure local interests are continually addressed and Southwest Diversified brings the technical expertise essential to a mountain side project of this magnitude.''

Community Bank President and Chief Executive Officer Kraig A. Westra said: ''We believe it is important to help with the redevelopment of our own area. We can see the land proposed for development from Community Bank headquarters; it's literally in our own backyard. We're committed to

giving back to the communities we serve and doing it generously. We think this is a great way to show it.''

According to Cantwell, SWD was brought in because of their successful development of similar properties in both the Bay Area and in Arizona.

William D. Foote, president of SWD, said: ''We are excited by the opportunity of redeveloping and beautifying La Vina. Working with two local partners makes the process much smoother, especially when they have the expertise and abilities of Cantwell-Anderson and Community Bank.''

The planned development will include 272 single-family homes, an average of 2.5 homes per acre, within the developed area, maintaining the small-town atmosphere that the Altadena community values so highly.

The plan also dedicates 108 acres as perpetual natural canyon and rolling chapparal for the preservation of native flora and fauna and provides for a small K-8 private school to be housed in a remodeled former hospital building located on the property.

Architecture will feature the distinctive look of the ''California Craftsman'' style developed from the turn of the century through the 1930s. Stands of mature trees, together with the small-town environment, will give the planned community a sense of unity with the cultural heritage of the area.

Community Bank is the 13th largest California bank, as well as the largest bank in the San Gabriel Valley. It was chartered in 1945 and has grown steadily since. The bank's assets now total more than $1.3 billion. Primarily a business bank, Community Bank's 18-branch network offers financial services for middle-market businesses, professionals, corporations and individuals.

Cantwell-Anderson is a residential developer and builder active in the Altadena-Pasadena area for the past decade.

Southwest Diversified is a leading developer of homes and masterplanned communities in California and Arizona. The company operates in financial partnership with the Toronto-based Coscan Development Corp. and its major shareholder, Carena Bancorp Inc., two of Canada's major publicly held development corporations.

#90022b0033 01/22/1990 ~Business Wire

DENVER (JAN. 22) BUSINESS WIRE - CREDO Petroleum Corp. reported Monday that for the fiscal year ended Oct. 31, 1989 net income was $475,000, or 14 cents per share, on revenues of $1,701,000, compared to net income of $204,000, or 6 cents per share, on revenues of $1,196,000 last year.

Cash flow from operations increased 43 percent to $946,000 compared to $543,000 last year. Results for 1988 have been retroactively restated for the adoption of Statement of Financial Accounting Standards No. 96, ''Accounting For Income Taxes.''

James T. Huffman, president, said that 1989's results reflect the third consecutive year of substantial earnings increases. Earnings were favorably impacted by the acquisition of United Oil Corp. in July 1988, several smaller acquisitions made during the year, the improving natural gas markets. Since 68 percent of CREDO's reserves are natural gas, the company expects improving gas markets to continue to have a very positive effect of the company, Huffman said.

Production volumes and oil and gas sales reached record levels in 1989. Gas sales volumes increased 53 percent to 301 million cubic feet compared to 197 million cubic feet last year. Oil sales volumes increased 23 percent to 38,000 barrels compared to 31,000 barrels last year.

Gas prices received during the year increased 2 percent to $1.42 per thousand cubic feet compared to $1.39 last year. Oil prices increased 10 percent to $16.51 per barrel compared to $15.01 in 1988.

Reserves increased 11 percent in 1989 to 941,000 equivalent barrels of oil. At Oct. 31, 1989, estimated proved developed reserves totaled 3.84 billion cubic feet of natural gas and 301,000 barrels of oil. Estimated future net revenues from proved developed reserves were $7,874,000 using Oct. 31, 1989 prices of $1.46 per thousand cubic feet for natural gas and and $17.76 per barrel for oil.

Since CREDO's Oct. 31 year end, oil prices have increased to around $20 per barrel.

The company's annual report is expected to be mailed in early February. The annual meeting of stockholders will be held in Denver on Thursday, March 22, 1990, at 2:30 p.m., MST, at the United Bank of Denver, Forum Room.

CREDO Petroleum Corp. is a publicly traded independent oil and gas company based in Denver. The company's stock is traded on the NASDAQ System under the symbol CRED and is quoted daily in the ''NASD Bid & Asked Quotations'' section of The Wall Street Journal.

#90022b0041 01/22/1990 ~Business Wire

SAN JOSE, CA (JAN. 22) BUSINESS WIRE - Businessland Inc., an international leader in the distribution, integration and support of microcomputer and workstation systems, Monday announced it will expand its Businessland Rents Division with three new stand-alone depots in Los Angeles, Houston and Chicago.

Operational this week, the new facilities follow a successful one-year program in Northern California. The company's one-year-old Businessland Rents operation already holds a 15 percent share of the $20 million Bay

Area PC rental market.

Now shipping 500-600 systems per month, Businessland Rents, based in Pleasanton, Calif., caters to companies of all sizes in the Silicon Valley San Francisco, Oakland and Sacramento areas. According to Brian Leeland, vice president of Businessland Rents, 60 percent of the facility's business comes from technology firms; the remainder from banking and engineering industries, and from independent consultants.

The $300 million PC rental market has an expected annualized growth rate of 30 percent over the next two years. Spurred on by corporate concerns over technology obsolescence, capital conservation in an uncertain economic climate, and expanding training and project requirements, renting has become the fastest growing segment of the PC industry.

Businessland Rents plans an aggressive roll-out into the top 20 U.S. computer markets over the next four years. Following Los Angeles, Houston and Chicago, Businessland Rents will open depots in Boston, Washington D.C., Philadelphia and New York.

Leeland commented, ''These new markets present a significant new business opportunity for Businessland and testify to the fact that PC rentals have arrived.''

Although Businessland Rents will operate independently with dedicated facilities and personnel, the division draws on the resources and capabilities of its entire $1 billion parent company. Businessland is the leader in the distribution, integration and support of microcomputer, workstations and systems for business.

It has installed more than 375,000 PCs, over 178,000 network nodes (8 percent of the total U.S. installed base) and over 10 times as many LANs as any of its competitors.

Each Businessland Rents depot will provide a full complement of high-quality brand name products and start-to-finish services, including delivery, installation, integration, training and on-site and 800 number hotline technical support.

Each Businessland Rents facility will carry its own multimillion dollar inventory and has a staff fully trained in configuring, installing and maintaining multi-technology systems, including software.

''The distinction between Businessland Rents and its national competitors quite simply, is the range of services and level of responsiveness the company can provide its customers,'' said Brian Leeland, vice president of Businessland Rents.

Recent Businessland Rents installations have included the highly successful September NetFRAME roll-out at the Santa Clara Convention Center.

The order included 60 to 70 CPUS, of various vendor types, to be hooked into a Novell network and NetFRAME network server. NetFRAME Co-Founder Enzo Torresi commented: ''When we rented from Businessland, we not only obtained the personal computers we needed, but also expert installation and support. We put together a very large network for a critical demonstration in only a couple of

days.''

Businessland Rents also met the challenge of the company's Los Angeles Technology Summit last December. More than 70 percent of the show's 75 exhibitors used Businessland Rents equipment and support services.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates microcomputer products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, two in Canada and two in West Germany. It reported sales of $1.2 billion in fiscal 1989.

#90022b0043 01/22/1990 ~Business Wire

WINTERSBURG, AZ (JAN. 22) BUSINESS WIRE - Unit 3 at the Palo Verde Nuclear Generating Station has begun generating electricity once again for customers of seven utilities in Arizona and three other states in the Southwest.

Unit 3 returned to service at 11:05 a.m. Sunday, Jan. 21, when its electricity was placed on the Southwestern transmission grid, thus ending an outage that began Dec. 30, 1989, when a large main output transformer failed.

Subsequent analysis revealed the root cause of the transformer failure was an internal fault within the device. It has been replaced with a new transformer, which steps up Unit 3's electrical output from 24,000 to 525,000 volts.

Late last month, Unit 3's refueling outage concluded. The unit is scheduled to generate electricity for customers throughout 1990 and won't be refueled again until 1991. Although it was out of service during much of last year, its first year of operation in 1988 was impressive.

Unit 3 generated more electricity than any other nuclear unit in the free world in 1988, according to the Utility Data Institute (UDI), the Palo Verde Nuclear Generating Station was number one in the nation for the amount of power produced. Together, all three units generated more than 23 million net megawatt-hours that year, the highest production total ever recorded by UDI.

In addition to Unit 3 currently operating at Palo Verde, Unit 2 remains at full power. It, however, is scheduled to begin a refueling outage next month, on Feb. 24. Unit 1, meanwhile, is expected to conclude its refueling outage toward the end of the first quarter.

Palo Verde is owned by seven Southwestern utilities located in four states. They are Arizona Public Service Co., Salt River Project, Public Service Co. of New Mexico, El Paso Electric Co., Southern California Edison, Los Angeles Dept. of Water & Power, and the Southern California Public Power Authority. APS is the managing and operating partner, and holds the NRC licenses for the plant.

Located 55 miles west of Phoenix, Palo Verde consists of three standardized pressurized water reactor units, each rated at 1,270 megawatts. Together, they are rated at a total of 3,810 megawatts, enough electricity to service approximately four million people.

CONTACT: Arizona Nuclear Power Project, Phoenix, Don Andrews, (602) 250-1530.

#90022b0046 01/22/1990 ~Business Wire

WINTERSBURG, AZ (JAN. 22) BUSINESS WIRE - E.C. "Bert" Simpson, an 18-year veteran of the commercial nuclear power industry, has been elected by the board of directors of the Arizona Public Service Co. to serve as vice president of Engineering & Construction for the Palo Verde Nuclear Generating Station.

The announcement was made by Palo Verde Executive Vice President William F. Conway, who stated that "Mr. Simpson's expertise and leadership will

further strengthen the engineering organization" of the nation's largest nuclear power plant.

Simpson, who holds dual university degrees in engineering disciplines, will join the Palo Verde management team Feb. 19. He is currently Director of Nuclear Operations Engineering & Support for the Florida Power Corp.'s Crystal River nuclear plant.

He has served in that capacity since 1988, responsible for directing and controlling engineering organizations, design programs, policies and technical services for Florida Power's nuclear operations department.

Previously, he has served as Director of Nuclear Operations Site Support, Director of Nuclear Operations Engineering & Licensing, Manager of Nuclear Engineering and Senior Nuclear Licensing Engineer at Crystal River. Simpson began his career at Florida Power in 1972 as a nuclear engineer.

At Palo Verde, Simpson will be responsible for the conduct of the Nuclear Engineering, Nuclear Construction, Nuclear Records Management, Cost & Scheduling, and Project Contract Administration departments.

In making the announcement, Conway stated that Simpson's hiring "will further strengthen the Palo Verde management team as well as invigorate our engineering organization. A finely tuned engineering department is vital to the optimum performance of a nuclear power plant." Conway said, "I have the utmost confidence that Mr. Simpson's abilities will assist Palo Verde in meeting the highest standards of the industry."

The Palo Verde Nuclear Generating Station is a triple-unit plant 55 miles west of Phoenix, Ariz. Rated at 3,810 megawatts, it provides electricity for seven utilities in four Southwest states.

It is owned by Arizona Public Service Co., Salt River Project, Southern California Edison, Public Service Co. of New Mexico, El Paso Electric Co., Los Angeles Dept. of Water & Power, and the Southern California Public Power Authority. Each utility shares the electricity generated by the plant in proportion to its ownership ratio. Arizona Public Service is the managing partner and operator of Palo Verde.

#90022b0049 01/22/1990 ~Business Wire

SALT LAKE CITY (JAN. 22) BUSINESS WIRE - L. Scott Nelson, president and chief executive officer of First Security Bank of Utah N.A., was elected by the bank's directors to the additional post of chairman of the board.

Nelson, 52, has served as a director of the bank since January 1988. He succeeds Robert T. Heiner, 64, as chairman.

Heiner continues as a director of the bank and as president, chief administrative officer and a director of First Security Corp., the bank's parent company.

Nelson has spent 21 years in progressively more responsible management positions within the First Security system. He joined First Security Bank of Idaho N.A., in 1969 as budget director and special projects officer. He was elected assistant vice president and commercial loan officer in 1971, vice president and cashier in 1974, vice president and manager of the bank's Boise office network in 1977, and senior vice president and assistant to the chairman of the bank in 1981.

Two years later in July 1983, Nelson was promoted to executive vice president and manager of the Community Banking Group, responsible for the bank's three regional divisions and their 72 full-service offices statewide, as well as the bank's marketing, operations and human resources divisions.

He moved to the commercial side of the bank in May 1986 as executive vice president. As manager of the Commercial Banking Group, Nelson was in charge of the commercial banking, mortgage loan and credit dvisions.

A few months later in January 1987, the directors of the bank made Nelson president and chief administrative officer, responsible for all community, commercial and trust operations. He was elected a director of the bank at the same time.

In October 1987, Nelson was elected president and chief administrative officer of First Security Bank of Utah, at which time he joined the bank's board of directors. He took on the added responsibilities of chief executive officer of the bank in October 1988.

A native of Lewiston, Idaho, Nelson graduated with honors from Idaho State University with a bachelor of science degree in business adminsitration. He earned his master's in business administration from the University of Utah. He is a graduate of both the Pacific Coast School of Banking and the National Commercial Lending School.

Nelson serves on the executive committee, branch administration division of the American Banker's Association. He is a past-president of the Idaho Bankers Association. He was appointed a director of the Salt Lake Area Chamber of Commerce in April 1989. In January 1990, Utah's Gov. Norman Bangerter named Nelson to the 15-member Utah Sports Authority, which will oversee the facilities to be built in the state's bid for the 1998 Winter

Olympics.

Heiner joined First Security Bank of Utah in Ogden nearly 40 years ago as a bookkeeper. He has continued to rise steadily through the ranks, entering management in 1954 as an assistant cashier.

In 1959, he was asked to head operations and human resources for all branch offices in the Ogden area as assistant vice president. He became vice president with still additional responsibilities in 1960. In 1969, he was promoted to senior vice president and manager of the bank's Northern Division, one of three major operating divisions of the bank. At the same time, he was elected to the bank's board of directors.

Heiner was elected executive vice president in 1979. In 1982, he became president, chairman and chief executive officer of the bank.

Heiner was elected a director of First Security Corp. in 1981 and assumed the added positions and responsibilities of president and chief administrative officer of the parent corporation in December 1986.

As part of the corporation's planned program for the ongoing, orderly succession of management, Heiner relinquished his positions as president of First Security Bank of Utah to Nelson in October 1987 and as chief executive officer in October 1988.

A lifelong resident of Ogden, Heiner has served in leadership roles in state and national bank and professional associations and in various civic an church organizations. He attended Weber State College, which conferred on him its honorary doctor of humanities degree in 1984 following 12 years of service on the college's Institutional Council.

Among the many other honors bestowed on him, Heiner received the ''National Spirit of Life Award'' from the City of Hope in 1985 and in 1989 was selected as ''Banker of the Year'' by the Utah Bankers Association.

BROOMFIELD, Co (JAN. 22) BUSINESS WIRE - Hathaway Corp. Monday announced that it incurred a $239,000 net loss, or 6 cents per share, for its second quarter ended Dec. 31, 1989, as compared to net income of $7,000 in the second quarter of last year.

Revenues decreased from $13,254,000 for the second quarter of last year to

$12,402,000 in the current year.

Revenues for the first six months of fiscal 1990 were $24,225,000 compared with $24,887,000 for the same six month period of a year ago, or a decrease of 3 percent. The company incurred a net loss of $583,000,

or 14 cents per share, for the six month period compared with a net loss of $689,000, or 17 cents per share, for the same period last year.

E.E. Prince, Chairman, President and Chief Executive Officer, stated, ''Compared with last year, the loss this quarter is primarily due to our Computer Software Segment's operating results being substantially down from last year, partially offset by improvements achieved by our Motion Control and our Systems and Instrumentation Segments.

''The drop in Software's results reflects softness being experienced in the overall mainframe software market. The primary objective continues to be returning the company to profitability, which includes continuing to explore the disposition of unprofitable operations and making acquisitions.''

Hathaway Corp. designs, produces and markets computer software, electronic systems, electromechanical systems and instrumentation for world markets.

BOISE, ID (JAN. 22) BUSINESS WIRE - J. Patrick McMurray, president and chief executive officer of First Security Bank of Idaho, has been elected to the additional post of chairman of the bank's board of directors.

McMurray succeeds James E. Phelps, who has announced his retirement effective Feb. 1, 1990.

McMurray, 41, is a 19-year First Security veteran. He began his banking career in 1971 in Boise as a management trainee, was named vice president in 1983 and was named senior vice president and manager of all Boise-area First Security offices in 1983.

McMurray was elected president and chief administrative officer of the statewide bank in February of 1988. He assumed the additional title of chief executive officer in April of 1989.

A native of Boise, McMurray is a graduate of Borah High School. He received his bachelor's degree at the University of Idaho and is also a

graduate of the Pacific Coast Banking School, University of Washington, Seattle.

McMurray is a member of the Idaho Bankers Association, the Idaho Bankers Association executive committee, and is past chairman, Idaho Group, Robert Morris Associates. He is a member of the Hillcrest Country Club, and Arid Club executive committee.

Active in the community, McMurray is former chairman of the Salvation Army Advisory Board executive committee, and is a director of FUNDSY. He is trustee and past chairman of the Boise Art Museum and is trustee of the St. Luke's Regional Medical Center/Mountain States Tumor Institute. He is a member of the Boise Chamber of Commerce economic development council.

McMurray, also a director of First Security Bank, serves on the management committee of First Security Corp., parent company of First Security Bank of Idaho.

In announcing McMurray's additional responsibilities, Spencer F. Eccles, chairman of First Security Corp., said, ''Pat McMurray has demonstrated substantive management capability and has provided strong leadership in each area of the bank for which he has had responsibility. He has spent his entire banking career with First Security, and has contemporary knowledge of this business.''

Phelps, 67, who has served as chairman of the First Security board since 1984, will close out a 41-year banking career at the end of January.

Phelps began his banking career with First Security in Craigmont in 1948. During his early years, he managed several First Security branches, including Genesee and Emmett and was elected president of First Security Bank of Twin Falls in 1963.

In 1967, Phelps moved to Pocatello to become senior vice president and supervisor of First Security's Eastern division. Four years later, he became manager of the bank's Southwestern division in Boise.

Taking on statewide responsibilities, Phelps was elected executive vice president of First Security Bank in 1977. He was named president and chief administrative officer in 1983 and in 1984 was elected president, chairman and chief executive officer. He has served as chairman of the board since McMurray was elected president and chief executive officer last April.

#90022b0060 01/22/1990 ~Business Wire

SAN RAFAEL, CA (JAN. 22) BUSINESS WIRE - Westamerica Bancorporation (ASE:WAB), parent company of Westamerica Bank, reported 1989 net income of $7.3 million, an increase of 53 percent over 1988 earnings of $4.8 million.

Earnings per share of $1.42 were up 53 percent compared to 93 cents in 1988.

For the fourth quarter of 1989 net income was $2.2 million, or 42 cents per share. This compared with results of $870,000, or 17 cents per share, reported in the same period a year ago, an increase of 147 percent.

According to David L. Payne, Westamerica's president and chief executive officer, fourth quarter and full year 1989 results reflected continued progress in key business areas. Payne noted that growth in both consumer loans and in core deposits was particularly strong especially in the latter half of the year.

Payne also cited improving credit trends which allowed the bank to reduce the loan loss provision in 1989. He indicated that non-performing assets had declined to $14.2 million at Dec. 31, 1989, from $22.5 million a year ago, a decrease of 37 percent.

All of these factors combined, resulted in improved ratios of return on assets and on equity in 1989.

For the year net interest income on a fully taxable equivalent basis was $61.7 million, or 9 percent over the $56.5 million in 1988. The increase reflects both an increase in earning assets and a wider margin. The bank's net interest margin, the spread between interest rates on loans and investments and the average rate of funding these assets improved to 5.31 vs. 5.00 percent in 1988.

Non-interest income decreased $1.2 million in 1989 to $14.5 million. This was 7 percent lower than 1988, a year in which non-interest income included a gain of $937,000 from the sale of three branches. Ongoing expense control efforts held operational and other non-interest expenses to $58.4 million, or 2 percent over 1988.

The provision for loan losses for 1989 was $5.7 million vs. $7.2 million in 1988, a decrease of 21 percent. Westamerica's reserve for loan losses which is available to absorb loan losses was $11.5 million, or 1.24 percent of loans at Dec. 31, 1989. This compares with a reserve of $10 million, or 1.15 percent of loans at year end 1988.

Westamerica Bank is a regional community bank with 33 offices located in Marin, Sonoma, San Francisco, Contra Costa, Mendocino, Nevada, Sacramento

and Solano counties.

DENVER (JAN. 22) BUSINESS WIRE - Nevada Goldfields Corp. Monday reported an unaudited, after-tax profit of $741,000, or 8 cents per share, on revenues of $4,318,000 for the second quarter ended Dec. 31, 1989.

Gold sales for the quarter were 3,882 ounces.

During the six-month period ended Dec. 31, 1989, the company sold its excess gold price protection program for a gain of $2,276,000.

Nevada Goldfields converted one of its gold loans to a cash loan at a gold price of $381 per ounce, which resulted in a gain of $1,546,000. As a result of these transactions, at the end of the six-month period ended Dec. 31, 1989, the company had reduced its total loan debt by $3,204,000.

The company completed all feasibility studies during the quarter and applied for all permits for mining the Keystone gold deposit located at its Manhattan Project in Nye County, Nev. Earthmoving will commence immediately upon issuance of the mining permits, which is expected early in February 1990.

This will allow for start-up of the Kingston mill which has been on standby since August 1989.

Nevada Goldfields Corp. is a Canadian public company that trades on the Toronto Exchange under the symbol NGF, on NASDAQ under the symbol NGFCF, and on the Stuttgart Exchange, West Germany, under the symbol NGF SG.

SEATTLE (JAN. 22) BUSINESS WIRE - Microsoft Corp. Monday announced the Microsoft Excel Developer Program, which provides support for third-party developers and fosters the development of programmers interested in creating applications based on the Microsoft Windows, Apple Macintosh and OS/2 versions of Microsoft Excel.

The announcement was made Monday at the third annual Microsoft Excel Development Conference, held Jan. 22-24 in Seattle. Additional Microsoft Excel Development Conferences will be held Feb. 5-6 in New York and Feb. 19-20 in San Francisco. The conferences are aimed at providing corporate and independent developers with tools and techniques to help them develop custom applications in Microsoft Excel.

''Many programmers create applications using Microsoft Excel, and we want to provide a high-quality support program that includes important technical information as well as products and services specific to Microsoft Excel,'' said Pete Higgins, general manager for the Microsoft Analysis Business Unit.

Available in February 1990, the Microsoft Excel Development Kit includes Microsoft Excel Technical Reference guides and technical notes on topics such as Dynamic Data Exchange, MS-DOS memory issues, interoperability between the Macintosh, Windows, and OS/2 platforms and porting Lotus 1-2-3 macros to Microsoft Excel. Developers will also receive a disk of sample macros and C source code for reading and writing Microsoft Excel files. Using these tools and the powerful Microsoft Excel programming language, developers can create Microsoft Excel templates, add-ins and stand-alone applications which include custom menus and dialogue boxes.

Microsoft Corp. (NASDAQ: MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, CD-ROM products and hardware for the microcomputer marketplace.

SAN FRANCISCO (JAN. 22) BUSINESS WIRE - To celebrate its 70th anniversary, Qantas has introduced new low fares to Australia, according to J. Patrick Clark, vice president passenger sales, the Americas. These fares start from as low as $871 roundtrip to Australia.

The anniversary celebration values are 20 percent off Qantas' normal low fares and are for travel to the Australian cities of Sydney or Melbourne from West Coast gateway cities of San Francisco or Los Angeles. One stopover may be made in Honolulu at no extra cost.

For connections from Atlanta, Chicago, Dallas, Denver, Houston, New York, and Washington D.C. to San Francisco or Los Angeles there is a special add-on fare of $200 roundtrip on certain domestic carriers. Special connecting fares from other U.S. cities are also available.

These special anniversary fares, which are on sale now, are good for travel through 1990. Tickets must be purchased prior to June 30. Seats are limited and some restrictions apply.

The $871 anniversary fare, for example, is good for roundtrip travel commencing between May 1 through Aug. 31. The special fare for travel commencing in March, April, September, October and November is $1,034. The special fare for travel commencing February and December is $1,196.

Qantas' anniversary fares have prompted various tour operators to introduce a series of package tours. An example is a week-long vacation in Australia, including three nights in Sydney, two nights in Melbourne, transfers, and all breakfasts, starting from just $1,099 per person including air fare from San Francisco or Los Angeles.

There are a variety of other anniversary packages that include Australian destinations beyond Sydney and Melbourne and others that include such attractive holiday locations as New Zealand, Fiji, and Tahiti.

Qantas, founded in 1920 in Australia, is the oldest airline in the English-speaking world, yet it has the youngest fleet of aircraft operating in the South Pacific, with an average age of 7.5 years.

Qantas currently operates 19 Boeing 747 services per week from the United States and Canada to Australia and the South Pacific, more flights and more destinations than any other airline.

#90022b0105 01/22/1990 ~Business Wire

AMERICAN FORK, UT (JAN. 22) BUSINESS WIRE - Complement Corp. has achieved a major breakthrough in multimedia computer-based training (CBT).

Complement Corp.'s training uses video and audio digital compression technologies. These allow the access of real-time video and audio from software with no specialized computer hardware add-ons.

At present, the best CBT systems are in the laser disc environment and require add-on devices for video and audio presentation. Until Complement's breakthrough, laser video disc CBT was the state of the art technology.

Complement's new technology allows programs to be run on any IBM compatible 286 or faster system with a VGA display monitor thus eliminating the need for expensive hardware add-ons or custom built systems.

Because Complement's CBT courses have fully digital real-time motion and digital audio, information modules can be transmitted over any digital network, such as Novell network, digital satellite network, standard phone line, or can be delivered as stand alone software packages. (Existing laser disc technology is an analog program and is not transmissible over digital networks.)

Complement's new technology also cuts production time and cost significantly. Industry cost for 30 minutes of training range from $85,000 to $250,000 with a production time of 60 to 180 days. Complement has cut production cost to $30,000 to $70,000 per 30 minutes of training. Because of a revolutionary authoring language called "RAP," the development time is cut down to only seven to ten working days per 30 minute module.

Another major advantage to Complement's new technology is that updates for existing CBT modules can be made and modified in as little as one day. Existing laser technology requires one to two months for updates or changes.

Currently the training market alone for U.S. companies has been estimated to be over $40 billion. Complement Corp. expects its presence to be felt in this market due to the revolutionary nature of its product. Management expects short term funding needs to be met by February of this year to assist in the fulfillment of several contracts that have been recently awarded.

Marketing rights for Complement Corp. have been assigned exclusively to VIP COMLINK (OTC) a Salt Lake City-based telecommunication company.

#90022b0109 01/22/1990 ~Business Wire

TUCSON, AZ (JAN. 22) BUSINESS WIRE - Burr-Brown Corp. (NASDAQ:BBRC) announced sales of $169,470,000 for the year ended Dec.31, 1989, a decrease of 4.1 percent from 1988.

Net income for the year was $8,710,000, or 90 cents per share, compared to $11,549,000, or $1.19 for the previous year. Order bookings for the year declined 5.5 percent to $169,279,000.

Fourth quarter sales were $39,744,000, 4.7 percent less than the previous quarter and 9.3 percent below the corresponding quarter of 1988. Operating income for the fourth quarter was $4,095,000, an increase of 21.7 percent over the fourth quarter of 1988 and a decrease of 16.1 percent from the third quarter of 1989. Net income for the quarter was $1,571,000, or 16 cents per share, compared to $2,856,000, or 30 cents per share, in the fourth quarter of 1988. Order bookings for the quarter were $36,500,000, a decrease of 6.5 percent from the fourth quarter of 1988 and 2.7 percent below the immediately preceding third quarter.

''Burr-Brown's growth for 1989 was less than planned due to a unique set of circumstances,'' said Jim Burns, president and chief executive officer. ''For the first time in our company's history, a slowdown in demand for analog products is occuring simultaneously in all major markets around the world. The strong dollar unfavorably affected sales from international markets by approximately $7.5 million and lowered net income by approximately $2.8 million in 1989 compared to 1988, net of mitigating effect the strong dollar had on overseas costs converted to dollars. Virtually all of the shortfall in orders, sales, and profit can be attributed to our business in Japan where weakening demand, lower prices, and the strong dollar combined to produce a decline in total sales.

Burr-Brown Corp. is an international leader in precision microelectronics. The company's products range from high performance linear and date conversion integrated circuits to data collection systems and personal computer instrumentation. The company's integrated circuit components are used in analog and digital signal processing applications found in medical instrumentation, factory automation, automatic test equipment, process control, defense systems, and consumer products. The company's systems components are primarily used in data collection and communications applications for enterprise automation.

     #90022b0130 01/22/1990 ~Business Wire
SAN JOSE, CA (JAN. 22) BUSINESS WIRE - California Water Service Co. (NASDAQ:CWTR) Monday reported fourth-quarter earninsg of 50 cents per common share, up 6 cents from the prior year, as net income for the quarter increased 12 percent to $2,868,000.

Directors of the company meeting Monday in San Jose also announced an increase in the quarterly dividend on common shares from 42 cents to 43-1/2 cents. The new annual rate is $1.74 compared with the $1.68 paid in 1989.

C.H. Stump, president and chief executive officer, said that water rationing had affected revenue in the several districts during the year as water use declined. This was offset to a significant degree, he said, during an extremely dry period in November and December when water use increased over the prior year.

As a result, he said, net income for the total year was down only 2 percent from 1988 to $13,772,000 on revenue of $117,487,000. Earnings for the year were equal to $2.40 per share, a decline of 5 cents from the

$2.45 reported in 1988.

The increased quarterly dividend is payable Feb. 15, 1990, to shareholders of record Feb. 2, 1990. The regular dividend on preferred stock was also declared.

SARATOGA, CA (JAN. 22) BUSINESS WIRE - Western Micro Technology Inc. (NASDAQ National Market System--WSTM) reported sales of $19,483,000 for the third quarter of fiscal 1990, ended December 31, 1989, compared with $25,038,000 for the same quarter a year ago, a decrease of 22 percent. A net loss of $388,000 was reported for the quarter, equivalent to $.14 per share, compared with net earnings of $882,000 or $.30 per share, a year earlier.

Sales of $62,276,000 were recorded for the nine months ended December 31, 1989, a decrease of 18 percent compared to sales of $75,771,000 in the corresponding nine months a year ago. The net loss for the nine months was $384,000, or $.14 per share compared with net earnings of $2,451,000 or $.84 per share for the corresponding period last year.

Western Micro Technology, Inc. is a leading full service electronics distributor, specializing in components and systems products. The company also offers memory testing and burn-in facilities. It is a publicly-owned company traded on the NASDAQ National Market System under the symbol WSTM. Western Micro Technology, Inc. is headquartered in Saratoga, California with stocking locations in Saratoga, San Diego, and Orange, California; Beaverton, Oregon; Redmond, Washington; and Burlington, Massachusetts. Sales offices are located in Agoura Hills, California; Fairfield and Marlton, New Jersey; and Dallas, Texas. Reliability testing facilities are located in Santa Clara, California and Durham, North Carolina.

The Board of Directors of Western Micro Technology, Inc. has authorized management to purchase from time to time on the open market or through negotiated purchase, up to 100,000 shares of the company's common stock. A total of 2,814,359 shares of common stock is currently outstanding.

The shares acquired will become authorized but unissued shares, and would be available for various corporate purposes. The funds required for the stock purchases will be provided out of working capital. Twelve months was set for the completion of the program.

Marshall G. Cox, Chairman of the Board, said, ''The Company believes that the current market price of Western Micro Technology's common stock is substantially below the underlying value of the outstanding shares. The share repurchase program announced today represents a sound investment of company resources.''

#90022b0135 01/22/1990 ~Business Wire

PLEASANTON, CA (JAN. 22) BUSINESS WIRE - Mission-Valley Bancorp (NASDAQ: MVBC) holding company for Commercial Bank of Fremont, The Bank of Pleasanton, The Bank of San Ramon Valley, Lamorinda National Bank, and the Bank of Milpitas N.A., Monday announced record financial results.

Mission-Valley Bancorp had record earnings for 1989 of $3,831,000 compared to $2,004,000 for 1988, an increase of 91 percent. Earnings per share grew to $1.36 for 1989, up from $1.06 earned in 1988.

Earnings for the fourth quarter of 1989 were $1,046,000, up 81 percent from the $582,000 earned in 1988. Earnings per share were 35 cents in the fourth quarter of 1989 compared to 29 cents for the like period in 1988.

Return on average equity remained strong in 1989, increasing to 15.9 percent from 14.7 percent in 1988. Return on average assets in 1989 was 1.5 percent compared to 1.3 percent in 1988.

Total assets reached $304 million at Dec. 31, 1989, a 32 percent increase over Dec. 31, 1988 total assets of $230 million. Total loans were $226 million, an increase of $67 million or 42 percent and total deposits were $275 million, an increase of $66 million or 32 percent.

The quality of the loan portfolio remains excellent. Nonperforming loans as a percentage of total loans was a minimal .06 percent at Dec. 31, 1989 compared to .59 percent last year.

On Sept. 29, 1989, Mission-Valley Bancorp and Concord Commercial Bank announced the signing of a definitive agreement to merge Concord Commercial Bank with a subsidiary of Mission-Valley Bancorp. The merger is expected to be completed in March 1990.

"Mission-Valley Bancorp has had an excellent year of growth and profitability. Each of the banks contributed to the outstanding results," stated Joseph P. Colmery, president and chief executive officer of Mission-Valley Bancorp.

"Our expansion into Milpitas and the opening of our new Danville branch of The Bank of San Ramon Valley contributed to Mission-Valley Bancorp's growth in 1989. We were also pleased to pay our first cash dividend in 1989.

"We were also pleased to pay our first cash dividend in 1989 along with a 3-for-2 stock split in November. We anticipate continued growth in assets and profitability and look forward to the addition of Concord Commercial Bank."

GLENDORA, CA (JAN. 22) BUSINESS WIRE - J. T. Waller, president and chief executive officer of Foothill Independent Bancorp (NASDAQ/NMS:FOOT), reported a 50 percent increase in net earnings for the company in 1989. Waller said: ''The company achieved record earnings for the year of 1989 in the amount of $3,080,641, equal to $1.02 per share, as compared with $2,051,026, or 68 cents per share, for 1988. This 50 percent increase in earnings over 1988 is even more remarkable considering that 1988 was our previous all-time record year.

''The company plans to continue its growth strategy, which is to utilize capital generated by earnings to maximize shareholders' equity and potential long-term shareholder values.''

As previously announced, the company paid a cash dividend of 4 cents per share on Jan. 19, representing its eighth consecutive quarterly cash dividend.

Foothill Independent Bancorp, through its principal subsidiary, Foothill Independent Bank, operates eight full-service banking offices in Los Angeles and San Bernardino counties in California. Total assets were $214 million at Dec. 31, 1989.

#90022b0150 01/22/1990 ~Business Wire

LA MIRADA, CA (JAN. 22) BUSINESS WIRE - Genisco Technology Corp. (ASE:GES) Monday reported net income of $1.7 million, or 65 cents per share, on revenues of $34.7 million for the fiscal year ended Sept. 30, 1989.

The company added that its pre-tax year-end figures included a gain of $1.9 million on the sale of two product lines and proceeds of $740,000 from an insurance claim for rain damage which resulted in after-tax net income of $1 million, or 39 cents per share, and an extraordinary credit for utilization of tax-loss carryforward of $709,000, or 26 cents per share.

For the corresponding period a year ago, Genisco posted a net loss of $12.4 million, or $4.62 per share, on revenues of $29.1 million.

For the fourth quarter ended Sept. 30, 1989, Genisco reported net income of $1.5 million, or 55 cents per share, on revenues of $8.8 million. The net income included an extraordinary credit for utilization of a tax-loss carryforward of $622,000, or 23 cents per share, and a gain of $1.7 million on the sale of the company's Transducers Division located in Simi Valley.

The fourth-quarter results ended Sept. 30, 1989, compared to a net loss of $3.6 million, or $1.35 per share, on revenues of $5.7 million a year ago.

Fiscal year 1989 fourth-quarter results also included approximately $800,000 of cost overruns relating to a loss contract that was originally booked in fiscal 1987. The Sept. 30, 1989, financial statements contained provisions for all such loss contracts. As of Dec. 31, 1989, substantially all of these loss programs were completed.

In addition, Genisco said that its $740,000 insurance claim for rain damage included $346,000 for recovery of lost revenues and associated costs and $394,000 for the replacement value of damaged equipment.

Phillip C. Friedman, Genisco's chairman and chief executive officer, said: ''The company's 1989 balance sheet represents a significant improvement over the preceding year. Our auditors have given our financial statements an unqualified and clean opinion.

The company's backlog at Sept. 30, 1989, was $20.3 million, compared with $25.7 million at Sept. 30, 1988. The fiscal 1988 backlog included $5.4 million related to an IBM contract before termination on Oct. 12, 1988, and $1.9 million relating to two product lines that were sold during fiscal year 1989.

Genisco Technology Corp. is a computer peripherals, computer graphics and electronics manufacturer located in Southern California. Corporate offices are located at 14930 E. Alondra Boulevard, La Mirada, Calif. 90638.

#90022b0172 01/22/1990 ~Business Wire
NEWBURY PARK, CA (JAN. 22) BUSINESS WIRE - David C. Kravitz, president of HOH Water Technology (NASDAQ: HOHI) Monday said the company has completed two critical financings totalling $3.5 million, including a long-negotiated financing with the Economic Development Bank of Puerto Rico (EDBPR).

He said funds of approximately $2.5 million have been deposited in the company's accounts and a $1.0 million, five-year credit facility is now in place. Kravitz said that with the completion of these financing steps, the company will cancel other financing alternatives, the provisions of which were not as attractive.

"Our long wait is over," said Kravitz in making the announcement. "We now have the financial resources to finish outfitting our manufacturing facility in Ponce, Puerto Rico, and to commence production and distribution of our patented Electropure products. We also have funding sufficient to our current needs for additional product development and positioning activities."

The company completed a private placement of common stock with warrants aggregating $1.5 million, Kravitz said. Proceeds of this placement will be used for general working capital purposes.

The company also announced completion of stock purchase and loan agreements between HOH Water's Puerto Rican subsidiary, HOH International, and the Economic Development Bank of Puerto Rico. Under the agreement, EDBPR invested $1.0 million in the preferred equity of HOH International and has provided guarantees for 80 percent of a term loan of $1.0 million at 1 percent over the prime lending rate.

The term loan will be made to HOH International by the San Juan, Puerto Rico-based Banco Central Corp. through its San Juan office. Proceeds of the EDBPR investment and loan will be used to finish outfitting the company's Ponce manufacturing facility and to finance the initial manufacturing requirements of the company.

Kravitz said HOH Water has terminated its letter of intent, announced Sept. 6, 1989, with an international investment group. He indicated that certain key deadlines had been delayed by the group, and that terms of the proposed investment were no longer attractive to HOH in light of the recently completed financings.

As a result, Kravitz said, the six million shares of HOHI put into escrow pending the group's investment will be withdrawn by the company. "We expect to complete and install 20 beta-test Electropure units within the next several weeks and will commence manufacturing in Ponce within approximately 180 days, barring construction delays," he said.

#90022b0173 01/22/1990 ~Business Wire

LONGMONT, CO (JAN. 22) BUSINESS WIRE - MiniScribe Corp. (NASDAQ: MINQE) is pleased to announce that it has reached a new agreement in principal with its lending bank, Standard Chartered Bank of London, under which it will borrow the previously announced sum of $15 million in interim financing.

The agreement is subject to the negotiation of definitive documentation and

bankruptcy court approval. The bank has also agreed to permit the company to use the bank's cash collateral pending the negotiations.

The bank's first proposal to advance the funds was turned down by the bankruptcy court on Jan. 19, 1990, after two days of hearings, primarily on technical legal grounds. All of the participants in the hearing, including the trade creditors' and debentureholders' committees agreed on the company's need for the funds.

Promptly after the adverse ruling, the bank proposed an alternative plan for making the loan. Under the proposed agreement, the elements of the first loan proposal that were unacceptable to the bankruptcy court would be eliminated.

In return, the court would order a sale of the company's assets during March 1990 to the investor with the highest bid. At the time of the sale, the bank would have the right to bid up to the amount of its debt position which would then be $110 million. The company and the bank will be seeking bankruptcy court approval for the new terms on an expedited basis.

Richard P. Rifenburgh, chairman and chief executive officer of the company, said, "I am pleased with this favorable development and with the prompt and constructive response by the bank to the court's ruling. It demonstrates their desire to enable the company to maximize its going-concern value.

"I am confident that if all interested parties work together constructively, the company will obtain the interim financing. I recognize that the March time period is a short one in which to find a new investor, although the process of contacting potential investors was begun by Merrill Lynch several weeks ago.

"We stand ready on short notice to provide all of the information needed by an investor to make an informed bid for the company's assets. We are directing all of the interested parties to contact Merrill Lynch Capital Markets in New York."

MiniScribe is a high-volume supplier of technologically advanced high quality Winchester disk drives.

#90022b0177 01/22/1990 ~Business Wire

OAKLAND, CA (JAN. 22) BUSINESS WIRE - Golden West Financial Corp., parent of World Savings and Loan Association, announced Monday that 1989 reported earnings from all sources, amounted to $158 million, or $2.51 per share,

up 14 percent from the $2.20 per share of 1988.

At the same time, net income from core business activities set a new record of $142 million, or $2.26 per share, a 16 percent increase over 1988 earnings of $1.94 per share.

Significant gains were also realized in fourth quarter results. Reported earnings rose 12 percent of 65 cents per share, compared with 58 cents per share for the final three months of 1988. Additionally, core income for the last quarter increased, climbing 12 percent to 58 cents per share, up from the 52 cents per share posted one year ago.

Golden West is a savings and loan holding company with assets in excess of $19 billion. The company's principle subsidiary World Savings and Loan Association, headquartered in Oakland, currently has 114 authorized offices in that state, 61 in Colorado, 10 in Kansas and 7 in Texas.

A separate subsidiary, World Savings and Loan Association of Ohio, conducts business through 8 facilities, while a third subsidiary, World Savings and Loan Association of America, located in the state of Washington, operates 2 branches in the Seattle area. With a total of 202 approved offices, the Golden West system comprises one of the largest multi-state branch networks in the country.

The company's stock is listed on the New York, Pacific and Midwest Stock Exchanges under the ticker symbol GDW. Options on Golden West's stock are traded on the Philadelphia Options Exchange.

PHOENIX (JAN. 22) BUSINESS WIRE - Phelps Dodge Corporation today reported consolidated net income of $267.0 million ($7.46 per common share) for the year ended December 31, 1989. This amount includes income of $504.0 million ($14.08 per share) less a non-recurring af- ter-tax charge of $237.0 million ($6.62 per share) which was announced in December, primarily reflecting write-downs of certain non-producing assets. Results for the fourth quarter were a net loss of $140.7 million ($4.03 per share), comprised of income of $96.3 million ($2.76 per share) less the non-recurring after-tax charge of $237.0 million ($6.79 per share). The company reported net income of $420.2 million ($11.28 per share) and $140.6 million ($3.79 per share) in the 1988 year and fourth quarter, respectively. Per share amounts reflect average shares outstanding on a fully diluted basis for the respective periods.

Phelps Dodge is North America's largest producer of copper. The company is also the world's second largest producer of carbon blacks, the leading North American fabricator of steel wheels and rims for medium and heavy trucks and a major manufacturer of magnet and specialty wires, and has foreign investments in mines and wire and cable manufacturing facilities. The company's operations are located throughout the United States and in twenty-two foreign coun- tries.

     #90022b0188 01/22/1990 ~Business Wire
BEVERLY HILLS, CA (JAN. 22) BUSINESS WIRE - International Lease Finance Corp. (NASDAQ:ILFC) Monday announced record results for the fiscal year and fourth quarter ended Nov. 30, 1989.

For the 12-month period, total revenues reached a record $334.1 million, up 57 percent from the $213.2 million reported for fiscal year 1988. Pre-tax income in 1989 was $94.9 million, an all-time high. Net income for 1989 was $61.2 million, up 42 percent from the $43.4 million reported in the prior year.

After giving effect to the preferred dividend requirements, primary and fully diluted earnings per share were $1.57 and $1.56, respectively, in 1989 vs. $1.14 in 1988, gains of 38 percent and 37 percent, respectively. Average 1989 shares outstanding were 34,213,960 on a primary basis and 36,785,389 on a fully diluted basis vs. 32,452,283 and 35,027,672, respectively, in 1988.

This was an increase of 5 percent on both a primary and fully diluted

basis. The effective tax rate for 1989 was 35.5 percent against the year-earlier rate of 33.7 percent.

As of Nov. 30, 1989, shareholders' equity for the company reached $500.2 million compared with the 1988 year-end level of $350.5 million, a jump of 43 percent. Total assets at the end of 1989 were up 46 percent year to year to $2.58 billion.

For the three months ended Nov. 30, ILFC's revenues and earnings also reached all-time highs for any quarterly period. Quarterly revenues exceeded the $100 million mark for the first time, climbing to $107 million, up a strong 70 percent from the 1988 fourth-quarter level of $62.8 million. Net income for the period more than doubled to $28 million from $12.2 million, a gain of 130 percent.

Equivalent earnings per share on a primary basis rose 128 percent to 73 cents from 32 cents reported in 1988's fourth quarter.

For both the full year and fourth quarter, the year-over-year revenue gains by segment were substantial across the board. Revenues from the company's primary segment -- flight equipment rentals -- reached $249.5 million in fiscal 1989, up 56 percent from the $159.9 million in respective 1988 sales.

This gain reflected three factors: a 53 percent rise in the number of aircraft under operating lease at year end from 49 in 1988 to 75 in 1989; a higher average value of aircraft in the fleet; and a stronger leasing market yielding higher rental rates. Comparable fourth-quarter operating lease revenues climbed 59 percent to $71.1 million vs. $44.6 million in 1989 and 1988, respectively.

Revenue attributable to remarketing of flight equipment grew 49 percent to $53 million in 1989 from the previous year's $35.6 million, primarily reflecting the sale of 12 planes during the year. Remarketing revenues in the fourth quarter were particularly strong at $24.9 million, up 11 percent from 1988's $11.4 million.

Interest and other revenues in 1989 advanced to $31.6 million vs. $17.7 million in 1988, up 79 percent.

The robust results during 1989 were achieved not only on the revenue side, as described, but also from the effect of declining interest rates over the last half of the year and by careful management of the company's debt structure. The spread between increased operating lease rentals and interest costs in 1989 vs. 1988 was a positive $28.4 million.

The comparable 1988 vs. 1987 spread was only $1.8 million. At Nov. 30, debt financing reached $1.8 billion with a composite interest rate of 8.8

percent vs. the 1988 levels of $1.247 billion and 8.86 percent. At year end, 70 percent of ILFC's total debt was at fixed rates.

''If 1988 was a year of positioning for the future, with our major $5 billion order, then 1989 could certainly be called the 'Year of Placements ' '' said ILFC Chairman and Chief Executive Officer Leslie L. Gonda. ''During the year, we signed contracts for an all-time high 35 new planes and 18 used planes on operating leases with 20 airlines in 16 countries,'' he added.

''We are very gratified by our financial, operating and stock market performance in 1989,'' added Steven F. Udvar-Hazy, ILFC president. ''But we take even greater satisfaction and comfort from the current industry and financial trends, which, combined with our exceptionally strong strategic positioning, should ensure ILFC's future successes. We remain tremendously confident about the company's business fortunes.''

Based in Beverly Hills, International Lease Finance Corp. is the world's premier operating lessor and remarketer of advanced-technology commercial jet aircraft with a current fleet of 83 planes valued at $3 billion.

SAN FRANCISCO (JAN. 22) BUSINESS WIRE - Two San Francisco ad executives, Nancy Meyers and Cheryl Curbow, have joined Young & Rubicam San Francisco as vice presidents.

Each is taking on a key role with the agency's 1st Nationwide Bank account -- Meyers as management supervisor and Curbow as brand planner.

Meyers, 38, was most recently vice president, management supervisor, at Foote, Cone & Belding in San Francisco. She has also held positions with PG&E in San Francisco and General Mills in Minneapolis.

She holds a bachelor's degree from the University of California, Davis, and an M.B.A. from the University of California, Berkeley.

The former deputy director of research and planning at Foote, Cone & Belding in San Francisco, Curbow, 42, has also performed major marketing and research duties at Bank of America, Levi Strauss & Co., S&O Consultants, and Yankelovich, Skelly & White. She is a graduate of Mount Holyoke College.

Last fall's addition of 1st Nationwide Bank to Y&R San Francisco's client roster, along with a steady rise in other client business during 1989, has

made the firm one of the fastest-growing profit centers in Y&R's global network of 256 offices.

SAN FRANCISCO (JAN. 22) BUSINESS WIRE - Grubb & Ellis Realty Income Trust (NASDAQ:GRIT) Monday announced that its board of directors has approved a plan for the liquidation and dissolution of the company.

Under the plan, which is subject to shareholder approval, the company would sell or otherwise dispose of all of its investments and distribute the proceeds to shareholders.

In addition, the company has entered into a letter of intent to sell its Livermore Arcade Shopping Center and has commenced the active marketing of its other investments. The company is obtaining current appraisals on the investments and will attempt to sell them for amounts which are at least equal to their appraised values.

The board of directors considered various alternatives but concluded that liquidation was the most desirable.

The company had reported in December that it was considering various alternatives regarding the use of the $6.2 million in proceeds from the repayment of the loan on the Moss Creek Apartments including liquidation. The distribution of the Moss Creek loan proceeds would be part of the liquidation proceeds if the plan is approved by shareholders.

The company also declared a per share dividend of 18 cents payable Feb. 16 to shareholders of record Feb. 2.

Grubb & Ellis Realty Income Trust is advised by Grubb & Ellis Realty Advisers Inc., a wholly owned subsidiary of Grubb & Ellis Co., one of the nation's largest real estate services firms. Shares of REIT are traded on the NASDAQ/NMS under the symbol GRIT. Warrants of the REIT are also trade on the NASDAQ under the symbol GRITW.

#90022b0213 01/22/1990 ~Business Wire

SHELTON, CT (JAN. 22) BUSINESS WIRE - Frank J. Kugler Jr., chairman of

Northeast Bancorp Inc. and its banking subsidiary, Union Trust Co., reiterated that the capital position of Northeast remains strong and that Northeast intended to vigorously pursue consummation of its previously agreed to merger with The Bank of New York Company Inc.

Commenting on Northeast's capital position, Kugler indicated Northeast Bancorp remains especially well capitalized with year-end 1989 capital of $254,081,000 representing a capital-to-asset ratio of 7.3 percent.

This is after a previously announced special provision of $58 million for the fourth quarter, which increased the bank's loan loss reserve to $50 million, or 2.07 percent of total loans and 82.7 percent of total non-performing assets.

Kugler noted that after the effect of these adjustments, year-end primary book value as reflected in the Northeast audited 1989 financial statements was $34.90.

As previously announced, Price Waterhouse has, as of Dec. 31, 1989, rendered an unqualified opinion with respect to Northeast's 1989 financial statements. As part of this examination, an expanded evaluation of the adequacy of Northeast's reserve for possible loan losses was performed.

Regarding its merger agreement with Bank of New York, Kugler on Monday reiterated Northeast's intention to pursue consummation of the merger. As set forth in the agreement, Northeast shareholders would receive 2.5x book value at the time of consummation of the merger.

Kugler further commented that, unfortunately, given the amount of bad news coming out of New England regarding reduced earnings caused by loan problems, Northeast Bancorp's strong financial position is being overlooked. He feels the company is well positioned to deal with the uncertain financial climate in Connecticut.

#90022b0223 01/22/1990 ~Business Wire

PORTLAND, OR (JAN. 22) BUSINESS WIRE - Precision Castparts Corp. (NYSE:PCP) Monday reported lower sales and earnings for the quarter and for the nine months ended Dec. 31, 1989.

E.H. Cooley, board chairman and chief executive officer of the Portland-based manufacturer of investment castings for the aerospace, industrial turbine and health care industries, said that sales for the quarter decreased 4 percent to $104.2 million, down from $108.2 million in the prior year's third quarter. Net income for the quarter amounted to

$5.4 million, or 31 cents per share, down 25 percent from $7.2 million, or 43 cents per share, for the same period last year.

For the first three quarters of fiscal 1990, sales amounted to $326.7 million, off less than 1 percent from the prior year's $328.1 million. Net income declined 11 percent to $20.3 million, or $1.19 per share, from $22.7 million, or $1.35 per share, earned in the first nine months one year earlier.

In reporting quarterly results today, Cooley said that the reductions in sales for the quarter and for the first nine months were a result of a seven-week strike at The Boeing Co. which resulted in production stretchouts by the company's major customers.

''During the quarter, our Large Structurals Business Operation in Oregon was closed for nine days, and production was curtailed to a lesser degree in our other facilities,'' Cooley said. He also stated that, during the quarter, costs related to the development of new parts continued to be high at both of the company's divisions, but that the price of nickel continued to decline from prior historic highs.

The backlog of orders at Dec. 31, 1989, amounted to $476.3 million, up 7 percent from $447.0 million one year earlier, a new record for the company.

MILPITAS, CA (JAN. 22) BUSINESS WIRE - Adaptec (NASDAQ:ADPT) today announced financial results for its third fiscal quarter ended Dec. 29.

Revenues during the quarter were $28,979,000, an 86 percent increase from $15,607,000 for the like period last year. Net income was $3,864,000, a 1,656 percent increase from $220,000 for the like period last year.

Earnings per share were 45 cents, a 1,400 percent increase from 3 cents for the like period last year even though common share equivalents increased from 7,607,000 to 8,636,000 resulting in a dilutive impact of 6 cents per share.

''Adaptec's fourth consecutive quarter of record revenues reflects our design win successes and the increasing demand for our SCSI and AT products by peripheral, microcomputer and workstation manufacturers. The accelerating acceptance of SCSI, which was pioneered by Adaptec, is providing us with significant opportunities,'' stated John G. Adler, president and chief executive officer.

''New opportunities for growth and continued market leadership are fueled by our commitment to product development, as demonstrated by our complete family of single-chip controllers and recently announced EISA host adapter.''

''Adaptec has now achieved three consecutive quarters of record earnings, extending our record of profitability to twenty-two quarters,'' said Paul G. Hansen, Adaptec's chief financial officer.

''Working capital management and improving profitability increased Adaptec's cash balance. However, expected revenue growth, its related working capital requirements and budgeted capital expenditures will reduce cash balances in the future.''

Adaptec is a leading supplier of high-performance Input/Output (I/O) solutions. Products include proprietary VLSI circuits, a broad line of high-performance AT and Micro Channel controllers, SCSI-based host adapters, a family of SCSI test and development systems, a SCSI LAN interface unit, and a recently introduced family of laser printer controllers.

#90022b0236 01/22/1990 ~Business Wire

SALT LAKE CITY (JAN. 22) BUSINESS WIRE - Directors of First Security Corp. (OTC/NASDAQ: FSCO) Monday declared a regular quarterly cash dividend of 32 cents per common share.

Spencer F. Eccles, the corporation's chairman and chief executive officer, said the dividend is payable March 5, to shareholders of record Feb. 16. The dividend is now equivalent to $1.28 per share on an annual basis.

First Security Corp. has previously reported 1989 earnings of $43.14 million, the second highest in the history of First Security and an increase of $10.10 million from 1988's $33.04 million. Income on a fully diluted basis was $3.28 per common share in 1989 and $2.58 in 1988.

Net income, which has increased for five consecutive quarters, totaled $11.56 million in the fourth quarter, compared with $8.85 million earned in the like 1988 period. a 30.7 percent increase. On a fully diluted basis, net income earned per common share was 87 cents vs. 69 cents in 1988's fourth quarter.

In other board action, the directors elected a new First Security Corp. director. He is Curtis T. Eaton, Twin Falls, formerly chairman and chief

executive officer of Twin Falls Bank & Trust Co., a bank which First Security recently acquired.

Eaton has served as chairman and chief executive officer of the $190 million asset Twin Falls bank since 1972 and has been a director of the bank since 1965.

First Security Corp. is the largest financial services organization headquartered in the Intermountain region. The corporation operates 166 banking offices in Utah, Idaho and Wyoming. Other subsidiaries include a leasing company, an investment management firm, two insurance companies and a discount brokerage operation.

MILWAUKEE (JAN. 22) BUSINESS WIRE - Federated Financial Savings and Loan Association (NASDAQ/OTC:FEDF) Monday announced net income for the first quarter ended Dec. 31, 1989, of $54,000, or 4 cents per share.

This compares with a loss of $445,000, or 33 cents per share in the preceding quarter ended Sept. 30, 1989. Net income for the first quarter of the prior fiscal year was $257,000, or 19 cents per share. The decrease from the prior year is primarily due to a lower net interest spread.

Net interest income for the first quarter of fiscal 1990 was $1.7 million vs. $2 million for the same period in fiscal 1989. The corresponding net interest spread was 1.61 percent compared with 2.21 percent for the fiscal 1989 first quarter, but up from 1.51 percent reported for the last three months of fiscal 1989.

Because Federated has more interest earning assets than interest bearing liabilities, its net interest margin was 2.28 percent for the first quarter of 1990.

Core income (pre-tax income excluding nonrecurring gains or expenses) for Federated was $117,000 for the first quarter of 1990, the first profitable quarter since Dec. 31, 1988.

Total assets of the association stood at $301 million as of Dec. 31, 1989, a 4 percent decline from the preceding quarter due principally to the sale of loans and a reduction in debt. Stockholders' equity was $21.5 million, or $15.58 per share, which represented a net worth to asset ratio of 7.1 percent as of Dec. 31, 1989.

Federated previously announced the signing of an agreement calling for Hopkins Savings and Loan to merge into Federated. It is expected the merger will be completed by mid-1990. Federated Financial Savings has 10 branch offices in southeastern Wisconsin.

REDWOOD CITY, CA (JAN. 22) BUSINESS WIRE - FAFCO Inc., the nation's oldest and largest manufacturer of domestic solar heating systems, Monday announced signing a 10-year lease on a new and substantially larger manufacturing facility in Redwood City.

The company will move from its 24,000 square foot facility in Menlo Park by Feb. 28. The new 42,500 square foot facility in Redwood City will allow the company to consolidate its operations in addition to supplying needed space to accommodate growth in both the solar and off-peak air conditioning businesses.

Freeman Ford, FAFCO's president, stated, ''FAFCO's move to its larger facilities will substantially improve efficiency as we combine facilities separated by almost two miles.''

HOUSTON (JAN. 22) BUSINESS WIRE - Tenneco Inc. Monday announced the opening of its Tenneco Minerals unit Fondaway gold mine northeast of

Fallon, Nev.

The Phase I project is a heap leach operation expected to produce 12,000 ounces of gold per year during its two- to three-year mine life. Exploration and evaluation are continuing on Phase II in the same area, which has the potential for a much larger ore reserve.

Tenneco also announced the acquisition of the Golden Dome property near Loyalton, Calif., from Hecla Mining Co. of Coeur d'Alene, Idaho. Tenneco will proceed immediately to begin permitting this property. It is expected to be a small heap leach gold operation with a three- to four-year mine life producing gold in the 30,000-40,000 ounce per year range.

''We're pleased to be able to continue the growth of Tenneco's gold mining business units with the Golden Dome project,'' said David R. Delling, president of Tenneco Minerals Company. ''Permitting and development activities have already started and additional exploration is planned which should increase the reserve base. Beyond Golden Dome we have a number of promising exploration projects underway which are likely to lead to other new mines in the future.''

R. A. Hodgson is vice president for precious metals development and operations. K. D. Cunningham is vice president of exploration at the company's exploration office in Reno, Nevada.

Tenneco Minerals Co. has headquarters in Lakewood, Colo. Tenneco Inc. is a Houston-based diversified industrial corporation with major business interests in natural gas pipelines, agricultural and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

MILPITAS, CA (JAN. 22) BUSINESS WIRE - ADAC Laboratories (NASDAQ:ADAC), a leading producer of medical imaging and information products, Monday announced that on Friday, Jan. 19, 1990, the company was served with a class-action lawsuit alleging violations of federal and state security laws.

The complaint generally alleges that the company's reporting was inaccurate for the period Feb. 14, 1989 through Jan. 3, 1990. The lawsuit seeks unspecified damages. The case was filed in the United States District Court, Northern District of California, San Jose Division.

In addition to naming the company as a defendant, the lawsuit names two executive officers of the company as defendants.

Based upon its initial review of the complaint, the company believes the lawsuit is without merit and intends vigorously to defend the action.

ADAC Laboratories, with headquarters in Milpitas, designs, manufactures, markets and services medical imaging and information products worldwide.

#90022b0277 01/22/1990 ~Business Wire

SANTA ROSA, CA (JAN. 23) BUSINESS WIRE - American Home Shield Corp. (NASDAQ: AHSCL) announced Monday results for the year and fourth quarter ended Dec. 31, 1989.

The nation's leading home service company reported net earnings for the 12 months of $8.5 million as compared to 1988's $4.8 million. Earnings in 1989 before income taxes were $13.1 million compared to $7.3 million in 1988, an increase of 80 percent.

In connection with the company's merger (completed on Oct. 27, 1989) with a subsidiary of ServiceMaster Limited Partnership, AHS stockholders received $9.50 in cash and Contingent Payment Rights worth up to $3.50 if the company meets specific earnings targets for the last half of 1989 and for the calendar years 1990-1992.

Based on unaudited results for the last half of 1989, AHS achieved the earnings target for 1989. Accordingly, the payment of 50 cents per share will be paid on May 1, 1990 to CPR holders of record on April 15, 1990.

AHS gross contracts written in 1989 increased three percent to $65.5 million compared to $63.7 million. Contract revenue increased 17 percent to $63.1 million from $53.7 million the prior year.

The ratio of AHS's net direct contract costs to contract revenue declined over the 12 months to 37 percent compared to 46 percent in 1988. General, selling and administrative expenses as a percentage of contract revenue for 1989 moved up to 49 percent from the previous year's 45 percent.

The increase in GS&A is primarily due, for both the year and the fourth quarter of 1989, to one-time charges associated with the merger with a subsidiary of ServiceMaster and the consolidation of the company's service facilities to a new high-tech center in Iowa.

For the fourth quarter alone, the company reported net earnings of $880,000

as compared to 1988's $1.3 million. Earnings before income taxes for the period were $1.4 million vs. $1.9 million in the fourth quarter of 1988, after one-time charges of approximately $2 million due to the cancellation of stock options in connection with the merger with a subsidiary of ServiceMaster and approximately $1.1 million associated with the consolidation of the company's service facilities.

AHS gross contracts written in the fourth quarter remained at $15.7 million. Contract revenue increased 15 percent to $16.5 million from $14.4 million in the like period last year.

#90022b0298 01/22/1990 ~Business Wire

SAN DIEGO (JAN. 23) BUSINESS WIRE - Unaudited earnings applicable to common shares for 1989 were $175.9 million, or $3.15 per share, announced the San Diego Gas & Electric Co. board of directors Monday.

In 1988, earnings applicable to common shares were $177.6 million, or $3.18 per share. The decrease for the 12 months ended Dec. 31, 1989, was due primarily to the Public Utilities Commission's February 1989 decision to disallow the utility $25 million of costs to import power over the Southwest Powerlink. In addition, earnings decreased as a result of the lower return on common equity authorized by the commission.

However, these factors were largely offset by other, favorable events in 1989 that reduced the net decline to only 3 cents. This included an increase in sales that are not subject to regulatory balancing accounts and the improved earnings of SDG&E's subsidiaries.

Operating revenues and operating expenses remained at $2.1 billion and $1.8 billion, respectively, for the 12-month period ended Dec. 31, 1989.

For the fourth quarter of 1989, earnings of $51.8 million, or 93 cents per share, were up compared with $44.5 million, or 80 cents per share, for the like quarter in 1988. The increase in sales that are not subject to regulatory balancing accounts was the primary cause of the increase.

Operating revenues in the fourth quarter were $577.8 million, a 9.9 percent increase from $525.9 million for the like quarter in 1988. Operating expenses were $505.0 million, up 12.4 percent from $449.3 million for the fourth quarter of 1988.

#90022b0330 01/22/1990 ~Business Wire

BOULDER, CO (JAN. 23) BUSINESS WIRE - Exabyte Corp. (NASDAQ: EXBT) Monday reported net income for the year ended Dec. 30, 1989 of $13,614,000, or 72

cents per share, a 412 percent increase from net income of $2,658,000, or 15 cents per share, for the previous year.

Included in net income were extraordinary gains from the utilization of income tax carryforwards of $1,250,000 and $909,000 for 1989, and 1988, respectively. Revenues for the 1989 period were $88,655,000, an increase of 184 percent over revenues of $31,174,000 for 1988.

For the quarter ended Dec. 30, 1989, the company reported net income of $5,004,0000, or 25 cents per share. Net income for the comparable period in the previous year was $2,477,000, or 14 cents per share, which included extraordinary gains from the utilization of income tax carryforwards of $841,000, or five cents per share. Fourth quarter revenues increased by 133 percent to $31,233,000 from $13,413,000 for the like period last year.

Commenting on the results, Peter D. Behrendt, president, stated: "Exabyte's fourth quarter results, representing the 11th consecutive quarterly revenue increase, complete a highly successful year for the company which included the fourth quarter initial public offering and the introduction of several additional state-of-the-art products.

"Our EXB-8200 8mm Cartridge Tape Subsystem retains its strength in all markets and distribution channels with particular growth in the important original equipment manufacturers (OEM) segment, which accounted for 37 percent of shipments during the fourth quarter of 1989, up from 11 percent at the end of 1988."

Exabyte Corp. develops, manufactures and markets high capacity 8mm cartridge tape subsystems which are used primarily with workstations, network file servers and minicomputers.

SANTA BARBARA, CA (JAN. 22) BUSINESS WIRE - CMC, a subsidiary of Rockwell International Corp., announced general customer availability of its first VMEbus FDDI network interfaces.

The CMC-1050 series delivers the highest FDDI performance in the industry, at the most aggressive price, while providing dual and single attachments to the FDDI ring and full Station Management (SMT) compatability.

Priced at less than $10,000, the CMC-1055 single ring attachment interface and the CMC-1056 dual ring attachment interface implement CMC's exclusive FXP architecture. The FXP implementation provides full throughput on the FDDI network and the VMEbus interface.

The products incorporate a 25 MHz AMD 29000 RISC microprocessor, a non-blocking architecture with multiple internal buses, 512 Kbytes of DRAM for protocol execution and 512 Kbytes of Video RAM for packet processing. The architecture enables protocol processing and VMEbus and network transfers to occur simultaneously.

The CMC-1056 interface provides two physical connections to the FDDI optical fiber, offering true FDDI connectivity to the network ring. CMC also is making available the CMC-1055, an FDDI card with a single physical connection that attaches to the ring network via a wiring concentrator.

The interfaces have been available until now only through CMC's FDDI Forerunners' Program, which packages the hardware with software, support and training.

CMC, founded in 1981, is a leading supplier of high-performance networking solutions based on the industry standards TCP/IP, OSI, Ethernet and FDDI. OEMs and system integrators can offer their customers multisystem network support through the use of CMC's TCP/IP and OSI software, and high-performance network processors for various computer bus architectures.

#90022b0612 01/22/1990 ~Business Wire

FREMONT, CA (JAN. 22) BUSINESS WIRE - Lam Research Corp. (NASDAQ/NMS:LRCX) Monday announced net income of $2.3 million, or 20 cents per share, for the second quarter ended Dec. 31, compared with net income of $2.4 million, or 22 cents per share, for the like period of fiscal 1989.

The company reported sales of $35.7 million, a 12.3 percent increase over last year's sales of $31.8 million.

For the six months ended Dec. 31, Lam reported net income of $4.7 million, or 40 cents per share, on sales of $73.1 million, compared with net income of $4.1 million, or 38 cents per share, on sales of $58.2 million during the first six months of the previous year.

The increase in second quarter sales is primarily attributable to market share gains made by Lam's Gemini-3 and TETRON advanced epitaxy products. The slight decrease in net income and earnings per share for the second quarter reflects a higher fiscal tax rate and a greater number of shares outstanding.

As predicted, Lam's order rate during the second quarter showed slight

improvement from first quarter levels, but remains supressed due to overall market softness. Fiscal 1990 third- and fourth-quarter results will continue to be dependent upon market conditions, and as previously announced, could potentially be lower than those of the like period a year ago.

Several important milestones highlighted Lam's second fiscal quarter. The company shipped the first repeat orders for the TETRON reactors into production environments, while follow-on Gemini-3 systems were delivered to customers for advanced DRAM applications. This combination of product penetration has significantly increased Lam's share of the epi market.

Also during the second quarter, the company shipped its second electron cyclotron resonance (ECR) system. Lam has identified ECR technology as critical to the production of next generation devices.

Lam's commitment to ECR technology was endorsed by SEMATECH, the U.S. industry consortium, with the award of a Joint Development Program (JDP) contract. This represents the second major SEMATECH contract awarded to Lam in recent months.

The substantial JDP contract will fuel the development of a domestically designed and manufactured chemical vapor deposition (CVD) system utilizing critical ECR technology. SEMATECH has disclosed that ECR technology is essential to the success of its Phase III program and its primary goal of improving the competitiveness of U.S. device manufacturing companies.

''We have successfully diversified our product line while maintaining our focus on this film technology,'' commented Roger Emerick, Lam's chairman and chief executive officer. ''This ECR CVD program fully complements our core technologies of etch, epitaxy and CVD. We are extremely pleased by the receipt of the SEMATECH contract, allowing us to accelerate our ECR program.''

In parallel to this ECR CVD program and Lam's emphasis on integrated processing, the company's organization has evolved to a functional structure with product line emphasis. The realignment allows Lam to fully optimize its resources throughout all departments to take advantage of the market opportunities presented by future thin film management requirements.

Lam Research Corp. is a leading supplier of wafer processing equipment for the worldwide semiconductor industry. The company's broad product offerings are singularly focused on thin film management, one of the most vital areas in the fabrication of current and future integrated circuits.

Serving as the foundation for this focus, Lam has developed core technologies encompassing etch, epitaxy, CVD and ECR disciplines. Founded in 1980, Lam Research is publicly held and listed on the NASDAQ National

Market System under the symbol LRCX.

With headquarters in Fremont, Lam maintains customer support centers strategically located throughout the United States, Europe and Pacific Rim to support its global customer base. -0-

#90022b0615 01/22/1990 ~Business Wire

LYNNWOOD, WA (JAN. 22) BUSINESS WIRE - Ralph V. Schapler, chairman and chief executive officer of Pioneer Federal Savings Bank, Lynnwood, Monday reported the bank's results for the three and 12 months ended Dec. 31, 1989.

Pioneer Bank converted to stock ownership on July 13, 1989, and trades on the NASDAQ National Market System under the symbol PFBK.

Net income for the three months ended Dec. 31, 1989, increased to $1,772,000, or 63 cents per share, substantially more than the $490,000 reported for the same period in 1988.

Based primarily on the quarterly earnings, the board of directors declared a dividend of 20 cents per share to stockholders of record Jan. 12, 1990, payable on Jan. 26, 1990.

Net income for the three month period ended Dec. 31, 1989, includes a one-time charge resulting from the implementation of OTS Supervisory Bulletin 89-16 governing the accounting for excess servicing premiums. Excluding the impact of that charge, net income for the quarter would have been $2,036,000. This represents a 12 percent increase over the earnings reported for the quarter ended Sept. 30, 1989, of $1,811,000, excluding the impact of the restructuring of investments and borrowings.

Net income for the 12 months ended Dec. 31, 1989, was a loss of $1,417,000 compared to income of $4,414,000 for the same period in 1988. Net income,

not including the one-time effects of restructuring and management recognition plan, was $5,738,000 for the 12 months ended Dec. 31, 1989.

The 30 percent increase in net income, not including the effects of the one-time events, over the previous year was principally composed of a $2,002,000 increase in net interest income, resulting from larger portfolio balances and an increase in the net interest margin, and a $2,336,000 increase in income from real estate operations, resulting from an increase in residential lot sales in the bank's subsidiary. Due principally to the implementation of new accounting rules for loan fees (SFAS 91), which require loan fees collected to be amortized over the life of the loan, loan fee income decreased by $1,911,000. Sales of investments during the 1988 period resulted in gains of approximately $567,000, which were not repeated during the 1989 period.

SANTA CLARA, CA (JAN. 22) BUSINESS WIRE - Networked Picture Systems Inc. (NASDAQ:NPSIU, NPSI, NPSIW), a supplier of high resolution color processing and page layout systems to the professional color printing industry, Monday announced preliminary sales results of approximately $1,750,000 for the year ended Dec. 31, 1989.

This compares with sales of $646,860 for the previous year. Revenues for the fiscal quarter ended Dec. 31, 1989 were approximately $750,000, as compared to sales of $363,534 in the corresponding period last year. The company's complete results for the year are not yet available, but material losses both for the fiscal quarter and for the year are expected.

Frank S. Greene Jr., president of NPS, reiterated earlier statements regarding the increasing sales activity for the first three fiscal quarters of 1989, during which the company's revenues were $227,905, $304,382 and $469,852, respectively, followed by approximately $750,000 in the fourth quarter.

''We're encouraged that our sales continue to increase, but our short term challenge will be to reach profitability in this new fiscal year,'' commented Greene. ''We believe that NPS offers a cost-effective production tool for our growing customer base of commercial trade shops and their clients in the color publishing marketplace.''

NPS has the largest installed base of microcomputer-based color prepress workstations. PAGE EXPRESS, the company's core product, comes standard with photo retouching, image assembly, color correction and page makeup

software. Images can be input via high-end scanners, such as HELL, SCITEX and CROSFIELD, and any DDES-compatible scanner.

Both images and multipage documents output to similarly high-end equipment as well as to affordable film recorders like Optronics' ColorSetter 2000 for processing commercial-quality films. PAGE EXPRESS also accepts PostScript language files created on both Macintosh- and PC-based desktop publishing systems, bridging the gap between DTP systems and high-end prepress systems.

PORTLAND, OR (JAN. 22) BUSINESS WIRE - Sequent Computer Systems Inc. Monday reported revenues of $145.6 million for the year ended Dec. 30, 1989.

This represents a 91 percent increase over the $76.1 million in revenues for 1988. Net income for the year totaled $16 million, or 82 cents per share. This is a 147 percent increase over the $6.5 million, or 40 cents per share in 1988.

Included in net income are extraordinary credits related to the tax benefit of utilizing net operating loss carry-forwards of $2.3 million, or 12 cents per share in 1989, and $948,000, or 6 cents per share in 1988.

For the fourth quarter, ended Dec. 30, 1989, the company reported revenues of $47.8 million, a 98 percent increase over the corresponding quarter in 1988, and an 18 percent increase over third-quarter 1989 revenues, which were $40.4 million. Net income for the quarter totaled $5 million, or 24 cents per share, compared to $2.2 million, or 13 cents per share, for the fourth quarter of 1988.

Net income for the current quarter included extraordinary credits related to the tax benefit of utilizing net operating loss carry-forwards of $163,000, or 1 cent per share. This compares to $328,000, or 2 cents per share for the like quarter in 1988.

Sequent Computer Systems is a leading supplier of UNIX-based, parallel computers for both commercial and technical database applications. Since the launch of its parallel processor family in 1984, Sequent has installed more than 2,000 systems worldwide.

SANTA MONICA, CA (JAN. 22) BUSINESS WIRE - National Medical Enterprises Inc. (NYSE/PSE/LONDON: NME) through its Psychiatric Institutes of America (PIA) subsidiary, Monday announced the acquisition of an 80-bed behavioral and mental health center in Yorba Linda, Calif., from St. Joseph Health Systems of Orange, Calif.

Terms were not disclosed.

PIA will begin operation of the newly converted freestanding psychiatric facility in early February.

In discussing the project, Norman A. Zober, president and chief executive officer of NME's Specialty Hospital Group, noted, ''PIA remains committed to rendering the finest in patient care by offering quality clinical programs and by developing outside working relationships with the medical community, local service agencies and health care professionals.''

Located 30 miles from Los Angeles, Yorba Hills Hospital, formerly St. Jude Hospital Yorba Linda, will provide a psychiatric component to NME's existing health care services at nearby Placentia-Linda Community Hospital.

The newly acquired facility will initially employ 60 people and contribute an estimated $2 million in local revenues annually through salaries, wages and benefits.

The addition of Yorba Hills Hospital brings the total number of operating PIA freestanding psychiatric facilities to 63 with another 11 currently approved or under construction.

National Medical Enterprises, one of the nation's largest health care services companies, owns, operates and manages more than 500 acute, psychiatric, and physical rehabilitative hospitals, long-term care facilities and substance abuse treatment centers throughout the United States and internationally.

PETALUMA, CA (JAN. 22) BUSINESS WIRE - Optilink Corp. and DSC Communications Corp. Monday announced the signing of a letter of intent providing for the acquisition of Optilink by DSC in exchange for shares of DSC common stock.

The acquisition is expected to be accomplished by means of a merger between Optilink and a wholly owned subsidiary of DSC. In the merger, all shareholders and other security holders of Optilink will receive shares of DSC common stock according to a formula agreed upon in the letter of intent.

A definitive agreement is expected to be signed on or about March 1, 1990. Subject to obtaining all requisite governmental and Optilink shareholder approvals, closing is expected to occur during July 1990.

Final transaction share count will be based upon, among certain other things, the average closing price of DSC common stock for the 30 trading days preceding the closing. The acquisition value is estimated to be approximately $55 million.

DSC's chairman and chief executive officer, James L. Donald, stated that, ''As a leading supplier of intelligent network systems products to the public network, it is a natural progression for DSC to expand its market penetration outward from the local exchange carrier (LEC) central office. With this acquisition, DSC will have entered the digital loop carrier marketplace.

As a result, we will broaden our ability to address the requirements and opportunities that are being created by the RBOCs and the other LECs in the digital loop segment of the telecommunications market.''

With Optilink's strong fiber optic and SONET oriented product offering, Litespan-2000, being marketed in combination with DSC's leading family of intelligent network system products, we are positioned to be a leader in this important area.''

With headquarters in Petaluma, Optilink Corp. offers the broadest range of loop carrier products on the market.

DSC Communication Corp. is a leading designer, developer, manufacturer and marketer of digital switching, transmission and private network system products for the worldwide telecommunications industry.

#90022b0632 01/22/1990 ~Business Wire

BEVERLY HILLS, CA (JAN. 22) BUSINESS WIRE - Great Western Financial Corp. Monday reported 1989 earnings of $100 million, or 78 cents per share, compared with $248 million, or $1.95 per share, for the year 1988.

The reduced earnings in 1989 were the result of a $200 million write down of commercial and multi-family real estate and a year-end increase in loan loss reserves, which were announced in November.

The write down and added reserves also combined to produce a loss for the 1989 fourth quarter of $77.3 million, or 59 cents per share, compared with earnings of $59.7 million, or 47 cents per share, for the same period of 1988.

Net interest income, the primary measure of core operating income, increased 15 percent to a record $956 million in 1989 compared with $832 million for the year 1988.

The net interest margin, the difference between the company's yield on earning assets and its cost of funds, was 3.01 percent at Dec. 31, 1989, compared with 2.81 percent at year-end 1988. The spread on the company's adjustable rate mortgage loan portfolio increased to 2.40 percent over the 11th District Federal Home Loan Bank cost of funds index at Dec. 31, 1989, compared with 2.34 percent at year-end 1988.

Total new loans including real estate loans and consumer lending were $13.1 billion for the year 1989 compared with $13.2 billion for 1988. In a declining national mortgage market, new real estate loan volume totaled $11.1 billion for the year 1989, compared with a record $11.5 billion in 1988.

Income from loans serviced for others was $37.1 million in 1989 compared with $36.1 million in 1988. At Dec. 31 1989, the company was servicing $10.5 billion in loans for others compared with $9.7 billion at year-end 1988. Customer accounts rose to $23.8 billion at year-end 1989 compared with $22.2 billion at Dec. 31, 1988. New customer accounts totaled $1.7 billion for 1989 compared with an increase of $1.6 billion for 1988.

Great Western's assets reached $37 billion in 1989, compared with $33 billion at the end of the prior year. Great Western Financial Corp.

operates a real estate-oriented, consumer bank with primary emphasis on residential mortgage lending, mortgage banking, retail banking and consumer finance, and has nearly 1,000 offices in 32 states.

SALT LAKE CITY (JAN. 22) BUSINESS WIRE - Dayna Communications Inc. Monday announced shipment of its DaynaTALK MC LocalTalk network interface card for IBM PS/2 Micro Channel computers and compatibles.

DaynaTALK is a family of products for Macintosh and IBM compatible personal computers that enhance the data transmission speed over LocalTalk cable systems at a variety of rates up to 1.7 Mbps, improving overall network performance. In addition, the DaynaTALK network interface cards can function at the standard LocalTalk 230 Kpbs data rate as LocalTalk cards for MS-DOS workstations and NetWare or DaynaNET file servers.

The DaynaTALK MC card is a full sized Micro Channel bus LocalTalk card for IBM PS/2 models 50 and above and compatibles. It is compatible with TOPS DOS, NetWare 2.15 and Dayna's own DaynaNET network operating system.

''The DaynaTALK MC card is the only network interface card available for PS/2 computers that can carry both Apple AFP and NetWare IPX protocols over a LocalTalk wire,'' said Lynn Alley, vice president of research and development at Dayna. ''This means that it can be used as a LocalTalk network interface card for PS/2 computers that are being used as workstations and NetWare file servers.''

The DaynaTALK MC card is compatible with the full line of DaynaTALK products, including DaynaTALK for the Macintosh, the DaynaTALK PC card and the SpeedGuard Collision Filter. It is also compatible with TOPS FlashCard and FlashBox products used on the same network.

The DaynaTALK MC card is available immediately and is priced at $399 retail for a single card and $1,399 for a pack of four. Ingram Micro D and Softsel Computer Products are distributing the full DaynaTALK product line nationally.

Dayna Communications is a privately held company that designs and manufactures a range of products to meet the connectivity needs of personal computer users.

HILLSBORO, OR (JAN. 22) BUSINESS WIRE - Washington Federal Savings Bank (NASDAQ:WFOR) Monday announced earnings of $375,950, or 24 cents per share for the fourth quarter of 1989, an increase of 156.0 percent from earnings reported for the fourth quarter of 1988 of $146,851, or 9 cents per share.

The savings bank also reported earnings for the year 1989 of $1,233,029, or 78 cents per share, a decrease of 8.1 percent over the 1988 reported earnings of $1,341,419, or 85 cents per share.

Howard L. Hubbard, president and chief executive officer said: ''We continue to enjoy a positive net-income spread and earnings for the quarter benefited from the large gain in non-interest income. This has been a difficult year for our industry, but we came through with a fair profit and we meet the new requirements of Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

The savings bank declared its regular quarterly dividend of $.075 per share payable on Feb. 28, 1990, to shareholders of record on Feb. 15, 1990. According to Hubbard, ''Washington Federal's board of directors is following the established dividend policy and it reflects the board of directors' assessment of the savings bank's level of earnings.''

Washington Federal Savings Bank has been a Washington County based financial institution since 1925 and serves the entire Portland metropolitan area with 17 retail branch locations in four Oregon counties: Multnomah, Clackamas, Columbia and Washington. The savings bank also operates three wholly owned subsidiaries, WF Service Corp., WF Insurance Corp., and Ward Cook Inc. Mortgage Banking.

MOUNTAIN VIEW, CA (JAN. 22) BUSINESS WIRE - SynOptics Communications Inc. (NASDAQ:SNPX), a manufacturer of integrated local area networking (LAN) systems, Monday announced preliminary financial results for the fourth quarter ended Dec. 31, 1989.

Revenue for the fourth quarter is expected to be approximately $25 million which would result in year-end revenue of about $77 million. Earnings per share for the full year are expected to be approximately $1.20. Actual results will be reported in February following completion of the company's annual audit.

''These results are a reflection of the LAN market's continuing strong acceptance of SynOptics' new System 3000 product line that we announced in May 1989,'' said Andrew K. Ludwick, president and chief executive officer of SynOptics.

''This was the first full quarter of shipments of our LattisNet Network Management Release 2.0 software, part of the System 3000. We are pleased with the early acceptance of these products and technologies which are based on our Network Utility Architecture platform.''

SynOptics designs, manufactures and markets local area networking products based on its Network Utility Architecture, a value-added product strategy which incorporates network connectivity, internetworking and network management solutions into an integrated networking system.

The company has headquarters at 501 E. Middlefield Road, Mountain View, CA 94043-4015, telephone: 415/960-1100.

ALEXANDRIA, VA (JAN. 22) BUSINESS WIRE - Time-Life Books Monday announced that it has acquired The Record Clubs of Australia Pty Limited and World Record Club New Zealand from its owner, Joseph Schwartz, for an undisclosed sum.

The acquisition makes Time Warner Inc. one of the largest direct marketers of books and records in Australia and New Zealand.

Founded in the 1970s, The Record Clubs of Australia consists of The Record Club, The Australian Compact Disk Club and a videocassette club. The World Record Club New Zealand includes the Kiwi Compact Disk Club. The Australian and New Zealand Clubs have a combined membership of 125,000.

The Record Clubs of Australia has distribution agreements with all of the major recording studios, including CBS, EMI, WEA, Polygram, BMG, and Festival, an Australian label. The company also markets books on tape, offering audiotapes of works by such authors as John le Carre, Frederick Forsyth and Agatha Christie.

John Fahey, president and CEO of Time-Life Books, said the acquisition is consistent with his company's strategy for expansion abroad through the music and videocassette businesses. In 1989 the international division of Time-Life Books accounted for over one third of the company's revenues.

In addition to rock, The Record Clubs of Australia offers a wide variety of classical, jazz and country music, with an extensive artist catalogue of over 6,000 titles, from the Beatles to Madonna.

The companies will be owned and operated by the Sydney Australia headquarters of Time-Life Books Australia Pty Ltd., under the direction of Boezeman. Time-Life Books founded its South Pacific Division, based in Sydney in 1963.

Time-Life Books is a wholly owned subsidiary of the Time Inc. Book Co., a division of Time Warner Inc., and the largest direct marketer of books and entertainment products in the United States.

Last year the company shipped over 25 million units of books, records and videocassettes throughout the globe. In 1989 Time-Life Books acquired Books for Children, Britain's largest hardcover book club for children.

ALBANY, NY (JAN. 22) BUSINESS WIRE - KeyCorp's fourth quarter earnings, reported Monday, continued the trend of consecutive quarterly earnings advances posted in 1989.

Earnings for the fourth quarter and the full year 1989 were at record levels.

For the full year 1989, net income rose 14.2 percent to $136.9 million, up from $119.9 million in 1988. Earnings per common share were $3.20, up 10.3 percent over 1988's $2.90. There was an average of 41.8 million common shares outstanding in 1989; this compares to 39.7 million in 1988.

For the fourth quarter of 1989, earnings of $36.4 million increased 5.5 percent over the $34.5 million of fourth quarter 1988. Earnings per common share, however, advanced at an even faster 7.5 percent rate to 86 cents from 80 cents.

''KeyCorp's fourth quarter and full year 1989 performance are consistent with the commitment we made to our shareholders at mid-year 1988,'' said Victor J. Riley Jr., president and chief executive officer.

Riley noted that KeyCorp placed special emphasis during 1989 on achieving the following goals:

-- Maintain a diversified and well-balanced loan portfolio and avoid concentration in any single industry or geographic region, with uncompromising credit quality standards.

-- Focus on stabilizing KeyCorp's net yield on average earning assets, already among the highest in the banking industry; like all banks, KeyCorp's net yield was under great pressure in 1989 from competitive forces and an inverted yield curve.

-- Effect tight overhead expense control to lower the efficiency ratio - an important measure of the amount of operating income consumed by overhead expense.

-- Exit from, or significant restructuring of, certain unprofitable non-bank or financial services businesses; exit from the automobile leasing business and planned consolidation of the four KeyCorp mortgage banking companies are examples of such actions.

KeyCorp (NYSE:KEY) is a multi-regional bank holding company with assets of $15.5 billion and more than 570 banking offices in eight states. Key Bank subsidiaries provide service to the growing consumer middle market and small-to medium size business enterprises.

#90022b0652 01/22/1990 ~Business Wire

NEW YORK (JAN. 22) BUSINESS WIRE - Nazem and Co. Monday announced that Emile J. Geisenheimer has joined the firm as general partner, specializing in high technology, biomedical and leveraged buyout opportunities.

''The addition of Emile Geisenheimer to our group as a new general partner adds a vital component to Nazem's strategy for the decade ahead,'' said Fred F. Nazem, managing general partner. ''In the 1990's, the successful venture capital firms will be those who understand not only how to build small companies from their earliest stages, but also how to revitalize large companies that have matured and plateaued out.

Geisenheimer, 42, joined Nazem and Co. from Philips, one of the world's largest electronics firms, where he was president and chief executive officer of Philips Electronics Instruments Inc., a diversified manufacturer of high technology capital equipment.

Geisenheimer, who was 36 years old at the time and the youngest Philips president in the company's history, is credited with having pared down the underperforming $70 million dollar subsidiary and then rebuilding the company to over $130 million in sales by the time of his departure in 1989.

Prior to being named CEO of Philips Electronic Instruments, Geisenheimer served as vice president and the senior marketing and sales executive for Philips Medical Systems Inc., a diagnostic imaging company. He helped engineer the ''breakout'' strategy for the company, which resulted in a 35 percent per annum growth rate for the company over the six-year period from 1978 to 1983. During that time, sales rose from an initial base of $80 million to $450 million.

Before joining Philips, Geisenheimer served as a senior and managing consultant with Cresap, McCormick and Paget (now a Towers Perrin company), a general management consulting firm, where he focused on marketing, organization and strategic issues for companies in the U.S. and abroad.

Nazem and Co., based in New York and founded in 1976, is one of the oldest most successful venture capital firms in the industry, with broad experience nurturing companies from seed financing to public offerings. It helps companies identify and capitalize on their strengths and provides in addition to money, new technologies as well as financial, marketing and big-business operating know-how. Its technologies as well as financial, marketing and big-business operating know-how. Its investments include Cirrus Logic, Apollo Computer, Xyvision and CAE systems.

NASHVILLE, TN (JAN. 22) BUSINESS WIRE - Nashville-based Business Risks International (BRI) and MEDTOX Laboratories Inc., (MEDTOX) of St. Paul, Minn., have signed an agreement to provide drug testing services for BRI and BRI clients.

MEDTOX is a national clinical toxicology reference laboratory with expertise in providing high quality lab services to medical centers, clinics and corporations. The company was formed in 1984 to provide services for therapeutic drug monitoring, drugs of abuse screening and confirmation; clinical analysis for toxins from occupational and environmental exposure; research analysis and emergency toxicology. MEDTOX currently receives test specimens from over 1,200 locations.

MEDTOX was one of the first 10 laboratories to receive certification by The National Institute on Drug Abuse (NIDA) under the National Laboratory Certification program, which qualifies the lab to perform urine drug testing on federal employees and is evidence of the forensic quality of their testing service.

BRI's Commitment to a Drug-Free Workplace program was designed to provide organizations with a structured program which can be tailored to their specific needs to more effectively manage substance abuse in the workplace.

Some of the program's components include developing drug policies, pre-employment process review, educational programs, workplace profile and drug testing services.

BRI is a worldwide professional services firm which specializes in security consulting, investigations and loss prevention for major corporations, government agencies, financial institutions and law firms.

BRI assists its clients improve security, reduce vulnerabilities and provide continuing support to security-related programs in a cost-effective manner.

BRI has 24 offices throughout the United States, and offices in London, Hong Kong, Taiwan, The Philippines, Singapore and Thailand. MEDTOX has regional office locations in Atlanta, Denver and San Diego.

ATLANTA (JAN. 22) BUSINESS WIRE - Utilizig U.S. West Service Link, Resurgens Communications Group Inc. (ASE:RCG) and The Chillicothe Telephone Co. Monday announced that they have agreed to form a joint marketing effort to provide operator and enhanced services to the 1,900 independent local exchange companies (LEC) and interexchange common carriers (IXC) in the United States.

The primary service provided to the LECs and IXCs will be operator services and billing for credit card, collect and person-to-person calls.

Commenting on the announcement, John D. Phillips, president and chief executive officer of Resurgens, said: ''We are very pleased to announce

this service designed exclusively for the independent telephone and IXC industry. The cooperative approach in service is a first for the operator service industry.''

Bill McKell of Chillicothe Telephone stated: ''We feel this effort will provide the complete service required by the independent telephone companies and the interexchange carrier companies in the area of operator services.''

The Chillicothe Telephone Co. has been providing operator services since 1895 and is one of the largest privately owned telephone companies in the nation. Resurgens Communications Group Inc. is a telecommunications company which processes and transmits operator-assisted long distance telephone calls from multi-telephone facilities such as hotels, hospitals and from pay telephones.

Through its subsidiary, Southern Cellular Telecom Inc., the company markets and services cellular telephones, facsimile machines and other telecommunications products.

The common stock and convertible subordinated debentures of Resurgens Communications Group are traded on the American Stock Exchange under the symbols RCG and RCG.A, respectively.

DALLAS (JAN. 22) BUSINESS WIRE - DSC Communications Corp. and Optilink Corp. Monday jointly announced the signing of a letter of intent providing for the acquisition of Optilink by DSC in exchange for shares of DSC common stock.

The acquistion is expected to be accomplished by means of a merger between Optilink and a wholly-owned subsidiary of DSC. In the merger, all shareholders and other security holders of Optilink will receive shares of DSC common stock according to a formula agreed upon in the letter of intent.

A definitive agreement is expected to be signed on or about March 1. Subject to obtaining all requisite governmental and Optilink shareholder approvals, closing is expected to occur during July 1990. Final transaction share count will be based upon, among certain other things, the average closing price of DSC common stock for the 30 trading days preceding the closing. The acquisition value is estimated to be approximately $55 million.

DSC's Chairman and Chief Executive Officer, James L. Donald, stated that, ''As a leading supplier of intelligent network system products to the public network, it is a natural progression for DSC to expand its market penetration outward from the local exchange carrier (LEC) central office.

With this acquisition, DSC will have entered the digital loop carrier marketplace. As a result, we will broaden our ability to address the requirements and opportunities that are being created by the RBOCs and the other LECs in the digital loop segment of the telecommunications market.''

Headquartered in Petaluma, Calif., Optilink Corp. offers the broadest range of loop carrier products on the market.

DSC Communications Corp. is a leading designer, developer, manufacturer and marketer of digital switching, transmission and private network system products for the worldwide telecommunications industry.

BEVERLY HILLS, CA (JAN. 22) BUSINESS WIRE - Qintex Entertainment Inc. (QEI) (NASDAQ:QMTQE) announced Monday that the comapny has reached a settlement with MCA Inc. (NYSE:MCA) of outstanding litigation regarding distribution of certain MCA programming by QEI.

''We have amicably resolved our differences and have reached a fair and equitable agreement that benefits both companies,'' said Jonathan Lloyd, president of Qintex Entertainment. '''We are very pleased to avoid extended litigation in a manner that protects valuable assets of Qintex Entertainment.''

Under the terms of the accord announced Monday, MCA will assume responsibility for future programming sales, and proceeds from current receivables will be allocated between the two companies. Further details were not made available.

As announced on Oct. 19, QEI filed for protection under Chapter 11 of the Federal Bankruptcy Code when the company could not meet a material obligation under its previous distribution agreement with MCA. The revised agreement has been approved by the bankruptcy court.

IRVINE, CA (JAN. 22) BUSINESS WIRE - Western Digital Corporation (AMEX:WDC) Monday reported net income of $8.6 million, or $.29 per share, on revenue of $264.9 million for the second fiscal quarter ended December 30, 1989, versus net income of $12.7 million, or $.44 per share, on revenue of $258.4 million in the second quarter of fiscal 1989.

Second quarter net income includes a gain of $1.1 million resulting from the open market purchase of $7.5 million face value of the company's 9% convertible subordinated debentures due 2014, pursuant to the purchase program announced on November 22, 1989.

The second quarter results mark a return to profitability for Western Digital after reporting a loss of $2.7 million, or $.09 a share, on revenue of $224.9 million in the first quarter ending September 30, 1989. Revenue for the second quarter is the second- highest quarterly revenue in the company's history.

Net income for the first six months of fiscal 1990 totaled $5.9 million or $.20 per share, compared with $25.5 million, or $.89 per share, in the first half of fiscal 1989. Revenue for the first six months of fiscal 1990 totaled $489.8 million, versus $505.4 million in the first half of fiscal 1989.

Roger W. Johnson, chairman, president and chief executive officer of Western Digital, said, ''The company's intelligent disk drive, high-end storage controller, and communications lines all achieved solid operating performance and increased revenue from the prior quarter, while the systems logic line was profitable for the first time and imaging revenue improved significantly from the first quarter.

The Storage Products unit, which includes storage controllers, chips and intelligent drives, achieved revenue of approximately $183 million in the second quarter, while its profitability outstripped the company's overall level of profitability.

Western Digital Corporation, headquartered in Irvine, California, is a multinational company that designs, develops, manufactures and markets semiconductor devices, subsystems, and intelligent disk drives for original equipment manufacturers and resellers which serve the microcomputer industry. The Storage Products unit provides a broad range of intelligent disk drives and storage controllers. The Microcomputer Products unit provides communications, imaging, systems logic, and

integrated systems products.

KANATA, Ontario (JAN. 22) BIZWIRE - Mitel Corp. announced Monday that its parent company, British Telecom, has made public its plans to review the future of its 51 percent shareholding in the company.

The sale of all or part of this shareholding is one of the options being explored. According to British Telecom, the manufacture of PBX equipment is no longer an essential part of its strategy and therefore felt it would be in the best interests of Mitel to have as its shareholders people who have a strategic interest in its business.

The text of the news release issued by British Telecom Monday is as follows:

British Telecom Monday announced that it is reviewing the future of its 51 percent shareholding in Mitel. The sale of all or part of this shareholding is one of the options being explored.

David Dey, Managing Director of British Telecom's Communications Systems Division, said: ''Mitel is making good progress in terms of products, quality and financial performance. Independent experts place it among the

leading companies in its field.

Dey said that, in light of these developments, British Telecom was exploring alternative approaches to its investment in Mitel, including the sale of its shareholding in the company.

BT and Mitel will work collaboratively, with potential purchasers, to ensure the best possible outcome for both companies. Until the new approach is finalized, the ongoing relationship between BT and Mitel will remain unchanged.

British Telecom has engaged the services of Morgan Stanley to advise on available options and initiate discussions with potential purchasers.

Mitel Corp. is an international manufacturer of sophisticated, reliable business telecommunications systems and public switching systems with annual revenues of more than $400 million. More than 120,000 Mitel telecommunications systems have been sold in over 80 countries. Mitel's common shares are traded on the Toronto, Montreal, New York and London stock exchanges under the symbol MLT. Since 1986, British Telecom plc (BT) a $20 billion telecommunications company based in the United Kingdom, has owned 51 percent of the company.

#90022b0670 01/22/1990 ~Business Wire

NEWPORT, KY (JAN. 22) BUSINESS WIRE - NS Group Inc. (ASE: NSS) announced Monday significant increases in its fiscal 1990 first quarter results vs. the comparable quarter a year ago.

Consolidated net sales for the 1990 first fiscal quarter ended Dec. 30, 1989, were $56,664,000, up 26.5 percent, or $11,880,000 from fiscal 1989 first quarter net sales of $44,784,000.

Consolidated net income for the 1990 first fiscal quarter was $2,991,000, or 22 cents per share, compared to $801,000, or 6 cents per share, for the comparable period a year ago.

C.R. Borland, president and chief executive officer of NS Group Inc. commented: "We are very pleased with the results of our first fiscal quarter. Newport Steel Corp.'s tubular product shipments are up 75.5 percent from the first quarter of a year ago and 6.4 percent from the fourth quarter of fiscal 1989 as the oil country tubular market continues to strengthen.

"Shipments of bar steel products, however, declined 12.7 percent from the first quarter of a year ago and 22.2 percent from the levels of the fourth quarter of fiscal 1989 as a result of the well publicized softening in the steel bar market place. Overall, we are optimistic that steel bar sales have reached their low point and, with the improvement in tubular sales, 1990 looks to be a very strong year for NS Group."

Borland noted that the company's financial position is very strong, with over $56 million in cash and short-term investments, including the proceeds earmarked for Newport Steel Corp.'s construction of a continuous slab caster. The current ratio stands at 3.4 to one and the company has unused lines of credit of over $25 million.

NS Group Inc. is a holding company that owns four major operating subsidiaries: Newport Steel Corp., a tubular steel producer; Kentucky Electric Steel Corp., a producer of steel bars; Erlanger Tubular Corp., a processor of tubular products; and Imperial Adhesives Inc., an adhesives manufacturer.

#90022b0673 01/22/1990 ~Business Wire

HARTFORD, CT (JAN. 22) BUSINESS WIRE - United Technologies Corp. (UTC) Monday reported record earnings for 1989 and higher fourth-quarter results, according to Robert F. Daniell, chairman and chief executive officer.

For the year, UTC had net income of $702.1 million or $5.20 per share on a fully diluted basis, compared to 1988 net income of $659.1 million or $5.05 a share.

"These results reflect the continuing improvement in the operating performance of our core businesses," Daniell said. "Our high backlog, continued strong overseas growth and ongoing cost reduction efforts position us for further improvements in 1990," he added. Daniell said Pratt & Whitney, Otis and Hamilton Standard were the major contributors to the improvement in 1989 results.

Revenues in 1989 increased to $19.8 billion, compared to $18.5 billion in 1988. Revenues in the Power, Flight and Building Systems segments

increased, while the Industrial segment declined slightly. Daniell said international revenues (overseas operation and exports) increased 18 percent to $9.8 billion and now account for 50 percent of total revenues.

UTC's business backlog reached $20.1 billion on Dec. 31, up 19 percent from the same 1988 date when the backlog totaled $16.9 billion. For the year, Pratt & Whitney announced $11 billion in commercial engine orders, including options, compared to $5 billion announced in 1988.

"Customer acceptance of our new technology commercial jet engines has proven that Pratt & Whitney is meeting the future requirements of the airlines," Daniell added.

Fourth-quarter 1989 net income increased to $184.4 million or $1.36 a share, compared to net income in the same period a year earlier of $150.6 million or $1.16 a share. The Power and Flight Systems segments were responsible for the improvement.

In the Power segment, quarterly operating income grew to $249 million from $194 million a year earlier, with most of the increase deriving from Pratt & Whitney's Commercial Engine Business.

Flight Systems operating income was up in the quarter, increasing to $72 million from $39 million in 1988. Hamilton Standard accounted for most of the improvement.

#90022b0677 01/22/1990 ~Business Wire

MAYNARD, MA (JAN. 22) BUSINESS WIRE - Digital Equipment Corp. Monday announced that MasPar Computer Corp., manufacturers of high-performance data-parallel computer systems, has joined the Data-Parallel Research Initiative.

The Digital Initiative was introduced in May of 1989 to encourage research into new and improved data-parallel computing applications as well as into distributed supercomputing. MasPar is the third company to join the Initiative following Digital and Thinking Machines Corp.

Through the Initiative, MasPar will make its MP-1 Family of data-parallel

systems available at discounted prices to universities and qualified research institutions in both the United States and Europe to conduct research that will create or optimize massively parallel applications.

MasPar's MP-1 Family of data-parallel computers integrates Digital Equipment Corp.'s VAXstation 3520 workstation as part of the product offering. The VAXstation workstation was selected by MasPar for its widely accepted architecture and high-resolution graphics, as well its ULTRIX programming environment.

The entire system is available through the initiative at prices that start under $100,000. Massively parallel computers use thousands of processors working in parallel to solve complex problems in applications such as molecular dynamics, computational fluid dynamics, structural and thermal analysis, image recognition, signal processing, seismic data reduction, electronic computer-aided engineering and others.

MasPar Computer Corp., of Sunnyvale, Calif., manufactures, services and supports the affordable, high-performance MP-1 Data Parallel Computer systems and associated software development tools. These systems speed up the solutions of large and compute-intensive problems by orders of magnitude at a dramatic 10X to 100X price/performance improvement over existing computer systems.

Digital Equipment Corp., headquartered in Maynard, is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

#90022b0689 01/22/1990 ~Business Wire

LOUISVILLE, KY (JAN. 22) BUSINESS WIRE - Dataguard Recovery Services Inc. said it expects to report net income for the year ended Dec. 31, 1989, of $101,000 on revenues of $3,082,000. These results would make 1989 the company's second consecutive profitable year.

Richard W. Smith, president and chief executive officer, noted that "1989 was the company's first full year under a capital lease for its enhanced computer hardware, which increased total costs and expenses by approximately $500,000 for the entire year. The company's ability to report profitability for a second consecutive year in spite of this increase represents continued progress in providing profitable disaster recovery services."

Year end results were assisted by the purchase of certain computer equipment leases at favorable terms that decreased lease expenses by approximately $220,000 for the year and the capitalization of approximately $170,000 of software development costs.

Smith also stated that "these lease purchases should provide benefits totalling approximately $20,000 per month in 1990 through reduced lease and maintenance expenses."

Dataguard is a Louisville-based company which markets disaster recovery services to users of large-scale computers throughout the United States and Canada. The company's stock trades in the over-the-counter market.

#90022b0690 01/22/1990 ~Business Wire

LINCOLNSHIRE, IL (JAN. 22) BUSINESS WIRE - Clear Communications and Larse Corp. Monday announced a marketing and development agreement to deliver the most comprehensive wide-area network management system available for private T1 networks.

The agreement calls for Clear Communications to integrate its Clearview Surveillance System software with the Larse family of intelligent TNDS CSUs (Channel Service Units) and Integra-T network management software.

Both companies will sell the bundled network management system, giving private network managers the first on-line, real-time information management capability for monitoring the performance of all the T1 links in their wide-area networks from a central location.

"Effective network management is the biggest challenge confronting corporate networks today, and the alliance of Larse and Clear Communications is a major step toward delivering the comprehensive, turn-key solution that network managers require," said Mel Perkins, president and chief executive officer of Larse.

"Integrating the Clearview Surveillance System with Larse CSUs will enable us to deliver our next-generation network management capabilities far more rapidly and easily to a broader customer base than ever before," said Robert Copithorne, president and chief executive officer of Clear Communications. "Many of the largest enterprise networks have already installed Larse TNDS Intelligent CSUs."

Larse Corp. is a leading producer of telecommunications network equipment and systems, including intelligent CSUs. Intelligent CSUs are critical components used in wide-area networks to perform network-wide T1 diagnostics and collect performance information, including the new industry-standard ESF (Extended Superframe Format) performance data.

In addition to its TNDS Intelligent CSUs, the Santa Clara, Calif., company recently introduced the Integra-T network management system that gives network operators remote control and problem isolation from a central location.

Clear Communications is a telecommunications systems company based in the Chicago area that delivers wide-area network management solutions. The Clearview Surveillance System is a comprehensive decision support system for managing carrier performance in wide-area digital networks.

#90022b0692 01/22/1990 ~Business Wire

DAYTON, OH (JAN. 22) BUSINESS WIRE - The Reynolds and Reynolds Co. (NYSE: REY) Monday reported first quarter revenues for the period ended Dec. 31, 1989 of $139.4 million, compared with $146.7 million in last year's first quarter. Net earnings were $6.2 million, or 58 cents per share, compared with $7.1 million or 66 cents per share.

David R. Holmes, president and chief executive officer of Reynolds and Reynolds, said, "Our business is trending as we anticipated. The slowdown in the automotive market did not allow us to match the record performance we achieved in last year's first quarter. However, we're pleased with the strength of our earnings."

Reynolds' computer systems segment reported revenues for the quarter of $58.6 million compared with $63.2 million last year. "Considering the conditions in the automotive market we're doing very well. We're in a very favorable competitive position with the ERA in-house system for automobile dealers. We are continuing to drive ERA sales in the market.

"The enhancements we have already installed for ERA customers, and some exciting new enhancements we will announce at the National Automobile Dealers Association convention next month will put even more distance between Reynolds and our competitors," Holmes said.

The business forms segment posted sales of $80.8 million compared with $83.5 million reported in the first quarter last year. "We're disappointed with our sales levels, but we're satisfied with earnings to date. We have initiated new sales programs and enhanced our manufacturing and customer service capabilities to better position us for sales growth as the year progresses.

"Overall, we anticipate modest sales growth for the year with strong profitability. We believe the slowdown in the automotive market is a short-term market adjustment and that the market will strengthen as the year progresses." Holmes said.

Reynolds and Reynolds, headquartered in Dayton, is a major supplier of information processing systems, including business forms and computer systems to automotive, professional, medical, and general business markets.

CONTACT: Reynolds and Reynolds Co., Dayton, Dale Medford or Paul Guthrie, (513) 449-4099 or (513) 449-4216 by George F. Sweeney & Co., New York, George F. Sweeney, (212) 808-5566.

#90022b0694 01/22/1990 ~Business Wire

STAMFORD, CT (JAN. 22) BUSINESS WIRE - EnviroSource Inc. (NASDAQ: ENSO) announced Wednesday that it intends to increase its holdings of Envirosafe Services Inc. (''ESI'') common stock to between 80 percent and 100 percent.

EnviroSource currently owns 62.5 percent of ESI's common stock.

EnviroSource stated that in the near future it intends to initiate negotiations with ESI's board of directors to structure a tax-free transaction in which holders of ESI's common stock would receive shares of EnviroSource common stock.

The proposed transaction, which EnviroSource said it would like to complete by the end of the second quarter, will be dependent upon market conditions and satisfaction of certain other conditions, including approval by ESI's board of directors.

In making the announcement Louis A. Guzzetti Jr., president and chief executive officer of EnviroSource, said, ''In the middle of last year, we announced that our strategic mission is to become the leading long-term supplier to industrial customers of specialized services that primarily involve the recycling, handling, stabilization or landfilling of environmentally sensitive wastes or by-products.

''We subsequently sold or discontinued all unrelated businesses and, as a further indication of our commitment to this mission, in November, we changed the company's name from NEOAX to EnviroSource. The decision to increase our interest in ESI, one of the nation's leading operators of hazardous waste landfills, is another logical step in the pursuit of our strategy.

''We believe the transaction we are contemplating, which will allow EnviroSource to utilize its tax loss carryforward to shelter ESI's earnings, will strengthen both companies and will be beneficial to the stockholders of each.''

EnviroSource supplies industrial customers with long-term specialized services, primarily the recycling, handling, stablization or landfilling of environmentally sensitive wastes or by-products.

#90022b0698 01/22/1990 ~Business Wire

TUSTIN, CA (JAN. 22) BUSINESS WIRE - Trimedyne Inc., Monday announced it entered into a strategic alliance agreement with Technolas Laser Technik GmbH of Munich, West Germany, under which Technolas will manufacture Excimer ''cold'' lasers and laser catheters for sale exclusively by Trimedyne for cardiovascualr use throughout the world, except in continental Europe.

In Europe both Trimedyne and Technolas will market the systems. These lasers take their ''cold'' name from the Excimer laser's ability to vaporize plaque (fatty deposits) blocking blood vessels, including hard, calcified deposits, at normal tissue temperatures without heat.

To fulfill the terms of the agreement, Trimedyne must purchase at least $20 million of the new cold lasers and laser catheters from Technolas through 1995.

Technolas is the world's largest manufactuer of Excimer lasers for medical use. Under the agreement, Trimedyne will also have access to clinical data from the use of Technolas' Excimer lasers in more than 200 patients in the coronary arteries and over 250 patients in peripheral (leg) vessels in Europe. Trimedyne plans to apply to the U.S. Food and Drug Administration (''FDA'') to test the new Excimer lasers in humans at up to five medical centers in the United States.

Commenting on the agreement, Howard K. Cooper, president of Trimedyne, said, ''This agreement enables Trimedyne to provide physicians with both Holmium and Excimer ''cold'' lasers, as well as its established thermal laser devices, to treat any type of blockage in a blood vessel. The availability of clinical data from the use of Technolas' Excimer lasers in Europe has the potential to markedly reduce the time and cost necessary for Trimedyne to meet the requirements of the FDA for marketing approval in the U.S. Trimedyne intends to immediately commence marketing the new Excimer lasers in a number of other countries throughout the world.''

Trimedyne is the leading manufactuerr of lasers and laser catheters for cardiovascular use as an alternative or adjunct to bypass surgery and balloon angioplasty and markets these products in the United States and 32 foreign countries.

#90022b0703 01/22/1990 ~Business Wire

STOCKHOLM, Sweden (JAN. 22) BUSINESS WIRE - Ericsson has signed a contract worth over $30 million with the Moroccan Telecommunications Adminsitration for AXE digital switching equipment.

The contract also includes a 20,000-line switch which is to replace an old switch which was destroyed in a fire. Ericsson and the Moroccan Telecommunications Administration were able to arrange a temporary solution in less than a week to cover the most pressing need of telephone lines.

The equipment will be manufactured in Sweden and installed during 1990.

Ericsson received the first AXE order from Morocco in 1984 and has, to date, installed approximately 100,000 local lines in Morocco. Also, in 1988, a contract concerning the expansion of the mobile telephone network was signed.

Headquarted in Stockholm, Ericsson is one of the world's leading manufacturers of telecommunications equipment. Its wholly owned North American subsidiary is based in Richardson, Texas.

#90022b0705 01/22/1990 ~Business Wire

WALLINGFORD, CT (JAN. 22) BUSINESS WIRE - Dime Financial Corp. (NASDAQ:DIBK) Monday reported that net income increased 16 percent for the fourth quarter of 1989.

For the three months ended Dec. 31, 1989, net income was $1.8 million or 34 cents per share. This compares with net income of $1.6 million or 29 cents per share for the fourth quarter of 1988. For the full year, net income was $7.3 million or $1.36 per share vs. $6.9 million of $1.29 per share in 1988.

The quarterly and year-to-date comparisons include the results of operations of City Savings Bank of Meriden subsequent to the completion of its acquisition by Dime Financial Corp. on Dec. 2, 1988.

Net interest income after the provision for loan losses was $6.4 million for the 1989 fourth quarter, rising 23.3 percent from the comparable period in 1988, and totaled $24.6 million for the year, an increase of 19.5 percent from 1988. Due primarily to the inclusion of the operations of City Savings, other income was $469,000 and $2.1 million for the quarter and year, respectively, vs. $190,000 and $1.1 million for the

comparable 1988 periods, and noninterest expenses were $3.6 million for the quarter and $13.8 million for the year compared with $2.7 million and $10.0 million in the respective 1988 periods.

Reflecting the current slowdown in the local real estate market, the provision for loan losses was $640,000 for the quarter and $1.3 million for the year in 1989 vs. $397,000 and $790,000 for the comparable 1988 periods. Nonperforming assets as a percent of total assets stood at 1.26 percent as of December 31, 1989, up from 0.49 percent a year ago but down from the Sept. 30, 1989 level of 1.69 percent.

Dime Financial Corp. is the holding company for The Dime Savings Bank of Wallingford and City Savings Bank of Meriden. Dime Savings Bank operates nine offices in New Haven County, and City Savings Bank operates three offices in Meriden. Both are state-chartered, FDIC-insured institutions.

PALO ALTO, CA (JAN. 22) BUSINESS WIRE - Varian Associates, Inc., Monday reported net earnings of $7.6 million (39 cents per share) for the first quarter of fiscal 1990.

Although slightly lower than the $9.3 million (44 cents per share) of the year-ago period, the first-quarter profit was a marked improvement over the $1 million (5 cents per share) earned in the fourth quarter of 1989.

First-quarter order receipts were $326 million compared with 1989's $334 million. However, sales rose 11 percent to $318 million from the prior year's $287 million. Backlog rose from the previous quarter to $860 million, and was only slightly below the record $862 million of a year ago.

Chairman and Chief Executive Thomas D. Sege said continued order strength in most of Varian's businesses was encouraging, with only semiconductor equipment posting an understandable easing from the record pace of 1989. ''While net earnings were below those of the year-ago quarter, there was strong improvement over the prior three months, and we more than met our profit expectations for the period,'' said Sege.

''Steps taken to reduce costs and improve margins are beginning to pay off particularly in electron devices where profitability had been well below expected levels.''

First-quarter orders and sales rose for Electron Device and Systems. Operating margins posted a significant improvement over the second half of 1989. ''The improvement in electron device profitability suggests that we are making good progress in controlling costs and the technical difficulties that have plagued this business in recent quarters,'' Sege noted.

Semiconductor Equipment order volume for 1990's first quarter was similar to the average level achieved in the prior three quarters. Sales increased 26 percen over 1989's first quarter, and backlog rose from the prior quarter. However, profits for this business declined due to costs associated with bringing complex new products on line.

Varian Associates, Inc., a diversified high-technology company with some 12,000 employees and 1989 sales of $1.3 billion, produces systems and components for communications, industrial, scientific, medical, and defense markets worldwide.

NEW ORLEANS (JAN. 22) BUSINESS WIRE - Babcock & Wilcox (USA), a major operating unit of McDermott International Inc., and Interatom GmbH (West Germany), a subsidiary of Siemens, announced Monday that the two companies have entered into a teaming arrangement to compete for contracts involving the Superconducting Supercollider (SSC) program for the fabrication of superconducting magnets.

The teaming arrangement calls for Interatom to supply the collared coils to B&W. Assembly into finished magnets will be performed at B&W's Mt. Athos facilities in Lynchburg, Va. The SSC is being funded as a Department of Energy (DOE) physics research project to be constructed in Ellis County, Texas, south of Dallas, and will be managed by Universities Research Association.

The SSC will enable scientists to probe the subatomic world and investigate the laws of physics which prevailed when the universe was created.

When completed the SSC will accelerate and steer two beams of protons in opposite directions around a 53-mile oval tract. Traveling nearly the speed of light, the protons will collide, producing conditions which mimic the early universe.

The function of the superconducting magnets is to provide magnetic fields

to bend the two proton beams along the 53 mile route of the collider.

Babcock & Wilcox, one of the largest suppliers to the U.S. Department of Energy, and Interatom have participated in the transfer of technology in the superconductivity field and in the Phase I, technology orientation conducted by SSC management.

As participants they have reviewed the magnet development work at Fermi National Accelerator Laboratory, Brookhaven National Laboratory and the Lawrence Berkeley Laboratory.

Interatom, which has 1,500 employees, is involved in research, development manufacturing and marketing of advanced power reactors, plant engineering and construction, advanced industrial systems and technology.

Babcock & Wilcox is a major operating unit of McDermott International Inc. a leading worldwide energy services company. The company and its subsidiaries manufacture steam-generating equipment, defense products and tubular products. They also provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore.

BALTIMORE (JAN. 22) BUSINESS WIRE - Polk Audio Inc. (NASDAQ:POLK) announced Monday sales and earnings for the third quarter and nine months ended Dec. 24.

For the third quarter, net earnings were $684,698 in 1989 compared to $649,548 in 1988, an increase of five percent.

Earnings per share for these periods were $.39 in 1989 compared to $.28 in 1988, an increase of 39 percent reflecting the reduction in shares outstanding in the 1989 period compared with 1988. Net sales for the third quarter were $7,397,238 in 1989 compared to $7,902,288 in 1988, a decrease of six percent.

For the nine month periods, net earnings were $1,349,375 in 1989 compared to $1,124,434 in 1988, an increase of 20 percent. Earnings per share for these periods were $.77 in 1989 compared to $.49 in 1988, an increase of 57 percent also reflecting the reduction in shares referred to above. Net sales for these periods were $20,385,998 in 1989 compared to $18,741,036 in 1988, an increase of nine percent.

Weighted average number of shares outstanding for the third fiscal quarter were 1,763,152 in 1989 compared with 2,279,891 in 1988 and for the first nine months were 1,763,073 in 1989 compared with 2,292,338 in 1988.

WALTHAM, MA (JAN. 22) BUSINESS WIRE - IPL Systems Inc. Monday opened a European marketing and technical support office that will be headed by IPL's newly named European Marketing Manager Pierre Henin to support all European-based IPL distributors.

The office, located in Zaventem, Belgium, a part of metropolitan Brussels, will service IPL distributors in 17 countries.

''In opening a European office, we are reinforcing our already strong commitment to our overseas distributors,'' said IPL President and Chief Executive Officer Robert Norton. ''We plan to continue our efforts in being a leading developer and supplier of IBM compatible storage subsystems and memory cards in Europe and throughout the world.''

''In directing the new office, Mr. Henin will be responsible for sales training for resellers' sales forces and providing technical and marketing support to dealers and third-party maintenance groups,'' said Manfred (Fred) Wirth, vice president and managing director of international sales. ''And most importantly, Mr. Henin will receive customer input on current and anticipated product requirements helping to discern what IPL can offer to meet present future data processing demands.''

IPL's international business has grown substantially, increasing 78 percent by the end of the third quarter this year compared to the same period last year. The company expects continued international growth with its existing and new products.

IPL selected metropolitan Brussels for its international office because the city is expected to become the hub of the European Community in 1992.

IPL has built on its European presence since its founding and maintains a substantial network of European distributors. Some of those distributors include: The Olivetti Companies (Ibimaint and Ciesse in Italy, Decisions Systems International), GUWA Computer Systems Vertriebs GmbH, West Germany Techinnova 2000 Group based in France and West Germany, Econocom Europe and Reflex/Camborn in the U.K.

Henin joins IPL from the Econocom Group where he held various product

management positions in the European Marketing Center. He moved to Econocom in 1985 where he worked in such areas as electronic data processing and engineering. Before joining Econocom, Henin was a technical service engineer with ComputerLand for two years. He holds an industrial engineering degree with honors from Institut Superieur Industriel Arts et Metiers - Pierrard, Vraton, France.

IPL Systems Inc., designs, manufactures and markets IBM compatible tape drive subsystems and memory products for IBM Systems/3X, 43XX, 9370, S/370 30XX, and AS/400 computers. The company was founded in 1973 and its headquarters are located at 360 Second Ave., Waltham, MA 02154 (617) 890-6620. IPL Systems international office is located at Keiberg Park, Pavillion 406, Imperiastraat 10, Zaventem, Belgium.

IPL Systems Inc. stock is quoted on the NASDAQ national market system and traded in the OTC market under the symbol IPLSA.

SANTA CLARA, CA (JAN. 22) BUSINESS WIRE - Stanford Telecommunications Inc. (NASDAQ/NMS:STII) announced Monday it was successful in posting record high quarterly funded bookings of $44.2 for its third quarter fiscal year 1990 ended Dec. 31, 1989.

The quarterly bookings record surpasses the prior quarterly bookings record of $30.1 million established during the quarter ending June 30, 1988. Stanford Telecom had recorded funded bookings of $13.5 million and $11.1 million for its first and second fiscal quarters of 1990 respectively.

Revenue, net income, total bookings and backlog results for Stanford Telecom's third quarter fiscal year 1990 are expected to be announced by the end of January 1990.

Stanford Telecommunications designs, manufactures, and operates defense electronic systems for aerospace applications. These systems include complex electronic and computer systems for satellite ground terminals and airborne and spacecraft electronics. They provide a variety of services including satellite communications, navigation, and tracking, telemetry and control.

CAMBRIDGE, MA (JAN. 22) BUSINESS WIRE - Gensym Corp., the leading supplier of real-time expert system products, Monday announced the signing of a corporate software licensing agreement with The Du Pont Co.

The agreement encourages Du Pont plants around the world to implement expert systems using the G2 Real-Time Expert System from Gensym Corp. The terms of the agreement were not announced.

Du Pont is a major customer of Gensym Corp., with 15 installations of the G2 Real-Time Expert System in Du Pont plants. ''We have been evaluating the economic returns of our on-line expert system installations, and the results have encouraged us to move ahead even more quickly with our application of this technology,'' said Gus Santelli, program manager for AI in process control at Du Pont. ''We believe that we will have many additional on-line expert systems within Du Pont in complex applications.''

''We have used a number of expert system products at Du Pont, because on-line expert systems are a significant weapon in making Du Pont's plants competitive,'' said Robert K. Cox, consultant manager in the engineering department at Du Pont. ''We are looking for expert systems that have the technology we need, packaged to make the applications easy to develop and support. This agreement with Gensym is a significant step in our realizing this goal.''

''This is a very significant step for Gensym,'' said Lowell Hawkinson, chairman and chief executive officer of Gensym Corp. ''We have been working with Du Pont for three years; in that time, they have helped guide the evolution of the real-time expert system technology in G2, and they have deployed the first large on-line real-time applications of expert systems in industry. We are pleased that the success of these first installations is being recognized and that Du Pont, through this agreement is encouraging deployement of G2 across their corporation.''

The G2 Real-Time Expert System, in on-line configurations, is priced from $30,000 depending on hardware platform. Presently, G2 is available on computer systems from Digital Equipment Corp., Hewlett-Packard/Apollo, Sun Microsystems, Apple Computer and others.

Founded in 1986 and based in Cambridge, Mass., Gensym Corp. is the leading supplier of real-time expert system products for on-line commercial, industrial and scientific applications.

The company's real-time expert system, G2, is currently installed

worldwide at more than 300 customer sites in a range of applications, including process monitoring and control, manufacturing, network management, robotics, spacecraft monitoring and other real-time, on-line tasks.

Gensym sells and supports its products worldwide through domestic regional offices in California, Texas, Illinois, and Massachusetts, as well as through agents in Europe and Japan.

LISLE, IL (JAN. 22) BUSINESS WIRE - Molex Inc., a leading worldwide connector manufacturer, Monday announced the purchase of a majority interest in Fitech Inc., a fiber optic connector manufacturer.

The purchase price is undisclosed.

Fitech, formed in 1988 and located in Des Plaines, Ill., will be immediately renamed Molex Fiber Optic Interconnect Technologies Inc. Its full line of fiber optic connectors and assemblies will be offered to the data and telecommunications markets through Molex's worldwide sales network.

''We expect this acquisition to lead to the production of a full line of fiber optic interconnection products,'' said Tom Lee, Molex's director of new ventures.

''With these new products Molex will become a supplier with major new opportunities and a broader range of products sold on a worldwide basis,'' he said.

''After the initial development and start-up phase, we will launch a second operation, producing fiber optic harness assemblies.''

''Fiber optics will be one of the fastest growing segments of the interconnection industry,'' Lee said. ''We are determined to build a major position in this worldwide market. We will make a multi-million dollar capital commitment to reach this goal.''

According to Lee, Fitech Inc. will retain its existing management. Mark Margolin, formerly with Amphenol, is the president of Fitech Inc.

Molex designs and manufactures electronic components, switches and associated application tooling. Based in Lisle, the company's worldwide operations include 46 plants in 20 countries. Sales for the fiscal year ended June 30, 1989 were $572 million.

#90022b0731 01/22/1990 ~Business Wire

HOLLYWOOD, FL (JAN. 22) BUSINESS WIRE - Suncoast Savings and Loan Association (NASDAQ: SCSL) announced Monday that net income for the first six months of fiscal 1990 ended Dec. 31, 1989 was $689,000, or 37 cents per share, compared with $784,000, or 40 cents per share, reported for the similar period in fiscal 1989.

For the second quarter of fiscal 1990 ended Dec. 31, 1989, Suncoast earned $202,000, or 11 cents per share, vs. $301,000, or 15 cents per share, in the year ago quarter.

Commenting, Albert J. Finch, chairman and chief executive officer noted the year to date performance resulted primarily from increases in loan originations, net interest income and gain on the sale of loans, but was off-set by the changing regulatory and economic environments caused by the Financial Institution Reform, Recovery and Enforcement Act (FIRREA) legislation.

Originations and purchases of mortgage loans were $383.9 million for the first six months of fiscal 1990 compared with $357.7 million for the first half in the prior fiscal year. For the second quarter of fiscal 1990, mortgage loan originations and purchases amounted to $199.4 million, up 18 percent from the $169.4 million for the similar year ago period.

Loans sold in the secondary market totaled $377.6 million for the first half of fiscal 1990, well above the $306.4 million sold in the first half of the previous fiscal year.

For the most recent quarter loan sales were $183.6 million, vs. $185.4 million for the 1989 fiscal year second quarter.

At Dec. 31, 1989 Suncoast Savings serviced nearly $3.0 billion in mortgage loans compared with $2.7 billion at Dec. 31, 1988.

According to Finch, ''Suncoast Savings exceeds the regulatory requirements for tangible, core and risk-based capital mandated by FIRREA at December 31, 1989.''

Finch also announced the cancellation of Suncoast's private placement offering of mandatory convertible notes. Finch stated, ''Because of an adverse regulatory environment and its effect on the value of the association's stock, we feel it is not in the best interest of our shareholders to continue with the offering at this time.''

Total assets reached $301.4 million and deposits totaled $249.0 million at Dec. 31, 1989, vs. $236.3 million in assets and $173.7 million in deposits recorded the same date in 1988.

Suncoast Savings and Loan Association is one of the largest mortgage servicers in the Southeast. The company and its subsidiaries are engaged in purchasing and originating mortgage loans for resale in the secondary market. Suncoast operates five full-service branches in Florida. The Association also operates loan production offices in Florida, Massachusetts and California.

WORCESTER, MA (JAN. 22) BUSINESS WIRE - BASF Bioresearch Corp. has selected the Massachusetts Biotechnology Park off Route 9 as the site for a new, world-class biomedical research facility.

The 250,000-square-foot facility which is expected to be operational by 1993 will be one of the world's largest laboratories for research into cures for cancers and diseases of the immune system. Once operational, it wil initially employ about 250 scientists and support staff.

By the end of the decade, the facility is expected to double in size and stafff. Total cost for the Worcester operation is estimated at approximately $100 million.

''We chose to locate in Worcester based on a number of positive factors including the support of the Commonwealth of Massachusetts as well as from Worcester itself,'' said Dr. Erich Schlick, president of BASF Bioresearch Corp. ''We researched a number of sites before making our final decision. Worcester not only met our infrastructure needs, but, likewise, its academic and medical environment was conducive to our locating here. Finally, we are close to other outstanding medical and academic institutions in Massachusetts.''

BASF hopes to begin construction on the new faciliity by the end of the year. Hundreds of construction jobs are expected to be created by the project which is expected to be completed within 2-1/2 years.

BASF Bioresearch Corp. is a wholly owned subsidiary of BASF Corp., the North American member of the BASF Group. BASF Corp. currently manufactures audio, video and computer media in Bedford, Massachusetts. In addition, BASF Corp. manufactures pharmaceuticals through its Knoll Pharmaceutical unit in Whippany, New Jersey.

Other products include chemicals, fibers, coatings, printing inks, engineering plastics, high performance composites, plus flavors and fragrances and urethane processing equipment at facilities throughout the world.

#90022b0736 01/22/1990 ~Business Wire

COLUMBIA, SC (JAN. 22) BUSINESS WIRE - South Carolina Federal Corp. (NASDAQ/NMS:SCFB) Monday announced earnings for the first quarter ended Dec. 31, 1989.

For the quarter, net income was $527,000, or 23 cents per share, compared with net income of $1,659,000, or 72 cents per share, earned during the like period last year.

Net interest income decreased by $524,000 for the quarter ended Dec. 31, 1989, compared with the quarter ended Dec. 31, 1988. An increase in interest expense resulting from higher rates paid on interest-bearing deposits was the primary factor contributing to the decline in net interest income.

The quarter ended Dec. 31, 1988, also included a nonrecurring pretax gain on the sale of Federal Home Loan Mortgage Corp. preferred stock of $1,553,000.

John W. Folsom, president and chief executive officer, commented: ''Although we face the continuing challenge of maintaining our net interest margin, we remain confident about the future prospects for South Carolina Federal. We have taken the necessary steps to recognize and deal with our credit problems.

''In addition, we are in the process of evaluating our operations, products, and services to ascertain the most effective way to improve

profitability. Unprofitable or marginal activities will be eliminated to produce better net interest margins and lower overhead.''

At Dec. 31, 1989, total assets were $932,354,000 and net loans were $743,999,000. Deposits were $710,211,000 at Dec. 31, 1989, an increase of $31,597,000 over Sept. 30, 1989.

South Carolina Federal Corp. is the unitary thrift holding company of South Carolina Federal Savings Bank which currently operates 32 full-service offices and six mortgage loan offices in South Carolina. The common stock of South Carolina Federal is traded in the NASDAQ National Market System under the symbol SCFB.

#90022b0740 01/22/1990 ~Business Wire

LITTLETON, MA (JAN. 22) BUSINESS WIRE - Alliant Computer Systems Corp. (NASDAQ:ALNT) Monday introduced the FX/2800, the first family of supercomputers that combines a RISC-based architecture with an open technical computing software standard.

The new high-end systems are significant because they make possible a wide range of applications software and deliver incomparable performance to the technical computing marketplace.

Available within 90 days, the standards-based supercomputers are priced from $500,000 to $2 million. In a typical application mix, the FX/2800 family provides equivalent performance to a single processor CRAY Y-MP, twice the performance of a VAX 9000 model 440 and two and a half times the performance of a high-end Convex C-240.

The FX/2800 family provides up to nine times the price performance of a VAX 9000 model 440 and five times that of a high-end Convex 240. The FX/2800 delivers 10 times greater performance than the existing FX/80.

The FX/2800 family supports the Parallel Architecture eXtended (PAX) technical computing standard jointly developed by Alliant and Intel Corp. Introduced in October 1989, PAX-compliant software can run unaltered on any i860 processor-based platform, from the desktop to the supercomputer. This ensures widespread applications software availability. Many independent software vendors -- including Oracle Corp., Pixar, Marc Analysis and Swanson Analysis Systems -- have endorsed the standard to date.

''These new supercomputers are an important industry advance because they

bring the benefits of the PAX standard to the high end of computing for the first time. While other supercomputers and minisupercomputers espouse an open philosophy, they are locked into a closed, proprietary processor architecture. It's very clear today's users want to invest in a computing technology that protects their large software investment and provides guaranteed processor continuity,'' said Ronald Gruner, Alliant president and chief executive officer. Supercomputing For The 90s

The FX/2800 family delivers the three key capabilities required for technical computing in the 1990s. These include parallel processing for speed and flexibility, tools to visualize results and system-wide standards that ensure integration into existing computing environments.

These benefits are further enhanced by Alliant's use of the Intel i860 chip, the industry's only 64-bit RISC processor. The i860 CPU is optimized for computationally intensive applications such as molecular modeling, fluid dynamics, structural analysis and the interactive display of three-dimensional graphic images. General business applications such as database and econometric modeling also benefit from the unmatched scalar performance of this processor. ''Adaptive Supercomputing''

The new FX/2800 offers a remarkable range of configurability that addresses the varied supercomputing needs of a multiuser environment. It features an innovative design called Adaptive Supercomputing that enables users to configure the FX/2800 to meet the needs of any application mix.

Large problems can be solved very quickly with one large cluster of processors or smaller jobs can be solved by separating processors into independent units. For example, one minute the supercomputer can look like many processors are ''crunching'' together in parallel, and the next minute it can perform like seven midrange computers or 28 single-user computers.

No other supercomputer has ever offered this level of dynamic, adaptive parallel and multiprocessing capability. Three Levels Of Standards-Based Supercomputing

The new Alliant supercomputer is also the only system that provides all three categories of standards at the application, environment and connectivity levels.

First, at the applications level -- where other supercomputer vendors remain closed -- the FX/2800 offers an industry-standard hardware and software platform. This ensures any software purchased for a PAX compliant system will run unaltered on the FX/2800 system. Second, it features a standard operating environment (Concentrix and UNIX System V Release 4). Third, it offers industry-standard connections to any computer on the network (via Ethernet, DECnet, UltraNet, TCP/IP, NFS, NQS

and X-Windows).

Alliant Computer Systems Corp. manufactures standards-based parallel supercomputers with visualization tools that enable scientists and engineers to quickly intepret and solve complex problems.

#90022b0749 01/22/1990 ~Business Wire

FORT WORTH, TX (JAN. 22) BUSINESS WIRE - Tandy Corp. (NYSE: TAN) announced Monday that consolidated sales and operating revenues for the second quarter of fiscal 1990 were $1,456,588,000, an increase of four percent over the year earlier sales and operating reveneues of $1,402,661,000.

Earnings per share for the second quarter of fiscal 1990 were $1.43 compared to $1.50 reported for the year earlier period. Net income for the three months ended Dec. 31, 1989, was $117,633,000, compared to $135,050,000 in the same quarter of the prior year.

John V. Roach, chairman of the board and chief executive officer of Tandy Corp., stated, "Income, while good for the level of sales, was reduced by sales trends in two major sectors of our industry, completion of the ten million share repurchase program and costs associated with patent settlements. Weakness in demand for low-end personal computers and certain categories of consumer electronics slowed overall revenue growth."

Consolidated sales and operating revenues for the six-month period ended Dec. 31, 1989, were $2,442,565,000, compared to $2,339,614,000 for the same period last year. Earnings per share for the first six months of fiscal 1990 were $2.14 compared to $2.23 for the first six months of fiscal 1989. Net income for the six months ended Dec. 31, 1989, was $180,387,000, compared to $199,959,000 for the six months ended Dec. 31, 1989.

CAMP HILL, PA (JAN. 22) BUSINESS WIRE - Consumers Financial Corp. (NASDAQ-NMS: CFIN), an insurance holding company located in Camp Hill, Pa., announced that it has acquired Investors Fidelity Life Assurance Corp., based in Columbus, Ohio, for $6.9 million.

Both Consumers Financial Corp. and Investors Fidelity market credit life and disability insurance along with extended service automobile warranties. The acquisition allows Consumers to expand its marketing efforts into Ohio, where Investors Fidelity writes approximately $9 million in annual premiums.

In addition, Investors Fidelity will add about $20 million to Consumers' consolidated asset base. The company plans to operate a regional sales office in Columbus.

Consumers produced approximately $46 million in credit insurance premiums in 1989 and its assets total about $135 million. The company also markets individual life insurance, and owns a wholesale auto auction, Interstate Auto Auction, which is located in Mercer, Pa.

AUSTIN, TX (JAN. 22) BUSINESS WIRE - Conquest Airlines Corp. (NASDAQ:CAIR (common); CAIRU (units); CAIRW (warrants)), the largest independent regional airline in Texas, Monday reported results for the three and six month periods ended November 30, 1989.

Revenues for the current second quarter increased 84% to $2,883,892 from $1,565,051 in the same period one year earlier. The operating loss for the quarter declined to $349,214 from $469,134 in the comparable quarter last year.

The net loss for the quarter was $1,119,505 or $.27 per share versus $1,112,379 or $.65 in the second quarter of fiscal year 1989. Per share calculations in the current second quarter were based upon a weighted average of 141% more shares outstanding than in the same period one year earlier primarily due to the Company's May 1989 public offering.

For the first half of fiscal 1990, revenues increased 94% to $5,571,189 from $2,877,863 in the first six months of last year. The operating loss for the first half of the year declined to $712,127 from $972,429 in the same period one year earlier.

The net loss in the first half of the year was $2,158,874 or $.53 per share versus a net loss of $2,104,555 or $1.24 per share in the comparable

six month period last year. Per share calculations in the first half of the current fiscal year were based upon a weighted average of 143% more shares outstanding.

The revenue growth achieved in the first half of the current fiscal year is primarily due to increased passenger service on the Company's expanded fleet which now numbers nine aircraft. Enlarging the fleet and schedule changes required the payment of non-recurring expenditures for, among other things, the establishment of counter and gate service and outfitting of aircraft and training of flight and ground personnel.

These actions are in keeping with certain corporate objectives, namely to increase passenger load factors through the integration of new aircraft and expansion of the Company's route system. Despite these expenses as well as higher maintenance, sales and promotional expenses (including promotional fare pricing), general and administrative expenses, and non-cash depreciation and amortization expenses, the Company's operating loss declined. The increase in interest expense associated with fleet expansion produced a modestly higher net loss in the current first half versus the same period last year.

According to Victor Rivas, President and Chief Executive Officer, ''The first half of this fiscal year has been an exciting period of growth for our Company. Importantly, the number of passengers on our intrastate Texas flights rose substantially to 118,766.''

Looking ahead, Mr. Rivas commented, ''The Company has taken several steps designed to increase revenues in future quarters. In November, Conquest received Department of Transportation

authorization to provide interstate service. ''We have now entered into several interline agreements with other carriers and a joint fare agreement with another carrier. Similarly, we expect Conquest will generate additional revenues as a result of becoming a member of a not-for-profit travel agency responsible for placing reservations for governmental, military and various civil service employees. With our ninth plane in operation and our relocation to Austin, we look ahead with confidence to continuing the dynamic growth pattern established since we began operations just 16 months ago.''

Conquest Airlines Corp. is the largest independent regional air carrier in the state of Texas and one of the largest in the United States. The Company provides over 90 flights daily to Abilene, Austin, Beaumont, Corpus Christi, Houston, Laredo, McAllen, San Angelo, San Antonio and Tyler, on its fleet of nine all new prop-jet aircraft.

#90022b0770 01/22/1990 ~Business Wire

OSHKOSH, WI (JAN. 22) BUSINESS WIRE - Oshkosh Truck Corp. (NASDAQ: OTRKB) announced Monday at its annual shareholder meeting that net income was $690,000, or eight cents per share for the first quarter ended Dec. 31, 1989, of its 1990 fiscal year.

This compares to $3,075,000, or 34 cents per share, for the first quarter of fiscal 1989. Net shipments for the first quarter of the 1990 fiscal year were $96,339,000 compared to $79,731,000 a year ago.

According to John Carroll, president, over 85 percent of the improvement in volume was due to the chassis division formed following the acquisition of the motorhome chassis business from Deere and Co. in January, 1989. Improved aftermarket parts sales accounted for most of the remaining volume increase.

"While we are beginning to see improvement at the gross profit level, we continue to incur above average administrative costs in several areas associated with being a defense contractor. Start up costs of the new chassis division factory in South Carolina were also experienced during the recent quarter," said Carroll.

"Operating profits are expected to improve as the year progresses, but in total will trail last year," concluded Carroll.

The backlog as of Dec. 31, 1989, was $362 million compared to $341 million on Dec. 31, 1988. The current backlog does not include a new U.S. Army contract awarded on Jan. 12, 1990, which calls for production during 1992 and 1993 of 1,044 trucks and spare parts worth $213.9 million.

At the annual meeting the shareholders elected nine directors, including a new director, Michael W. Grebe, a partner in the law firm of Foley & Lardner in Milwaukee.

MIAMI LAKES, FL (JAN. 22) BUSINESS WIRE - Preferred Homecare of America Inc. (NASDAQ: PFRD), a hi-tech home infusion company and provider of pharmaceuticals to subacute care facilities, announced Monday that a letter of intent has been signed to purchase all the stock of American Home IV Care Inc. (AHCI) Potomac, Md., a physician owned home infusion company.

The total purchase price is $1 million. Two hundred seventy thousand dollars will be paid at closing in a combination of cash and stock. An additional payment of up to $730,000 may be made over the next five years based on the achievement of certain earnings.

"The acquisition of American Home IV Care is consistent with the strategy of expansion in the growth of our company. This acquisition will enhance Preferred Homecare's current base in the Baltimore/Washington D.C. region, which is a key market area for the home infusion industry," remarked Carlos M. Herrera, president and chief executive officer.

Preferred Homecare of America currently has offices servicing patients in Miami/Fort Lauderdale, Pasco County, Fort Myers, Fla., the New York/New Jersey metropolitan area and the Washington D.C./Maryland/Virgina region.

#90022b0773 01/22/1990 ~Business Wire

HOUSTON (JAN. 22) BUSINESS WIRE - A. Earl Swift, chairman and president of Swift Energy Co. (ASE, PSE: SFY), Monday announced its agreement to purchase five separate groups of oil and gas producing properties located

in Texas, Oklahoma, and Louisiana for an aggregate purchase price of over $42.5 million. The producing properties are to be purchased on behalf on current and future company-managed income and pension limited partnerships and joint ventures.

During the fourth quarter of 1989, funds raised for their acquisition of properties under the company's serialized public offerings totaled approximatley $7.5 million. Total subscriptions to partnerships and joint ventures during 1989 were approximately $74.3 million.

In the largest acquisition Swift has agreed to purchase from Amoco Production Co. 114 gross (27.7 net) oil and gas wells located in Custer, Caddo, and Washita counties, Okla.

Swift and its independent consultants estimate that the purchased interests in these properties have proved net working interest reserves of approximately 44.6 billion cubic feet of natural gas and 447,400 barrels of oil.

Under four other agreements, Swift contracted with sellers for the purchase of interests in 88 gross (24.8 net) oil and gas wells located in Burleson, Fayette, Freestone, Jim Hogg, Hidalgo, Grayson, and Lee Counties Texas. Proved net working interest reserves attributable to the interests acquired are estimated to be 634,200 barrels of oil and 15.7 billion cubic feet of natural gas.

A portion of the properties acquired in the five transactions with a value of approximately $10 million will be placed in partnerships formed prior to Jan. 1, 1990.

A significant portion of the remainder is expected to be placed in future partnerships to be formed under the company's four public limited partnership offerings during the first half of 1990, with the possibility that some portion may be placed in joint ventures formed with third parties.

As managing general partner of the limited partnerships, Swift receives from 5.5 percent to 13.5 percent of the net revenues from any properties acquired by the partnerships. For financial statement purposes, Swift recognizes its pro rata interest in the properties acquired when the properties are purchased by the limited partnerships.

Commenting, Swift said, "Our continued aggressiveness in the acquisition of producing oil and gas reserves demonstrates the company's and its partners' confidence in the future of the domestic oil and gas industry. We are convinced that reserves bought at today's discounted prices provide a sound current rate of return and a hedge against inflation and unknown factors that affect world oil and gas supply and demand.

#90022b0784 01/22/1990 ~Business Wire

NEW YORK (JAN. 22) BUSINESS WIRE - Loral Corp. (NYSE:LOR) Monday reported that income from continuing operations for the quarter ended Dec. 31, 1989 increased to $16 million, or 64 cents primary earnings per share, from $15.7 million, or 63 cents per share, in the comparable period last year.

The current quarter's results include a pre-tax $10.5 million, or 26 cents per share after tax, non-recurring charge against earnings, covering all the costs associated with the company's settlement with the U.S. Justice Department and the contract dispute regarding the ALR-56M.

Income from continuing operations before the non-recurring charge increased 44 percent, which was attributable to margin improvement and decreased net interest expense.

Bookings for the quarter reached $360 million, up from the $269 million recorded in the third quarter last year. Backlog reached a record $2.2 billion.

''Loral's operating results for the quarter were very solid,'' said Bernard L. Schwartz, Loral Chairman and Chief Executive Officer. ''The bookings momentum that started last quarter remained strong during this quarter, and we expect the trend to continue.''

Sales for the third quarter were $301 million, compared with $310 million last year. The company expects a marked increase in fourth quarter sales.

Results for the prior year have been restated to reflect the divestiture of two non-defense electronics units on April 27, 1989.

The purchase of Honeywell's Electro-Optics Division was completed at the end of the quarter for $54 million in cash. Through the third quarter, Loral's operating results do not include any contribution from the acquired division. The division, which was integrated into the company as Loral Infrared & Imaging Systems, adds to Loral's program base and capabilities in the areas of electro-optical airborne reconnaissance, threat warning detection, situation awareness, missile guidance and targeting.

Third quarter bookings represented strong new and follow-on business.

The company received $7.7 million in initial long-lead funding for its first production option of the 56M advanced radar warning receiver for U.S. F-16s.

The company also booked almost $100 million in training and simulation in the third quarter. A $61 million award from the U.S. Air Force was received for a fourth F-15E weapon systems trainer and support. So far the company has delivered two trainers, and plans to deliver a third this year. Also, Loral received $18 million in orders for its basic multiple integrated laser engagement system (MILES) for force-on-force training.

Loral was awarded low-rate initial production contracts totaling $11 million for the Air Force's military strategic, tactical and relay (MILSTAR) satellite communications program. The company will provide the processor and real-time operating system for the MILSTAR terminal.

Another new business area -- mid-range unmanned aerial vehicles (UAV) for tactical reconnaissance -- was opened up by a $4.7 million win for ground stations and data links in the joint Air Force and Navy UAV program.

An $11 million competitive contract to provide UHF multichannel digital radios, called ther MRC-142, for use in the U.S. Marine Corps' digital wideband transmission system (DWTS) was won at the close of the quarter. This new program positions Loral to supply as many as 500 radio systems in a program worth more than $50 million.

In December, Loral booked $23 million in follow-on production contracts for the digital scene matching area correlation (DSMAC) guidance system for the U.S. Navy's Tomahawk cruise missile.

The company also received orders totalling $28 million for infrared countermeasures systems for international customers.

Income from continuing operations for the nine months ended Dec. 31, 1989, totaled $52.4 million, or $2.08 per share (after the 26 cent charge), compared with $43.6 million, or $1.74 per share, in the prior year. Bookings for the first nine months of fiscal 1990 totaled $1.2 billion, compared with the $700 million recorded last year. Sales for the first nine months were $830 million, compared with $860 million a year ago.

Loral Corp. is a high-technology company that primarily designs and manufactures defense electronics.

NORWALK, CT (JAN. 22) BUSINESS WIRE - TechnoServe, an international development agency, announced Monday that it has been selected to receive a $280,000 grant from IBM to provide for the establishment of agricultural service cooperatives in Ghana, West Africa.

Included in the grant are IBM PS/2 computers and IBM Proprinters, which will be used to give local farmers access to up-to-date production and market information.

According to founder and president Bullard, ''We believe that the people of Africa and Latin America possess their own inherent wealth--their human potential and natural resources.

''What they need is the knowledge and skills to use their resources effectively. And now, with IBM's help, many more farmers will learn to sow and reap for themselves, today and for generations to come.''

''A company like ours that does business worldwide should care about a continent like Africa that has immense social needs,'' says Serge Caby, program manager, IBM Europe. ''We can do that effectively through our support of development agencies such as TechnoServe.''

With a staff of 190 people in 11 countries, TechnoServe assists locally-managed agricultural projects in Africa and Latin America, making them independent and profitable. Since its founding in 1968, the organization has taught hundreds of thousands of needy men and women to run agricultural enterprises that produce food and income, while fostering self-reliance. Each year, more than 500,000 people in the developing world benefit directly from TechnoServe's assisted enterprises.

TechnoServe/Ghana advisors are highly trained professionals in the fields of agriculture, bookkeeping, accounting, marketing and rural credit. With assistance from IBM, they will provide on-the-job training to Ghanaian farmers. In other projects throughout Africa and Latin America, TechnoServe's expert training has meant long-term viability for a variety of agricultural enterprises.

TULSA, OK (JAN. 22) BUSINESS WIRE - Jack Lewis, chairman of the board and chief executive officer of Health Concepts IV (AMEX:HCF) Monday announced significant developments regarding the company.

Howard L. Brenneman was appointed to Health Concepts board of directors. From 1962 to 1986, Brenneman was with New York Stock Exchange company, Hesston Corp., with revenue growth of 15 to 150 million during this time. From 1982 to 1986, he served as president and CEO.

He brings valuable business and financial experience and will be available for consulting and advisement. He is currently a consultant and serves on

several boards, including the advisory board of Boatmens First National Bank of Kansas City, and the board of Kansas Gas and Electric.

Thomas H. Claunch Jr., joins Health Concepts as vice president of marketing. Claunch was regional director of marketing, over five states and international affairs of Puerto Rico, with Community Psychiatric Centers, CPC.

Claunch brings over 20 years of marketing and consulting experience in alcohol and drug abuse. He is a graduate of the University of Tulsa, where he received a degree in marketing, and is continuing graduate work for a master's degree in marketing.

Health Concepts IV is an alcohol and drug treatment company. Its strategy is to market services in major metropolitan areas and to lease under-utilized beds in acute care hospitals and/or certified free standing facilities on an as needed basis, rather than investing in permanent, high cost facilities.

HCF maintains specialty alcohol and drug treatment units for women, adolescents, cocaine, codependency and relapse.

#90022b0797 01/22/1990 ~Business Wire

BATON ROUGE, LA (JAN. 22) BUSINESS WIRE - Piccadilly Cafeterias Inc. (NASDAQ: PICC), announced Monday its operating results for the second quarter and six month period ended Dec. 31, 1989.

Sales for the second quarter of fiscal 1990 rose 13 percent to $77,578,000 from $68,474,000 for the second quarter of fiscal 1989. Net income was $3,109,000, or 33 cents per share, compared to net income of $3,548,000, or 38 cents per share, a year ago.

Earnings during the quarter were adversely affected by an agreement by Institutional Equipment & Interiors Inc. (IEI), a wholly-owned subsidiary of Piccadilly based in Elmhurst, Ill., to pay a fine of $550,000, or six cents per share, to conclude a matter involving an allegation that IEI had participated with other unnamed parties in an agreement to submit collusive bids for a contract to construct a commerical kitchen for an unrelated customer.

This action was brought against IEI by the federal government in the United States District Court, Northern District of Illinois, eastern

division and involved activities occurring prior to Piccadilly's acquisition of control of IEI in 1984.

Earnings during the quarter were also negatively impacted by the severe cold weather that affected most of our market area.

James C. Malmberg, president and chief executive offcier, said that the second quarter operating results are encouraging in light of the ever increasing competitive restaurant industry environment.

''As a result of higher sales volume, improved operating margins, and our continued cafeteria expansion, we remain competitive and should see continued growth for the remainder of fiscal 1990.''

Malmberg noted that total cafeteria customer traffic in the quarter increased 3 percent from the prior year and that customer traffic in cafeterias that were open during both periods decreased 5 percent.

Piccadilly Cafeterias owns and operates 138 cafeterias in 14 states and six Ralph & Kacoo's seafood restaurants. All operating units are company owned.

BARTLESVILLE, OK (JAN. 22) BUSINESS WIRE - Phillips Petroleum Company Iran, a subsidiary of Phillips Petroleum Company, has received a $92 million settlement in an agreement with the Government of Iran and the National Iranian Oil Company.

The agreement concludes all claims and counterclaims between the parties.

A statutory fee of almost $1 million was deducted by the U.S. Treasury Department, leaving a net payment to Phillips of more than $91 million.

Phillips had filed a claim with the Iran-U.S. Claims Tribunal in 1981 seeking compensation for the expropriation of Phillips' one-sixth interest in two producing offshore oil fields. On June 29, 1989, the Tribunal had awarded Phillips approximately $110 million in compensation.

However, due to a lack of jurisdiction, the Tribunal did not dispose of a counterclaim by Iran concerning oil received by Phillips Petroleum Company under purchase contract. That issue and other items were settled with the $92 million award to Phillips.

The settlement was approved by the Tribunal and payment made to Phillips from a special account established to fund Tribunal awards or settlements.

BOCA RATON, FL (JAN. 22) BUSINESS WIRE - H. Werner Krause, president and chief executive officer of Siemens Information Systems, will host an informal luncheon for sports and business writers to discuss Siemens progress in South Florida and the Jan. 28 soccer game between Siemens-sponsored Boca Juniors and the world renowned Schalke 04 of West Germany to benefit the Boca Raton Youth Soccer Association. Kos Donev, Florida's collegiate soccer coach of the year from FAU who coaches the Boca Juniors, will also participate.

Siemens first opened its Boca Raton facilities in 1978. Since then, the complex has grown to over 650,000 square feet in 12 buildings housing five separate Siemens U.S. companies. The most dramatic growth has occurred in the last four years with employment increasing from 385 in 1986 to its current level of 2,000. Siemens Boca Raton is the headquarters for all Siemens telecommunications and information systems businesses in the United States.

The Boca Juniors, sponsored by Siemens Information Systems, is made up of local amateur and top caliber college players from Palm Beach and Broward Counties. Krause is player/captain of the team. Since his personal involvement in revitalizing the team, the Boca Juniors have consistently been the leader of the Gold Coast Soccer League.

NATICK, MA (JAN. 22) BUSINESS WIRE - "Consistent with our strategy to create an outstanding management team at Prime, we are announcing today that the appointment of John J. Shields as president and chief operating officer," said Chief Executive Officer James F. McDonald, "Jack's expertise in building organizations and establishing strong customer focus will greatly enrich Prime's management capabilities."

Prime also announced that McDonald, while continuing as chief executive officer, has been appointed vice chairman of Prime's board of directors. At the end of a one-year transition period, Shields will assume the duties

of chief executive officer of Prime. At that time, McDonald is expected to continue to serve on Prime's board of directors.

"We're pleased to have someone of Jack's stature and capability join our management team," McDonald said. "Together, we plan to continue Prime's strategy as a major participant in the CAD/CAM, minicomputer and computer services markets.

"Jack will succeed me as chief executive officer once the company's restructuring is complete and growth and profitability have been restored. Our progress in restructuring into profit centers and implementing cost reduction measures is on schedule and I expect that Jack will make a major contribution towards our mutual goals.

Jack will chair the management committee comprised of the senior functional executives and will be responsible for ensuring that we have a fully coordinated set of plans and budgets. Jack will also establish management processes across all the company's businesses."

Prime also announced the creation of a Corporate Management Office, which consists of McDonald and Shields, to oversee the strategic direction, day-to-day management and return of the company to growth and profitability.

Shields joins Prime after 28 years at Digital Equipment Corp. where he began as a field service engineer. His last position at Digital was senior vice president of Worldwide Sales and Services, Industry/Channels Marketing and the International Organization, with a worldwide work force of more than 70,000 people.

Prime Computer Inc. with its headquarters in Natick, Mass., supplies integrated solutions to the international manufacturing, financial services, government, education and scientific marketplaces. The company is the second largest worldwide supplier of integrated CAE/CAD/CAM systems.

NEW YORK (JAN. 22) BUSINESS WIRE - Unisys Monday announced the availability of two new V Series mainframe computers that lower the cost of entry into two of the corporation's industry-leading financial applications - check processing and imaging, providing continued investment protection for existing commercial, government and financial users and reducing environmental costs over previous generation systems.

During a press conference held at the Unisys Wall Street Solution Center,

Financial Systems Division President O. G. Greene characterized the V400 models as "new account door openers" for his direct sales force.

"These CMOS computer systems occupy as little as 11 square feet of office space, can be plugged into any standard electrical outlet and will outperform comparable IBM AS/400 and 4300 models.

"The price/performance range offered in the V400 series brings the cost of solutions based on Unisys general finance, document processing, and imaging application systems within reach of the medium-to-small financial institution market." Check Imaging System driven by V Series engines

"Unisys has been designing MICR processing systems since the 1960s, and that experience helped us to develop the industry's first integrated imaging system," said Fred Meier, vice president, Imaging Systems corporate office at Unisys.

"V Series systems are used to meet the processing requirements of the image item processing system components and control the image check processing systems software, indexing the check image with the MICR code read by the reader/sorter." The Unisys V400 Aeries: A foundation that can grow

The V410 model can be upgraded onsite to a V430 (which provides twice the processing throughput). The maximum configuration of both systems is one 5.5-square-foot processor cabinet (one CPU, two I/O processors and 40MB memory), and four 5.5-square-foot I/O cabinets that house and provide connectivity for 64 DLPs. Test-site user and first-day customer voice enthusiasm

Dave Johnston, vice president and MIS director of Heritage Federal Savings Bank, has been impressed with the reliability of his V430 field test system. "Our ATM network is on a national switch. We need to be online twenty-four hours a day, seven days a week to service our 120,000 customers, and we need to make sure there are no hardware failures. So far there hasn't been any downtime. It's been a very reliable box."

KINGSTON, NY (JAN. 22) BUSINESS WIRE - Besicorp Group Inc. (NASDAQ:BESI), announced Monday results for the second quarter ending Nov. 30, 1989.

Revenues for the second quarter were $2,890,294 as compared to $719,245 for the same period last year. Net income for the second quarter was $1,294,504 as compared to a net loss of $331,620 for the same period last year. Revenues for the six-month period were $3,423,476 compared to

$1,079,579 for the same period last year.

Michael F. Zinn, president of Besicorp, said ''The significant improvement in reported results is directly attributable to the financial closing of the Carthage and South Glens Falls cogeneration projects.

These results fo not reflect either the deferred portion of development fees earned, or the anticipated income from our 42.5 percent equity ownership interests.''

#90022b0829 01/22/1990 ~Business Wire

CITY OF INDUSTRY, CA (JAN. 22) BUSINESS WIRE - Applied Solar Energy Corp. Monday reported fiscal 1989 results.

Net sales for the 12 months ended Oct. 28, 1989 were $21.7 million compared to $25.8 million for the like period ended Oct. 29, 1988. Net loss for the year was $1.84 million which includes a loss from discontinued operations of $656,000 and a gain on the sale of the company's wholly owned subsidiary, Simulaser Corp. of $1.87 million. This compares to a net loss of $3.09 million for the prior year 1988.

Included in the prior years is a loss from discontinued operations of $667,000. The year-end backlog is $22.5 million up from $7.5 million at the end of 1988; $11.5 million of this backlog is fully funded.

Net sales for the fourth quarter of fiscal 1989 were $6.4 million. Sales for the like period ended Oct. 29, 1988 were $7 million. Net earnings for the quarter is $871,000 which includes a loss from discontinued operations of $145,000 and a gain on the sale of the company's wholly owned subsidiary, Simulaser Corp. of $1.87 million. This compares to a net loss of $602,000 for the like quarter of 1988 which includes a loss from discontinued operations of $204,000.

Commenting on Applied Solar's fourth-quarter and year-end results, Gerard McLarnon, president and CEO, noted that the sale of the Simulaser Corp. business and the growing backlog of its solar cell business has considerably strengthened the company's future. The company recently received two space station contracts totalling about $15 million.

According to McLarnon, the recent failure of McDonnell Douglas to acquire Applied Solar had little impact upon the company, which is now reviewing its options.

Applied Solar has two major business units, one producing gallium arsenide and silicon solar cells which convert sunlight directly into electrical power, for the space and defense industry and the second business unit, operating under the named Advanced Optoelectronics, is responsible for the development and sale of photosensor devices and laser subassemblies.

These products are used in multiple consumer, medical, defense and industrial applications. Applied Solar Energy Corp. is traded on NASDAQ under the symbol SOLR.

CHARLESTON, W.VA (JAN. 22) BUSINESS WIRE - National Banc of Commerce Co. reported record earnings for the year ended Dec. 31, 1989.

Consolidated net income for the company was $6,309,000 for the year of 1989, a 42.7 percent increase over the $4,422,000 reported for the like period in 1988. The company's return on average assets for the year of 1989 was 1.06 percent compared to 1.05 percent for the like period in 1988. This announcement was made by Charles R. Smith, chairman and chief executive officer of National Banc of Commerce Co.

For the three months ended Dec. 31, 1989, the company reported consolidated net income of $1,831,000 compared to $1,220,000 for the like period last year, an increase of 50.1 percent. The company's return on average assets for the three months of 1988 was 1.15 percent.

Deposits totalled $502,212,000 on Dec. 31, 1989, while total assets reached $629,635,000. Earnings per share for the year of 1988 were $1.10, based on 5,758,000 average shares outstanding compared to the $1.20 earned for the like period last year of 3,697,000 average shares outstanding.

For the three months ended Dec. 31, 1989, earnings per share were 29 cents based on 6,204,000 average shares outstanding compared to 33 cents based on 3,697,000 for the like period last year.

National Banc of Commerce Co. is the holding company for the National Bank of Commerce of Charleston, Belle, Nitro, South Charleston, Guaranty National Bank and the Bank of Man.

#90022b0840 01/22/1990 ~Business Wire

HOUSTON (JAN. 22) BUSINESS WIRE - Continental Airlines Monday announced that it has filed with the DOT for the right to fly nonstop from Houston to Tokyo, as part of a major expansion of service to Japan.

The nonstop flight would be an adjunct to the one-stop flight currently being sought via Honolulu. When offered together, the two routes would provide a competitive pattern of service between Houston and Tokyo.

Continental Chairman Frank Lorenzo was joined by Mayor Kathryn J. Whitmire and Greater Houston Partnership officials, who said they have been working together to obtain government approval for the new routes.

''Continental is pleased to have been able to make this filing. There is an intense community of interest between Houston and Tokyo that justifies this service, and we're also gratified that this is being demonstrated by the high level of local backing that our applications are receiving at the DOT,'' Lorenzo said.

''The opportunity to connect Houston and Tokyo depends upon an economically viable pattern of service,'' added Lorenzo. ''That pattern of service is a combination of nonstop flights, which would be gained from this application, and one-stop flights, to come from the filing currently pending before the DOT.''

Continental said the DOT's decision-making process could allow it to begin one-stop service as early as August 1990, and nonstop flights beginning in early 1991.

Houston is competing with several other U.S. cities for the right to become a Tokyo ''gateway.'' Lorenzo said that Houston's ability to win the route designation is enhanced by the cooperation that exists among the carrier, city officials and the Greater Houston Partnership. ''This project is but the latest example of unity between Continental and its hometown,'' Lorenzo said.

Continental has nearly 11,000 Houston employees -- its largest staff concentration anywhere -- and offers Houstonians nearly 200 daily departures to cities worldwide.

Lorenzo said there are 125 Japanese companies with Houston offices, and 109 Houston companies have a significant level of trade activity in the Pacific Rim, for which Tokyo is an ideal gateway.

Furthermore, Japan is Houston's largest trading partner. A recent study showed that new nonstop air service between Houston and Tokyo would cement these linkages and allow more of them to form, having a net positive economic impact on the Houston economy of approximately $305 million in the first year alone.

''I am extremely pleased that Continental has seized the opportunity to file for nonstop service between Houston and Tokyo,'' Mayor Whitmire said. ''As our largest international trading partner, Japan is Houston's highest priority in air service development. Continental's success in this endeavor will help Houston realize its true economic potential as an international center of trade and commerce.''

The carrier said that it intends to operate the new flights with widebody Boeing 747 aircraft. Japan's language, customs and cuisine will be an integral part of the ground and inflight service.

Continental's long, proud era of trans-Pacific experience dates to 1964, when it dedicated two 707s to fly servicemen from the Unite States to Pacific Rim cities including Tokyo. Continental is also operator of Continental/Air Micronesia, which began a unique inter-island service in the mid-Pacific in 1968.

Tokyo was woven into this route system in 1977, and now the airline serves more Japanese cities than any other U.S. carrier: Fukuoka, Nagoya, Okinawa and Tokyo. Continental has a total of 56 weekly departures from Japan. However only seven of those weekly frequencies are to the U.S. mainland.

On May 31, 1989, Continental inaugurated nonstop trans-Pacific service with daily service between Seattle/Tacoma and Tokyo, and has enjoyed substantial traffic growth since its inception.

Today more than one-fourth of Continental's business is on international route segments, and this sector of the company makes a major contribution to Continental's profitability.

Continental's filing with the U.S. Department of Transportation also seeks new routes including daily nonstop service to Nagoya from Seattle/Tacoma, Honolulu and Los Angeles; daily nonstop service between Guam and Sendei; and four weekly nonstop flights between Guam and Sapporo.

NEW YORK (JAN. 22) BUSINESS WIRE - Business Week magazine, a division of McGraw-hill Inc., and Hirlapkiado Vallalat, a publishing corporation based in Budapest, Hungary, have agreed to publish a Hungarian-language monthly magazine, it was announced Monday by John W. Patten, executive vice president and publisher of Business Week.

The magazine will be entitled ''Magyar Kiadas-Business Week'' (Business Week Hungary) and contain editorials selected from Business Week and Business Week International. Translated into Hungarian, the magazine will have an initial circulation of 8,000, and will be distributed in Hungary and neighboring countries.

''Business Week International has provided global companies with information and advertising opportunities for years,'' said Patten, ''and, now with the opening of new markets, Hungarians will be able to read for the first time in their own language, Business Week's excellent coverage.''

''As various corporations are moving into Eastern Europe, Business Week Hungary will provide the opportunity for advertisers to deliver their message to an ever growing audience,'' Patten continued. ''With reporting which spans the globe fro Beijing to Budapest, Business Week is very pleased to establish a presence in Hungary.''

The first issue of Business Week Hungary will be introduced at the Budapest International Spring Fair in May, 1990. Advertising rates $3,500.

#90022b0843 01/22/1990 ~Business Wire
KINGSTON, NY (JAN. 22) BUSINESS WIRE - National Micronetics Inc. (NASDAQ:NMIC), announced financial results Monday for the quarter ended Dec. 23, 1989.

For the second quarter, National Micronetics Inc. reported sales of $11,769,000 resulting in a net loss of $687,000 compared to prior year sales of $10,578,000 and net income of $779,000.

Results for six months ended Dec. 23, 1989 included sales of $20,748,000 with a net loss of $1,319,000, compared to sales of $22,871,000 and net income of $1,627,000 for the same period of the prior year.

James A. Robinson, president and chief executive officer, stated that $468,000 of the losses incurred in the quarter ended Dec. 23, 1989, are non-recurring, resulting primarily from layoffs of non-production employees, elimination of underutilized office space in San Diego, and suspension of an unprofitable product in our Kingston facility.

As previously announced, the losses during the first quarter of the year were attributable primarily to manufacturing difficulties at the Kingston facilty, changes in the manufacturing process at that plant, and a reduction in sales for that period.

At this time, the company is continuing to supply products to the Asian subsidiary of MiniScribe Corp. at its former level and to receive payment therefore as product is delivered, but remains unable to borrow against its receivables from that company.

National Micronetics Inc. is an independent magnetic recording head manufacturer for the disk drive industry.

#90022b0848 01/22/1990 ~Business Wire
HARTFORD, CT (JAN. 22) BUSINESS WIRE - The Hartford Steam Boiler Inspection and Insurance Co. (NASDAQ: HBOL) Monday reported that net income per share for the fourth quarter of 1989 was 93 cents compared to 90 cents for the fourth quarter of 1988. For the year 1989 net income per share was $3.78 compared to $3.46 the previous year, a 9.2 percent increase.

Net income for the fourth quarter was $19.14 million versus $18.31 million

for the same period last year. Net income for the year 1989 was $77.57 million as compared with $70.66 the year earlier.

In his letter to shareholders, President and Chief Executive Officer Wilson Wilde said that insurance operations reported a combined loss and expense ratio of 83.9 percent for 1989 compared to 84 percent for 1988.

"Favorable claims experience and good expense control offset the 1.7 percent decline in insurance premiums for the year," Wilde said. "Claim reserves were adjusted downward in the fourth quarter and during the year, reflecting more favorable settlements than were previously estimated. In the fourth quarter of 1989, compared to 1988, re-estimates of prior years' claims improved pretax earnings by approximately $6 million."

President Wilde said that the company did not incur any significant losses from Hurricane Hugo or the California earthquake. "The claims results for the fourth quarter, however, do include $5 million in reserves, net of reinsurance recoverable, for losses which resulted from the severe cold weather experienced in December in the South," he said.

Revenues from engineering services for the fourth quarter increased 37.4 percent and for the year 1989, 31.1 percent. Pretax income from engineering services for the fourth quarter increased 120.9 percent and for the year 1989, 53.1 percent.

Net investment income for 1989 increased 16.5 percent compared to 1988. Shareholder's equity per share as of Dec. 31, 1989, was $16.29 compared to $13.04 as of Dec. 31, 1988, a 24.9 percent increase.

#90022b0851 01/22/1990 ~Business Wire

CHICAGO (JAN. 22) BUSINESS WIRE - United Airlines Monday announced a significant expansion of its intra-California service including an increase in the frequency of its flights between San Francisco International Airport and Los Angeles International Airport to every half hour beginning April 30 and inauguration of three daily flights between Oakland and Burbank on May 1.

''California has been a very important market for United Airlines for more than 62 years,'' said Stephen M. Wolf, chairman and president. ''Today's major service commitment by United strengthens our position in the state by increasing our operations dramatically both with additional intra-California service as well as increased service to destinations outside of California.

''This will provide our customers with a convenient schedule to meet their travel needs,'' Wolf said.

United will offer service between San Francisco International Airport and Los Angeles International every half hour from 7:00 a.m. to 7:00 p.m. every business day. The 11 additional flights represent a 69 percent increase in frequency and will raise the number of United flights between the two airports to 27. The flights will be operated in a variety of equipment including Boeing 727s, 737s and McDonnell Douglas DC-10s.

United's expanded service between San Francisco and Los Angeles is the latest move by the carrier over the last eighteen months to strengthen its position in the corridor between the Bay Area and the Los Angeles Basin.

With the May 1 schedule change, United will offer 108 daily departures in the corridor, up from 38 departures in August 1988. United carries the largest number of passengers from both airports.

United currently offers six daily flights between San Francisco International Airport and Ontario International Airport, three flights between San Francicso and Long Beach, five flights between San Francicso and Burbank, five flights between Oakland International and Ontario International and four flights between Los Angeles and Oakland.

The new service between Oakland and Burbank complements service United initiated between San Francisco and Burbank with four daily flights in September 1988.

At Oakland, where United became the largest carrier in July 1989, the airline has increased its number of daily departures from 12 in August 1988 to 29, with the May 1 schedule change.

United's flights to Oakland will depart Burbank at 9:00 a.m., 3:30 p.m. and 7:30 p.m. The Oakland to Burbank flights will depart at 7:00 a.m., 1:30 p.m. and 7:30 p.m.

United Monday also begins daily operation of the Boeing 747-400 on its service between San Francisco and Hong Kong. Last month, United became the first carrier to operate regularly scheduled B747-400 service from San Francisco.

The carrier had been alternating its daily non-stop service between San Francisco and Hong Kong between a B747-400 and a smaller B747SP. United also offers daily Boeing 747-400 non-stop service between Los Angeles and Sydney and Melbourne, Australia.

Last year, United reinforced its position as the leading international

carrier serving the Bay Area by creating a major international gateway at its hub in San Francisco which doubled the number of trans-Pacific flights the carrier offers from the Bay Area. In 1989, United added service from San Francisco to Mexico City, Miami and New Orleans and increased frequencies to Detroit and Philadelphia.

The number of United's daily departures from San Francisco will increase from 119 in August 1988 to 162 in the summer of 1990. Also in 1990, the number of United's international seats, on a weekly basis, will increase 26 percent for San Francisco and 25 percent for Los Angeles.

DANVERS, MA (JAN. 22) BUSINESS WIRE - ABIOMED Inc. (AMEX:ABD), announced Monday the commercial unveiling of PerioTemp, the only dental probe developed for diagnosis of periodontal disease by means of accurate temperature measurements.

The PerioTemp was the object of intense interest when it was displayed at the 15th anniversary meeting of the Yankee Dental Congress held in Boston during Jan. 18-21, 1990.

Key features:

o Provides clear, precise, accurate temperature measurements for instant and objective diagnoses.

o An attractive, light-weight portable console allows patient visualization of periodontal problem areas, improving patient motivation and follow up.

o Developed for screening during routine clean up and examinations.

o Extremely easy to use.

o Uses single use sterile disposable tips for infection control.

o A printer allows direct link to the console providing a permanent documentation of results.

The PerioTemp allows the patients to see their own problem areas during the examination. When the single-use probe is placed in the 'sulcus,' between the tooth and surrounding gum, a 3-color light display panel on

the console indicates which tooth is being probed and the status of the site.

Red indicates blatant disease, yellow indicates a potential problem area for a developing infection, and green indicates a healthy site.

The instant feedback encourages patient compliance with home care and acceptance of the diagnosis and treatment plans recommended by dentists and dental hygienists.

According to Dr. Param Singh, executive vice president and general manager of ABIODENT, the newly created Dental Division of ABIOMED: ''clinical studies have shown that the measurement of 'sulcular' temperature is a more accurate predictor of health status of the tissue surrounding each tooth than any conventional technique used until now. The response to the PerioTemp at the Yankee Dental Congress was extremely positive, and confirmed our very high expectations for acceptance of the product by dental professionals.''

Based in Danvers, Mass., ABIOMED Inc. develops manufactures and markets innovative medical and dental products and is a leader in research and development of heart support systems.

DANVERS, MA (JAN. 22) BUSINESS EDITORS - ABIOMED Inc. (AMEX:ABD) announced Monday that its board of directors has elected Dr. Zeev Hadass to the position of president and chief operating officer.

Dr. Hadass, age 56, comes to ABIOMED from Optrotech SA of Brussels, Belgium, where he served as president since 1985. Prior to joining Optrotech, the European distributor of a $60 million manufacturer of automatic optical inspection and CAM systems, he managed the early phase of Omikron Scientific, a start-up medical device company founded by venture capitalists.

Dr. Hadass also spent over 20 years in the weapons development industry holding various positions, including heading a division employing over 900 scientists, engineers and support personnel.

Dr. Hadass, holds a Ph.D. degree in aeronautical engineering from Stanford University. He and his wife, Rina, are the parents of three children.

Based in Danvers, ABIOMED Inc. develops, manufactures and markets

innovative medical and dental products and is a leader in the research and development of heart support systems.

#90022b0865 01/22/1990 ~Business Wire

DALLAS (JAN. 22) BUSINESS WIRE - Dallas-based MetroLink Group Inc. (OTC) has entered into a $4.5 million contract with FiberLAN Inc., a privately held coompany in Triangle Research Park, N.C., for constructing Phase 1 of its planned Metropolitan Area Network.

Phase 1 of the MetroLink provides alternate local area telephone access to occupants of over 30 major office buildings in the central business district of downtown Dallas.

Major suppliers of equipment for Phase 1 include Canada-based Northern Telecom Inc., Telco Systems of Norwood, Mass. and Intratec Systems Inc. located in Richardson, Texas.

According to Neill Seeber, president and chief operating officer of the MetroLink Group, construction of the metroplex-wide system linking major commercial and industrial centers will commence in the first quarter of 1990.

MetroLink utilizes fiber optic cables and digital transmission to connect major telecommunicaion users to their long distance carriers and to interconnect customers' various locations.

Seeber observed that leasing existing fiber optic cable from Western Union for Phase 1 eliminates delays and costs of new construction. MetroLink has been using Western Union cables since June, 1989, for service to MCI Corp. and International Telecharge Inc.

Seeber noted, ''Our success in the last half of 1989 has convinced our customers MetroLink provides advanced telecommunications services at far less cost than any other arrangement. Our network accommodates voice and data transmission at virtually any rate of speed and in any capacity desired. The absence of switching mechanisms and metallic (copper) transmission media assures customers of virtually error free transmission.''

Seeber added that other metropolitan areas with similar systems include New York City, Washington, D.C., Boston, Philadelphia, Orlando-St. Petersburg, Fla.; Houston, Los Angeles and San Francisco in construction stage.

CINCINNATI (JAN. 22) BUSINESS WIRE - First Savings Bancorp, parent of First Financial Savings Association, F.A., reported net earnings for the third quarter ended Dec. 31, 1989, of $515,000, or 77 cents per share, an

increase from the $482,000, or 73 cents per share reported for the comparable quarter in 1988.

Net earnings for the nine month period ended Dec. 31, 1989, amounted to $1,502,000, or $2.24 per share, up slightly from the nine month net earnings for the comparable period in 1988, which amounted to $1,497,000, or $2.27 per share.

Per share earnings calculations for the current nine month period are slightly lower than the comparable period in 1988. This decrease is due to the dilution from stock options based on the higher current market price of the stock.

#90022b0876 01/22/1990 ~Business Wire

CONWAY, AR (JAN. 22) BUSINESS WIRE - Acxiom Corp. (NASDAQ:ACXM) Monday reported record earnings and revenue for the third quarter and nine-month period of fiscal year 1990, according to Charles D. Morgan Jr., chief executive officer and chairman of the board.

Consolidated revenue for the third quarter ended Dec. 31, 1989, was $24,090,000, compared to $19,781,000 for the third quarter ended Dec. 31, 1988, a 22 percent increase. Pre-tax earnings for the quarter ended Dec. 31, 1989, were $3,024,000, compared to $1,490,000 for the quarter ended Dec. 31, 1988, a 103 percent increase.

Net income for the third quarter ended Dec. 31, 1989, was $1,921,000, compared to $845,000 in the quarter ended Dec. 31, 1988, a 127 percent increase. Per share earnings for the quarter ended Dec. 31, 1989, were 39 cents per share vs. 18 cents per share for the quarter ended Dec. 31, 1988

a 117 percent increase.

Consolidated revenue for the nine months ended Dec. 31, 1989, was $64,559,000, compared to $53,975,000 for the nine months ended Dec. 31, 1988, a 20 percent increase. Pre-tax earnings for the nine months ended Dec. 31, 1989, were $7,323,000, compared to $4,985,000 for the nine months ended Dec. 31, 1988, a 47 percent increase.

Net income for the nine months ended Dec. 31, 1989, was $4,704,000, compared to $3,250,000 for the nine months ended Dec. 31, 1988, a 45 percent increase. Per share earnings for the nine months ended Dec. 31, 1989, were 96 cents, compared to 69 cents per share for the nine months ended Dec. 31, 1988, a 39 percent increase.

Acxiom was selected for the fifth successive year by Forbes magazine as one of ''The 200 Best Small Companies in America.'' ''This is quite an honor for our company and is a reflection of the outstanding contributions of our dedicated associates,'' according to Morgan.

During the third quarter, Acxiom announced the creation of an industry oriented organizational structure that took effect Jan. 1, 1990. Under the new alignment, Acxiom customer service teams will specialize in its customers' business applications of Acxiom's complete range of systems and services.

''It is no longer adequate to just sell products and services. We plan to create true business partnerships with our customers,'' said Morgan.

Acxiom finalized the agreement with M/A/R/C Inc. of Irving, Texas, to provide data processing facilities and use of Acxiom's proprietary software systems. This type of ''outsourcing'' arrangement -- turning over information system functions to outside contractors -- is an increasingly popular and cost effective data processing alternative for corporations today.

Acxiom provides a complete range of marketing services, software and facilities management to direct marketing businesses and marketing divisions of Fortune 1000 companies in the United States and United Kingdom.

Acxiom services include marketing databases, list enhancement, list processing, personalization and lettershop, product fulfillment, subscription fulfillment and analysis and consulting.

ATLANTA (JAN. 22) BUSINESS WIRE - Telecom USA (NYSE:TTT) President Clark McLeod has announced the formation of a new subsidary, Telecom USA Information Resources Co., headquartered in Cedar Rapids, Iowa.

Telecom USA is the world's fourth-largest long distance carrier.

Telecom USA formed Information Resources to develop automated information and transaction services for delivery over networks accessible through ''800'' and ''900'' numbers. The new company has a full technical facility along with newsgathering and creative services.

Telecom USA Information Services' editorial department produces Voice News Network (VNN), Telecom USA's unique telephone information service. From a single number, VNN customers can access a broad range of information such as financial news, current stock quotes, entertainment and sports news, and current weather around the country.

Telecom USA introduced VNN in April 1989 as a talking yellow pages service and as a product enhancement to its long-distance network.

''Information Resources will market services in concert with other parts of the corporation. It will play a central role in strengthening our position as a full-service player, able to respond with innovative products to meet telecommunications and information needs,'' said McLeod in making the announcement.

Sarah E. Ordover has been named president of Telecom USA Information Resources. Prior to joining Telecom USA, Ordover worked with a number of domestic and European voice service bureaus mapping strategies for the introduction of 900 telephone service.

Most recently she lived in Belgium, where she was responsible for working with ITT World Directories' international units to develop new business in the electronic information field. She is the author of Telemarketing and Interactive Voice, published by Link Resources, and editor of ''Telephone as Media,'' a report produced by Strategic Telemedia.

Telecom USA provides a full range of long distance and related products to over 500,000 customers throughout the country. The company is headquartered in Atlanta.

#90022b0887 01/22/1990 ~Business Wire

FREEHOLD, NJ (JAN. 22) BUSINESS WIRE - Calton Inc. (NYSE:CN), a New Jersey based housing developer, reported a preliminary unaudited net loss of $6,312,000 (19 cents per share) on revenues of $133,655,000 for the fiscal year ended Nov. 30, 1989 as compared to net income of $21,655,000 (62 cents per share) on $169,300,000 of revenues for the fiscal year ended Nov. 30, 1988.

The 1989 results include non-recurring charges of $8,510,000 pre-tax as described below. Earnings (loss) per share are based upon the weighted

average shares outstanding of 33,735,000 and 35,003,000 for the years end Nov. 30, 1989 and Nov. 30, 1988, respectively.

The 1989 results decreased from the levels attained in the prior year partially due to a decrease in the average gross margin on houses delivered and lower average selling prices resulting primarily from the timing and nature of new project openings and market softening.

This reduction in average gross margin resulted primarily from a significantly higher proportion of houses delivered in 1989 from the Florida and Pennsylvania projects, where average selling prices and gross margins are historically lower than those in New Jersey.

Calton Homes and its subsidiaries delivered 978 and 1,050 housing units in fiscal year 1989 and 1988, respectively. For the year ended Nov. 30, 1989 approximately 33 percent of the housing units delivered were from the company's New Jersey projects compared to approximately 60 percent in fiscal 1988. The decrease in both the number and relative precentage of houses delivered in New Jersey is partially a result of the timing of project openings and a continuing market softening in New Jersey.

In 1989, the company wrote off its remaining investment of $6,394,000 in and guaratees and loans to certain partnerships affiliated with Wedgewood Park Development Inc., an unconsolidated subsidiary of Calton Capital II Inc.

In addition, the company wrote off a portion of its investment in certain assets in its home building subsidiary located in Tampa, Fla., as part of its decision to dispose of this subsidiary since it has been determined that the book value of the assets is not currently realizable due to continuing unprofitable operating results. These results were partially offset by income resulting from the equity in earnings of joint ventures, principally from equity in earnings of Talcon, L.P., a master limited partnership.

Talcon participates in real estate partnerships in several states primarily California and Virginia. The equity in earnings of joint ventures amounted to approximatley $6,642,000 in fiscal 1989 compared to $4,580,000 in the same period in 1988. In addition, the company profited from the establishment of a wholly owned subsidiary in 1989 in Sacramento, Calif. Finally, revenues for fiscal 1988 include $5,200,000

from the sale of land that contributed approximately $1.5 million to net income compared to land sale revenues of $5,100,000 that contributed approximately $300,000 to net income in 1989.

Net loss for the fourth quarter of 1989 was $3,923,000 (12 cents per share) on revenues of $55,408,000 compared to net income of $10,730,000

(31 cents per share) on revenues of $67,959,000 for the same period in 1988. Earnings (loss) per share are based upon the weighted average shares outstanding of 33,680,000 and 34,825,000 for the respective periods. The fourth quarter 1989 results decreased from the levels attained in the prior year partially due to a decrease in the average gross margin on houses delivered, the write-off of the investment in affiliates of Wedgewood Park Development Inc. and Tampa, assets as discussed above and reduced income resulting from the equity in earnings of joint venture (principally Talcon L.P.).

The equity in earnings of joint ventures amounted to $2,962,000 and $5,660,000 in the fourth quarters of 1989 and 1988, respectively. These factors were partially offset by the results of the company's operations in Sacramento, in 1989. Calton Homes and its subsidiaries delivered 354 and 467 housing units in the fourth quarter of 1989 and 1988, respectively.

Sales backlog at Nov. 30, 1989 was approximately $67,900,000 representing 474 units compared to $37,600,000 representing 265 units at Nov. 30, 1988. The increase in both the number of units and dollars of sales backlog in 1989 compared to the prior year is due partially to the number and timing of new project openings, including those in Sacramento.

Since August 1989, the company has not been in compliance with certain financial covenants contained in the agreement which governs its $100 million uncollateralized line of credit. The company has been engaged in discussions with its lenders regarding possible modifications to the agreement, including adjustments of the covenants, the conversion of the line into a collateralized arrangement, and a mandatory reduction in the amount which may be borrowed under the line.

#90022b0890 01/22/1990 ~Business Wire

COLUMBIA, TN (JAN. 22) BUSINESS WIRE - Maury Federal Savings Bank (NASDAQ/NMS:MFED) Monday reported results for the third fiscal quarter ended Dec. 31, 1989.

Net income was $183,473, or 32 cents per share, vs. $282,664, or 49 cents per share, for the prior year third quarter. The decrease of $99,191 was due almost entirely to the prior year quarter including a non-recurring untaxed capital gain of $103,568, without which the prior year third quarter earnings would have been 31 cents per share.

Stockholders' equity at Dec. 31, 1989, was $10,267,944, representing book value of $17.43 per share. On total assets of $53,004,205, the bank's

capital-to-assets ratio is 19.4 percent, believed to be one of highest among banking institutions.

With continued strong earnings and a high level of capital, in December the bank declared an increased quarter dividend of 10 cents per share and a special dividend of $1 per share.

Maury Federal Savings Bank, with offices in Columbia and Mt. Pleasant, Tenn., serves customers primarily in Maury County and southern Middle Tennessee. The bank's common stock is traded on the NASDAQ National Market System under the Symbol MFED.

#90022b0891 01/22/1990 ~Business Wire

FREEHOLD, NJ (JAN. 22) BUSINESS WIRE - Talcon L.P. (NASDAQ:TLCNZ), a publicly traded limited partnership engaged in real estate development through its participation in unconsolidated project joint ventures and limited partnerships, reported preliminary unaudited net income of $6,594,000 for the year ended Nov. 30, 1989 compared to $1,917,800 for the 1988 fiscal year.

The partnership recorded equity in earnings of joint ventures in which it participates in the amount of $4,624,000 and $1,226,000 in fiscal 1989 and 1988, respectively.

The significant improvement in earnings in 1989 is due to profitable operations in several of the partnerhip's operating limited partnerships, principally those operating in the California and northern Virginia real estate markets.

Also, Talcon, L.P. realized a net gain of approximately $4,189,000 in 1989 compared to $2,391,500 in 1988 from the sale of partnership interests.

Net income for the fourth quarter of 1989 amounted to $3,408,000 compared to $5,200,900 for the comparable period of 1988. Results for the 1989 and 1988 fourth quarter include equity in earnings of joint ventures in which the partnership participates in the amount of $713,000 and $3,388,900, respectively.

Net income reported for the year ended Nov. 30, 1989 was allocable to the partnership's Class B Limited Partnership Unitholders (12 cents per unit) after allocation to the general partner and the Class A Limited Partner.

No earnings were allocable in fiscal 1988 to the partnership's class B

Limited Partnership unitholders. In 1989, the holder of the redeemable class limited partnership interest were allocated $5,819,000, of which approximately $2 million was preferred return accumulated as of Nov. 30, 1988.

STAMFORD, CT (JAN. 22) BUSINESS WIRE - Burton G. MacArthur, Jr. was Thursday elected executive vice president, newsprint and kraft, of Champion International Corporation.

In this position, he will have the responsibility of directing the manufacture and the sale of products from the company's mills in Lufkin and Sheldon, Texas and Roanoke Rapids, N.C. Since joining Champion in 1974, he has managed the company's order services, production planning, and management information systems.

He received an A.B. from Harvard College in 1970 and an M.B.A. from The Amos Tuck School of Business Administration at Dartmouth College in 1974.

MacArthur succeeds Richard E. Olson. Olson will remain an executive vice

president and will have responsibility for technology, engineering, major projects, manufacturing support, and international licensing. Since joining Champion in 1967, he has held a variety of manufacturing and technical positions, including managing the engineering and construction of the company's Quinnesec pulp mill. Olson succeeds Mr. Judson Hannigan who is retiring.

Champion is one of the America's leading manufacturers of paper for business communications, commercial printing, publications, newspapers. Headquartered in Stamford, Connecticut, the company owns or controls 6.4 million acres of timberlands in the U.S. and is a major manufacturer of plywood and lumber.

BURLINGTON, VT (JAN. 22) BUSINESS WIRE - John A. Cobb, president and chief executive officer of Eastern Bancorp Inc. (NASDAQ:VFBK), was appointed to the additional position of president and chief executive officer of Vermont Federal Bank, FSB at the annual meeting of the bank's board held Jan. 17, 1990.

Cobb's duties and responsibilities will include management of Vermont Federal Bank, Eastern's largest subsidiary. ''Vermont Federal Bank has a clear focus on the future and I will continue to execute the strategic plan of the bank designed first and foremost to respond to our customers' needs by providing the best banking products and outstanding service in an easy and convenient banking atmosphere,'' said Cobb.

In other action, the board elected two new directors to serve three year positions on the bank's board. Ernest A. Pomerleau is president of Pomerleau Real Estate of Burlington, Vt., and is a graduate of St. Michael's College. Stewart H. McConaughy, a managing partner of Gravel and Shea, a law firm in Burlington, Vt., is a cum laude graduate of the University of Michigan Law School and of Wesleyan University. Both men serve in numerous community leadership positions.

Eastern Bancorp is the $617.3 million holding company for Vermont Federal Bank, FSB of Burlington, Vt., and Rockingham Bancorp of Exeter, N.H. Vermont Federal Bank operates from 15 locations throughout Vermont and recently announced plans to open a branch and three drive-up lanes in Williston, Vt.

LOUISVILLE, KY (JAN. 22) BUSINESS WIRE - Kentucky Medical Insurance Co. (NASDAQ: KYMDA) expects to report 1989 operating earnings in the range of $3.00 to $3.30 per share, according to Chief Operating Officer David Lester.

Those figures exceed by about 18 percent to 29 percent the company's 1988 reported operating income of $2.55 per share. Operating earnings per share are based on a weighted average 969,000 shares outstanding, compared with 765,000 shares in 1988.

Management expects to report operating income of between $2.9 million and $3.2 million, or 53 percent to 68 percent above the comparable figure of $1.9 million in 1988.

Net income is expected to increase between 37 percent and 49 percent over last year's figure of $2.7 million, Lester said. On a per-share basis, net income is expected to reach $3.80 to $4.10, compared with $3.51 per share in 1988.

Lester said income continued to expand for the Kentucky-based medical professional liability insurer because:

- A new division which insures hospitals and other health care facilities contributed to profits through about $1.7 million in new premiums.
- Investment performance improved substantially, as yields increased and investment income rose more than 25 percent.
- Policyholder claims and losses were lower than expected.

"We're pleased with the gains achieved in 1989 over the strong growth of 1988," said Lester, noting that income expanded despite heavy competition from other insurers and a decline in the company's policyholder base. "We intend to build upon last year's accomplishments as part of our long-range strategy," Lester said.

Lester said that strategy includes a decision to decrease overall liability insurance premiums for physicians by 12.5 percent. The company also announced additional policy incentives from a fund within company insurance reserves called the Physicians Experience Pool.

Lester said he expects that pricing decisions and other insurance policy changes will enhance Kentucky Medical's competitiveness and expand the company's market share. It currently insures about half of Kentucky's doctors.

In the plan, Kentucky Medical's 2,000 policyholders will receive

reductions ranging from nine to 14 percent, depending on the doctor's specialty/risk classification and coverage limits.

#90022b0902 01/22/1990 ~Business Wire

NEW ORLEANS (JAN. 22) BUSINESS WIRE - Freeport-McMoRan Energy Partners, Ltd. (NYSE: FMP), Monday declared a cash distribution for the quarter ended December 31, 1989, of 55 cents per unit payable February 15, 1990, to unitholders of record at the close of business on January 31, 1990.

In November 1989, FMP and Freeport-McMoRan Inc. (NYSE: FTX), majority owner and special general partner of FMP, announced their intention to convert FMP from a master limited partnership to a publicly traded corporation listed on the New York Stock Exchange. This restructuring is expected to occur by the end of the first quarter of 1990.

The cash distribution for the fourth quarter of 1989 will be FMP's nineteenth consecutive quarterly cash distribution of 55 cents per unit. FMP has a policy of making quarterly cash distributions of at least 55 cents per unit for a five-year period that began in April 1985, when the partnership became a publicly traded entity.

The five-year period is scheduled to conclude on March 31, 1990, and the partnership will therefore make one additional distribution of 55 cents per unit in 1990 under its initial five-year distribution policy.

The first-quarter 1990 cash distribution is currently scheduled to be paid before the consummation of FMP's restructuring.

FMP explores for, develops, and produces oil and natural gas offshore and onshore in the United States. McMoRan Oil & Gas Co., a wholly owned subsidiary of Freeport-McMoRan Inc., is the managing general partner of FMP.

CONTACT: Freeport-McMoRan, New Orleans, Joseph H. Tice, (504) 582-4458 Craig E. Saporito, (504) 582-4476.

#90022b0904 01/22/1990 ~Business Wire

NEW ORLEANS (JAN. 22) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE: FRP), Monday declared a cash distribution for the quarter ended December 31, 1989, of 60 cents per unit payable February 15, 1990, to unitholders of record at the close of business on January 31,

1990.

Fourth-quarter 1989 cash available for distribution totaled $51.2 million or the equivalent of 62 cents per unit anticipated to be outstanding on January 31, 1990. In addition to cash flow from ongoing operations, fourth-quarter 1989 cash available for distribution included proceeds from the sale of certain non-strategic assets and related working capital totaling $11.4 million.

FRP is making quarterly cash distributions of at least 60 cents per unit through the second quarter of 1991. The level of cash available for distribution in excess of 60 cents per unit during the fourth quarter of 1989 will enable the partnership to reduce from $8.8 million to $7 million the amount of cash distributions previously deferred by Freeport-McMoRan Inc. (NYSE: FTX). FRP's fourth-quarter and year-end 1989 financial results will be announced on January 23, 1990.

FRP is a limited partnership engaged in the mining of phosphate rock; the production and distribution of phosphate and nitrogen fertilizer products; the exploration, mining, and transportation of sulphur; and the exploration, development, and production of geothermal energy.

FRP also receives royalties from a proprietary process used by Freeport-McMoRan Inc. for the recovery of uranium oxide from phosphoric acid. Freeport-McMoRan Inc. owns approximately 62 percent of the outstanding units.

AUSTIN, TX (JAN. 22) BUSINESS WIRE - HealthVest (ASE:HVT) Monday announced that it has received the payment of approximately $2.7 million due Jan. 20, 1990, from Healthcare International Inc. under the terms of the Standstill Agreement.

Upon receipt of these funds, HealthVest has paid its lenders approximately $3.5 million, representing interest payments which were due in late December or early January.

HealthVest also announced that the syndicate of banks providing its $33 million eurodollar credit facility has exercised its power of attorney to place mortgages on several properties owned by the Trust.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including

psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers, and facilities offering other related health care products and services.

-30- 321
#90022c0012 01/22/1990 ~Comtex
WASHINGTON (JAN. 22) COMTEX - The 10-Q report filed at the NASD shows Bouton Corp. earned $27,000, or $0.00 per share, on revenues of $2 million for the quarter ended Nov. 30, 1989.

This compares with a loss of $27,000, or $0.01 per share, on revenues of $1.57 million for the same period in 1988.

-30- 438
#90022c0013 01/22/1990 ~Comtex
WASHINGTON (JAN. 22) COMTEX - The 10-K report filed at the NASD shows Wetjet International Ltd. lost $1.54 million, or $0.13 per share, on revenues of $4.22 million for the fiscal year ended Sept. 30, 1989.

This compares with net income of $205,844 (including an extraordinary gain of $54,388), or $0.02 per share, on revenues of $5.66 million in fiscal 1988.

-30- 518
#90022c0015 01/22/1990 ~Comtex
WASHINGTON (JAN. 22) COMTEX - The 10-Q report filed at the NASD shows American Electromedics Corp. earned $32,000, or $0.01 per share, on

revenues of $609,000 for the quarter ended Oct. 28, 1989.

This compares with a loss of $168,000, or $0.06 per share, on revenues of $266,000 for the same period in 1988.

-30- 458

#90022c0016 01/22/1990 ~Comtex

WASHINGTON (JAN. 22) COMTEX - The 10-K report filed at the NASD shows Home Federal Savings Bank of Alabama earned $294,000, or $1.20 per share, for the fiscal year ended Sept. 30, 1989 vs. earning $482,000 in fiscal 1988.

Earnings per share data for fiscal 1988 is not available because the bank had not converted from mutual to stock form until Nov. 13, 1989.

Earnings per share data of $1.20 for fiscal 1989 assumes the bank's stock conversion was completed at Sept. 30, 1989.

-30- 647

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

GROUP LED BY HARDBALL INC OWNS 300,000 SHARES (13.90%) OF HAL INC (TICKER: HA) OF HONOLULU, HI.

ANNOUNCEMENT:

On Dec. 29, 1989, HAL Acquisition was merged with and into HAL, and Hardball Inc. entered into a shareholder agreement with other shareholders.

As a result, the former shareholders own 75 percent of the new firm.

The agreement grants a 6-year voting proxy to J. Thomas Talbot and Peter V. Ueberroth.

Argyros loaned Hardball $4,854,772 to help finance the acquisition through an equity contribution to HAL.

-30- 468

#90022c0399 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Dec. 27, 1989, Westbank Corp. declared a distribution to each outstanding common stock shareholder of one common stock purchase right for each share registered at the close of the business day on Jan. 2, 1990. Each right entitles the holder to purchase one $2.00 par-valued common stock at a cash excise price of $36.00 per common share. The terms are subject to adjustment and are set forth in a shareholder rights agreement between Westbank and the rights agent, namely State Street Bank and Trust Co.

These rights will not be initially exerciseable. A distribution date for these rights and their date of separation from common stock will result from any of a number of activating conditions, all of these conditions being related to the acquisition of large and potentially control-threatening percentages of outstanding shares by an outside party or parties.

-30- 1102

#90022c0400 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Dec. 29, 1989, Reuter Inc. refinanced outstanding debts and obtained working capital by entering into a restated loan and security agreement with U.S. West Financial Services Inc. Those outstanding debts were owed to the UnibancTrust Co. and First Illinois Bank of Evansville Inc.

The financing is evidenced by a promissory note for $6.50 million maturing on March 30, 1990, or June 30, 1990 if extended. Security was offered in the form of certain Reuter machinery and equipment and all outstanding shares of Reuter Recycling of Florida Inc.

-30- 791

#90022c0401 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Dec. 18, 1989, Simpson Industries Inc. amended its shareholder rights plan (as embodied in its April 27, 1987 shareholder rights agreement) between itself and the National Bank of Detroit as rights agent and successor rights agent to Manufacturers National Bank of Detroit effective March 31, 1989.

The amendment: reduces the ownership threshold that triggers a "flip-in" under the rights plan from 40% of outstanding shares to 20%, adds a "flip-in" trigger provision for any owner of greater than 10% whom the board majority deems an "adverse person", provides for the issuance of common stock after the distribution date for a stock sale if deemed necessary, changes the distribution date for stock sales, and excludes the underwriter from the label of beneficial owner for shares owned as an underwriter.

-30- 1038

#90022c0402 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Oct. 6, 1989, Software Developer's Co. Inc. entered into an agreement with Custom Design Systems Inc. to purchase from Custom Design Systems full right and title to the intellectual property and other interests in the C-Worthy software product. The property will be exchanged upon receipt of

aggregate payments by Custom Design Systems, to be made over time in the amount of $1.00 million.

C-Worthy is a complete software tool, consisting of computer programs, libraries, utilities and documentation for providing prewritten code for the creation of user-interfaces within new software. Custom Design will retain the right to use C-Worthy for limited, internal development purposes and to use portions of C-Worthy's programs and other intellectual material in future software endeavors.

-30- 1032

#90022c0403 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 10-Q report filed at the NASD shows Conquest Airlines Corp. lost $1.12 million, or $0.27 per share, on revenues of $2.88 million for the quarter ended Nov. 30, 1989.

This compares with losses of $1.11 million, or $0.65 per share, on revenues of $1.57 million for the same period in 1988.

-30- 487

#90022c0404 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Jan. 8, 1990, BIS-ILE Associates, controlled through a 55.88% partnership by International Leisure Enterprises Inc., filed a petition for relief from creditors and reorganization under Chapter 11 in the U.S. Bankruptcy Court for the District of Arizona.

-30- 489

#90022c0405 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Jan. 8, 1990, Home Owners Savings Bank filed a business and recapitalization plan with the Office of Thrift Supervision in order to bring itself under compliance with capital liquidity requirements of OTS as of Dec., 1989.

-30- 448

#90022c0407 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Jan. 17, 1990, Piedmont Federal Corp. announced an expected net income for all of fiscal 1989, ended Dec. 31, 1989, of $3.30 million. This is $500,000 less than the reported $3.80 million reported for the nine months ended Sept. 30, 1989.

-30- 467
#90022c0408 01/22/1990 ~Comtex
WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Jan. 18, 1990, Celerex Corp. announced that it was no longer a development stage company. This advance is reflected in Celerex's third-quarter statement, where losses were $611,911, or $0.03 per share, on revenues of $242,362 for the quarter ended Sept. 30, 1989.

This compares with losses of $1.02 million, or $0.05 per share, on revenues of $3,009 for the same period in 1988.

Celerex states the financial information for its quarterly report has been prepared on the basis that the company will be able to continue in existence as a going concern and do not include any adjustments relating to the recoverability and classification of liabilities that might be necessary should the company be unable to continue in existence.

-30- 954
#90022c0409 01/22/1990 ~Comtex
WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Jan. 4, 1990, Kelly Oil Corp. announced that it had completed a private placement of 697,181 shares of common stock for proceeds of approximately $6.7 million. Of these funds, $2.47 million were used to retire outstanding debts resulting from drilling activities, and the balance was added to working capital.

-30- 535
#90022c0410 01/22/1990 ~Comtex
WASHINGTON (JAN. 23) COMTEX - The 10-Q report filed at the NASD shows Agripost Inc. lost $370,190, or $0.02 per share, on revenues of $245,059 for the quarter ended Nov. 30, 1989.

This compares with losses of $78,226, or $0.01 per share, on no revenues for the same period in 1988.

-30- 430
#90022c0411 01/22/1990 ~Comtex
WASHINGTON (JAN. 22) COMTEX - The 10-Q report filed at the NASD shows International Converter Corp. earned $37,610, or $0.00 per share, on revenues of $798,731 for the quarter ended Nov. 30, 1989.

This compares with earnings of $76,360, or $0.00 per share, on revenues of $890,913 for the same period in 1988.

-30- 468
#90022c0412 01/22/1990 ~Comtex
WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows on Jan. 6, 1990, Jackson County Federal Savings and Loan Association filed a capital restoration plan as per a request from the Office of Thrift Supervision. OTS will approve that plan within 50 days if no additional information is requested.

Jackson Federal has repeatedly claimed that it has been in compliance with OTS' capital requirements resulting from Jackson Federal's conversion in 1988. Under a bulletin released by the OTS on Jan. 9, 1990, however, previously agreed to capital forebearances are eliminated under the Financial Institutions Reform, Recovery and Enforcement Act of 1989. Jackson Federal has therefore stated that it will not act inconsistently with any applicable operating restrictions during the approval period.

#90022c0416 01/22/1990 ~Comtex
WASHINGTON (JAN. 23) COMTEX - Community National Bancorporation of South Carolina Inc. filed a Form S-1 registration statement with the SEC in which it proposes to offer 800,000 shares of its common stock at a price of $10.00 per share.

Community National Bancorporation has been formed to become a bank holding company by acquiring all of the capital stock of Community National Bank of Columbia, South Carolina.

Community National Bancorporation's executive office is located at Suite 300, 1331 Elmwood Ave., Columbia, SC 29201 and its telephone number is (803) 252-6717.

-30- 753

#90022c0417 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - Xybit Inc. filed a Form S-18, amendment No. 1 registration statement with the SEC in which it proposes to offer 250,000 units. The initial public offering price is $0.75 per unit.

Also, an additional 500,000 units are being registered for offering by certain selling shareholders of the company. The company will not receive any proceeds from the sale of such units.

This is a blind pool/blank check offering in that neither the use of the proceeds nor the business of the company is specified.

Xybit's executive office is located at 321 Fifth Ave., Suite 301, New York NY 10016 and its telephone number is (212) 684-3440.

#90022c0418 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - Alden Production and Marketing Corp. filed a Form S-18, amendment No. 2 registration statement with the SEC in which it proposes to offer 25 million units. Each unit consists of one share of common stock, one Class A warrant and one Class B warrant.

Each Class A warrant entitles the holder to purchase one common share at $0.04 per share and each Class B warrant entitles the holder to purchase one common share at $0.08.

The initial public offering price is $0.02 per unit.

Finnet Securities Inc. is underwriting the offering.

The business plan of the company is to engage in the production of video programs, including a television sports interview program to be known as Sports Signatures, instructional videos, commercials, and, to a lesser extent, movies.

The company's executive office is located at 4742 N. 24th St., Suite 340, Phoenix, AZ 85016 and its telephone number is (602) 956-8830.

#90022c0419 01/22/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - Vector Automotive Corp. filed a Form S-1, amendment No. 1 registration statement with the SEC relating to 60 million common shares underlying 60 million warrants of Vector which were previously sold in the company's initial public offering of 60 million units. Each unit then consisted of one common share and one warrant of the company.

Each warrant is exerciseable to purchase one share of the company at an exercise price of $0.15 per share.

In addition to the warrants, this prospectus relates to an aggregate of 6 million underwriter's warrants previously sold in the initial public offering and to 6 million common shares underlying the underwriter's warrants. The underwriter's securities are being sold by Blinder, Robinson & Co. Inc.

Vector is a development stage firm in the business of design, manufacture and assembly of exotic sports cars known as the Vector W2 and Vector W2-A.

Vector's executive office is located at 400 North Marine Ave., Wilmington, CA 90744 and its telephone number is (213) 522-5500.

BRUSSELS (JAN. 22) - The Belgian government on Monday decided to slash its withholding tax on income from bonds and certificates of deposit (CD's) from 25 percent to 10 percent from March 1, Prime Minister Wilfried Martens said.

The move aims at curbing a capital flight from Belgium that last year totalled around 130 billion Beglian francs (3.6 billion dollars) and at easing the cost of state borrowing, Finance Minister Philippe Maystadt said.

The tax, deducted at source on interest from bonds and bank-issued CD's, has forced the government to offer interest way above market rates in order to attract lenders, analysts said.

At 10 percent, the new rate will also be broadly aligned with investment taxes in other European countries, they said.

The European Economic Community (EEC) is scheduled to start removing its final controls on capital movements from July 1.

The reduced tax rate will apply to new paper issued from March, when the government is also set to float a loan to help finance the country's huge budget deficit.

Market analysts had predicted difficulties for the loan, citing the double effect of the tax and the attraction of investments elsewhere in the liberalised EEC markets.

Belgian investors have become accustomed to placing their assets in Luxembourg-based unit trusts where there is no withholding tax. Some of these institutions even base their business on Belgian government bonds.

Mr. Maystadt said that the government was taking a prudent approach on the likely effect of the tax, and was not projecting it to lead to an influx of capital.

TURIN (JAN. 22) - Italian group Fiat said Monday it was reorganising its aerospace activities in a new company, to take better advantage of its capabilities and boost its operations on the international market.

The new company, Fiat Spazio, will be held 50 per cent by BDP Difesa and Spazio, and 12.5 percent apiece by Gilardini, Fiat Avio, Telettra, and

Comau.

The new company "will be able to develop a capacity to propose complete space programmes for private or state-owned operators" and "assume the function of main contractor" in national and international markets.

LONDON (JAN. 22) - New car sales in western Europe increased 3.6 per cent in 1989 over the previous year's level to a record 13.47 million vehicles, the Financial Times said Monday quoting figures supplied by automakers.

It was the fifth year in a row that western European new car sales had hit a record high.

Volkswagen, which has led the field since 1985, retained first place with 2.02 million vehicles, up 4.1 percent, for a 15 percent share of the market compared to 14.9 in 1988.

Fiat was in second place with 1.99 million vehicles, up three percent, with its market share unchanged at 14.8 percent.

U.S. auto giant General Motors saw the steepest increase in sales, up 10.2 percent to 1.48 million vehicles for an 11 percent share of the market, up from 10.4.

British company Rover did worst among the losers, with sales down 7.9 per cent to 412,000, for a market share of 3.1 percent, down from 3.5.

Mercedes-Benz of West Germany also saw sales shrink, but by a smaller 2.1 percent to 434,000 vehicles, with its market share trimmed from 3.4 percent to 3.2.

Japanese car sales were virtually unchanged at 1.45 million, down 0.1 per cent, but their market share was down from 11.3 tp 10.9 percent.

Toyota sales were down 2.3 percent at 344,000, with its market share shrinking from 2.7 to 2.6 percent.

Of the five principal markets, Italy, Britain, France and Spain all saw car sales rise to a new record, while West German sales were up 1.86 percent to 2.8 million.

LONDON, Jan 22 (AFP) - Western zinc and lead mining production fell in

1989, according to provisional figures published Monday by the Internatioanl Lead and Zinc Study Group.

Zinc mining production was down 0.4 percent from the previous year at 5.08 million tons while lead was down 0.5 per cent at 2.32 million tons, the Group said.

Refined zinc production fell 0.6 percent to 5.21 million tons, while consumption was virtually unchanged from the 1988 level at 5.26 million tons.

A fall in European and Canadian production was offset by increases in the United States, Brazil and South Korea.

Producer stocks of zinc at the end of 1989 stood at 355,000 tons, some 46,000 tons up on the previous year's level.

Refined lead production was down 0.3 percent at 4.38 million tons, but consumption rose 1.2 percent to a record 4.4 million tons.

Producer stocks of lead were down 7,000 tons on the 1988 level at 185,000 tons.

#90022d1790 01/22/1990 ~French/German News Agency

BONN (JAN. 22) - West German computer group Nixdorf said Monday it would axe almost 5,000 jobs, nearly a sixth of its workforce, within six months.

Nixdorf, in which Siemens recently took a controlling stake, said it would shed 4,800 of its 28,000-strong workforce by July 1.

It employed 31,000 people in November 1988 when it first started a restructuration programme.

The new job cuts will affect all sectors, including distribution, production, research and development and administration.

According to the West German weekly Der Spiegel, Nixdorf is likely to announce annual losses of up to a billion Deutsche marks (625 million dollars).

The West German monopolies commission has yet to give the green light to the Siemens deal, under which Nixdorf computer activities would be merged with those of Siemens to create Europe's leading computer concern.

#90022d2210 01/22/1990 ~French/German News Agency

BUDAPEST (JAN. 22) - Submachine-gun fire broke out Monday in the Albanian capital Tirana, according to a Hungarian radio correspondent in the city.

"This afternoon, as I was walking in Tirana with a member of the Hungarian embassy in Albania, I heard submachine gun bursts at regular intervals, coming from the southeast of the Albanian capital", he said in a broadcast on a private Hungarian radio station.

The diplomat accompanying the correspondent was quoted as saying that he had "never heard such gunfire" in Tirana.

Isolated and Stalinist-ruled Albania is the only Eastern bloc state to have resisted the wave of pro-democracy movements in recent months.

On January 12, the Yugoslav news agency Tanjug, quoting reliable sources, announced that a state of emergency had been declared in Albania.

The same day, the Yugoslav press said security measures had been stepped up in Tirana at the residences of Albanian party chief Ramiz Alia and of Nexhmia Hoxha, the widow of the late Albanian leader Enver Hoxha.

But Mr. Alia vigorously denied the Yugoslav reports, and accused Belgrade of fabricating them in a move aimed at "overthrowing the people's power" in Albania.

Travellers returning from Albania could not confirm the Yugoslav press reports, saying there were no visible signs of a state of emergency in the country bordering Greece and Yugoslavia.

#90022d8440 01/22/1990 ~French/German News Agency

Tokyo (JAN. 22) - Toyota Motor Corp. announced Monday its car exports during 1989 fell 8.1 percent to 1,669,130, the first drop in two years.

The export total included 1,139,680 passenger cars, down 7.5 percent, and 529,450 trucks and buses, a 9.3 percent drop.

Output for the year meanwhile hit a new record of 3,975,902, up 0.2 percent from 1988, as domestic sales reached a new high of 2,308,863, up 8.9 percent.

Nissan said its exports increased two percent, the first gain in four years, to 1,064,172, thanks to steady sales in the U.S.

Car exports by Nissan reached 895,710, up 5.6 percent, but commercial vehicles exports plunged 13.5 percent to 168,462.

Nissan's production grew 9.6 percent to 2,372,526. Domestic sales set a new record of 1,319,210, up 13.7 percent.

#90022d8790 01/22/1990 ~French/German News Agency

JOHANNESBURG (JAN. 22) - The South African motor industry is due to get a 77 million dollar export boost from next year when several local manufacturers begin production of exhaust systems for European markets, Business Day newspaper reported here Monday.

The move is in line with the European Community's move to introduce a clean air policy in 1993. South Africa mines 80 per cent of world platinum, a key component in converters which cut exhaust pollution.

Industry sources said at the weekend that at least three large catalytic converter plants for the manufacture of exhaust systems were on the drawing board.

The move is expected to boost local demand for platinum and rhodium, another integral component in clear-air exhaust systems.

The first plant in South Africa is to be built in the Cape Province port of Port Elizabeth and is expected to produce one million converters a year, all of them intended for export.

Company spokesmen said a local company, Algorax, is to start production on the 25 million rand (9.5 million dollar) plant within weeks. A German chemical company, Degussa AG, which owns 50 per cent of Algorax will provide technology and design for the plant. Production of the exhaust systems is expected to start in January 1991.

Motor industry sources said negotiations were underway for the creation of other plants, but declined to disclose details.

NICOSIA (JAN. 22) - New crude oil discoveries by the Saudi Arabian Oil Company (Saudi Aramco) in the country's central Najd Province could yield about 30 billion barrels, the Middle East Economic Survey (MEES) reported

Monday.

Quoting Saudi officials, the Nicosia-based newsletter said three discoveries made so far could be part of a single giant oilfield and that further drilling was planned in the northward direction of the capital Riyadh, located 190 kilometers (118 miles) away.

"The area is a new oil region, since all the previous commercial discoveries and the current production of Saudi Arabia is from the Eastern Province," MEES said.

The crude oil - of a light, sweet type currently in high demand - can be hooked into the expanded East-West Petroline export pipeline system running north of Riyadh, the report said.

"Discoveries of similar quality light crude have been made at three locations south and southeast of Riyadh since last June," MEES said.

Tokyo (JAN. 22) - Japan Air Lines (Jal), the national flag carrier, announced Monday it planned to build a modern tourist hotel in Moscow over the next two years jointly with two Soviet state-run corporations.

Jal intends to discuss the construction plan, including hotel location and the size with Soviet airline Aeroflot and its travel agency Intourist, according to Jal officials.

The officials said Moscow had been calling on the United States, West Germany, Britain, Finland and Japan to cooperate in construction of hotels in the Soviet Union.

#90022d8980 01/22/1990 ~French/German News Agency

MANILA (JAN. 22) - The majority of American firms established in the Philippines have not changed their plans for expansion and new investments despite the bloody abortive coup here last month, the head of the American Chamber of Commerce said Monday.

Mark Blacker said that in a recent survey of 68 member firms 48 said they had expansion plans before the coup bid in December and that 43 of them said they were still pushing through with these plans despite the failed putsch.

Mr. Blacker said this would lead to about 8.6 billion pesos (383 million dollars) in new investments.

He also said more investment would go into manufacturing and trade even though most respondents said they expected the country's manufacturing sector to slow down partly because of the coup and partly due to a general slowdown of the economy.

"The coup attempt did not hold up any plans that are in process," Mr. Blacker added.

The failed power grab, that resulted in the death of 119 people and injuries to more than 500, had sparked questions about the country's political stability.

President Corazon Aquino on Sunday said the government was taking steps to ensure that foreign investors who have expressed confidence in the country's economic recovery, were not disappointed.

#90022d9170 01/22/1990 ~French/German News Agency

BANGKOK (JAN. 22) - The European Economic Community (EEC) Monday signed four agreements worth 67.2 million dollars for rural development in Thailand, an EEC official here said.

The official said the agreements were signed by visiting EEC Commissioner Abel Matutes, responsible for relations with Asia and Latin America, and Thai Deputy Minister of Agriculture and Cooperatives Udorn Tantisunthorn.

The grants will be used to boost the production of fruit, vegetables, silk and rubber as well as production at 10 existing irrigation schemes, the official said.

Monday's aid agreements brought the total EEC funding for rural development aid to Thailand to 206.19 million dollars since this cooperation program began in 1977, the official said.

Mr. Matutes, who arrived here early Monday from Brussels, was scheduled to visit a Cambodian refugee camp in the Thai border province of Surin and observe EEC funded projects in the northeast Tuesday.

He was due to leave for the Philippines on Wednesday.

#90022d9180 01/22/1990 ~French/German News Agency
JAKARTA (JAN. 22) - The Indonesian government plans to require local cigarette makers to put nicotine content labels on their products, and to slap a higher tax on strong cigarettes, Health Minister Adhyatma said here Monday.

The government will also introduce nicotine standards for locally made cigarettes on which to base the new excise tax rates, Mr. Adhyatma told reporters after meeting President Suharto.

The cigarette industry is a major source for revenue for the government and was expected to bring in around 1.4 trillion rupiah (780 million U.S. dollars) in the fiscal year ending March 31.

-30- 768
#90022d9520 01/22/1990 ~French/German News Agency
PARIS (JAN 22) - The heavy goods vehicle division of French automaker Renault said Monday it had signed a cooperation accord with Czechoslovak concern Avia on developing a new range of 3.5 to five ton vehicles.

The new trucks should be in production in 1992, with production of around 20,000 vehicles a year, Renault Vehicules Industriels said.

Avia will invest at least 500 million francs (89 million dollars) in the project, while Renault will evaluate prototypes proposed by Avia, and take part in studies on the engineering and technical aspects of production.

Renault said that the focus on providing technological assistance and know-how was an example of the type of cooperation the French company wanted to see with East European partners.

The Renault group said earlier this month that it was to sign an agreement with Czechoslovak concern Baz for producing small utility vehicles.

#90022p0025 01/22/1990 ~PR Newswire

LOS ANGELES (JAN. 22) PR NEWSWIRE - First Executive Corp. (NASDAQ: FEXC) announced that defaults by issuers of securities held in its portfolio and declines in market value of those and other non-performing securities occurring in the fourth quarter of 1989 are expected to result in substantial year-end charges to operating results. The charges include a provision for holdings of Campeau Corp. subsidiaries, which entered bankruptcy in early 1990. The company may also designate a portion of its investment portfolio of bonds as held for sale, which would require it to reduce the carrying value of such bonds to the lower of cost or market, resulting in a further charge to operating results in 1989. The aggregate amount of all such items is expected not to exceed $515 million (after the effect of a small projected tax benefit), subject to year-end audit adjustments. Capital losses for which no tax benefit is claimed may be

carried forward to reduce taxes related to any future capital gains.

Although operating results for 1989 have not yet been determined, the foregoing charges will exceed income and, together with the $112 million (pre-tax) charge in the first quarter related to a write-down of Executive Life Insurance Company of New York (ELNY), result in a substantial loss for 1989. The company has prepaid a $50 million borrowing, a covenant of which would have been violated by the loss; the company may reborrow such amount with the lender's concurrence.

First Executive also reported that, after reserves and write-offs, and based on preliminary pricing information, which are all subject to year-end audit adjustments, its bond portfolio declined in market value during the fourth quarter, and was approximately $1.4 billion below amortized cost at Dec. 31, 1989. On the same basis, the market value of equity securities was approximately $13 million below cost at Dec. 31, 1989.

First Executive also stated that it had determined to retain ELNY, that the unit is no longer for sale, and that talks with potential buyers have been discontinued. The company recently terminated a definitive agreement to sell ELNY to WW Acquisition Corp., which was unable timely to arrange financing for the acquisition.

Finally, First Executive said Executive Life Insurance Co. has agreed to increase its mandatory securities valuation reserve account by approximately $110 million at Dec. 31, 1988 in conjunction with the completion of the California Department of Insurance examination of collaterized bond obligation transactions, and to seek Department approval of such transactions.

#90022p0027 01/22/1990 ~PR Newswire

AUSTIN, TX (JAN. 22) PR NEWSWIRE - Motorola (NYSE: MOT) today unveiled its newest 32-bit microprocessor, the 68040 (040), with endorsements from more than 35 leading computer manufacturers including Apple Computer, Bull Commodore, Hewlett-Packard/Apollo, NCR, Nixdorf, Philips and Unisys. Motorola has completed initial testing of the 040 and is currently distributing samples to key customers with general sampling slated for the end of the first quarter, 1990.

The 040 delivers 20 million instructions per second (MIPS) at 25 MHz, making it the fastest available mainstream microprocessor by more than 25 percent over competitors such as the Intel 80486 and several RISC (reduced instruction set computer) offerings. The 040 also delivers very high performance in mathematical calculations crucial for applications such as graphics and financial analysis. The 25 MHz 040 delivers an average of 3.5 million floating point instructions per second (MFLOPS) and a peak of 8 MFLOPS. Future clock speed versions of the 040 will offer dramatic increases in performance.

The performance of the 25 MHz 040 is derived from its ability to perform a number of operations at once. By including integer unit, floating-point unit two memory management units and data and instructions caches on a single chip, the processing rate of the 040 is markedly increased. The combination of the 040's performance with its $4 billion 32-bit software base, the world's largest, will establish the new chip in desktop computers, graphics workstations and multiuser computers.

"The 68040 extends our position as the leading supplier of microprocessor solutions," said Murray A. Goldman, senior vice president and general manager of Motorola's Microprocessor Products Group (Austin, Texas). "The 040 allows our 68000 customers to substantially increase system performance while utilizing their current software base to compete in all segments of the industry."

The 040 is priced at $795 in sample quantities. The 25 MHz part is available in a 179-pin ceramic PGA (pin grid array) package.

Motorola's Microprocessor Products Group (Austin, Texas) includes the High-end Microprocessor Division, the Microcontroller Division and the Digital Signal Processor Operation.

SAN DIEGO (JAN. 22) PR NEWSWIRE - Mycogen Corp. (NASDAQ: MYCO) announced today revenues of $2,510,000 for the interim quarter ended Dec. 31, 1989 compared to $1,416,000 in the same period in 1988. Net loss was $258,000, or $.03 per share, compared to a net loss of $736,000, or $.11 per share in the quarter ended Dec. 31, 1988.

In December 1989, Mycogen's board approved a change in the company's fiscal year end from September 30 to December 31. "This change will align Mycogen's reporting schedule with the agricultural industry business cycle " said Vice President and Chief Financial Officer James R. Glynn.

"Mycogen's results for the interim quarter reflect continued improvement in performance and progress toward profitability," said Jerry Caulder, Ph.D., Mycogen's chairman, president and chief executive officer.

"Through a series of strategic agreements, we are expanding our innovative biopesticide research and development programs while enhancing our manufacturing capability and worldwide commercialization network," Caulder added.

The recent acquisition of Safer Inc.'s commercial and agricultural products division further strengthens Mycogen's capability to deliver environmentally sound pesticides to the market. "The agreement positions Mycogen in a new segment of the commercial pest control market with a broadened product line," Caulder said.

At the company's annual meeting on Jan. 18, 1990, Mycogen stockholders re-elected the current board of directors and approved the election of Hiroshi Shimoda, manager, office of planning and development of Kubota, to the board. In addition, an amendment to the company's stock option plan was also approved.

Mycogen Corp. is a biotechnology company engaged in the research, development and commercialization of biopesticides for control of insects, weeds, and nematodes. The company develops products through the application of genetic engineering technology and innovative formulations of naturally occurring microorganisms.

SAN JOSE, CA (JAN. 22) PR NEWSWIRE - Samsung Information Systems America announced today that Tom L. Caress, former director of sales for Toshiba's western region, and Thomas J. Loeb, former sales manager of Sun Microsystems Inc. value-added reseller sales program in Orange County, Calif., have joined Samsung as senior director of national sales (Caress) and senior director of marketing (Loeb).

Caress, who has 18 years of experience in high-technology sales, will develop Samsung's U.S., Canadian and Mexican sales organizations into full sales and service operations. Loeb has 20 years of experience in the high-technology industry during which time he has worked at companies such as Xerox Corp. and Altos Computer Systems Inc. At Samsung, Loeb will focus on distribution, dealer relations and product marketing.

"Samsung Information Systems America is at a pivotal time in its sales and marketing organizations," said Phil Vertin, Samsung's senior vice president of sales and marketing. "The company is barely a year old and we need experienced sales and marketing professionals to help guide us into the 1990s. Tom Caress and Tom Loeb have the experience to determine what our needs are and the backgrounds to make it work."

Samsung Information Systems America, based in San Jose, markets personal

computers, monochrome and color monitors, video cards, local-area network (LAN) hardware systems and Ethernet interface cards. Samsung markets its products through leading national and regional distributors in North America. The company has district offices in the cities of Chicago, New York, Washington, Atlanta, Dallas, Los Angeles and San Jose. The Samsung customer support number is 800-446-0262.

HOUSTON (JAN. 22) PR NEWSWIRE - Public trading in two companies which are affiliates of Granada Corporation, headquartered in Houston, began trading on the American Stock Exchange today (Jan. 22). They are Granada BioSciences, Inc. (AMEX: GBI.WI), which began trading a maximum of 6,833,107 common shares, and Granada Foods Corporation (AMEX: GNF.WI), which began with a maximum of 3,476,640 common shares, both on a "when issued" basis.

Four major Japanese companies have acquired stock in the two companies. The Japanese group of companies includes Nissho Iwai (Japan's sixth largest trading company), Jusco (supermarkets), Fujiya (restaurants), and Itoham (Japan's largest ham company). Through a partnership formed by these and other Japanese companies together with Granada Corporation as managing partner, approximately 7.7 percent of Granada BioSciences, Inc. and 11.6 percent of Granada Foods Corporation have been purchased.

Granada BioSciences, Inc. is a leading biotechnology based company which focuses its technologies on improving the quality of food products. It is a leading supplier of genetic products and reproductive technical services. Granada BioSciences provides embryo transfer and sire services to both domestic and international customers in the food animal industry and is one of the leading commercial animal biotechnology and mariculture research organizations in the world.

The company also manufactures and sells high quality, genetically superior food animals, and owns and manages one of the nation's largest herds of registered purebred cattle.

Granada BioSciences had $11.1 million in revenues in the first three quarters of 1989 with net equity in excess of $44 million.

Granada Foods Corporation, headquartered in Houston, is a producer, marketer and distributor of value added food, specializing in certain red meat and poultry products. The company's Texas-based processing and distribution facilities service various metropolitan areas in the

continental United States and certain international markets. Granada Foods, believed to be Texas' largest meat purveyor and this country's major supplier of naturally smoked, whole-body turkeys, has recently opened a multi-million dollar state-of-the-art, 65,000-square-foot food processing plant on Polk Street in Houston's Central Business District. The company also owns and manages some of this country's major feedlots.

For the first nine months of 1989, Granada Foods had revenues of $94.1 million and earnings of $15,000 as the company was impacted by higher meat prices, competitive pricing pressures and the costs of integrating the new processing plant in Houston. In the prior year, nine-month net income was $3.7 million on revenues of $83.5 million.

SAN FRANCISCO (JAN. 22) PR NEWSWIRE - The Pacific Stock Exchange today announced it will list and trade options on the underlying common stocks of Norwest Corp. (NYSE: NOB); Sotheby's Holdings Inc. (AMEX: BID); and Sunstrand Corp. (NYSE: SNS). The PSE will list and trade options on the underlying common stock of Sovran Financial Corp. (NYSE: SOV) on Tuesday, Jan. 23, 1990.

Norwest, which is based in Minneapolis, is a bank holding company offering full service commercial banking and specialized financial and investment services.

Based in Bloomfield Hills, Mich., Sotheby's conducts auctions of fine art, jewelry and decorative art, and also engages in real estate brokerage; provides loans to cosigners, purchasers, dealers and collectors of art; and owns and operates offices and independent affiliates and other brokerage firms.

Sunstrand designs, manufactures and sells various proprietary systems and components for aircraft engine and airframe manufacturers and their customers. The company's headquarters are in Rockford, Ill.

Based in Norfolk, Va., Sovran is a bank holding company with subsidiaries engaged in full service commercial banking, mortgage banking, second mortgages, leasing and consumer finance. It also provides services such as credit insurance, and life, property and casualty insurance.

#90022p0046 01/22/1990 ~PR Newswire
MEMPHIS (JAN. 22) PR NEWSWIRE - Holiday Corporation (NYSE: HIA) today announced that it increased the consent payment from $10.00 to $110.00 principal amount in the consent solicitation for the 8-3/8 percent Notes due 1996 of its Holiday Inns, Inc. subsidiary. No increase is being made to the tender payment with respect to the 8-3/8 percent Notes, which remains at $990 per $1,000.

The increased consent payments will be paid to all consenting holders of 8-3/8 percent Notes, including to holders who have previously delivered their consents.

Holiday also announced that the consent solicitation for the 8-3/8 percent Notes has been extended to 5:00 p.m., New York City time, on Friday, January 26, 1990, and the tender offer for the 8-3/8 percent Notes has been extended until midnight, New York City time on Friday, February 2, 1990.

In addition, the consent solicitation is being amended to provide that the proposed amendments for the 8-3/8 percent Notes become operative at the time the proposed amendments for the 10-1/2 percent Senior Notes due 1994 become operative, which may occur before the expiration of the tender offer for the 8-3/8 percent Notes. Holiday Inns is soliciting consents in connection with its offers to purchase such securities for cash. The consent solicitations and tender offers were mailed to holders on December 15, 1989. Except for the increase in the consent payment, the extension of the consent solicitation and tender offer periods reflected herein and the time at which the proposed amendments become operative, all other terms of the consent solicitations and tender offers remain as previously announced.

As of January 9, 1990, Holiday had received consents from holders representing approximately 33 percent of the 8-3/8 percent Notes and tenders representing approximately 21 percent of the 8-3/8 percent Notes. Additionally, a holder for a majority of the 8-3/8 percent Notes has agreed to consent in the consent solicitation on the amended terms. Holiday previously announced that it had received the requisite consents and has executed supplemental indentures with respect to its 10-1/2 percent Senior Notes due 1994, 11 percent Debentures due 1999, 9-3/8 percent Notes due 1993 and 15 percent Notes due 1992.

#90022p0055 01/22/1990 ~PR Newswire

TAMPA, FL (JAN. 22) PR NEWSWIRE - It is only one of many stories -- an AIDS patient with Kaposi's sarcoma refused morphine because the deaths of his friends with AIDS were preceded by morphine injections.

The key for University of South Florida residents treating the patient was that the man associated morphine with imminent death. Drawing out the patient's story enabled them to ease the man's fear so that he accepted

the pain medication.

An HIV education demonstration project is providing USF doctors-in-training at James A. Haley Veterans Hospital with an opportunity to examine and resolve ethical issues impacting the care of AIDS and HIV-infected patients. The 2-year project, funded by the Department of Veterans Affairs, began in June.

"It's an almost unfathomable world that these patients drop into once they find out they're HIV infected," said Willard Harris, M.D., chief of Medical Service at the Tampa VA hospital and associate chairman of the USF Department of Internal Medicine.

"You care for more than the disease and its complications. You have to be able to reach out and care for the AIDS patient as a fellow human being."

The residents have plunged into such issues as whether physicians have an obligation to treat HIV-infected patients, the potential discrimination against high-risk groups, informed consent in testing, how to work with angry or manipulative patients, and what guidelines to use for the removal of life support.

The program hopes to improve physicians' communication with patients and their families so that the medical and human needs of AIDS patients can be met with compassion, said Dr. Harris.

Dr. Harris is the project's intervention coordinator. Other members of the HIV ethics team are Robert Walker, M.D., director of the Division of MMd6cal Ethics and Humanities and a specialist in clinical ethics and ethics consultation, and David Smith, Ph.D., professor of medicine and a bioethicist with expertise in communication skills.

The three-member team works closely with social workers, nurses, an AIDS community support group, and the district coordinator of the state's AIDS program, as well as residents and attending physicians.

The program uses a case-based approach to ethics, including discussions of HIV cases and weekly ethics rounds, in which smaller groups of residents led by HIV ethics team members interview patients and family members on the wards.

"What makes a difference in the residents' behavior is not a lecture about abstract ethical principles," said Dr. Harris, "but actual involvement with the details of individual cases."

"The more you know," said Dr. David Smith, "about the medical facts of the case, the better positioned you are to make the appropriate diagnosis and treatment decision. Similarly, the more you know about a person's life

story and values, the better prepared you are to make an ethical decision."

ALEXANDRIA, VA (JAN. 22) PR NEWSWIRE - Time-Life Books today announced that it has acquired the Record Clubs of Australia Pty Limited and World Record Club New Zealand from its owner, Joseph Schwartz, for an undisclosed sum. The acquisition makes Time Warner Inc. (NYSE: TL) one of the largest direct marketers of books and records in Australia and New Zealand.

Founded in the 1970s, the Record Clubs of Australia consists of the Record Club, the Australian Compact Disk Club and a videocassette club. The World Record Club Zealand includes the Kiwi Compact Disk Club. The Australian and New Zealand Clubs have a combined membership of 125,000.

The Record Clubs of Australia has distribution agreements with all of the major recording studios, including CBS, EMI, WEA, Polygram, BMG, and Festival, an Australian label. The company also markets books on tape, offering audiotapes of works by such authors as John le Carre, Frederick Forsyth and Agatha Christie.

John Fahey, president and CEO of Time-Life Books, said the acquisition is consistent with his company's strategy for expansion abroad through the music and videocassette businesses. In 1989, the international division of Time-Life Books accounted for over one-third of the company's revenues.

In addition to rock, the Record Clubs of Australia offers a wide variety of classical, jazz and country music, with an extensive artist catalogue of over 6,000 titles, from the Beatles to Madonna.

The companies will be owned and operated by the Sydney Australia headquarters of Time-Life Books Australia Pty Limited, under the direction of Bonita Boezeman. Time-Life Books founded its South Pacific Division, based in Sydney, in 1963.

Time-Life Books is a wholly owned subsidiary of the Time Inc. Book Company a division of Time Warner Inc., and the largest direct marketer of books and entertainment products in the United States. Last year the company shipped over 25 million units of books, records and videocassettes throughout the globe. In 1989, Time-Life Books acquired Books for Children, Britain's largest hardcover book club for children.

ATLANTA (JAN. 22) PR NEWSWIRE - LJ Hooker Corp. Inc. ("Hooker") announced today that it has received approval from the U.S. Bankruptcy Court to retain, effective Jan. 10, Jones Lang Wootton U.S.A. to market the company's five major commercial real estate holdings.

Those properties, which are managed by certain debtor and non- debtor corporations which do business under the LJ Hooker name, are the Forest Fair Mall outside Cincinnati; Richland Fashion Mall outside Columbia, S.C.; Thornton Town Center Mall in Thornton, Colo., outside Denver; the Gateway Mall site and The Ten Peachtree Office Center in Atlanta.

"We believe that the sale of these properties to companies that can invest in and otherwise maximize their value will be in the best interest of the malls, as well as our creditors and other business entities," said Sanford C. Sigoloff, chief executive of Hooker and chairman of Sigoloff and Associates, the firm hired to manage Hooker during its Chapter 11 reorganization.

"Jones Lang Wootton is a premier commercial real estate firm with a strong international presence. Their assistance will help ensure that the assets will be marketed for their optimum value."

Jones Lang Wootton, a New York-based commercial real estate firm, was selected earlier this month by Hooker to market these properties individually. Sigoloff said that executives of Hooker and Jones Lang Wootton have been meeting with prospective buyers of the properties and have had a substantial number of inquiries concerning their sale.

Hooker and several of its subsidiaries filed for Chapter 11 under the Federal Bankruptcy Code on Aug. 9, 1989 and on dates thereafter.

BENTON HARBOR, MI (JAN. 22) PR NEWSWIRE - Two officers and long-service employees have announced their retirements from Whirlpool Corporation (NYSE: WHR), the company announced today. Samuel Bateman, executive vice president, international operations, and Charles D. Putnam, executive vice president, administration, will retire on May 1, 1990.

Bateman, 60, joined the company in 1959 at the St. Joseph (Mich.) Division

as a manufacturing engineer. In 1962 he was promoted to manager, manufacturing engineering, at the former laundry products group, also located in St. Joseph. He moved to the LaPorte (Ind.) Division as manager of plant facilities in 1963, later becoming director of operations engineering and long range planning.

In 1965 Bateman was assigned to the position of sales director, Kenmore floor care products at the St. Paul (Minn.) Division. He transferred to the Findlay (Ohio) Division as director of manufacturing when that plant began operation in 1967. In 1970 Bateman was named general manager of the newly-opened Danville (Ky.) Division. He became general manager, Fort Smith (Ark.) Division, in January 1974 and in June 1980 was appointed division vice president. In 1981 he was elected vice president, refrigeration products group, at the Evansville (Ind.) Division.

Bateman moved to the company's Benton Harbor (Mich.) headquarters in 1983 as executive vice president, manufacturing, and in 1986 was named president, Whirlpool do Brasil S.A., located in Sao Paulo. In 1988, upon his return to the United States, he was named executive vice president to head a special range study for the company, a position he held until his current assignment in 1989.

Bateman has served on the board of directors of Brasmotor S.A., a long-term affiliate of Whirlpool Corporation in Brazil, and on the board of TVS-Whirlpool Limited in India.

A native of Virginia, Bateman served four years with the United States Air Force, and graduated from Michigan State University with a degree in business. He and his wife, Fran, have two grown children and reside in St. Joseph.

Putnam, 62, joined Whirlpool in 1963 as a patent attorney. He subsequently was named senior patent attorney, then assistant patent counsel and, in 1967, director of corporate labor relations. In 1977 he became general manager, personnel. In 1978 he was elected vice president personnel, and subsequently senior vice president, personnel resources, in 1983. He was appointed senior vice president, administration, in 1984 and assumed his current position in 1985.

Prior to joining Whirlpool, Putnam was corporate and patent attorney for the Clark Controller Company. Before being named to that position, he was responsible for new product design and for service activities connected with Clark products used by the steel and rubber industry.

A native of Northport, Mich., Putnam earned a bachelor's degree in electrical engineering from Michigan College of Mining and Technology and a law degree from Cleveland-Marshall Law School. He serves on the board of directors of Whirlpool Corporation, is a trustee of the Whirlpool

Welfare Benefits Trust Committee and the Pension Fund Committee and is chairman of the Retirement Committee and the Individual Trustees of the Whirlpool Savings & Profit Sharing Trust Committee. He also is a trustee of the Michigan Tech Fund and on the board of directors of Planned Parenthood.

Putnam and his wife, Louise, are the parents of four children and reside in St. Joseph.

Whirlpool Corporation is the world's leading manufacturer and marketer of major domestic appliances. Headquartered in Benton Harbor, the company manufactures products in ten countries and markets them under nine brand names in 45 countries.

LEICESTER, NY (JAN. 22) PR NEWSWIRE - CPAC, Inc., (NASDAQ: CPAK), a manufacturer of chemicals and pollution control equipment for the imaging industry, today released its financial statement for the third- quarter and nine-month periods ended Dec. 31, 1989.

On sales of $20.9 million, for the nine months ended Dec. 31, 1989, CPAC reported a profit of $1.1 million or earnings per share of $0.48, compared to the same nine month period last year, when CPAC sales were $19.9 million, with a resulting profit of $986,000 or earnings of $0.44 per share.

On sales of $7.1 million in the third quarter, CPAC reported a profit of $348,000 or $0.15 per share. Last year, during the same three month period, CPAC sales were $6.6 million, resulting in a net profit of $407,000 or earnings of $0.18 per share.

CPAC President and Chief Executive Officer Thomas N. Hendrickson stated that third-quarter and year-to-date earnings were reduced by losses in its equipment group, CPAC Equipment division, Leicester, N.Y., and IMG Photo Products, San Jose, Calif. According to Hendrickson, the consolidation of the two divisions that was planned for 1991 was accelerated to minimize further losses in the equipment group. CPAC announced the closing of IMG Photo Products San Jose plant on Jan. 4, 1990. The company projects IMG's consolidation with the CPAC facility in Leicester, N.Y. to be completed by the end of the fourth quarter (March 31, 1990).

Hendrickson stated that the performance of the CPAC Chemicals group in the third quarter was above projected levels. Robert C. Isaacs, chief

operating officer of the CPAC Chemicals group announced that the Trebla Chemical division, St. Louis, has increased its chemical business with CPI minilabs from the present 40 percent to 100 percent, effective Feb. 5, 1990. Total chemistry business with CPI is expected to exceed $2 million annually under the new two-year chemical agreement.

CPAC management also announced the final incorporation of CPAC Europe on Dec. 29, 1989. CPAC Europe, located in Belgium, is a joint venture company with N.V. Ampaco S.A., to manufacture photographic chemicals and distribute CPAC equipment.

BEVERLY HILLS, CA (JAN. 22) PR NEWSWIRE - Qintex Entertainment Inc. ("QEI") (NASDAQ: QMTQE) announced today that the company has reached a settlement with MCA Inc. (NYSE: MCA) of outstanding litigation regarding distribution of certain MCA programming by QEI.

"We have amicably resolved our differences and have reached a fair and equitable agreement that benefits both companies," said Jonathan Lloyd, president of Qintex Entertainment. "We are very pleased to avoid extended litigation in a manner that protects valuable assets of Qintex Entertainment."

Under the terms of the accord announced today, MCA will assume responsibility for future programming sales, and proceeds from current receivables will be allocated between the two companies. Further details were not made available.

As announced on Oct. 19, 1989, QEI filed for protection under Chapter 11 of the Federal Bankruptcy Code when the company could not meet a material obligation under its previous distribution agreement with MCA. The revised agreement has been approved by the bankruptcy court.

#90022p0062 01/22/1990 ~PR Newswire

PHILADELPHIA (JAN. 22) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) announced today an aggressive new program designed to help its customers conserve energy and save money on their electric bills.

PE said the program will offer residential and business customers

incentives and rebates, complimented by audits and consulting services, to effect the conservation of electricity.

It will be phased in over a three-year period and will contain 15 different components promoting the efficient use of electricity by PE's residential, commercial and industrial customers.

The program's theme, to be stressed in television, radio and print advertisements beginning today, and in mailings and transit posters, will be, "The Power Is In Your Hands. Use it Wisely."

The advertising campaign will be designed to reinforce a conservation ethic throughout the Philadelphia region, following the example of how recycling has become popular through media exposure.

PE said the conservation program will provide residential customers with free energy conservation literature, energy efficiency audits of their homes, low-cost weatherization service, rebates for the installation of energy-efficient equipment and reduced rates for off- peak use of electricity.

The conservation program also will offer commercial and industrial customers incentives for installing off-peak ice storage cooling systems, rebates for the installation of energy-efficient lighting systems, and additional incentives for converting from standard to high- efficiency motors.

PE said an average residential customer using 500 kilowatt-hours of electricity a month could, merely by following the program's low-cost/no-cost weatherization tips, save up to 10 percent, or $80, on a yearly electric bill.

In another example, the company said, a residential customer buying an energy-efficient water heater, putting it on a special off-peak electric rate, wrapping the heater and installing low-flow shower heads, could save $220 or more a year.

Joseph F. Paquette Jr., PE chairman and chief executive officer said the program was designed to meet two principal objectives.

"First," he said, "PE believes we must help our customers use energy more efficiently and thereby save money on their electric bills. Responsible utilities care about their customers. It is quite clear that what's good for our customers is good for PE.

"Second, even with Limerick Unit No 2 in commercial operation, current energy trends indicate to us that we must prepare for shortages projected for the PE service territory after the year 2000. The more our customers

can conserve, the longer PE can delay the need to build or buy expensive additional electric capacity.

"We are offering a conservation program that not only provides immediate assistance to our customers but also offers both the company and its customers long-term economic and environmental benefits in delaying the major expense of providing additional capacity," Paquette said.

He said the conservation program was formulated with the input of a wide range of community, business, environmental and educational leaders during a series of focus group meetings at PE during 1989. Both the staffs of the Pennsylvania Public Utility Commission and the Governor's Energy Office attended some of the meetings and have been fully briefed on the final program.

Paquette said the results and costs of the program components will be constantly evaluated from the time of their implementation to determine which are most effective and can be expanded to meet future conservation goals.

PE said the public promotion will offer a single, toll-free telephone number -- 800-521-5353 -- where customers can get free energy conservation literature and additional information about the conservation program.

The company said three components of the new program were begun late in 1989. They include commercial and industrial incentives for off-peak ice storage cooling systems; home energy audits that produce a "Smart Chart" profile of energy use, and the distribution of free conservation literature.

CHARLOTTE, NC (JAN. 22) PR NEWSWIRE - CCAIR, Inc. (NASDAQ-NMS: CCAR), today announced that it has reached a favorable conclusion to its negotiations with USAir (NYSE: U) regarding the proration formula for the division of joint fare revenues. The Company and USAir have entered into an agreement which establishes a new proration formula to be applied to joint fare revenues retroactive to August 5, 1989. Although the effect of the revised formula cannot be determined with certainty until it is put into operation, the Company believes that the agreed upon formula, together with recent fare increases, will restore the Company's share of joint fare revenues to a level which approximates the Company's per passenger revenue experienced prior to August 5, 1989. Gordon Linkon, Vice President - USAir Express Division of USAir expressed to Company officials his satisfaction with the new agreement and stated that he is looking forward to a mutually beneficial on-going relationship with CCAIR, Inc.

The Company also released the terms of its January 2, 1990 sale of its cargo operations to MARTINAIRE. The Company will receive monthly payments of 7 percent of the gross revenue received by MARTINAIRE for servicing cargo routes formerly serviced by the Company. The payments will be made for a period of 36 months or up to a maximum total amount $478,000. Although the Company expects a pre-tax loss of approximately $450,000 on the sale of its cargo operations, the Company will incur no further operating losses for the cargo operations after the second quarter. In the first quarter, cargo operating losses amounted to approximatley $367,000.

CCAIR's stock is traded on the over-the-counter market and is quoted on the NASDAQ National Market System under the symbol "CCAR."

IRVINE, CA (JAN. 22) PR NEWSWIRE - Gateway Communications Inc., (NASDAQ: GWAY), a leading supplier of X.25 wide area networking products for the LAN industry, today announced it has signed a reseller agreement with BT Tymnet Inc. (San Jose, Calif.), one of the world's largest providers of international value-added networking services.

Throughout the term of the multi-year contract, Gateway's X.25 product line of gateways and bridges/routers will be offered as part of BT Tymnet's PC LAN network services.

"This is a significant strategic alliance for Gateway," said Bert Ott, vice president of sales at Gateway Communications. "The deal will give Tymnet users a single source for reliable, flexible and secure high-speed data connectivity."

John Lenko, BT Tymnet's LAN product manager said that "The agreement represents the first step in BT Tymnet's plans to provide worldwide interconnectivity offerings for the LAN marketplace." Lenko added, "The results of our evaluation of Gateway's products, combined with their excellent reputation, made our product selection and buying decision very easy."

The Gateway products covered by the agreement are the award-winning G/X25 Gateway 64, G/X25 Gateway & Bridge 64, and G/Remote Bridge 64.

These X.25 gateways and bridges provide LAN users with access to remote LAN, mini and mainframe computers through BT Tymnet's high-speed public data network.

Gateway's X.25 wide area networking products install in any IBM PC, XT, AT PS/2-30, or compatible, 80486 or 80386 ISA bus machines. Users may choose from RS-232, RS-422, RS-449, or V.35-compatible communications interfaces.

Gateway Communications Inc. is a pioneer in PC LAN-based X.25 technology, and designs, manufactures and markets a full range of communications and networking products for IBM and compatible personal computers.

Corporate and international headquarters are located at 2941 Alton Ave., Irvine, Calif., 92714; telephone 714-553-1555; fax 714-553-1616.

BT TYmnet Inc., an international value-added network provider, is one of the world's largest suppliers of shared, dedicated and hybrid network solutions. The company owns and operates the TYMNET Network which offers protocol conversion, error-protection, enhanced security features, electronic messaging, card services and electronic data interchange. The TYMNET Network is accessible from most countries throughout the world.

GERMANTOWN, MD (JAN. 22) PR NEWSWIRE - Microlog Corporation (NASDAQ: MLOG) and Bellatrix Communications Inc., announced today their plans to form a joint venture under the name of MICRO-BELL.

MICRO-BELL would be organized as a service bureau providing telephone service.

Bellatrix Communications Inc. will act as the marketing arm of the venture and will be responsible for generating programs processed through the service bureau. Microlog Corporation will provide the voice response technology and the operation of the bureau.

"900 technology uses the telephone to bring marketers closer to customers. A 900 call is simply an enhanced 800 call, except that the caller covers the cost. In this way marketers offset the cost of their direct response programs while gaining valuable information about what their audiences think, read and buy," commented Michael Kaye, president of Bellatrix Communications.

"MICR-BELL will allow Microlog to participate on a continuing basis in the rapidly growing 900 service market. With Bellatrix's expertise in developing marketing programs, the proposed joint venture is positioned to become a major factor in the 900 service bureau business," added J.G. Hartwell, chairman and chief executive officer of Microlog.

Because of its dominant position in the 900 service industry, Telesphere Communications, Inc. (AMEX: TSP) was selected by MICRO-BELL to provide the 900 network access that would terminate in the venture's facility in New York City. Telesphere's senior vice president in charge of 900 operations Dennis Houlihan, observed: "We expect the MICRO-BELL service bureau to be one of the most technically sophisticated installations connected to our nationwide 900 network. We think the service bureau's capabilities will be an excellent selling point to independent information providers."

Microlog Corporation designs, assembles, markets qnL services voice processing systems and other communications products. Through subsidiaries the company also provides performance analysis and technical and administrative support services under contracts with government and commercial customers.

Bellatrix Communications, Inc., a wholly owned subsidiary of Bellatrix International, Inc. is a full-service audiotex company that provides 900 telephone services to information providers and packaged goods manufacturers and marketers. Bellatrix, specializing in innovative target marketing applications, provides services including conceptual development structure, creative production, media placement, database generation and fulfillment.

Telesphere Communications, Inc., the country's leading supplier of interactive 900 network services, is a full service interexchange carrier with a nationwide fiber optic network supported by digital switching equipment in eight hub locations. The company also provides credit card and operator assisted services for hotels, hospitals and other selected institutions and a range of direct-dial services, including several WATS packages and international calling.

JACKSON, MI (JAN. 22) PR NEWSWIRE - CMS Energy Corporation's oil and gas exploration and production unit, Northern Michigan Exploration Company (NOMECO), today announced it has purchased, for approximately $3 million, a 50-percent interest in a natural gas well in Louisiana. The remaining 50-percent interest in the well was purchased by Patrick Petroleum Company (NYSE: PPC).

The Tenneco Fee No. 1 gas well is located in the Bayou Penchant Field, Terrebonne Parish, La.

NOMECO and Patrick Petroleum each acquired half of the total proved reserves of approximately 7.1 billion cubic feet of gas and 112,000 barrels of condensate. The companies will also drill an offset development well which potentially could add reserves, in addition to those already purchased. Discovery of additional reserves may require

additional payments by the companies for the property, which NOMECO will operate.

NOMECO is among the top 100 U.S. oil and gas companies in production and reserves. It is Michigan's largest independent oil and gas producer, with activities in 14 states and seven foreign countries.

CMS Energy Corporation (NYSE: CMS) is engaged in the distribution of electricity and natural gas, interstate storage of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility, serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

DETROIT (JAN. 22) PR NEWSWIRE - NBD Bancorp (NYSE: NBD) announced today that an application has been filed with the Office of the Comptroller of the Currency to merge its 17 banks in Michigan into a single, statewide bank.

The new bank, to be headquartered in Detroit, will be named NBD Bank, N.A.

It would have total assets of $21.8 billion and deposits of $16.5 billion, based on year-end 1989 figures.

Charles T. Fisher III, chairman and president of NBD Bancorp, said, "Statewide consolidation is an important step in enhancing our competitive edge through improved customer service.

"As one bank, we will be able to offer consistent products across the state and enhance our responsiveness to customer and community needs. We should also realize increased profitability from the resulting economies

of consolidated functions, systems and procedures," he said.

Pending regulatory approval, the consolidation will be implemented in stages beginning in the spring and should be completed by the end of 1990.

CAMBRIDGE, MA (JAN. 22) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI) announced today that it has named Garen G. Bohlin, L. Patrick Gage, Ph.D. and Tuan Ha-Ngoc to the position of executive vice president. All three will continue to report to Gabriel Schmergel, president and chief executive officer.

Bohlin, who joined the company in 1983, will assume additional responsibilities for overseeing the company's manufacturing and pharmaceutical development activities. He continues to be responsible for the company's finance, human resources, operations support, and corporate communications functions. Before joining Genetics Institute, Bohlin was a partner in the Chicago office of Arthur Andersen & Co.

Gage, a recent addition to the company's management team, is responsible for all research, product development and clinical development activities at Genetics Institute. Prior to joining the company he spent 18 years at Hoffmann-LaRoche, Inc. in various scientific and management assignments.

Ha-Ngoc, who joined the company in 1984 after holding various management positions at Baxter International Inc., will assume additional responsibilities for overseeing the company's regulatory and quality control/quality assurance groups. He retains his prior responsibilities for the direction of the marketing and business development group, the patent and licensing group, and the company's branch operation in Japan.

"The continued growth, both in size and complexity, of our company requires a constant review and adjustment of our organizational structure " stated Schmergel; "These changes will enable me to devote more time to strategic matters affecting Genetics Institute. At the same time it will better enable us to manage the company's broad product portfolio and efficiently move important products through development to the market," he added.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and related technologies.

RICHMOND, VA (JAN. 22) PR NEWSWIRE - Ethyl Corporation (NYSE: EY) reported today that net income and earnings per share in the fourth-quarter of 1989 set all-time records. The company also said 12-months results were slightly ahead of last year's record earnings. The report is based on preliminary figures.

Net income for the fourth quarter of 1989 amounted to $62.6 million, or 53 cents a share, up six percent and eight percent, respectively, from fourth-quarter 1988 net income of $58.9 million, or 49 cents a share. Fourth-quarter 1989 results reflect higher after-tax realized investment gains by First Colony Life Insurance Company, $4.0 million versus $1.2 million in 1988.

Net income for the year 1989 was $231.3 million, or $1.93 a share, up slightly from $231 million, or $1.91 a share, in 1988. Results for the year 1989 reflect realized investment gains of $10.5 million versus $9.7 million in 1988.

At the beginning of the third quarter of 1989, Ethyl spun off its aluminum plastics and energy business as Tredegar Industries, Inc. (NYSE: TG). Results of these businesses while part of Ethyl are reported as discontinued operations. Ethyl's 1989 fourth-quarter income was up 14 percent from fourth-quarter 1988 income from continuing operations of $54.8 million. Earnings per share for 1989 increased 15 percent from 46 cents a share in the prior year on a similar basis. On a continuing-operations basis, 12-months 1989 income amounted to $219.5 million, or $1.83 a share, up 13 and 14 percent, respectively, from 1988

income of $194.3 million, or $1.61 a share.

Total net sales from continuing operations and insurance revenues were $644.9 million for the fourth quarter of 1989, up 11 percent from $578.4 million for the fourth quarter of 1988. For the year 1989, total net sales from continuing operations and insurance revenues amounted to $2.43 billion, an increase of 16 percent from $2.09 billion for the prior year. Net sales for 1989 increased seven percent for the fourth quarter and 10 percent for the year compared to 1988. Insurance revenues increased 19 percent for the quarter and 29 percent for the year from 1988.

Floyd D. Gottwald, Jr., chairman of the board, said: "We are pleased with Ethyl's results from continuing operations for the fourth quarter and the year. Our insurance subsidiary, First Colony, continues to set records, while chemicals operating results, though mixed, also were favorable."

SEATTLE (JAN. 22) PR NEWSWIRE - NeoRx Corporation (NASDAQ: NERX) announced today that it plans to file during the week of Jan. 29 a registration statement with the Securities and Exchange Commission for a proposed exchange offer to the holders of its 9-3/4 percent convertible subordinated debentures due 2014 ("debentures") for shares of a new series of preferred stock, designated the $2.4375 convertible exchangeable preferred stock, Series 1 (liquidation preference $25.00) ("preferred stock"). The preferred stock will be offered to the debenture holders at

the rate of 40 shares of preferred stock for each $1,000 in principal amount of debentures accepted for exchange. The exchange offer will be subject to certain conditions, including the tender of at least 50 percent of the outstanding debentures.

The proposed terms of the preferred stock substantially reflect the terms of the debentures, except that the conversion price for the preferred stock into shares of common stock will be $5.50 (the debentures are convertible into shares of common stock at a conversion price of $6.45).

The purpose for the proposed exchange offer will be to improve the company's capital structure by retiring up to $28,000,000 outstanding principal amount of the debentures. The company believes this improved capital structure will aid future financing efforts and permit the company to continue to meet applicable financial criteria to maintain the listing of its securities on the National Association of Securities Dealers Automated Quotation System.

A registration statement relating to these securities and the exchange offer will be filed with the Securities and Exchange Commission. The securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any state.

NEW YORK (JAN. 22) PR NEWSWIRE - Londontown Corporation announced today that its strong financial performance since its acquisition last year by an investor group led by members of management has led it to recently engage the investment banking firm of Kidder, Peabody & Co. Incorporated to explore ways to reduce the debt incurred in the acquisition.

Mark Lieberman, chairman of the board of directors and president of the company, said, "Our strong financial performance, made possible by the continuing loyalty of our customers and dedication of our employees, has accelerated our consideration of ways to restructure, replace, or engage in a transaction to reduce the debt incurred in acquiring the company." He added, "The successful completion of this phase of our development will allow us to grow the business in sales and earnings, making us an even stronger company."

Londontown Corporation is the leading manufacturer in the United States of quality men's and women's rainwear and a leading manufacturer of quality men's and women's outerwear. The Eldersburg, Md.-based company designs, manufactures, and distributes its products under the LONDON FOG trademark and under a variety of other well-known brand names.

PHILADELPHIA (JAN. 22) PR NEWSWIRE - Meritor Savings Bank (NASDAQ-NMS: MTOR) today reported a fourth quarter loss of $33.8 million, or $.96 per share, compared to a loss of $117.8 million, or $3.35 per share for the fourth quarter of 1988.

The loss for the year was $55.6 million, or $1.58 per share, compared to $209.8 million, or $5.98 per share, for 1988.

Contributing to the loss for the fourth quarter were an addition to the loan loss provision related to commercial loan credits and a higher level of expenses associated with foreclosed real estate.

As previously announced, during the fourth quarter, Meritor agreed to sell 54 retail banking offices to Mellon Bank (East). The sale is expected to be completed within the first half of 1990. The financial impact of the sale will be recorded at the time of settlement.

"The transaction will improve our capital ratios and strengthen our balance sheet," said Meritor Chairman Roger S. Hillas. "The premium realized on the branch sale will enable us to continue restructuring to restore operating earnings."

Assets were $12.6 billion at the end of the year, a decrease of $4.6 billion from $17.2 billion at the end of 1988.

LOS ANGELES (JAN. 22) PR NEWSWIRE - First Interstate Bancorp (NYSE: I) today reported a net loss of $124.5 million ($3.30 per share) for the 1989 year and a net loss of $344.3 million ($7.56 per share) for the quarter ended Dec. 31, 1989.

In December, the Corporation announced that it would record a fourth quarter provision of $300 million, of which $225 million was provided for

potential loan losses, $60 million for other real estate (ORE) charges and $15 million for disposition expenses in connection with the implementation of an accelerated disposition program for problem assets at First Interstate Bank of Texas. The program is designed to reduce problem assets at the Texas affiliate and to enable management there to focus on the profitable segments of its banking operations.

First Interstate provides the largest geographical coverage of any retail and business banking system in the United States. Including licensees, First Interstate Banks operate nearly 1,200 full-service offices in 21 states. These offices serve five million households in more than 650 communities, including seven of the ten fastest growing metropolitan markets in the U.S. Other offices serve U.S. and international customers in 19 countries.

CONTACT: Ken Preston, 213-614-3656, or Simon Barker-Benfield, 213-614-5791, both of First Interstate Bancorp.

LOS ANGELES (JAN. 22) PR NEWSWIRE - CalMat Co. (NYSE: CZM) today announced earnings for the 12-month period ended Dec. 31, 1989 of $78,101,000, or $2.52 per share, compared with 1988 earnings of $56,386,000, or $1.82 per share. Total revenues for the year rose to $689,812,000, up from $666,662,000 in the comparable year-ago period.

Earnings for the fourth quarter were $31,235,000, or $1.01 per share, in 1989, compared with $12,345,000, or $.40 per share, in the comparable quarter of 1988. Fourth quarter revenues were $172,452,000 in 1989, versus $162,960,000 in 1988. Net earnings for 1989 include $18,700,000, or $.60 per share, for the fourth quarter and $21,968,000, or $.71 per share, for the year from operating results of, and gains from the disposal of, net assets held for sale as part of the company's previously announced plan to dispose of its properties development business. Comparable amounts from net assets held for sale for 1988 were not material.

According to A. Frederick Gerstell, president and chief executive officer of CalMat, all construction material divisions contributed to the company's strong performance. Cement, asphalt, concrete and aggregates operations each achieved record sales volumes and increased profits for the year, despite the well-publicized economic slowdown in Arizona. The only segment reflecting lower income in 1989 was the ongoing land development and management business, which recorded fewer land sales than in 1988.

"With our core businesses performing well, and with healthy backlogs, CalMat enters 1990 with optimism," commented Gerstell. "While mindful that

1990 could bring a long-predicted economic slowdown, we remain confident in the strengths of CalMat's unique market positions in several of the country's most attractive construction material markets."

NEW YORK (JAN. 22) PR NEWSWIRE - Guilford Mills, Inc. (NYSE: GFD) announced today that Jeff Enfield has been named director of Materials Management for the company's Warp Knit Apparel and Home Furnishings Business Unit. In his new capacity, Enfield will be the facilitator and coordinator between sales, manufacturing and finance in development, implementation and control of sales, manufacturing and financial planning for the Warp Knit Apparel and Home Furnishings Business Unit. He replaces John Emrich who has recently left the company.

Enfield has been with Guilford Mills since 1970 and has held positions related to Corporate Quality Control and as director of Greige Goods Operations for the Warp Knit Apparel and Home Furnishings Business Unit.

He will report to Nathaniel G. Weisler, president of Guilford's Warp Knit Apparel and Home Furnishings Business Knit and Corporate senior vice president of Guilford Mills.

In making the announcement today, Weisler said, "Jeff Enfield's deep experience at Guilford Mills in Corporate Quality Control and as director of Warp Knit Greige Goods operations makes him the ideal candidate for this important position in Guilford."

Enfield will be headquartered at the company's offices in Greensboro, N.C.

NEW YORK (JAN. 22) PR NEWSWIRE - The CIT Group Holdings Inc. today reported 1989 operating net income of $132.2 million (before a factoring restructuring charge of $6 million after tax, hereinafter described), up from $120.3 million in 1988.

CIT is the finance company 60 percent owned by The Dai-Ichi Kangyo Bank Ltd. (DKB), the largest bank in the world, and 40 percent owned by Manufacturers Hanover Corp. Albert R. Gamper Jr., president and chief executive officer of CIT, said, "Besides the purchase of its 60 percent interest in CIT by The Dai-Ichi Kangyo Bank Limited, which was completed at year end 1989, I am delighted to report that 1989 saw CIT attain record receivables of $10 billion and continue excellent credit and operating expense controls."

The CIT Group Holdings Inc. is the largest bank-affiliated finance company in the United States, with total assets of $10 billion as of Dec. 31, 1989. CIT provides a full range of asset-based financing services for large and middle-market companies. These activities include acquisition financing, debt restructuring and recapitalization transactions, as well as project financing and financing for capital, commercial and industrial equipment.

CIT is a leader in financing programs for the air transportation, construction, trucking and logging industries. In addition, it operates the largest factoring business in the United States and provides, through its sales finance division, financing for dealers in recreational vehicles small business equipment and manufactured housing.

UNIVERSAL CITY, CA (JAN 22) PR NEWSWIRE - MCA Inc. (NYSE: MCA) announced

today that it had determined to sell its LJN Toys, Ltd. subsidiary whose principal operations are based in New Jersey, Hong Kong and Canada; therfore, LJN will be reported as a discontinued operation in MCA's 1989 consolidated financial statements.

This decision will result in a loss from discontinued operations of approximately $53 million (after tax). Such loss includes the operating loss for 1989, which will not be included in income from continuing operations, and a provision of approximately $30 million (after tax) related to the future sale of LJN. MCA further announced that it will report record net income and earnings per share for the full year 1989, after making provision for the loss from discontinued operations referred to above.

WASHINGTON (JAN. 22) PR NEWSWIRE - The U.S. federal government's first General Services Administration (GSA) contract for Erasable-Optical Disk Systems has been awarded to Intrafed Inc.

Based in Washington, Intrafed is a supplier of advanced computer technologies to U.S. federal agencies, and as such is the federal government's distributor/supplier of the world's leading Erasable Optical Disk Technology from Alphatronix Inc.

In announcing the award, John R. Meshinsky, Intrafed's president, said, "Although many other erasable optical disk systems will be considered for other similar awards, we're pleased that the Alphatronix technology -- and Intrafed as the distributor -- is currently available to the federal market through this contact vehicle."

Explaining the great advantage of Erasable-Optical Disk Systems, Meshinsky said: "Most optical storage systems are similar to the laser disks used in stereo CD players, in that once information is recorded on the disk, the data cannot be changed by the user. Erasable-Optical Disk Systems will revolutionize the industry in the '90s, allowing users to record and change stored data." These systems are available as off-the-shelf products that are 100 percent compatible with personal computers, such as IBM PS/2 models, IBM AT compatibles and clones, Macintosh models from Apple Computers, engineering workstations, and microcomputers from both DEC and Sun Microsystems.

Meshinsky added that the "laser light used in Erasable-Optical Disks does not inflict enough energy on the disk to change chemical bonds or modify its structure. In one test, data was recorded and erased 30 million times

with no degradation in quality. With high data reliability and exceptional stability, the Erasable-Optical Disk Technology will emerge as the leader in applications requiring high storage capacity, fast random access, removability, non-contact recording, long life and standardization."

Another great benefit of the Alphatronix Erasable-Optical Disks is the immense amount of data that can be stored on each 5-1/4 inch disk. "Each 5-1/4 inch disk has a storage capacity greater than 650 megabytes (Mb)," said Meshinsky, adding, "that's nearly three dozen 20 Mb hard disks from three dozen standard AT personal computers. Or you could compare that single 5-1/4 inch laser disk to 1,800 standard 5-1/4 inch floppy disks. And in all cases the data integrity is better on the single laser disk than on all the other mediums."

Intrafed Inc. is the leading supplier of advanced computer and image technologies to the federal government. The company distributes technologies from Alphatronix and TAB laser-optic filing systems. The GSA contract number for the Alphatronix Erasable Optical Disk Systems is GSOOK-90-AGS-5759.

#90022p0109 01/22/1990 ~PR Newswire

PASADENA, CA (JAN. 22) PR NEWSWIRE - Avery International Corporation (NYSE, PSE: AVY) today reported net income increased 11 percent for the fiscal year ended Nov. 30, 1989, to $86.5 million, or $1.96 per share. Sales increased 10 percent to $1.73 billion. Excluding the impact of changes in foreign currency rates, net income increased 14 percent and sales increased 12 percent. Net income for 1988 was $77.7 million, or $1.77 per share on sales of $1.58 billion.

Fourth quarter net income increased 9 percent to $23.2 million, or $.52 per share, and sales increased 8 percent to $450 million. Excluding the impact of changes in foreign currency rates, net income increased 12 percent and sales increased 11 percent. In the fourth quarter 1988, net income was $21.2 million, or $.48 per share on sales of $417 million.

Charles D. Miller, chairman and chief executive officer, said that Avery's results for the year benifited from "solid performances in many of our materials and converting businesses."

"The materials business in the United States, including the roll materials films for automotive graphics and the specialty tape businesses, posted significant sales and profit gains due to the strong demand for self-adhesive materials. These materials are used for product packaging,

building and automotive graphics, electronic data processing and diaper closure tape applications. Soabar products for the retail and apparel markets, and Avery and K&M brand office products, contributed to the positive results for the converted products businesses."

Miller said that investment and rebuilding costs in the industrial lable and films businesses in the United States and the roll materials business in Europe, as well as lower volume in our European specialty tape business reduced operating profits in these units.

"The current business climate remains uncertain, and we expect slower economic growth in major world ed-ets," Miller stated. "Therefore, we are cautious in our outlook for the first quarter, but expect 1990 to be a good year in total for Avery."

Avery, headquartered in Pasadena, is a leading worldwide manufacturer of self-adhesive base materials, labels, tapes, office products and specialty chemicals. The company has approximately 11,700 employees in more than 150 manufacturing facilities and sales offices located in 25 countries.

ST. LOUIS (JAN. 22) PR NEWSWIRE - Senetek PLC (NASDAQ: SNTKY) said it received approval from the Danish regulatory agency to start Phase III clinical trials of its new proprietary drug combination for treatment of male impotence.

Dr. Gerlof Homan, president and CEO of Senetek said the company will begin Phase III trails "immediately." He said the company expects to commercialize its drug combination in 1990 and is negotiating with companies in Japan, Europe and the United States. Senetek estimates the world wide sale of its drug combination will exceed $500 million within three years of its introduction into the global markets.

Senetek's new drug combination (tests of over 400 injections) eliminated the side effects and discomfort common to all current male injection regimens. Patients participating in the test said they preferred Senetek's new medication over available products.

Like the earlier tests, the Phase III trials will be conducted under the direction of Dr. Thomas Gerstenberg, Department of Urology, Herlev Hospital, University of Copenhagen, Copenhagen, Denmark.

Explaining the importance of Senetek's new drug combination, Homan said, "There is a great need for non-surgical therapy for erectile

insufficiency." He noted, "Chronic ailments such as diabetes mellitus, vascular diseases, lesions cause y surgery and trauma accounted for approximately half of the over 10 million cases of impotence in the U.S. in 1987."

Homan noted that male impotence can be caused by drugs prescribed for other ailments. Sixteen of the top 200 prescription drugs have been associated with impotence and may account for 25 percent of all cases of male sexual dysfunction. Impotence may be caused by other factors such as anxiety, depression and excessive alcohol.

In 1985, impotence accounted for costs of over $146 million for hospital admissions and outpatient physician visits in the U.S. In 1988 alone, penile implants totalled 85,000 in the U.S. at a cost of $70 million. Homan estimates the U.S. prostheses market will reach well over $120 million in 1990.

#90022p0111 01/22/1990 ~PR Newswire

NEW YORK (JAN. 22) PR NEWSWIRE - After making a previously reported fourth-quarter addition of $140.0 million to its reserve against loans to certain countries with severe debt servicing problems (LDC's), National Westminster Bancorp ("NatWest Bancorp"), the parent company of National Westminster Bank USA ("NatWest USA"), National Westminster Bancorp NJ ("NatWest NJ"), and First National Bank of Central Jersey ("Central Jersey"), today reported a consolidated net loss of $84.0 million in the fourth quarter of 1989. For the full year ended Dec. 31, 1989, the net loss was $139.5 million. This included additions to the reserve against loans to LDC's totaling $295 million and a related reduction in taxes of $53.4 million.

NatWest Bancorp was established in connection with the Feb. 1, 1988, acquisition of NatWest NJ. On the same date, ownership of NatWest USA was transferred from NatWest Holdings Inc. to NatWest Bancorp. On Aug. 18, 1989, NatWest Bancorp acquired Ultra Bancorporation, the parent of Central Jersey. Central Jersey is now a subsidiary of NatWest NJ.

Core earnings, which is net income before the additional LDC provision and related taxes and goodwill amortization, were $39.5 million in the fourth quarter of 1989 compared with $32.7 million in the fourth quarter of 1988. On the same basis, earnings for the year were $135.1 million compared with $127.1 million for 1988. Goodwill amortization totaled $33.1 million in 1989 and $29.2 million in 1988.

NatWest Bancorp is a wholly owned subsidiary of National Westminster Bank PLC (ADS - NYSE: NW), the London-based international banking and financial services organization.

#90022p0114 01/22/1990 ~PR Newswire

SEATTLE (JAN. 22) PR NEWSWIRE - NeoRx Corp. (NASDAQ: NERX) today reported a net loss for the first fiscal quarter ended Dec. 31, 1989, of $5,567,000 ($.38 per share) which included a $1.4 million one-time restructuring charge.

This compares to a net loss of $3,873,000 ($.27 per share) for the first quarter ended Dec. 31, 1988. Revenues for the quarter were $820,000 compared to $1,451,000 for the first quarter of 1989, reflecting a shift in Sterling Drug Inc.'s research support from technetium products to rhenium products and a change in the focus of the collaboration to clinical activities only.

Without the restructuring charge, operating expenses for the current quarter would have decreased $584,000, or 10 percent, from last year's quarter. With the charge, operating expenses increased $826,000 from $5,729,000 in last year's first quarter to $6,555,000 in the 1990 first quarter.

The company's restructuring involves a further focusing on those core technologies and products that are closest to commercialization. specifically, the company will constrain its product development efforts

to its technetium-labeled antibody product line for imaging cancer and its rhenium-labeled antibody product line for treating cancer. The latter is funded in part by Sterling Drug.

The result of the restructuring will be a down-sealing of the company's work force by approximately 45 people or 27 percent and the consolidation of the company into its main facility in Seattle.

The non-recurring charge against earnings results from severance costs for discharged employees, discontinuance of its use of its leased Bothell facility and a decision to postpone the construction of a large- scale manufacturing facility, and expenses associated with termination of contracts not related to its core technologies.

According to Dr. Robert T. Abbott, president and CEO, "This difficult decision is necessary to ensure the company's commercial viability and continued leadership in the monoclonal antibody cancer imaging field. The company remains optimistic about approval prospects of its two products currently being reviewed by the FDA. The recent filing of our PLA for imaging Small Cell Lung Cancer, and the potential application of the same antibody for use in imaging certain other major cancers demonstrate our ability to succeed."

NeoRx Corp. is developing monoclonal antibody-based pharmaceutical products for in vivo imaging and treatment of certain types of cancer. The company has filed for marketing approval with the FDA two imaging products OncoTrac(R) Melanoma and OncoTrac Small Cell Lung Cancer. The company is presently conducting five cancer clinical trials.

NEW YORK (JAN. 22) PR NEWSWIRE - The American Stock Exchange today opened put and call options trading in the exchange-listed common stock of three companies. They are the Amex's first options to be selected under a Securities and Exchange Commission rule that took effect today permitting exchanges to freely add options on listed stocks.

The new SEC rule also permits exchanges to multiply trade new options on listed stocks and brings an end to the Options Allocations Plan which restricted trading in options on exchange-listed securities to a single options exchange. Options on over-the-counter stocks were never subject to the Allocation Plan.

The new options and their trading specifications follow:

- Fleet/Norstar Financial Group, Inc. (ticker symbol: FNG). Fleet/Norstar is the nation's 21st-largest banking organization and second-largest mortgage banking operation. Opening strike prices will be 22-1/2, 25 and 30 with position limits of 5,500 contracts. Initial expiration months will be February, March, April and July of 1990. Richard Reynolds of the Spear, Leeds and Kellogg specialist unit will be lead specialist.

- Racal Telecom, PLC (ticker symbol: RTG). Racal is a leading provider of mobile telecommunications in the United Kingdom. Opening strike prices will be 55, 60 and 65 with position limits of 3,000 contracts. Initial expiration months will be February, March, April and July of 1990. William Charlton, Jr. and Allen Mischel of the Charlton, Goin/Spear Leeds & Kellogg specialist unit will be lead specialists.

- Sotheby's Holdings, Inc. Class A (ticker symbol: BID). Sotheby's is the world's largest auctioneer of art and operates a luxury residential real estate brokerage business. Opening strike prices will be 17-1/2, 20, 22-1/2 and 25 with position limits of 5,500 contracts. Initial expiration months will be February, March, April and July of 1990. Lead specialist will be Edward S. Gutman of the Bear, Stearns & Company specialist unit.

The Amex trades a total of 191 stock options, including 38 options on OTC stocks. In addition, options are traded on three broad-market indexes - the Major Market Index (XMI), the Institutional Index (XII) and the International Market Index (ADR) - as well as two narrow-based indexes - the Oil Index (XOI) and the Computer Technology Index (XCI).

ST. PAUL, MN (JAN. 22) PR NEWSWIRE - Empi, Inc. (NASDAQ: EMPI), today announced the signing of an exclusive three-year medical products distribution agreement with Hoggan Health Industries, Inc., of Salt Lake City. The agreement covers distribution of two medical products in the United States and Canada.

The FET 5000, a clinical system, and MicroFET, a hand-held device, are computer-based force evaluation and testing systems used to objectively quantify muscle weakness. Both products are designed to aid in determining the location, nature and extent of muscular impairment resulting from injury or disease. Potential markets for the products include physical therapy, orthopedics, chiropractic and neurology.

According to Michael Connoy, Empi president and chief operating officer, the agreement supports Empi's diversification goal. "The Hoggan systems complement Empi's diagnostic product lines. A significant benefit of these products is the objective documentation they provide for health insurance claims."

Hoggan Health Industries is involved primarily in the manufacture and marketing of fitness equipment. To market the relatively new line of medical products, Hoggan sought a company with strong medical distribution in both the United States and Canada.

Lynn Hoggan, President of Hoggan Health Industries, said, "With 2000 clinics currently using Empi products, I believe Empi has the potential to get these devices into the hands of many medical professionals quickly and efficiently. The 600 medical equipment dealers that supplement Empi's retail business serve to broaden the sales coverage."

Empi develops, manufactures and distributes biomedical devices, computer-based diagnostic systems and accessories for the physical medicine, orthopedic, rehabilitation and neurology markets. The company's shares are traded on the NASDAQ national market system under the symbol EMPI. The company has approximately 1.8 million shares outstanding.

#90022p0124 01/22/1990 ~PR Newswire

MINNEAPOLIS (JAN. 22) PR NEWSIWRE - Bio-Medicus, Inc. (NASDAQ: BMDS) today reported net income of $1,287,000 or 17 cents per share for the third quarter, which ended Dec. 31. That compares with net income of $1,164,000 or 16 cents per share for the same period a year earlier.

Third-quarter sales rose 16 percent to a record $7,945,000 from $6,838,000 a year earlier.

The company said improved operating performance in the quarter more than offset the remainder of takeover defense and merger expenses incurred by HemoTec, Inc. HemoTec had been the object of a tender offer by another company before becoming a wholly owned subsidiary of Bio-Medicus effective Aug. 29, 1989.

For the nine months ended Dec. 31, net income was $2,614,000 or 34 cents per share, compared with $2,904,000 or 39 cents per share a year earlier. Net income for the first nine months of fiscal 1990 was after one-time takeover defense and merger expenses of $2,013,000. Sales rose 26 percent to $23,107,000 from $18,278,000 in the first nine months of fiscal 1989.

The company's improvement in operating performance continued to be reflected in its gross margins, which increased to 63 percent in the third quarter from 60 percent in the previous year.

Bio-Pump sales continued to be the primary factor in the performance improvement. Unit sales of the Bio-Pump increased 36 percent in the quarter, on top of a 55-percent increase in the third quarter a year earlier. Unit sales were up 40 percent for the first nine months of fiscal 1990. Bio-Console sales were flat in the third quarter and up 19 percent for the nine months.

The company said HemoTec's sales declined 4 percent in the quarter as some customers apparently postponed purchases in anticipation of the introduction of HemoTec's new HMS instrument in April. For the nine months, HemoTec sales were up 11 percent.

Export sales accounted for 19 percent of total sales in the quarter, compared with 23 percent in the third quarter a year earlier. The decline reflects a 40-percent drop-off in third-quarter sales to Bio-Medicus' distributor in Western Europe.

Research and development expense rose 53 percent in the quarter and 31 percent in the nine month period, reflecting an acceleration of current R&D projects, primarily the new HemoTec HMS instrument.

Bio-Medicus is the world's leading producer of centrifugal blood pumps and related equipment for circulatory support systems. Through HemoTec it produces computer-based instruments and disposables for the management of clotting factors during medical procedures.

SANDUSKY, OH (JAN. 22) PR NEWSWIRE - Cedar Fair, L.P. (NYSE: FUN), which owns and operates two amusement/theme parks, today announced record revenues and net income for calendar year 1989.

Net revenues increased 16 percent to $120.0 million from $103.2 million a year ago. Net income for the year was $31.6 million, or $1.48 per limited partner unit, up 40 percent from $22.6 million, or $1.06 per unit, in 1988.

Richard L. Kinzel, president and chief executive officer of Cedar Fair Management Company, the managing general partner of Cedar Fair L.P., explained that virtually all of Cedar Fair's gross income is realized during the operating season from mid-May to late-September, with the major portion historically concentrated in the peak vacation months of July and August.

"We are extremely pleased with the record operating results achieved for the current year," Kinzel said. "Combined attendance was the highest in the parks' history and totalled 4.3 million, as both parks set new records. Combined per capita spending also rose 6 percent, to $25.63 from $24.10 last year." Kinzel attributed the record operating results to the successful debuts of the Partnership's two new roller coasters, Magnum XL200 at Cedar Point and the Excalibur at Valleyfair, together with generally good weather in July and August.

"Our capital reinvestment program continues to be a major part of Cedar Fair's strategic planning," Kinzel said. "After the $11 million in capital expenditures currently underway at our parks for the 1990 season are completed, Cedar Fair will have made nearly $30 million in capital investments since the public offering in 1987.

"Following the strong operating results turned in for the third straight year and with the addition of new attractions designed to make our parks even more exciting places to visit and re-visit, we look forward to another year of growth for Cedar Fair," Kinzel concluded.

Cedar Point is located on Lake Erie between Cleveland and Toledo, and Valleyfair is located near Minneapolis/St. Paul.

FAIRBANKS, ALASKA (JAN. 22) PR NEWSWIRE - Sphinx Mining Inc. (NASDAQ:

SPNXF) announced today its annual gold production for 1989 was 10,636 ounces. The substantial increase from the previous years' level was primarily due to the successful start-up of the Midnight Creek placer mine in the Ruby District.

Cash flow from these two (Fish Creek and Midnight Creek) placer mines is estimated at $557,000.

TORONTO (JAN. 22) PR NEWSWIRE - Varity Corporation today announced it has sold its minority interest in its Brazilian associate, Maxion S.A., of Sao Paulo, to Companhia Iochpe de Participacoes, Maxion's controlling shareholder since 1984.

Terms of the transaction were not disclosed.

Varity expects to post a gain on the transaction in its financial results for the year ending Jan. 31, 1990.

In a related development, Varity said its export commitments made in 1984 have been cancelled.

New agreements between Maxion and Varity's operating groups Massey-Ferguson and Perkins have been reached on continued cooperation in the areas of technology and distribution, and Maxion's rights to use the trademarks of Massey-Ferguson and Perkins have been renewed.

WASHINGTON (JAN. 22) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM; NASDAQ-NMS: SLMAJ) today announced a first quarter 1990 dividend on its voting and non-voting common stock of 13 cents per share, the same as that paid in the previous quarter. The dividend on the common stock will be paid on March 13, 1990, to shareholders of record on Feb. 27, 1990.

The corporation also declared a first quarter 1990 dividend of 5 percent, or 62.5 cents per share, on its adjustable rate cumulative preferred stock. That dividend rate is tied to yields on certain U.S. Treasury obligations, but is never less than 5 percent nor more than 14 percent per

annum. The dividend on the preferred stock will be paid on March 30, 1990 to shareholders of record on March 15, 1990.

At Dec. 31, 1989, Sallie Mae's common shares issued and outstanding consisted of 12.9 million shares of voting common stock and 85.7 million shares of non-voting common stock. The non-voting common stock is traded on the New York Stock Exchange under the symbol "SLM"; the voting common stock, of which ownership is restricted to certain financial and educational institutions, is traded on the NASDAQ National Market System under the symbol "SLMAJ." The preferred stock, of which 4,290,150 shares were outstanding at Dec. 31, 1989, trades on the NYSE.

ALEXANDRIA, VA (JAN. 22) PR NEWSWIRE - PHP Healthcare Corporation (NASDAQ-NMS: PHPH) announced today that the Fairfax County Virginia board of supervisors approved a three-year $6.2 million contract to operate two health care centers.

The two centers, which will open in the spring, will help serve the estimated 25,000 uninsured, low income residents of the county. With PHP's establishment and operation of these centers, the Fairfax County Health Department, through its affordable health care program, is

addressing a problem of national importance -- the estimated 31 million uninsured in the United States.

The operation of these centers is a new initiative for PHP Healthcare which specializes in providing medical services for which there is a critical need.

#90022p0135 01/22/1990 ~PR Newswire

GASTONIA, NC (JAN. 22) PR NEWSWIRE - Libraries worldwide face a growing crisis. Their valuable collections of books are gradually, but relentlessly, turning to dust on the shelves.

FMC Corp. (NYSE: FMC) has developed a proprietary treatment process and chemicals for the mass restoration of library books and paper documents by strengthening the paper while arresting acid decomposition. The company today announced construction of a large demonstration plant at Bessemer City, N.C., which will use the paper preservation process to treat 300,000 books annually. The facility will be completed during the first quarter of 1990.

The problem is the durability of papers manufactured since 1850. The acid content of chemicals used in paper production slowly degrades the cellulose fibers, causing paper and books to deteriorate, explained Dr. Robert S. Wedinger, head of FMC's Lithium Division Preservation Systems business. "The new process can return many older books to usefulness and add decades to the lives of less deteriorated books," he said.

This innovative process, developed by FMC Lithium Division (Lithium Corporation of America, a wholly owned subsidiary of FMC), is a safe, non-toxic treatment for the deacidification, buffering and strengthening of paper that effectively and economically extends the useful life of books and archival documents. The unique technology is the only proven process that combines both the deacidification and strengthening of paper. Patents are pending worldwide on the process and the treatment chemicals. Independent evaluation of the process verifies the uniform deacidification and strengthening of treated book paper.

In the FMC system, libraries will send books for processing in provided treatment containers, each holding about 20 books, which are sealed during transfer and treatment.

FMC said it expects to respond to the Library of Congress' imminent request for preservation services and build commercial scale treatment

plants each with the capacity to process 2 to 5 million books annually.

FMC Corp., headquartered in Chicago, is one of the world's leading producers of machinery and chemicals for industry, government and agriculture. The company operates 88 manufacturing and mine facilities in 24 states and 14 foreign countries. The company divides its businesses into five major segments: industrial chemicals, precious metals, defense systems, performance chemicals, and machinery and equipment.

MILWAUKEE (JAN 22) PR NEWSWIRE - Universal Foods Corporation (NYSE, PSE: UFC) announced today that it has signed a letter of intent to sell its Cheese Division to the division's current management.

This transaction should be finalized by early spring.

Terms of the sale were not disclosed.

The division produces and markets Italian-style cheeses under the Stella(R) label, low sodium cheeses under the Lorraine Brand(R) label, and substitute cheese. It also imports and markets gourmet cheeses, such as Ile de France(R) brie and Boursin(R) herb cheese. Headquartered in Milwaukee, the division operates plants in Cumberland, Wis.; Peru, Ind.; and Ogdensburg, N.Y.; and a curing and distribution facility in Beloit, Wis. It employs about 400 people, approximately 10 percent of the company's full-time employees.

In making the announcement, Guy A. Osborn, president and chief executive officer, said, "This was a very difficult decision. Our Cheese Division has been a key part of the company for many years and is a very valuable asset. We have invested millions of dollars in recent years modernizing our plants, making quality improvements, and training our people. We are pleased that our current management and employees will continue to benefit from the investments we have made over the years. Universal has some of the best cheese producers in the country and several national brands with leading positions.

"However, on top of our rapid growth during the last few years, we continue to see many excellent investment opportunities for the company. These opportunities will require a great deal of capital. We have determined that an appropriate method of obtaining those funds is to redeploy the capital to be raised from the sale of our cheese business. We are very pleased with the continued strengths and growth in our businesses, and still anticipate reaching our earnings target of $1.93 per share this year."

Universal Foods' board of directors has authorized the retention of Goldman, Sachs & Co. to assist the company with this transaction.

Universal Foods is a national manufacturer and marketer of food ingredients and selected consumer food items. These include the world's most diversified line of yeast products; frozen potato products; food colors and flavors; dehydrated products; and a complete line of Italian-style, imported and substitute cheeses.

MAYNARD, MA (JAN. 22) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today announced the new grant recipients in the second cycle of the Digital Faculty Program: "Incentives for Excellence." The 13 recipients, each of whom will receive $60,000 in cash and equipment per year for up to three years, were selected from nominations provided by the Deans and Chairs of some of the leading university and college Engineering and Computer Science departments across the country.

The "Incentives for Excellence" program was initiated in 1986 to encourage talented young faculty members to stay in the teaching profession by giving them the resources to develop themselves, their projects and their students. The first cycle of the program assisted 11 faculty members for three years. The result of the support has been that all 11 have continued to teach, one has received tenure, two have been promoted and three were selected by the National Science Foundation as Presidential Young Investigators. Each recipient used the $25,000 yearly cash grant and the $35,000 yearly equipment grant to some extent to support research and graduate assistants.

Samuel H. Fuller, vice president, Research and Architecture at Digital said, "The strength of America's high-technology industry depends upon the continued high quality of engineering and computer science programs in our educational institutions. The first cycle of the 'Incentives for Excellence' program has proved successful in encouraging young engineers and scientists to remain involved in teaching and research in colleges and universities. In addition, it forged a relationship with ongoing dialogue between engineers and scientists in industry and those in education. We are looking forward to a continuation of this success in the second cycle."

Digital Equipment Corporation, headquartered in Maynard, Mass. is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

ST. LOUIS (JAN. 22) PR NEWSWIRE - Monsanto Company (NYSE: MTC) today reported its fourth consecutive year of increased sales and earnings, the second year in a row that it set sales and earnings records.

Net income for 1989 was $679 million, a 15 percent improvement compared with the $591 million earned in 1988. Earnings per share increased to $10.03, 21 percent higher than the $8.27 per share recorded last year. Consolidated net sales for the year reached $8.68 billion, 5 percent more than the $8.29 billion reported for 1988.

Net income for the fourth quarter of 1989 was $90 million, or $1.37 per share, on sales of $2.01 billion. For the same period last year, Monsanto earned $45 million, or $0.70 per share, on sales of $1.88 billion. Net income for the fourth quarter of 1989 also included a one- time after-tax gain of $36 million from the sale of Monsanto's analgesics business, which was completed in November. Without this gain, fourth quarter earnings increased 20 percent from a year ago. The impact of non-recurring items in 1989 was about the same as the total of a number of small non-recurring items in the prior year.

#90022p0148 01/22/1990 ~PR Newswire

OLD GREENWICH, CT (JAN. 22) PR NEWSWIRE - American Brands, Inc. (NYSE: AMB) today reported record results for 1989 with earnings per common share from continuing operations rising 20 percent to $6.51 from $5.44 in 1988.

For the year, revenues of $11.9 billion approximated last year despite the impact of less favorable sterling exchange rates and the absence of Southland Life, which was sold in March. Income (after taxes) from

continuing operations rose 17 percent. Net income rose 9 percent to a record $631 million, and earnings per share rose 12 percent; 1988 net income included income from discontinued operations totaling $39 million, or 40 cents per share.

For the quarter ended Dec. 31, 1989, net income rose 34 percent to a record $172 million from $128 million, and earnings per share rose 31 percent to $1.75 from $1.34 in 1988. Revenues declined to $2.9 billion from $3 billion, due to the impact of foreign currency translation and the absence of Southland.

The average number of shares outstanding was 3 percent higher in the quarter but 2 percent lower for the year. Lower exchange rates for foreign currencies, principally the British pound, adversely affected revenues by $218 million and E.P.S. by 8 cents in the quarter and by $594 million and 23 cents for the year.

Net income in 1988 reflected restructuring charges totaling $44 million, or 47 cents per share, for the quarter, and $52 million, or 54 cents per share, for the year.

American Brands is a global consumer products holding company with four core businesses -- tobacco, distilled spirits, life insurance and office products. Each has brand name leaders in its respective industry.

#90022p0150 01/22/1990 ~PR Newswire

DALLAS (JAN. 22) PR NEWSWIRE - Oryx Energy Co. (NYSE: ORX) today announced net income of $139 million, or $1.32 per share, for the year 1989, and $14 million, or $.13 per share for the fourth quarter.

This compares with a net loss of $305 million, or $2.89 per share, for the previous year, and net income of $2 million, or $.02 per share, during the fourth quarter of 1988.

Revenues in 1989 were $1.21 billion and $306 million for the fourth quarter compared to $1.29 billion for all of 1988 and $316 million in the fourth quarter of that year.

Excluding net loss on sale of properties, income from ongoing activities totaled $25 million for the fourth quarter of 1989 compared to a loss of $6 million for the same period last year. This increase was primarily due to higher crude oil prices, lower costs resulting from operational efficiencies and debt restructuring, and higher gas volumes. A decrease in

crude oil volumes and a decrease in gas prices partially offset these positive factors.

Average net production of crude oil and condensate was 112 MB/D at an average price of $17.97 per barrel in the fourth quarter of 1989 compared to 116 MB/D at an average price of $12.10 per barrel in the fourth quarter of 1988. Average net production of natural gas for the fourth quarter of 1989 was 747 MMcf/D at an average price of $1.66 as compared to 706 MMcf/D at an average price of $1.69 for the fourth quarter of 1988.

Income from ongoing activities for the 12 months ended Dec. 31, 1989, was $63 million as compared to a loss of $56 million for the same period a year ago. Results for the 12 months of 1989 were impacted by higher crude oil prices, lower costs resulting from debt restructuring and operational efficiencies, and higher gas volumes. A decrease in crude volumes partially offset these positive factors.

Dallas-based Oryx Energy Co. conducts its domestic operations through Sun Energy Partners L.P. Oryx Energy, the managing general partner and 98-percent owner of the partnership, is the largest independent oil and gas company in the world with assets in excess of $5 billion and proved reserves of more than 1 billion equivalent barrels. Oryx Energy trades on the New York Stock Exchange and the partnership with the symbol "SLP."

#90022p0152 01/22/1990 ~PR Newswire

NEW YORK (JAN. 22) PR NEWSWIRE - John R. Stafford, chairman, president and chief executive officer of American Home Products Corporation (NYSE: AHP), today reported record sales and earnings for the quarter and year ended Dec. 31, 1989. The results for 1988 and 1989 have been restated to include the operations of A.H. Robins Company Incorporated ("Robins") which was merged into the company on Dec. 15, 1989 and accounted for as a pooling of interests transaction.

Net sales for the fourth quarter increased 7 percent to $1,640,199,000. Net sales for the year increased 5 percent to $6,747,016,000. Net sales for health care products increased 6 percent for the fourth quarter and 4 percent for the year ended Dec. 31, 1989. Net sales of food and household products increased 11 percent for the fourth quarter and 9 percent for the year ended Dec. 31, 1989.

Net income for the fourth quarter increased 19 percent to $304,391,000, while net income per share increased 18 percent to $1.95. Net income for the year increased 11 percent to $1,102,158,000, while net income per

share increased 10 percent to $7.07.

Income before taxes for the year was reduced by provisions for the writedown of certain intangible assets of $119,000,000, for expenses related to the consolidation of Robins into the company of $76,000,000, and by certain other writedowns and reorganizational costs of $28,000,000. The total of these charges was $162,000,000 in the fourth quarter and $223,000,000 for the year. In 1988, the fourth quarter and the year included $32,000,000 and $121,000,000, respectively, of provisions recorded by Robins for expenses related to its Chapter 11 bankruptcy. Before these special provisions in both years, income before taxes for the fourth quarter and full year 1989 increased 4 percent and 5 percent, respectively.

Net income in 1989 includes tax benefits derived from the utilization of net operating losses generated by Robins relating to the funding of the Dalkon Shield trusts on Dec. 15, 1989. The 1989 tax provision was reduced by the amount of taxes which would otherwise have been payable on Robins' 1989 U.S. income and by $94,000,000 primarily relating to the refund of prior years' taxes paid by Robins. These benefits were reflected in the fourth quarter of 1989. The tax rate for the quarter and the year also reflects a reduction of foreign tax rates and benefits obtained from additional operations in Puerto Rico.

#90022p0154 01/22/1990 ~PR Newswire

BOISE, ID (JAN. 22) PR NEWSWIRE - Boise Cascade Corp. (NYSE:BCC) today announced that 1989 earnings declined from a 1988 peak to their second-highest level in company history. Fourth quarter results were substantially below those of the same period a year ago.

Net income for 1989 was $268 million, or $5.70 per share on a fully diluted basis, compared with net income of $289 million, or $6.15 per share on a fully diluted basis, for 1988. Sales for 1989 were $4.3 billion, compared with $4.1 billion for 1988.

Net income for the fourth quarter of 1989 was $51 million, compared with $76 million for the same quarter a year ago. Fully diluted earnings per share were $1.10 in the fourth quarter of 1989, compared with $1.64 for the same quarter in 1988. Sales for the fourth quarter of 1989 were $1.1 billion, compared with $1 billion for the same quarter a year ago.

John B. Fery, chairman of the board and chief executive officer, noted that earnings in 1989 declined from their 1988 peak as a result of adverse market conditions for the company's paper business. "Paper-segment

earnings declined through the year, reflecting weakness in our major grades, but the company's office products and building products segments both reported very strong performance for 1989," said Fery.

The decline in operating income for the company's paper and paper products segment in 1989 was due to weaker prices for many of the paper grades manufactured by the company, combined with sharply higher costs for wood chips in the Pacific Northwest. This segment's operating income in the fourth quarter of 1989 was down significantly from the record level of the same period a year ago, as the company began to feel the full impact of price discounts and cost increases that had taken effect during the year. In addition, unusually cold weather during the fourth quarter resulted in increased energy and maintenance costs at several company paper mills.

The company's office products business reported record performance in 1989. Sales volume for the year exceeded $1 billion for the first time, an increase of about 17 percent over that of 1988. Operating income for the year increased 7 percent over that of 1988 to a new high. Growth in income lagged growth in sales during the year primarily because of start-up costs associated with two new facilities. The favorable results in 1989 were attributable to the relatively healthy local economies of the major urban areas served by this business, combined with a variety of effective sales and marketing programs. These factors also contributed to the increase in the segment's operating income in the fourth quarter of 1989, compared with that of the fourth quarter of 1988.

Operating income for the company's building products segment in 1989 reached its highest level in 11 years and was up dramatically from that of strike-affected 1988. The strong performance in 1989 was due to a combination of factors, including the efficiencies gained from recent capital expenditures in the company's wood products manufacturing business and strong prices caused by vigorous rebuilding activity in the aftermath of Hurricane Hugo and the California earthquake and by constraints on timber supply. Due largely to these increased prices, this segment's operating income in the fourth quarter of 1989 was up dramatically, compared with that of the same period in 1988. The positive effect of higher prices was partially offset by increased delivered-log costs.

Boise Cascade Corporation is an integrated forest products company headquartered in Boise, Idaho, with operations located primarily in the United States and Canada. The company manufactures and distributes paper and paper products, office products, and building products and owns and manages timberland to support these operations. ATLANTA (JAN. 22) PR NEWSWIRE - AT&T (NYSE: T) today announced a time-saving service that allows busy people to record and send messages to any telephone, whether it's around the corner, across the country or around the world.

There are no sign-up fees or monthly charges and no special equipment is needed to use the service, called AT&T VoiceMark(sm) Messaging Service. Customers simply dial 800-562-6275, and follow the easy instructions to record and send a one-minute personal message.

Messages can be scheduled for delivery immediately or up to a week later. Recipients can record a one-minute reply at no extra charge.

Although the service can be used by customers anywhere in the United States, AT&T is initially marketing it in the greater Atlanta area. The company said it will promote Voicemark Service in other areas of the country as it expands the system.

"VoiceMark Service lets you use any telephone to be in two places at once. You can keep in touch at the same time you're attending to the demands of the day," said Karen Antonucci, AT&T VoiceMark Messaging Service marketing manager.

"You no longer have to endure the frustration and time delays associated with a telephone that's busy, friends and associates who aren't at home, or time zone differences.

"For example, someone who's taking an early flight from the East Coast to the West Coast can still get an important message to the person planning to meet the plane. By scheduling the message to be delivered later in the day, the West Coast friend receives the call at a convenient time," Antonucci said.

Customers can send VoiceMark Service messages to any telephone, local or long-distance, and to telephones in more than 150 countries that can be dialed directly from the United States.

"Customers who have used VoiceMark Service in trials tell us they find it helpful in scheduling or canceling business or social arrangements, for sending reminders, or as a personal greeting when schedules don't allow a direct call," Antonucci said.

Within the United States, VoiceMark Service prices are $1.75 for automated delivery, or $2.50 for person-to-person delivery, in which an attendant personally introduces the message to a specified person. There are no toll charges; the distance the message travels does not affect the price of the service. Prices for sending VoiceMark Service messages overseas vary by country.

Customers can charge their messages to MasterCard or Visa. In the nine-state region served by BellSouth, they also can use their AT&T card.

For more information about VoiceMark Service, including applicable terms and conditions, customers can call 800-662-2588.

RALEIGH, NC (JAN. 22) PR NEWSWIRE - Donald H. Morrow, a former history teacher, has been named executive director of the North Carolina Association of Educators (NCAE) by the organization's Board of Directors.

In a meeting held Jan. 20, the Board voted to name Morrow the top staff official. A 30-year staff member, Morrow has been serving as the interim NCAE executive director since July, 1989. The NCAE Board conducted a nationwide search to fill the position.

NCAE President Julia Kron said she is pleased with the Board's decision ans is confident that Morrow will serve the 42,000 member organization will. "He is an experienced staff member," said Kron, "totally familiar with the structure and inner-workings of the Association."

Morrow's long career with the state's largest professional education aassociation began in 1960 when he joined the North Carolina Education Association (NCEA) as a field staff consultant. He left North Carolina for a brief period, from 1969-1971, to work on an ethics program for the parent organization, the National Education Association (NEA), located in Washington, D.C.

Morrow rejoined the state association staff in 1971 following the merger of the NCEA and the North Carolina Teachers Association (NCTA) as manager of field services for the NCAE. He held this post until his appointment as executive director.

As field services director, Morrow set up field-based programs similar to the NEA program. The first NCAE field office was based in Asheville. NCAE's field operation has grown from three staff members to the current staffing of 23.

Morrow was instrumental in establishing the NCAE legal services program which offers varying kinds of legal assistance to members in both employment and personal matters.

While a field consultant for NEA, Morrow served on the National Committee on Professional Ethics which conducted a review and revision of the Code of Ethics of the teaching profession. In 1967, as chair of this committee Morrow presided over the rewriting of the Code and presented a report to the NEA Representative Assembly which resulted in the adoption of the Code of Ethics.

A Mooresville native, Morrow is a graduate of Duke University. He began his career in education as a history teacher at Reynolds High School in Winston-Salem.

Morrow is a member of Hudson Memorial Presbyterian Church in Raleigh, where he has served as a deacon, elder and clerk of session. He is also a member of the Raleigh Oratorio Society and the Raleigh Kiwanis Club.

Morrow is married to the former Mary McNeely Rogers of Mooresville. The couple has two daughters.

MINNEAPOLIS (JAN. 22) PR NEWSWIRE - Cray Research, Inc. (NYSE: CYR), announced today that the Saudi Arabian Oil Company (Saudi ARAMCO) has installed a CRAY-2 computer system.

Saudi ARAMCO is using the system primarily to simulate underground oil reservoirs, and thus to optimize the production of various wells in a given oil field. These simulation models are highly complex, and Saudi Arabia's oil fields are the largest in the world. The CRAY-2 supercomputer is required because it has sufficient memory (more than 2000 megabytes) to run these large, complex models.

The leased system was installed during the fourth quarter of 1989 in Saudi ARAMCO's EXPEC computer center in Dhahran, Saudi Arabia. Saudi ARAMCO is using Cray Research's UNICOS operating system, which is based on AT&T UNIX System V.

Cray Research, Inc., currently has 27 systems installed among 25 petroleum industry customers in eight countries. The company designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

CLIFTON, NJ (JAN. 22) PR NEWSWIRE - Keystone Camera Products Corporation (AMEX: KYC) of Clifton said today it has filed a complaint against Mitsubishi International Corporation of New York in the U.S. District Court in Newark to recover damages totalling $31,750,000, including $10,000 for punitive damages.

In its complaint, Keystone charged that Mitsubishi acted in bad faith and "intended to gain control of Keystone Camera Company or otherwise to drive it out of business" by improperly using its position as both exclusive exporter and exclusive importer.

At issue in the litigation, Keystone said, is Mitsubishi's "bad faith" failure to perform in accordance with agreements between Mitsubishi and Keystone covering export of Keystone cameras and the importing of component parts. The agreements were signed in September 1988.

In the agreements, Keystone said Mitsubishi became its exclusive importer of camera parts and Keystone's exclusive exporter of finished cameras.

Mitsubishi agreed to accept finished cameras in lieu of cash for the first $3,000,000 in parts imported for Keystone, the Keystone complaint said.

"Mitsubishi claimed it had shipped considerably more than $3,000,000 of parts to Keystone, and Mitsubishi demanded immediate payment in cash of approximately $1,900,000 from Keystone for parts delivered in excess of the $3,000,000 paid for with cameras," according to the complaint.

"Mitsubishi wrongfully used this claim for amounts due for parts as a further excuse for its non-performance of its obligation to use its best efforts to promote Keystone's export business and to expand the market for Keystone cameras.

"In bad faith, and knowing that the cutoff of Keystone's supply of imported parts could drive Keystone out of business, Mitsubishi used its position as both exclusive importer of parts for Keystone cameras and exclusive exporter of finished cameras, to squeeze Keystone to make payment for amounts allegedly due to Mitsubishi for parts," the complaint said.

"Because of Mitsubishi's failure to perform its obligations under the Import Agreement, Keystone was compelled to make direct arrangements with suppliers of parts and components, on less favorable financial terms, to continue the flow of parts and components to Keystone for the production of cameras."

In December 1989, Mitsubishi filed an action against Keystone in the U.S. District Court for the Southern District of New York seeking approximately $1.9 million plus unspecified amounts as damages said to have resulted from alleged breaches of the agreements.

Keystone, through its counsel, DeForest & Duer, claimed Mitsubishi's action was legally defective and that Keystone would move to dismiss the action.

NEW YORK (JAN. 22) - Woolworth Corporation (NYSE: Z) today announced that effective Feb. 1, 1990, Lee A. Sunderland will become president and chief executive officer of The Richman Brothers Company, a Woolworth subsidiary. Sunderland, who has served as executive vice president of Richman since October 1983, will succeed William H. Gaudreau, who is retiring.

Sunderland, 49, who will report to Ronald J. Berens, Woolworth Corporation's senior vice president - U.S. apparel group, began his career with Richman's Anderson-Little division in 1959. He is a graduate of Southeastern Massachusetts University.

Harold E. Sells, chairman of the board and chief executive officer of Woolworth Corporation, stated, "Having had a 30-year career in the men's and women's apparel business, Lee Sunderland brings a wealth of knowledge

and experience to his new position."

The Richman Brothers Company, which operates a total of 292 stores in the United States under the names Richman, Anderson-Little and Cotton Supply Company, sells men's and women's apparel and furnishings. Richman's revenues for the year ended Jan. 28, 1989, were $283 million.

#90022p0169 01/22/1990 ~PR Newswire

NORTHBROOK, IL (JAN. 22) PR NEWSWIRE - Culligan International Co. today announced that the United States Environmental Protection Agency in error included certain Culligan-brand weater coolers in a list of pressure bubbler water coolers that pose lead hazards.

Culligan's Director, Packaged Water Program, Paul Reidl, said that although Culligan licenses its name to EBCO Manufacturing Co. to produce water coolers, those coolers are not the pressure bubbler type listed by the EPA.

''EBCO produces two types of coolers for us under the Culligan name - one that dispenses our bottled water, and one that incorporates our reverse osmosis drinking water system,'' Reidl said. ''Each of these coolers is entirely different in design and function from the bubbler, or drinking fountain, coolers cited by the EPA. We do not know why Culligan's name appeared at all in this EPA list and how they got this erroneous information.''

''The fact that the Culligan name popped up in this report is unfair to Culligan employees, dealers and customers,'' Reidl said. ''Actually, it's ironic because the drinking water products we distribute are designed to substantially reduce lead and other unwanted substances found in drinking water.''

Reidl said Culligan has asked EPA officials to remove the company's name from the list of potentially hazardous coolers.

Culligan International Co., headquartered in Northbrook, Ill., is a leading manufacturer of drinking water and water softener systems. As the leading worldwide service organization in the water treatment industry, Culligan serves residential, commercial and industrial customers through a network of more than 1,350 dealerships and licensees.

A news release issued by the EPA on Jan. 19 mentioned Culligan in connection with pressure bubbler water coolers produced by the EBCO Manufacturing Co. as among those listed by the EPA and found to pose lead

hazards. Culligan was listed as one of the companies for whom EBCO produces drinking water coolers.

DENVER (JAN. 22) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) today reported earnings for the fourth quarter of $39.2 million, or 93 cents per share compared with 1988 fourth quarter earnings of $65.4 million, or $1.61 per share.

For the full year 1989, Cyprus earned a record $250.1 million, or $6.06 per share, on revenues of $1.8 billion compared with 1988's full year earnings of $170 million, or $4.21 per share, on revenues of $1.3 billion.

Higher prices, especially copper, and higher volumes from mines acquired in recent years were responsible for the record year, but lower prices for both copper and molybdenum affected the fourth quarter.

Cyprus Minerals, headquartered in Englewood, Colo., is the second largest United States copper producer. It is also a producer of molybdenum, lithium, coal, talc, barite, gold, silver and zinc.

#90022p0182 01/22/1990 ~PR Newswire

NEW YORK (JAN. 22) PR NEWSWIRE - Crane Co. (NYSE: CR) today reported net income for the fourth quarter ended Dec. 31, 1989, of $13.6 million, or 42 cents per share, compared with $12.5 million, or 37 cents per share for the fourth quarter of 1988, a 14 percent increase in earnings per share.

Sales for the fourth quarter were $347.2 million, compared to $343.9 million for the same period in 1988. For the year ended Dec. 31, 1989, income from continuing operations was $55.9 million, or $1.72 per share, compared to $49.2 million, or $1.46 per share in 1988, an 18 percent increase in earnings per share. Sales for the year increased 11 percent

to $1.5 billion, compared to $1.3 billion in 1988.

Operating profit for the fourth quarter was $24.5 million, up 4 percent on a 1 percent sales increase. Engineered industrial products, the company's largest business segment, had operating profits of $20.2 million, equal to last year's fourth quarter. Results were higher at Hydro-Aire, National Rejectors and the Canadian Valve and Plumbing businesses, but lower at the company's defense businesses which continue to be impacted by reduced military spending. The domestic valve operation continued to operate at a loss.

Wholesale distribution, the company's second business segment, showed a 24 percent operating profit increase for the quarter with both Huttig and Canada Supply up sharply. Huttig's performance was primarily driven by an increase in profitability at its Palmer G. Lewis West Coast operation. Huttig's other branches maintained margins on lower sales compared to last year. Canada Supply's higher profit performance was also primarily based on improved margins.

Operating profit for the year was $105 million, up 10 percent on an 11 percent sales increase with both of the company's segments showing higher profits. The engineered industrial products segment was up 13 percent primarily due to profit increases at Hydro-Aire, National Vendors and National Rejectors in West Germany. The defense businesses and the domestic valve operation were lower, with the latter operating at a loss for the year. The wholesale distribution segment was up 7 percent from last year, primarily because of the inclusion of a full year's results for Palmer G. Lewis, which was acquired at the end of the second quarter of 1988. Operating margins improved at Palmer G. Lewis, due to the beginning of a successful integration into Huttig.

Crane Co. is a diversified manufacturer and distributor of engineered products for aerospace, construction, defense and other industries.

#90022p0185 01/22/1990 ~PR Newswire

CHICAGO (JAN. 22) PR NEWSWIRE - The Quaker Oats Company (NYSE: OAT) today reported earnings per share of 27 cents for the second quarter of fiscal 1990 ended Dec. 31, 1989, compared to 47 cents a year ago. Consolidated operating income of $81.3 million was 10 percent lower than last year, due to sharply lower Fisher-Price results, predicted early in December.

Operating income in the second quarter for U.S. and Canadian Grocery Products was $58.3 million, or 12 percent above the $52.2 million earned a year ago. Contributing to the operating income results were cost- savings throughout the business resulting from restructuring actions taken last summer. Advertising and merchandising expenditures were even with levels in the year-ago quarter. Sales of $790.5 million were 2 percent below last year, as lower sales in the Pet Foods and Golden Grain divisions offset gains in the other divisions. Overall unit volume in the quarter was down 9 percent, primarily due to volume declines in pet foods, although volumes were also lower in pork and beans, Golden Grain products and, to a

lesser extent, cereals. This more than offset strong gains in Gatorade thirst quencher, syrups, food service and Canada.

Operating income in International Grocery Products for the second quarter was $32.5 million, or 14 percent above the $28.5 million reported last year due to higher operating income in Latin America, notably Brazil and, to a lesser extent, Mexico. However, the improved operating income performance in Brazil was offset by higher financing costs in that country.

On a year-to-date basis, operating income in International Grocery Products was $71.1 million, up 33 percent over last year.

Year-to-date operating income for Fisher-Price was $19.4 million, compared to $52.5 for the first six months a year ago.

Quaker is an international marketer of foods, pet foods and toys.

WAUKEGAN, IL (JAN. 22) PR NEWSWIRE - Outboard Marine Corp. (NYSE: OM) today announced a number of organizational and management changes designed to streamline its management structure and position the company for the changing recreational marine market.

OMC President and Chief Executive Officer James C. Chapman said Robert D. Randolph, currently vice president of manufacturing, has been named executive vice president of OMC and president of the marine power products group. In this position, Randolph will have responsibility for all manufacturing, marketing, engineering and accounting for OMC's marine power products, including Johnson and Evinrude outboards, OMC Cobra stern drives, OMC Sea Drives, and OMC parts and accessories. He reports to Chapman.

Thomas J. Beeler, currently vice president and general counsel, has been named senior vice president of OMC, chief administrative officer, and general counsel. In this position, Beeler will be responsible for all administrative functions of the corporation, law, corporate secretary, employee relations, public affairs, environmental control, and aviation. He reports to Chapman.

Dennis E. McArdle, currently vice president-special projects, has been named vice president of OMC and president of the boat group, which includes Donzi, Hydra-Sports, Javelin, Lowe, Sea Nymph, Seaswirl, Stratos, and Sunbird boats. In this position, McArdle will have full responsibility for these companies. He reports to Chapman.

Two separate boat divisions have been formed. John A. Winn, currently vice president and president of the boat group, has been named vice president of OMC and chairman of the Four Winns Division, a company he founded with his father and two brothers. John T. Keim, currently president of Chris-Craft Boats, has been named a vice president of OMC and president of the Chris-Craft Division. Both Winn and Keim report to Chapman.

Dennis L. Jacobson, currently vice president-international, has been named vice president of OMC and president of the international group. In this position, Jacobson will be responsible for the marketing of boats and marine power products outside the United States, as well as manufacturing facilities in Belgium, Sweden, Hong Kong, Australia, and Brazil. He reports to Chapman.

D. Jeffrey Baddeley has been named associate general counsel and secretary of OMC. In this position he will perform a variety of legal and administrative functions. He reports to Beeler.

CINCINNATI (JAN. 22) PR NEWSWIRE - Cincinnati Milacron Inc. (NYSE: CMZ) announced today that it has sold the major product lines and related assets of its wholly owned subsidiary, International Laser Machines Corporation (ILM), to Electrox Inc., a newly formed Indiana corporation. The product lines are ILM's CO2 laser, Nd:YAG laser and Nd:YAG laser marker. Electrox is a subsidiary of The 600 Group PLC, a publicly held British manufacturing company.

Exact terms of the transaction were not disclosed. However, Milacron said that an after-tax charge of approximately $4.5 million for the discontinuance of this operation will be included in the company's fourth-quarter 1989 results. Milacron expects to report its financial results for the fourth quarter and for the year 1989 on February 13.

"ILM has incurred operating losses since we acquired it in mid-1986," Cincinnati Milacron chairman and chief executive officer, James A. D. Geier, explained. "So, this action will benefit our future earnings. It is also another step in Milacron's overall reorganization strategy to concentrate on our core businesses. Our major emphasis remains on strengthening our position as a world-class supplier of machines, systems, controls and software for factory automation."

Cincinnati Milacron, with 1988 sales of $858 million, is a world leader in

advanced manufacturing technologies -- machinery, computer controls, software, cells and systems -- for the metalworking and plastics processing industries; and in robotics, metrology, inspection, and information technologies for industry in general. The company is also a leading producer of precision grinding wheels and synthetic metalworking fluids.

NEW YORK (JAN. 22) PR NEWSWIRE - The American Stock Exchange today announced that Granada BioSciences Inc. of Houston began trading a maximum of 6,833,107 common shares today on a "when issued" basis.

Granada BioSciences is a leading biotechnology-based company that focuses its technologies on improving the quality of food products.

Trading under ticker symbol GBI.WI, the common stock opened on 10,400 shares at 7.

Granada BioSciences is a leading supplier of genetic products and reproductive technical services. The company provides embryo transfer and sire services, to both domestic and international customers in the food animal industry; is one of the leading commercial animal biotechnology and mariculture research organizations in the world; manufactures and markets food animals; and owns and manages one of the nation's largest herds of registered purebred cattle.

An agreement with its Granada Foods Corp. affiliate allows Granada BioSciences to sell to Granada Foods its required amount of naturally produced and cloned beef cattle within the continental United States. Granada Foods also began trading on the Amex today on a "when issued" basis, under ticker symbol GNF.WI.

Granada Foods is a producer, marketer and distributor of value added food products both domestically and internationally, that specializes in certain red meat and poultry products.

NEW YORK (JAN. 22) PR NEWSWIRE - The American Stock Exchange announced that Granada Foods Corporation of Houston began trading a maximum of

3,476,640 common shares today on a "when issued" basis. Granada Foods is a producer, marketer and distributor of value added food products both domestically and internationally, that specializes in certain red meat and poultry products.

Trading under ticker symbol GNF.WI, the common stock opened on 4,600 shares at 7.

Granada Foods' Texas-based processing and distribution facilities service various metropolitan areas in the continental United States and certain international markets.

The company, believed to be Texas' largest meat purveyor and this country's major supplier of naturally smoked, wholebody turkeys, has recently opened a state-of-the art, 65,000-square-foot processing plant in Houston. Granada Foods also owns and manages some of this country's major feedlots.

Granada Foods' products and services are provided to restaurants, hotels, schools, hospitals, universities, supermarkets, retail grocery stores, military commissaries and other institutions.

An agreement with its Granada BioSciences, Inc. affiliate, allows Granada Foods to purchase from Granada BioSciences its required amount of naturally produced and cloned beef cattle within the continental United States. Granada BioSciences also began trading on the Amex today on a "when issued" basis, under ticker symbol GBI.WI.

Granada BioSciences is a leading biotechnology based company that focuses its technologies on improving the quality of food products.

#90022p0192 01/22/1990 ~PR Newswire

SAN JOSE, CA (JAN. 22) PR NEWSWIRE - Radius Inc., the leading manufacturer of high resolution graphics display systems and graphics engines for personal workstations, announced the Radius DirectColor/8(TM) Interface for the Macintosh II line of personal computers.

DirectColor/8 is upgradable from 8 to 16 to 24-bits of information per pixel.

"DirectColor/8 is a perfect example of Radius' commitment to open architecture, modular design systems," said Ed Colligan, Radius director of marketing.

"With Radius' line of modular color displays, interfaces and graphics engines, customers can build a system which best meets their particular application needs. Radius products are designed to avoid obsolescence."

The upgradable DirectColor/8 is a key component in the Radius Color Systems product line. Compatible with the Radius Color Display(TM), DirectColor/8 may be used in conjunction with the Radius PrecisionColor(TM) Calibrator, QuickColor(TM) Graphics Accelerator or QuickCAD(TM) Graphics Engine, to create any number of application specific personal workstations.

"Unlike other pseudo-upgrade programs, the DirectColor/8 upgrade is a true on-the-board, reseller installed upgrade," said Steve Becker, Radius product manager. "Radius customers do not have to turn in their current board for some completely different piece of equipment, nor do they have to hunt down and install their VRAM."

To upgrade a DirectColor/8 from 8 to 16-bit performance, a Radius Authorized Reseller installs a Radius DirectColor Memory Expansion Kit, Each DirectColor/8 may be upgraded to a full 24-bits per pixel performance. Radius Authorized Reseller installed upgrades do not void the DirectColor/8 full one year warranty.

DirectColor/8 has a screen resolution of 1152 x 882. This provides 30 percent more workspace than traditional 19-inch displays. The result is a full two-page view, ideal for publishers and designers. The 71 Hz refresh rate eliminates perceptible flicker for extended viewing comfort. DirectColor/8 is fully compatible with Apple's 32-Bit QuickDraw graphics system software.

DirectColor/8 also includes RadiusWare, the proprietary Radius System Software included with all Radius display systems. RadiusWare features include Tear-off Menus, Enlarged Menu Font, Screen Capture, Bit Depth Changer for on-the-fly pixel depth changes and Screen Saver.

While DirectColor/8 is also a gray scale interface capable of displaying 256 shades of gray, it will not replace the Radius GS/C Interface(TM). The GS/C Interface will continue to be available for shallow 8-bit color or gray scale applications such as CAD or graphics productivity. Price and Availability

The Radius DirectColor/8 Interface will be available January, 1990 from all Radius Authorized Resellers and Radius Authorized VARS. It will carry a suggested list price of $2,095. Each DirectColor Memory Expansion Kit will list for $1,095. As of Jan. 15, the Radius DirectColor/24 Interface will list for $4,095; an 18 percent reduction from its current list price.

Radius Inc. is the leading manufacturer of high resolution graphics

display systems and graphics engines for personal workstations. Radius products are available through a worldwide network of Radius Authorized Resellers.

FORT LAUDERDALE, FL (JAN. 22) PR NEWSWIRE - Lexicon Corporation (NASDAQ: LEXI) today announced that its wholly owned subsidiary, Scope Incorporated has completed the sale of substantially all of the assets, equipment and business of its Industrial Systems Division to Manufacturing Services Incorporated of Manassas, Va. for an aggregate purchase price of approximately $900,000. The purchase price represents the approximate book value of the assets and equipment sold and the proceeds will be used to reduce debt.

The Industrial Systems Division has been responsible for operating losses from continuing operations for Lexicon Corporation and subsidiaries of approximately $3.0 million over the past two fiscal years and losses from discontinued operations of nearly $600,000 in the same period. Scope, based in Reston, Va., has substantially reoriented its organization to concentrate on the target identification and electronic intelligence programs of its Signal Technology Division and is actively pursuing several major contracts in these areas.

NORTH TONAWANDA, NY (JAN. 22) PR NEWSWIRE - Record earnings in the second quarter and six months were reported today by Paul H. Taylor, president Taylor Devices, Inc. (NASDAQ: TAYD).

"New product applications in the oil drilling industry, plus improved profit margins on our new patented tension-compression products in aerospace, have largely been responsible for the steady increase in earnings. Our current backlog is $3,057,000, and all our defense programs are on sophisticated, advanced items not normally subject to military budget cutbacks," Taylor stated.

"We expect sales and profits to continue rising throughout the remainder of this fiscal year," he added.

Taylor Devices gave all employees an extra full day's pay at Thanksgiving time last year, as a reward for increased shipments. "Otherwise," Taylor

said, "our earnings would have been even bigger."

GREENSBORO, NC (JAN. 22) PR NEWSWIRE - Vanguard Cellular Systems, Inc. (NASDAQ: VCELA) and the Providence Journal Company announced today that they have entered into an agreement to form a 50/50 joint venture to acquire and operate non-wireline celluar systems primarily in eastern North Carolina.

The Providence Journal is a privately held company that operates cellular systems in North Carolina, Virginia and Georgia.

The agreement provides that the new joint venture company will acquire more than 80 percent ownership in the non-wireline systems serving the Wilmington and Jacksonville Metropolitan Statistical Areas. In addition, the agreement contemplates the future acquisition and operation of other non-wireline cellular systems in the eastern portion of North Carolina.

Haynes G. Griffin, President and Chief Executive Officer for Vanguard said "This is a great opportunity for two experienced cellular companies to own and operate cellular markets in the key growth areas of eastern North Carolina. The Wilminton and Jacksonville markets form the foundation for what we anticipate will become a regional network of MSA and RSA markets. This network could eventually total between 1.5-2.0 pops. We are delighted to become working partners with the Providence Journal and look forward to many years of success."

Vanguard Cellular Systems, Inc. headquartered in Greensboro, North Carolina, directly and indirectly owns interest in and operates cellular

telephone systems primarily in the Eastern United States.

NEW YORK (JAN. 22) PR NEWSWIRE - Michael Gardner has been named vice president-marketing and operations for NYNEX Logistics Services, a new division of NYNEX Enterprises. He is charged with developing Enterprises' third-party logistics services business. Gardner was named to the position in January.

Gardner brings more than 10 years of business experience to NYNEX Logistics Services. Previously, Gardner served as vice president-marketing at Distribution Centers, Inc. (DCI) of Columbus, Ohio. He has also served as executive vice president of Directel, a subsidiary of DCI.

Gardner received a B.S. degree in marketing management from Miami University, Oxford, Ohio, in 1979, and an M.B.A. in finance from Southern Illinois University in 1986. He holds memberships in the Council of Logistics Management and the Warehousing Education and Research Council.

The newly created NYNEX Logistics Services is designed to offer third-party logistics and integrated materials management on a national basis. The group is one of three new divisions at NYNEX Enterprises designed to strengthen the company's external business focus and develop new markets beyond the NYNEX family of companies.

The new group is located at NYNEX Enterprises' 441 Ninth Ave., Manhattan, headquarters. NYNEX Enterprises has also established a sales headquarters in Columbus, Ohio, where Gardner will be located.

As a third-party logistics provider, Enterprises offers a complete materials management package -- managing the movement of a client's products from the point of origin to the final destination.

Enterprises' third-party logistics services offerings include: -- Contract warehousing -- Inventory control/management -- Transportation brokerage services -- Purchasing and procurement support -- Customer service support -- Logistics information systems support NYNEX Enterprises is a subsidiary of NYNEX Corporation (NYSE: NYN). Enterprises provides cost-effective integrated materials management and technical services for the NYNEX family of companies, including purchasing, contracting, quality control, testing, inventory management and distribution.

For information about NYNEX Logistics Services, call: 212-502-6290, or 614-794-0605.

Gardner and his wife, Cynthia, reside in Westerville, a suburb of Columbus Ohio. They have two children.

DALLAS (JAN. 22) PR NEWSWIRE - Electronic Data Systems Corp. (EDS) announced today it has reached an agreement to acquire a 30 percent interest in Infocel, Inc., a Raleigh, N.C.-based specialist in information systems for local governments, education and public safety.

Terms of the purchase of the privately held shares were not disclosed.

George Newstrom, president of EDS' state operations division, which has responsibility for local government activities, said the agreement includes an option for full acquisition of the company and provides for joint marketing of Infocel's software products.

Since 1976, Infocel has designed and marketed its computer-based systems to city and county governments, schools, police and sheriffs' departments and community colleges.

Some uses for its 67 software products are financial management and reporting, utility billing and collections, parking ticket tracking, building permits, voter registration, school records management, property appraisal, and property tax billing and collection.

Headed by its founder and chairman, David Rodger, Infocel has 118 of its 149 employees at its Raleigh headquarters. EDS also has 150 people in Raleigh, working with North Carolina's Medicaid program.

With annual revenues of $15 million, Infocel has customers in 28 states and Canada while a subsidiary, GeoBased Systems, Inc., has customers in 31 states and 11 foreign countries using its geographic information system software to map and analyze land-related information.

Newstrom said EDS' interest in Infocel was sparked by the developing local government market and by the company itself. "Increasingly, cities and counties are seeing technology services as a means of boosting revenues, cutting costs and improving levels of service. There's a burgeoning market for accurate and efficient information management."

"Infocel is a great fit with EDS to pursue that business. The company is total solution and customer service oriented; our philosophies match. And they have credibility, earned by the performance of their people and

products."

Infocel's Chairman and President Rodger agreed. "The local government marketplace is fragmented," he said. "Combining the breadth of our products and market knowledge with EDS' position as the premier information technology provider gives us the opportunity to become the dominant team in this market."

EDS is the leader in providing technology-based solutions for the management and movement of data, voice and image information. EDS' stock is traded on the New York Stock Exchange under the symbol GME. With customers in all 50 states and 27 countries around the world, EDS reported revenues of $4.8 billion in 1988.

BOULDER, CO (JAN. 22) PR NEWSWIRE - Hauser Chemical Research (OTC) announces that it has submitted application for NASDAQ (National Association of Securities Dealers Automated Quotations System) listing. The company expects to be listed in the near future.

The company recently announced the signing of the final merger agreement between Hauser Chemical Research and Hauser Laboratories, effective Jan. 1 1990. The merger helped the company qualify for NASDAQ. NASDAQ is the fastest growing stock market in the world. NASDAQ operates a market with competing, multiple market makers.

The NASDAQ market makers communicate through a sophisticated global computer and telecommunications system. The NASDAQ system receives, stores, and transmits price and volume data and it calculates and transmits market statistics on more than 5300 domestic and foreign securities. Competition among market makers benefits the investor seeking the best available price.

Hauser believes NASDAQ listing will benefit the company's shareholders, making the company's stock quotations more readily available and up-to-date. NASDAQ's sophisticated technology and its system of competing market makers help ensure continuous markets, liquidity and high visibility for Hauser's stock.

Hauser Chemical Research is a chemical technology company specializing in chemical research, chemical analysis, engineering services, petroleum testing, and isolation and purification of high-value products and chemicals from biomass (i.e. plant and animal tissues.)

It is one of only a few companies nationwide applying chemical process technologies to the broader field of biotechnology with a special emphasis on natural products. Hauser Chemical Research has developed proprietary chemical technologies that enable it to isolate and purify extracts and natural compounds at a high-quality level and lower cost than competing technologies.

The company processes materials for clients producing pharmaceuticals, cosmetics, nutrients, and other high-value products.

Its service and research activities encompass the general field of organic and inorganic chemistry with special expertise in process and product development, synthesis, surface modification, chemical analysis, environmental analysis, industrial problem solving, product formulation, material testing, engineering services, and forensic investigations.

MADRID, SPAIN (JAN. 22) PR NEWSWIRE - Banco Santander (NYSE: STD) today announced a 28.52 percent increase in preliminary net income to 53.5 million pesetas ($487.6 million), or $440 pesetas per share ($4 per ADS), for the year ended Dec. 31, 1989, over the comparable period a year ago. Pre-tax income totaled 81.3 pesetas ($740.9 million).

The net interest income, after provision for credit losses, should increase 20.17 percent to 159.7 billion pesetas ($1.5 billion).

At year end, total assets were 4,528 billion pesetas ($41 billion), a 36 percent increase. Consolidated equity was 243.8 billion pesetas ($2.2 billion).

Return on assets was 1.34 percent and return on equity 19.42 percent. The operating costs as a percent of average total assets declined to 2.38 percent at year end from 2.45 percent in 1988.

The general meeting of shareholders is scheduled for Saturday, Feb. 3, in Santander, Spain.

The consolidated Santander Group is composed of Banco Santander, 17 more banks and another 76 companies of various nationalities in which it maintains an ownership position. Through a network of over 1,600 offices in 27 countries, Banco Santander ranks fourth among Spanish banks by total assets, second by profits and market capitalization, and first by number of shareholders.

Each Banco Santander ADS is equivalent to one ordinary Spanish Banco Santander share.

Conversion of Spanish pesetas was translated into dollar amounts at the exchange rate of U.S. $1.00 equals Sp. Ptas. 109.72.

DALLAS/FORT WORTH AIRPORT, TX (JAN. 22) PR NEWSWIRE - AMR Corp. (NYSE: AMR) announced today that its American Airlines Decision Technologies unit has become a subsidiary of the company and will begin making its decision-support services more widely available to outside clients.

Dr. Thomas M. Cook, one of the industry's most noted experts in the uses of operations research and computer models, is president of the subsidiary.

American Airlines, the principal subsidiary of AMR, has been using analytical techniques to evaluate operations and make key decision for more than 30 years. About two years ago, the various activities involved in the function were restructured into American Airlines Decision Technologies and the unit, operating as a division of the airline, began providing consulting services and model-driven computer software to outside organizations as well as to departments within American.

The success of these efforts and the long-term growth potential of the analytical consulting business prompted the company to make AADT a full and separate subsidiary of the parent corporation, said Donald J. Carty, AMR's executive vice president.

"We are excited about AADT's prospects," Carty said. "The company is drawing upon AMR's strong reputation for leadership and technological excellence, and Tom Cook and his people are well known as being among the best minds in the industry when it comes to using computer technology for making tough, complex decisions."

Over the years, American Airlines has used operations research for everything from flight planning and crew scheduling to developing and improving the operation of major connecting hubs and better managing its air fares and seat inventory.

In recent years, American Airlines Decision Technologies has done consulting work and implemented model-based systems for such outside organizations as Amtrak, Admiral Cruises, the European Economic Commission

the Federal Aviation Administration, SNCF (the French National Railroad), the Metropolitan Nashville Airport Authority, Civil Aviation authorities in Sweden and Spain, and Qantas, Eastern Airlines, Air France, Delta Air Lines, Canadian Airlines International and Ryder Truck Rental Inc.

SAN FRANCISCO (JAN. 22) PR NEWSWIRE - The board of directors of Paychex, Inc. (NASDAQ: PAYX) today declared a regular quarterly dividend of $.04 per share payable Feb. 26 to shareholders of record Feb. 5, 1990.

At their meeting here today, the directors also voted to add Donald W. Brinckman, president and chief executive of NYSE - listed Safety - Kleen Corp., to the board. His election increases the number of directors on the board to seven from six.

Brinckman has headed Safety-Kleen since 1968, during which period revenues have grown from $100,000 to over $417 million in 1988. He also serves on the board of Johnson Worldwide Associates and is a member of the Automotive President's Council. Brinckman holds a B.S. degree in marketing and an MBA with a marketing emphasis from Northwestern University.

Paychex, based in Rochester, N.Y., has 71 payroll service centers in major metropolitan areas throughout the country. The company is primarily engaged in the preparation of payroll checks, internal accounting records, and all federal, state and local payroll tax returns for businesses with 1 to 200 employees.

#90022p0221 01/22/1990 ~PR Newswire

EL PASO, TX (JAN. 22) PR NEWSWIRE - Property Trust of America (NYSE: PTR) announced that Realty Acquisition Corp., a subsidiary of Sizeler Property Investors Inc., had voluntarily dismissed its remaining claims against Property Trust in the litigation earlier filed as part of Sizeler's hostile tender offer to acquire a controlling interest in Property Trust.

The dismissals did not alter the partial summary judgment granted to Property Trust on Oct. 26, 1989, which upheld the validity of Property Trust's shareholder protections, including its shareholder purchase rights plan and 9.8 percent ownership limitation, and which upheld the

constitutionality of two Maryland anti-takeover statutes. The order granting the partial summary judgment is now appealable. In addition, Property Trust voluntarily dismissed its counterclaims against Sizeler. The dismissals were without prejudice, leaving either party free to re-file its claims or counterclaims at a later date.

James H. Polk III, president and chief executive officer of Property Trust stated, "Since our Board of Trustees' actions resulted in Sizeler increasing its offered price and the court would not permit Sizeler to amend its complaint, Sizeler's litigation claims relating to these actions have been rendered meaningless. Since we had conducted only limited discovery on our counterclaims, which we are free to pursue in the future, dismissal seemed prudent at this time because of the cost savings. We remain committed to opposing the Sizeler transaction." Property Trust also noted that the conditions to Sizeler's tender offer, which include the invalidation or inapplicability of the Trust's shareholder protections and the Maryland anti-takeover statutes, cannot be satisfied without further litigation or Sizeler's obtaining control of Property Trust's Board of Trustees.

Property Trust of America is a self-administered, equity real estate investment trust with a diverse investment portfolio of commercial properties located in the southwest and western United States.

#90022p0222 01/22/1990 ~PR Newswire

NEW YORK (JAN. 22) PR NEWSWIRE - Bairnco Corp. (NYSE: BZ) today reported that income from continuing operations for the fourth quarter was $2.6 million, or 25 cents per share, down from 1988's record $5,559,000, or 53 cents per share. Fourth-quarter sales of $49,318,000 were down 15 percent from $57,771,000 in the 1988 quarter.

For the full year, which included a third-quarter nonrecurring charge of $5,024,000, or 47 cents per share, income from continuing operations was $7,109,000, or 67 cents per share, a decline from the record $19,356,000, or $1.81 earned in 1988. Sales for all of 1989 were $196,943,000, a decrease of 7 percent from 1988's $211,792,000.

Chairman and president Glenn W. Bailey said that most of the sales and earnings decline in 1989 took place in Bairnco's Shielding Systems subsidiary which has experienced low order input, particularly in the defense procurement area, and losses on two major contracts that were booked earlier in 1989 and will be completed in mid-1990.

Bairnco's other subsidiaries had full year results that were generally flat to moderately down from last year. Arlon's laminated and coated products units offset weakness in domestic electronic materials markets with increased overseas sales and the introduction of new products not dependent on the electronics industry, although overall profit margins were down due to competitive pressures. Kasco's cutting services and products reported lower operating profits due to increased costs associated with an expansion of its service territories in the U.S. and Canada. Keene composites also had lower operating profit for the year on a small improvement in sales. Production at this facility was disrupted in the early part of the year by plant reconstruction work relating to an accident in late 1988.

Bairnco is the New York-based corporate parent of subsidiaries with operations in composites, laminated and coated products, electromagnetic shielding systems and products and cutting services and products.

#90022p0225 01/22/1990 ~PR Newswire

LOS ANGELES (JAN. 22) PR NEWSWIRE - ARCO (NYSE: ARC) today reported net income of $1.95 billion for 1989, an increase of 23 percent from the $1.58 billion earned in 1988. Earnings per share were $11.26 for 1989, compared with $8.78 in 1988.

Lodwrick M. Cook, ARCO chairman and chief executive officer, announced the earnings and stated that ARCO's return on stockholder's equity for the past 12 months was 30.6 percent versus 26.1 percent for 1988.

"We are pleased that ARCO is reporting both record earnings and record earnings per share. This achievement is a tribute to the quality of the company's assets across all our business segments and to the hard work and dedication of our employees," Cook said.

"In 1989, we experienced higher worldwide crude oil and refined product prices, increased natural gas volumes and lower interest expense, all of which contributed to our income growth. We also realized a $634 million after-tax gain from the sale of a majority interest in Lyondell Petrochemical Company in January.

"At the same time, however, the 1989 results reflect a $345 million charge for future environmental expenses and other provisions, as well as 50 percent less contribution from the earnings of Lyondell."

For the fourth quarter, ARCO's net income was $403 million, or $2.38 per

share, compared with $391 million, or $2.22 per share, in the fourth quarter of 1988.

For the full year 1989, ARCO's worldwide oil and gas exploration and production operations earned $887 million after tax, up 64 percent from $542 million in 1988. Higher crude oil prices combined with increased natural gas sales were responsible for the improved performance. ARCO's oil and gas segment results include a $40 million after-tax gain as a result of natural gas pipeline contract settlements.

LOS ANGELES (JAN. 22) PR NEWSWIRE - ARCO's (NYSE: ARC) board of directors today approved an 11.1 percent increase in the quarterly dividend payable to owners of ARCO common stock, raising the quarterly dividend from $1.125 to $1.25 a share.

Dividends for two other classes of ARCO stock remain unchanged. ARCO Chairman and Chief Executive Officer Lodwrick M. Cook said, "The dividend increase reflects ARCO's strong financial position and our confidence in the future."

At a meeting today, ARCO's directors declared the new dividend payable March 15 to stockholders of record Feb. 16.

Dividends of 75 cents a share and 70 cents a share, respectively, were also declared on the company's $3 cumulative convertible preference stock and $2.80 cumulative convertible preference stock, payable March 20 to stockholders of record Feb. 16.

MENOMONEE FALLS, WI (JAN. 22) PR NEWSWIRE - F&M Financial Services Corp. (NASDAQ/NMS: FMFS) today announced that net income for the fourth quarter of 1989 was a record $1,340,000, up 35 percent from the same period a year ago. Net income per share was $0.57, compared to $0.47 for the same period in 1988.

Net income for the year was $4,034,000, up 40 percent over last year. Net income per share was $1.79, up from $1.35 in 1988. Total assets as of Dec. 31, 1989, increased 22 percent to $681 million, which includes the acquisition of the $40 million St. Francis State Bank, now F&M Bank St. Francis.

Richard P. Klug, F&M chairman, president and chief executive officer, said "Earnings benefited this year from a 12 percent gain in net interest income and a 36 percent jump in noninterest income, an area of emphasis for F&M this past year. The gain in net interest income reflected increased loan volume and a higher net interest margin. In addition, we effectively contained our costs, enabling the company to grow without a proportionate increase in expenses."

F&M Financial Services Corp. is a diversified multibank holding company headquartered in Menomonee Falls, Wis., with 28 banking locations throughout the state. F&M also has four non-bank subsidiaries, which are F&M Trust Co. Inc.; Leasenu Inc., a full-line leasing company; F&M Insurance Services Ltd., and F&M Realty Inc.

NEW YORK (JAN. 22) PR NEWSWIRE - Geoffrey A. Thompson, president and chief executive officer of Marine Midland Bank, announced today several changes within the bank's senior management structure.

Keith R. Whitson has been named executive director of Marine. Whitson, previously chief executive officer-U.K. of the Hongkong and Shanghai Banking Corporation, has also been named to Marine's board of directors.

Robert A. Butcher and Thomas A. Johnson have been promoted to sector-level

positions at Marine. A sector is Marine's highest organizational level. Butcher, previously division executive in charge of planning and finance, is now chief financial officer and head of the new finance sector. Previously, Johnson was division executive for operations.

The new assignments for Butcher and Johnson follow the reconfiguration of the bank's former operations and financial control sector, headed by Rexford L. West. West, a sector executive, has assumed a new senior management function, corporate engineering, reporting to the chief executive officer. In this capacity, West has institution-wide responsibilities for redirecting Marine's technological, human and other resources to support a regional banking orientation for Marine.

Together, Thompson, Whitson, Butcher, Johnson and West, plus sector executives Alan J. Heuer and Dennis G. Buchert, comprise Marine's operating committee, the bank's top internal management group.

#90022p0241 01/22/1990 ~PR Newswire

NEW YORK (JAN. 22) PR NEWSWIRE - AT&T today announced that in the unlikely event of another serious service disruption to its long distance network, AT&T operators will help customers complete calls by providing

access information for other long distance carriers.

"AT&T's goal has always been to do whatever it takes to satisfy our customers," said AT&T Chairman Robert Allen. "We regret that at the start of last week's service disruption AT&T operators were unable to help customers because we did not have adequate procedures in place for such an unprecedented situation."

At the same time, AT&T said a formal interconnection arrangement among competitors covering service disruptions in the industry, as reported in an Associated Press story over the weekend, is unrealistic. However, AT&T's operators now have procedures in place to help customers during times of serious service problems.

Regarding operator information during service disruptions, the company said that if a customer requests the access code for a specific alternative carrier, its operators will provide the code if they have this information. Alternatively, they will refer the customer to their local telephone directory or local directory assistance for that carrier's phone number. If the customer does not request a specific company, the AT&T operator will provide access information for one of the other major national carriers.

The company pointed out that it cannot equip its operators with the more than 700 access codes now in effect for long distance companies, so they will be provided with a list of codes for the major national carriers. Operators will be instructed to give out these codes within minutes after the company determines that it has a serious service problem that cannot be quickly repaired.

"We're doing everything we can to minimize the possibility of a service disruption like last week's ever happening again," Allen said. "But we also want additional options in place to ensure that our customers will always receive the kind of service they have come to expect from AT&T."

DALLAS (JAN. 22) PR NEWSWIRE - Maxus Energy Corp. (NYSE: MXS) reports that a fire has been extinguished on the "Lan Shui", a temporary crude oil processing facility for its production in the Intan field of Southeast Sumatra, offshore Indonesia.

The fire started in the engine room of the floating production storage and offloading vessel on the afternoon of Jan. 21. The fire was extinguished

by mid-morning the following day.

All crew members were safely removed from the vessel. There was no damage to the Intan-A production platform and all producing oil wells were shut-in.

There was no apparent damage to the crude oil cargo tanks and processing equipment aboard the Lan Shui. Damage was limited to the engine room and accommodation areas. There were no spills or loss of crude oil.

The company's approximately 50,000 gross barrels per day production from the Cinta complex and export facilities in Southeast Sumatra were not affected. Maxus was producing in excess of 35,000 gross barrels per day from the Intan field, which started production in June of 1989.

The company is reviewing its options for resuming production at the Intan-A platform as soon as possible. Preliminary indications are that production should resume within 30-60 days. Construction of the company's 300,000 barrel per day permanent processing facility, scheduled for completion late this year, is unaffected.

The Lan Shui is under contract between Maxus Southeast Sumatra, Inc. and P.T. Samudra Petrindo Asia, whose parent company is Bluewater Terminal Systems N.V.

Maxus Southeast Sumatra Inc. is operator and owns 56 percent interest in the production-sharing contract. The other interests in the contract area are held by BP Petroleum Development (SES) Ltd., C. Itoh Energy Development Co., Ltd., Deminex Sumatra OEL GmbH, Repsol Exploracion S.A., Hudbay Oil (Indonesia) Ltd., Inpex Sumatra, Ltd., Lasmo Sumatra Ltd., Sunda Shell N.V., TCR Sumatra AG and Warrior Oil Co. The contract area is held with Pertamina, the Indonesian state oil company.

Maxus Energy Corp. is one of the largest independent oil and gas exploration companies in the United States.

#90022p0246 01/22/1990 ~PR Newswire

AUSTIN, TX (JAN. 22) PR NEWSWIRE - Motorola (NYSE: MOT) today announced the availability of the AT&T UNIX(R) System V Release 4 Application Binary Interface (ABI) for the Motorola 88000 and 68000 microprocessor architectures. This is the first available UNIX System V Release 4 ABI for a non-AT&T architecture and is a result of an agreement signed between Motorola and AT&T in April of 1988. That agreement guaranteed Motorola early and full access to UNIX System V Release 4 and later releases to

develop the ABIs for the 68000 and 88000 architectures.

An ABI is a set of specifications that allow UNIX System V Release 4-based application software programs to run interchangeably on different computers based on a given CPU architecture. The ABI standard allows hardware and software vendors and developers to efficiently share applications for UNIX systems operating on Motorola microprocessor products.

"The ABIs demonstrate Motorola's commitment to support standards allowing for more efficient utilization of applications software," said Murray Goldman, senior vice president and general manager of Motorola's Microprocessor Products Group. "Motorola's 68000 and 88000 architectures, coupled with early UNIX system availability, continue to position Motorola as the front-runner in UNIX technology."

In April 1988, AT&T endorsed the Motorola/88open Consortium Binary Compatibility Standard (BCS) for UNIX System V Release 3 as an interim ABI for Release 4. This BCS is the standard that allows application software compatibility between Motorola 88000-based systems. The Motorola BCS was used by AT&T as a model by which the ABI for UNIX System V Release 4 was developed for all other 32-bit microprocessors.

The ABI specifications of UNIX System V Release 4 for the Motorola 88000 and 68000 architectures are currently available from Motorola's Microprocessor Products Group and will be available through AT&T's UNIX Software Operation.

#90022p0250 01/22/1990 ~PR Newswire

LOS ANGELES (JAN. 22) PR NEWSWIRE - ARCO (NYSE: ARC) announced today it is calling two debt issues for early redemption - $300 million 11-1/8 percent debentures due 2015 and $200 million 11 percent debentures due 2013. Proceeds from an early 1989 secondary stock offering as well as certain other asset sales will be used for the redemption.

As a result of these redemptions, net income for the first quarter of 1990 will be reduced by approximately $30 million. Interest savings from the issues, after tax, will be approximately $29 million for the remainder of 1990. The retirements will result in annual after-tax interest savings of approximately $35 million in 1991 and beyond.

As a result of these and other scheduled redemptions during 1990, ARCO expects to reduce its long-term debt outstanding at year-end by

approximately $600 million. At Dec. 31, 1989, ARCO's outstanding long-term debt was approximately $6.0 billion.

DALLAS (JAN. 22) PR NEWSWIRE - Mesa Limited Partnership (NYSE: MLP) today announced that a federal judge has granted summary judgment in favor of Mesa in a lawsuit brought by Unocal Corp. (NYSE: UCL) following the 1985 attempt by Mesa Partners II to acquire Unocal.

Unocal had sought recovery under the "short-swing profit" provisions of Section 16(b) of the Securities Exchange Act of alleged profits on all or part of a 6.7 million share block of Unocal shares that Mesa purchased in early 1985. Mesa disposed of the shares in May 1985 pursuant to a debt exchange offer by Unocal for its own stock and a settlement agreement between Mesa and Unocal.

U.S. District Judge John G. Davies of Los Angeles, in granting the motion by Mesa, concluded that the disposition of the shares was an "unorthodox transaction" under established case law authorities and that, in light of the "unmitigated hostility" between Mesa and Unocal at the time and other factors, there was no potential for speculative abuse of information by Mesa. Accordingly, he held that the disposition was not within the scope of Section 16(b).

Unless reversed on appeal, the decision fully disposes of Unocal's lawsuit and eliminates the need for a full trial, which had been scheduled to begin later this month.

"We are confident the decision is correct and will be upheld if appealed," said Sidney L. Tassin, a Mesa spokesman. Tassin also said that if the case had gone to trial, Mesa had expected to prevail on additional grounds independent of the unorthodox transaction exemption. These grounds included that Section 16(b) also did not apply to the acquisition of the shares, since they were acquired in a single block purchase made at a time when Mesa owned less than the statutory threshold of 10 percent of Unocal's stock.

Section 16(b) is designed to prevent unfair use of information that may have been obtained by reason of a person's relationship to the issuing corporation. It generally provides that an officer, director or any shareholder that owned more than 10 percent of the corporation's shares before both the purchase and sale in question is liable to the company for any profits realized from any purchase and sale of shares occurring within a period of six months.

HARRISBURG, PA (JAN. 22) PR NEWSWIRE - Dauphin Deposit Corp. (NASDAQ: DAPN) today announced that its board of directors has adopted a Shareholder Rights Plan.

The plan is designed to deter abusive takeover tactics and prevent an acquiror from gaining control of Dauphin Deposit without offering a fair and full price to all of the company's shareholders, according to William J. King, chairman and chief executive officer.

Under the plan, rights to purchase Dauphin Deposit common stock will be distributed as a dividend at the rate of one right for each share of common stock held at the close of business on Feb. 8, 1990. The rights are scheduled to expire on Jan. 22, 2000. The rights will be exercisable for common stock upon payment of the consideration determined in accordance with the plan if a person or group acquires beneficial ownership of 18 percent or more of Dauphin Deposit common stock or announces a tender or exchange offer after which such person or group would beneficially own 18 percent or more of the common stock.

Under certain circumstances, the rights can be exercised for purchase of common stock of Dauphin Deposit or of a surviving party in a merger at 50 percent of the then current market price.

Generally, the board of directors of Dauphin Deposit will be able to redeem the rights at $.001 per right at any time until the 15th business day following a public announcement that an 18 percent position in the company has been acquired. During those 15 business days, the directors may extend the period in which they may redeem the rights. The rights are not exercisable until the expiration of the redemption period.

Information concerning the Shareholder Rights Plan will be mailed to all shareholders in the near future.

Dauphin Deposit is a multi-bank holding company headquartered in Harrisburg. The company's banks are Dauphin Deposit Bank and Trust Co., headquartered in Harrisburg, which operates 59 branches, and Bank of Pennsylvania, headquartered in Reading, Pa., with 25 branches. Shares of Dauphin Deposit are traded nationally in the Over-the-Counter Market and are listed in NASDAQ Quotations.

#90022p0261 01/22/1990 ~PR Newswire

MINNEAPOLIS (JAN. 22) PR NEWSWIRE - Medtronic Inc. (NYSE: MDT), and Surgical Laser Technologies Inc. (NASDAQ: SLTI) announced today the introduction to European markets of an advanced laser-powered catheter for vaporizing plaque in blocked blood vessels of the peripheral vascular system.

Developed by a partnership of the two companies, the Tactilaze(TM) Peripheral Angioplasty Laser Catheter incorporates a laser-conducting fiber and unique synthetic sapphire tip designed to enable the physician to precisely control and concentrate high-density, high-power laser energy to vaporize plaque with comparatively little damage to surrounding tissue.

Tactilaze catheter features include the photo-ablative, rapid-cooling contact tip which can be brought into contact with the plaque to optimize positioning and control.

Peripheral vascular disease is a leading cause of disability, and sometimes amputation, of lower limbs. Peripheral angioplasty is a less-expensive alternative to surgical bypass procedures. The angioplasty patient's hospitalization and recovery period is much shorter.

Peripheral laser angioplasty involves insertion of the catheter into the body's arterial system at the thigh and maneuvering it to a point in the vascular system where plaque is obstructing or restricting blood flow. Monitoring the catheter's progress by fluoroscopy, the physician positions the catheter tip at the blockage, then activates a laser power system outside the body. A high-density laser beam is transmitted through the catheter shaft and focused by the tip to vaporize the obstruction.

The Tactilaze catheter is supported by the Surgical Laser Technologies (SLT) Nd:YAG Contact Laser System(TM), a versatile, portable, and cost-efficient unit for multi-specialty application. In addition to the angioplasty catheter, it supports a variety of scalpels and probes used in gynecology, otolaryngology, ophthalmology, orthopedics, urology and most surgical specialties.

The Tactilaze catheter will be distributed by the Medtronic sales force in France and by the SLT distributor network in other European countries.

Surgical Laser Technologies, formed in 1983, is a developer and manufacturer of medical devices applying laser technologies. Headquartered in Malvern, Penn., it has manufacturing facilities in the greater Cincinnati area.

#90022p0262 01/22/1990 ~PR Newswire

NORTHBROOK, IL (JAN. 22) PR NEWSWIRE - Woodhead Industries Inc. (NASDAQ: WDHD) today reported a dramatic increase in net income and record sales for the first quarter of its 1990 fiscal year.

For the quarter ended Dec. 30, 1989, net income was $1,048,000, a 39.2 percent increase from $753,000 for the first quarter of fiscal 1989. On a per-share basis, net income was up 33.3 percent to $.32 compared to $.24 for the same period last year. Sales were $17.6 million, a 3.3 percent increase over sales for the first quarter of fiscal 1989. However, sales increased 13 percent if restated to exclude product lines discontinued after the first quarter of last year.

"Our profit performance was the result of our focus on high-margin core products and improved operating efficiencies," said Alan Reed, chairman and chief executive officer. "We sold a subsidiary and discontinued several underperforming product lines, but we replaced the loss in revenue with increased sales of our specialty electrical products and related new products. Our net income also benefited from our continuing cost control and asset management."

Reed added that the company has virtually eliminated interest expense and long-term debt, which stood at $9.4 million at the end of the first quarter of the previous fiscal year. Total assets were $37.7 million as of Dec. 30, 1989, down from $42.5 million at Dec. 31, 1988, which included $3 million in assets of a divested subsidiary. Working capital was $14.1 million at the close of the first quarter, vs. $17.9 million at the same time last year. Shareholders' equity increased to $26.6 million, or $8.23 per share, compared with $23.1 million, or $7.37 per share at the end of the first quarter last year.

The 19.7 percent increase in net income for the trailing 12-month period resulted in earnings per share of $1.44, return on equity of 18.5 percent and return on assets of 11.5 percent.

"We are in excellent financial shape," said Reed. "Our products are well received and we are constantly developing new ones to meet specific customer needs. We are manufacturing and shipping products faster with fewer people and lower costs than last year, while maintaining our tradition of premium quality. I believe the results of the quarter are an indication that we are on the right course."

Woodhead Industries Inc., headquartered in Northbrook, develops, manufactures and markets premium quality, Safety Yellow(R) specialty electrical devices and mechanical motion control products for industrial applications.

#90022p0264 01/22/1990 ~PR Newswire

AUGUSTA, GA (JAN. 22) PR NEWSWIRE - Merry Land & Investment Co. (MERRY LAND) (NASDAQ: MERY) reported record unaudited net income of $9,102,000 for the year ending Dec. 31, 1989, up from $8,580,000 earned in 1988.

Fully diluted earnings per share rose to $.93 from $.90. Revenues for the year rose to $37,490,000 from $31,535,000 in 1988.

At its meeting of Jan. 22, 1990, the board of directors announced that it would consider the payment of dividends on a regular quarterly basis. The board declared a $.10 per share dividend payable March 30, 1990 to shareholders of record March 15.

Peter S. Knox III, chairman of the board, reported that the company's real estate turned in a strong performance for 1989, with income from those properties which the company held for both 1988 and 1989 rising 15 percent as a result of higher occupancy and rent rates.

He also reported that in the past year, even while the Southeast apartment market has experienced improvements in general occupancy and rent levels, sales prices for the large apartment projects in which Merry Land invests have softened. This has occurred because tax law changes have made real estate investments less attractive to tax motivated buyers, and properties are now being sold on the basis of their cash yield -- not their tax benefits. This according to Knox, has presented Merry Land with an unusual opportunity to buy high quality apartment communities at reasonable prices.

In the last quarter of 1989, the company bought or contracted to buy four such properties, increasing its multifamily holdings by 59 percent. These include Windsor Place, a 224-unit apartment property in Charleston, S.C., bought for $7.1 million; The Quarterdeck, a 230-unit property, also in Charleston, bought for $8.8 million; Lake Point, a 208-unit project in Charlotte, N.C., bought for $7.3 million; and Chatham Wood another 208-unit project, in High Point, N.C., contracted for purchase at $6.3 million. Knox said that the company hopes to acquire more such properties. The company paid for all these properties with funds drawn on previously existing bank lines of credit.

The company's Charleston apartment communities have now completely recovered from the damage done by Hurricane Hugo, and insurance proceeds have covered the cost of repairs, less a small deductible amount.

WASHINGTON (JAN. 22) PR NEWSWIRE - Stanley C. Pace, chairman of the board and chief executive officer of General Dynamics Corporation (NYSE: GD), has been selected by the National Security Industrial Association (NSIA) to receive the 1989 James Forrestal Memorial Award, the NSIA announced today. He will accept the award and speak at the 36th Forrestal dinner on March 22, 1990, at the Sheraton Washington Hotel, Washington, D.C.

The award commemorates James Forrestal, Secretary of the Navy during World War II and later the first Secretary of Defense, who was instrumental in the establishment of NSIA in 1944. President Dwight D. Eisenhower was the recipient of the first Forrestal award in 1954.

The association's choice of Pace for this year's award emphasizes Forrestal's concept that a continuous and close working relationship between government and industry is essential to the nation's security. This concept was employed with exceptional effectiveness by Pace during his 36 years in the defense industry, where he has been a dynamic champion of the American system and a dedicated proponent of a strong national security. As an outstanding and respected leader of industry, he has effectively contributed his extensive knowledge and management experience to furthering meaningful communication and trust between government and the industry which provides the national security material needs.

Pace came to General Dynamics Corporation as vice chairman in mid- 1985 and since December 1985 has been chairman of the board and chief executive officer.

Founded during World War II, NSIA is a not-for-profit, non-political association of some 435 industrial, research, legal and educational organizations of all types and sites, representing all segments of the defense industry throughout the United States. NSIA's essential purpose is to foster an effective working partnership and good two-way communication between the government and industry in the interest of national security. The association's province is the business and technical aspects of the government-industry relationship encompassing government policy and practice in the entire procurement process, research and development, logistics support, and many other areas.

#90022p0270 01/22/1990 ~PR Newswire

MINNEAPOLIS (JAN. 22) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR), announced today that the National Center for Atmospheric Research (NCAR) will install a CRAY Y-MP8/864 supercomputer system in the second quarter of 1990. The new system will more than double NCAR's computational capacity.

NCAR became Cray Research's second customer in 1977 with the purchase of a CRAY-1 system. It was the first customer to run the Cray Research operating system, COS. The new CRAY Y-MP supercomputer will run UNICOS, which is based on AT&T's UNIX System V operating system, a de facto industry standard.

In 1983, NCAR purchased a second CRAY-1 system. That system was replaced by the current CRAY X-MP/48 supercomputer in 1986.

Computational researchers at NCAR use supercomputers in all areas of NCAR research including climate simulation, ocean simulation, atmospheric chemistry, cloud and storm behavior, and solar effects. These sophisticated environmental simulations are used to construct computer scenarios of past and present and predict the future. Without massive supercomputer capacity, the researchers face the choice of lower resolution models or unreasonably lengthy runs.

Another portion of NCAR's work has focused on modeling the oceans and the interplay between oceanic and atmospheric processes. Last November, NCAR computational research scientist Bob Chervin along with Dr. Albert Semtner Jr., from the Naval Postgraduate School in Monterey, Calif., were presented with a Cray Research Gigaflop Performance Award for their global ocean model. By modifying their program to run in parallel on all eight processors of the CRAY Y-MP system in Cray Research's Mendota Heights, Minn., facility, the researchers were able to achieve a speed of 1.125 billion calculations per second, or 1.125 gigaflops.

With their own CRAY Y-MP system on site, Chervin and other NCAR researchers are looking forward to gigaflop performance as an every day practice. But climate researchers have a seemingly unquenchable thirst for more power.

NCAR, located in Boulder, Colo., is managed by the University Corporation for Atmospheric Research (UCAR), a group of more than 50 institutions with doctoral-level programs in atmospheric and related sciences.

Cray Research Inc. designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

PITTSBURGH (JAN. 22) PR NEWSWIRE - Security Bureau Inc. (SBI), announced today two acquisitions that are expected to generate annual revenues of $6.3 million.

SBI acquired the eastern security officer division of Metropolitan International, a security firm headquartered in Timonium, Md. SBI will take over existing security officer operations in Atlanta; Boston; Baltimore and Silver Spring, Md.; Orlando, Fla.; and Wilmington, Del.

The acquisition represents SBI's first operations in Boston and Orlando, and will complement the company's existing operations in Atlanta, Baltimore, Silver Spring and Wilmington.

Also, SBI has acquired Jayne's Security and Investigation Inc., a security service firm in Pleasanton, Calif. The company has been serving the Bay Area for six years.

Gordon Ellis, SBI's president and chief operating officer, said the California acquisition will be merged with SBI's Wells Security subsidiary in Oakland, Calif.

SBI, a wholly owned subsidiary of Chambers Development Co. Inc. (AMEX: CDVB) of Pittsburgh, provides uniformed guard services, crisis management, security surveys, loss prevention and investigative services.

Chambers is a leading environmental firm, offering services in collection, hauling, disposal, recycling and landfill development.

"Both acquisitions are excellent for SBI because the companies have established an outstanding record of quality service to their customers," said Ellis.

"In the rapidly expanding security business, SBI is making well-planned acquisitions which complement the company. We are proceeding within the

strategy and business plan developed by Chambers toward an optimum mix of the security and solid waste businesses.

"Also, the new companies will continue to enhance our position as a leader in security programs across the country and help differentiate SBI services to meet the ever increasing client demands for high quality security programs."

SPRINGFIELD, IL (JAN. 22) PR NEWSWIRE - Springfield-based Marine Corp. (NASDAQ-NMS: MCOR) today reported the fifth consecutive year of record net income. Assets at Dec. 31, 1989, topped the $1 billion mark for the first time in the company's history.

Net income for the year ended Dec. 31, 1989, was $9,423,000, or $1.55 per share, an increase of 22 percent over the $7,749,000, or $1.29 per share, earned in 1988.

For the fourth quarter ended Dec. 31, 1989, Marine Corp.'s net income rose 25 percent to $2,458,000, or 40 cents per share, from $1,963,000, or 33 cents per share, in the comparable 1988 period.

Willard Bunn III, chairman and chief executive officer, attributed record earnings primarily to an increase in the net interest margin to 4.90 percent from 4.63 percent in 1988. The company's loan portfolio grew to an all-time high of $669,186,000, an annual increase of 17.5 percent and one of the principal factors responsible for the higher net interest margin.

Assets at Dec. 31, 1989, were $1,070,065,000, a 14.5 percent increase over $934,665,000 a year earlier.

Bunn said Marine Corp. is now positioned as the premier bank holding company in central Illinois. "Our consistent pattern of record earnings, robust equity capital to assets ratio of 8.72 percent, and strong reserve for loan losses ratio of 1.38 percent all reflect the strength of our company. We feel confident about the prospects for future growth as we enter the decade of the 1990s."

Directors Vote 30 Percent Dividend Increase

The Marine Corp.'s board of directors voted to increase the regular quarterly dividend 30 percent to 13 cents per share from 10 cents per share. The dividend is payable May 1, 1990, to shareholders of record on

April 16. On an annualized basis, the 13 cents per share dividend reflects a five-year compounded growth rate of 23 percent through the end of 1990.

Marine Corp. is a multibank holding company. It is the parent of Marine Bank of Springfield, Marine Bank of Champaign-Urbana, Marine Bank of Bloomington-Normal, National Bank of Monticello, De Land State Bank and Marine Investment Management Co., an investment advisor.

The company's shares are traded on the NASDAQ National Market System.

DETROIT (JAN. 22) PR NEWSWIRE - FirstFed Michigan Corporation's board of directors has elected C. Gene Harling chairman and chief executive officer of the corporation and chairman of its principal subsidiary, First Federal of Michigan.

Harling will succeed James A. Aliber, who will be 65 on Feb. 2. The appointment becomes effective on April 18, the date of the corporation's annual meeting.

Aliber will continue as a member of the board of directors and its

executive committee, and will serve as a consultant to the corporation. He was elected chairman in 1978 and has been with First Federal for 32 years.

Harling currently serves as president of FirstFed Michigan Corporation and president and chief executive officer of First Federal of Michigan, and will continue to hold those positions in addition to the chairmanships. He has been with the company since 1979, and was elected president of the thrift unit in 1985.

FirstFed Michigan Corporation (NASDAQ-NMS: FFOM) is the holding company of First Federal of Michigan, a Detroit-based savings and loan association with $11.5 billion in assets at the end of 1989. First Federal has 78 offices in the Lower Peninsula of Michigan. Its Bay Savings Bank subsidiary, based in Newport News, Va., operates 14 offices in Virginia and Louisiana, and its Omni Savings Bank subsidiary has five offices in Columbia, S.C.

#90022p0282 01/22/1990 ~PR Newswire

DENVER (JAN. 22) PR NEWSWIRE - First Interstate Bank of Denver, the state's second largest bank, today reported net income of $8 million for 1989, compared to $10.3 million reported for 1988.

For the fourth quarter of 1989 the bank posted a loss of $1 million versus earnings of $2.9 million for the like period of 1988. The loss in the fourth quarter was the result of an increased provision for loan losses and additional reserves for other real estate owned.

Non-performing assets at year-end 1989 totaled $46.5 million versus the $55 million reported at year-end 1988. Non-performing assets are at a seven-year low while loan loss reserves to non-accrual loans are at a high of 101 percent.

Total assets at year-end 1989 were $1.8 billion compared to $2 billion at year-end 1988. Total deposits of $1.2 billion and total loans of $1 billion at year-end 1989 were essentially the same as the like period a year ago.

#90022p0285 01/22/1990 ~PR Newswire

ATLANTA (JAN. 22) PR NEWSWIRE - BellSouth Corp. (NYSE: BLS) today reported net income of $1.74 billion, or $3.64 per share, compared with

net income of $1.67 billion, or $3.51 per share in 1988. Operating revenues in 1989 were $14.0 billion, compared to $13.6 billion in 1988.

Net income for the fourth quarter of 1989 was $469.0 million, up $49.7 million over the comparable quarter in 1988. Fourth-quarter earnings per share were 97 cents, compared to 90 cents in the same quarter in 1988. Fourth-quarter operating revenues totaled $3.6 billion in 1989, up $38.0 million from the fourth quarter of 1988.

"We continue to take steps to strategically position BellSouth for steady growth in shareholder value throughout the 1990s," said John L. Clendenin, BellSouth chairman and chief executive officer.

Clendenin noted that the acquisition of MCCA, completed in April last year significantly increased the company's presence in the fast-growing mobile communications market. "As we expected, our MCCA acquisition diluted earnings in 1989," said Clendenin, "but we continue to be very pleased with the growth and vitality of the cellular markets we serve."

BellSouth anticipated the impact of rate reductions in several states where it provides local telephone service, he said. "But new, incentive-based regulatory plans in Florida, Kentucky and Alabama will help us better respond to an increasingly competitive marketplace and provide opportunities to offer attractive returns to shareholders," added Clendenin.

One-time items favorably impacting 1989 results included $89.0 million in payments associated with the termination of BellSouth's agreement to merge its domestic cellular business with that of LIN Broadcasting. An accounting change by BellSouth's advertising and publishing subsidiary also favorably impacted 1989 net income. Net income was decreased, however, by one-time charges associated with refinancings of long-term debt on more favorable terms at the company's telephone subsidiaries and a fourth-quarter write-down of the value of computer leasing portfolios.

Growth in access lines and usage continued. Revenue increases, in part, stemmed from gains in local telephone service revenues resulting from the addition of 565,000 access lines during 1989. BellSouth now serves 16.9 million access lines.

BellSouth is an international telecommunications holding company.

NEW YORK (JAN. 22) PR NEWSWIRE - Air Canada is offering a special "seat sale" fare of $122 round trip between New York/Newark and Toronto during February and March which reflects a discount of 55 percent off the regular economy fare ($270) between the cities.

The discounted fare is applicable for travel between Feb. 1 and April 1, 1990, with a minimum stay of one Sunday and a maximum stay of 30 days. Non-refundable tickets must be purchased seven days in advance within three days of making reservations.

Air Canada offers eleven daily weekday non-stop flights (reduced schedules on weekends) from LaGuardia/Newark to Toronto.

"Air Canada's special new low fare from New York and Newark, affords the

opportunity to visit Canada's largest city (North America's second-largest theater destination), at the lowest fare ever offered by the airline between the cities," said Jessica G. Morris, general manager, Northeast and Midwest U.S.A., Air Canada, New York.

Air Canada recently announced a winter "seat sale" fare ($103 round trip) between New York/Newark to Montreal for travel Feb. 1 through April 1, 1990.

"Travelers from the New York/Newark metropolitan areas can choose from 20 Air Canada flights every weekday to Toronto/Montreal; more than on any other airline," said Morris.

Additional information and bookings are available through travel agents or by calling Air Canada.

PERTH, WESTERN AUSTRALIA (JAN. 22) PR NEWSWIRE - United States Trust Company of New York, as trustee for the 14-7/8 percent limited subordination debentures due 1998 issued by the Swan Brewery Company Limited of Perth, Western Australia, gave notice late last week in Australia to the Swan Brewery of the acceleration of all principal and other amounts under the debentures. Approximately US $121.5 million principal amount of the debentures are currently outstanding in the United States. U.S. Trust also notified the Swan Brewery that it would be resigning as trustee for the debentures, effective upon the appointment of the successor trustee.

U. S. Trust premised the acceleration notice upon the appointment of receivers and managers for the Swan Brewery in late December 1989. Receivers were appointed by the Supreme Court of Victoria, Australia for the Swan Brewery and its parent corporation, Bond Brewing Holdings Limited of Perth, Western Australia, upon ex parte application of a syndicate of banks led by National Australia Bank Limited.

The Swan Brewery and Bond Brewing have vigorously opposed the action of the bank syndicate in having receivers and managers appointed. Court proceedings are continuing in the Victoria Supreme Court, in which The Swan Brewery and Bond Brewing are seeking to have the appointment of the receivers and managers rescinded.

Bond Brewing Holdings Limited and its subsidiary, the Swan Brewery Company Limited, are both subsidiaries of Bond Corporation Holding Limited, the Australian conglomerate controlled by Australian entrepreneur Alan Bond.

MADISON HEIGHTS, MI (JAN. 22) PR NEWSWIRE - Rand Mueller, president of Code-Alarm, Inc. (NASDAQ: CODL) announced today the purchase of the assets and business operations of Chapman Products Inc., a subsidiary of ICM Industries, Inc. of Chicago.

Chapman, in particular, enjoys outstanding consumer acceptance in the security-sensitive cities of New York, Boston, Newark, N.J., Miami, Chicago, Hartford, Conn., Providence, R.I., Cleveland and in Puerto Rico. In total, these localities account for nearly 35 percent of automotive security sales. Market penetration for the combined Code- Alarm/Chapman security lines in these key areas is expected to improve significantly, after dealer pipelines are filled.

The purchase of Chapman, a pioneer and leader in the field of automotive security, included the company's machinery, inventory, patents, name and accounts. A new corporate identity, Chapman Security Systems, Inc., has been established, with William T. Duffy named president of the reorganized company. Duffy has wide experience in automotive security as well as the automobile business itself.

Rand Mueller stated, "Distinctive, new automotive security products are being designed for the Chapman line to incorporate the latest electronic advances in auto alarms and security systems." Established products will continue to emphasize ruggedness and mechanical dependability, the hallmark of Chapman products since 1967.

Code-Alarm is the country's leading manufacturer of vehicle alarms and security systems. In addition to Code-Alarm, Mirage and Scorpion security products, the company manufactures private label systems for General Motors, Ford and Chrysler. In January, the company introduced its new, monitored Home Security System 2001, which operates on the same hand-held transmitter as Code-Alarm's vehicle security systems.

CINCINNATI (JAN. 22) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) today reported net income of $174.1 million for 1989 compared with $103.4 million in 1988. Earnings per share increased to $2.48 in 1989 from $1.46 in 1988. Net income for 1989 included a first quarter pre-tax gain of $74.7 million ($.97 per share after tax) from the sale of the Company's Spanish wire and cable manufacturing operations and the wind-up of other foreign wire and cable investments. Net revenues for the year increased to $1,725.0 million from $1,546.5 million in 1988.

For the 1989 fourth quarter, net income was $25.3 million, or $.37 per share, compared with $19.3 million, or $.27 per share, for the fourth quarter of 1988. Net revenues of $468.8 million for the 1989 fourth quarter were virtually unchanged as compared with $468.6 million for the 1988 fourth quarter.

Penn Central's net income is computed after a deduction in lieu of current Federal income tax, because income that would otherwise be taxable is offset by pre-reorganization loss carryforwards. This deduction is not accruable or payable. The Company's 1989 income before this deduction was $232.4 million, or $3.31 per share.

Penn Central ended the year with shareholders' equity of $1.8 billion, or $27.84 per share.

Penn Central operates businesses primarily in the areas of industrial manufacturing, defense services and insurance.

DENVER (JAN. 22) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) announced today that its board of directors authorized certain amendments to its shareholder rights plan, including an amendment to lower the threshold at which the plan is activated. Previously, the rights issued under the plan would have become exercisable whenever an individual or group purchased 20 percent or more of the company's common stock. With the board's action, the rights will become exercisable with a purchase of 10 percent of the common shares. At that point all holders of rights, other than the person crossing the 10 percent threshold, would have the right to buy approximately $93 of Cyprus common stock at a 50 percent discount for each right held. The amendments take effect immediately.

Kenneth J. Barr, president and chief executive officer, said, "At today's meeting the board of directors reiterated its view that Cyprus has a bright future and that it is in the best long-term interests of the company, its shareholders, and its other constituencies, that Cyprus remains an independent company."

Cyprus Minerals, a major producer of copper, molybdenum, lithium, talc, and coal, adopted its original shareholder rights plan in 1986.

ATLANTA (JAN. 22) PR NEWSWIRE - Rollins Inc. (NYSE: ROL), nationwide consumer service company, reported for the fourth quarter ended Dec. 31, 1989, revenues increased seven percent to $92,003,000, net income increased 18 percent to $3,804,000. Earnings per share increased 14 percent to 16 cents compared to 14 cents.

For the year ended Dec. 31, 1989, revenues were $402,324,000, an increase of six percent and net income was $23,532,000, a decrease of five percent. Earnings per share were $1.00 compared to $1.05 the prior year. The annual results did not compare favorably to last year because of abnormal factors

that occurred during the important second quarter of the year.

Orkin's revenues, including lawn care services, increased eight percent for the fourth quarter and six percent for the year. Operating income increased one percent for the fourth quarter and decreased eight percent for the year.

Although Orkin's termite service business earlier in the year was adversely affected by weather conditions, this business subsequently performed near plan. The pest control business segment continued throughout the year to achieve expected increased revenues and operating profits.

The operating results for Orkin's lawn care business were significantly short of plan. As previously reported, industry-wide and for Orkin, the adverse spring weather also affected lawn care results. This, along with the added overhead costs due to the 1989 and 1988 expansion, negatively impacted this business segment and the combined Orkin Division.

Rollin's Protective's revenues increased six percent for the year and four percent for the fourth quarter. Operating income increased 14 percent and 18 percent, respectively. During the year the Chicago market was opened, the new computer system for monitoring customer's systems was installed and the new System VI, wireless security system was developed which will be marketed this year.

Gary W. Rollins, company president and chief operating officer, said: "During 1989 we addressed adverse external factors while continuing to implement some important programs to meet our planned future objectives. We are positive about the company and each of its businesses, and are optimistic about our ability to take advantage of future opportunities."

Rollins owns and operates the world's largest termite and pest control company which also provides lawn care services, and Rollins Protective Services, one of the leaders and pioneers in residential security.

NEW YORK (JAN. 22) PR NEWSWIRE - James B. Patterson has been appointed chairman and Ronald S. Burns, chief executive officer of JWT North America Burt Manning, chairman and CEO of the J. Walter Thompson Company announced today.

"Today's announcement reflects the significant opportunities that lie ahead for both the U.S. and Canada as we implement the Free Trade Agreement of 1989," said Manning. "This move, similar to the European management structure we implemented last year, creates a new JWT North America management that will oversee JWT/USA and JWT Canada."

Patterson, 42, moves to his new post from his current position as chief executive officer of JWT/USA. He will be responsible for the overall quality of the creative product and for assuring that the highest professional standards are met in the important disciplines of media, strategic planning and account management.

Burns, 45, is currently chairman of JWT Canada and director in charge of the Goodyear and Kraft/General Foods accounts worldwide, positions he continues to hold. His appointment as chief executive officer of JWT North America includes responsibilities for client relations, financial and operational activities of both countries. He will be based in New York.

The creator of many award-winning campaigns, Patterson joined J. Walter Thompson in 1971 as a copywriter. In 1984 he became executive creative

director of JWT/New York and in 1986 a director of the J. Walter Thompson Company. He has written six novels, one of which won the prestigious Edgar Award.

A native of Canada, Burns has served JWT for 20 years in London, New York, and in senior positions in Melbourne and Toronto. Prior to moving back to New York last fall, he had been president and chief executive officer of JWT Canada.

J. Walter Thompson is a $4 billion multinational agency with 165 offices in 37 countries.

#90022p0326 01/22/1990 ~PR Newswire

NEW YORK (JAN. 22) PR NEWSWIRE - North Side Savings Bank (NASDAQ: NSBK) today reported net income for the quarter ended Dec. 31, 1989, of $1,847,000, or 46 cents per share, compared to $1,351,000, or 33 cents per share, in the comparable period of 1988.

Net interest income increased $496,000 from $8,564,000 for the three months ended Dec. 31, 1988, to $9,060,000 for the three months ended Dec. 31, 1989. The provision for loan losses increased $200,000 for the same respective period to $500,000 at Dec. 31, 1989. Other expenses increased from $5.1 million to $5.8 million at Dec. 31, 1989, primarily due to increases in compensation and benefit expenses and occupancy and equipment expenses. The increases in income and expenses in the first quarter ended Dec. 31, 1989, over the prior year quarter are generally attributable to the fact that the Dec. 31, 1988, amounts include the results of operations of Richmond Hill Savings Bank only for the two-month period from Oct. 31, 1988, the date of the merger, to Dec. 31, 1988, while the results for the quarter ended Dec. 31, 1989, reflect combined operations for the entire quarter.

Total bank assets and liabilities increased $15.8 million during the three months ended Dec. 31, 1989, mainly due to an increase in deposits of $15 million. Money market investments, investment securities and mortgage-backed securities increased $27.8 million, $18.4 million and $18.7 million, respectively, while total loans decreased $30.7 million as payments and satisfactions of loans exceeded loan originations. The allowance for loan losses increased $1 million during the quarter, primarily as a result of the $.5 million current provision and a $.7 million recovery of amounts previously written-off. Non-performing and restructured loans increased from $28.3 million at Sept. 30, 1989, to $35.7 million at Dec. 31, 1989. North Side continues to be a financially strong institution and its ratio of shareholders' equity to total assets

was 7.45 percent at Dec. 31, 1989.

At the regular meeting of the board of directors held today, the board declared a $.10 per share quarterly cash dividend payable on March 7 to shareholders of record on Feb. 21.

#90022p0330 01/22/1990 ~PR Newswire

CHICAGO (JAN. 22) PR NEWSWIRE - First Colonial Bankshares Corp. (NASDAQ: FCOL) today announced record net income for 1989 of $11.8 million, a 10 percent increase over 1988. Earnings per share were $1.33 compared to $1.26. For the fourth quarter, net income was 5 percent above a year ago and earnings per share remained the same at $.39.

C. Paul Johnson, chairman and chief executive officer, stated, "The results are especially encouraging in light of substantial expenses associated with geographic expansion and some difficulties in the company's mortgage banking operation. The agreement we signed at the end of the year to transfer the servicing function of our mortgage banking portfolio to an outside servicer will positively impact earnings approximately $.07 per share while still retaining the valuable underlying asset."

The company's expansion efforts, including new banking offices opened within the last 18 months in Vernon Hills, Ill., Glendale Heights, Ill., and Naperville, Ill., and an agreement to purchase banks in Downers Grove, Ill., and Burbank, Ill., are a major reason for the 18 percent increase in noninterest expense over 1988. The earnings impact of the expansion and mortgage banking operation was cushioned by a $1.6- million after-tax gain from freezing the company's pension plan.

Johnson said, "We are especially pleased to see deposit growth of 12 percent and loan growth of 7 percent for the year, when competition for banking business has been at its strongest."

The $1.250-billion asset First Colonial Bankshares Corp. owns 11 banks with 16 locations throughout Chicago and its surrounding suburbs and has contracted to purchase two additional banks, and is parent company to several non-bank subsidiaries including First Colonial Mortgage Corp., Mid-States Financial Corp., a commercial leasing firm, and First Colonial Trust Co.

NEW YORK (JAN. 22) PR NEWSWIRE - Andrews Group Incorporated common stock will continue to be included for quotation in the National Association of Securities Dealers Automated Quotations System (NASDAQ) via an exception from the capital and surplus requirement.

While Andrews Group failed to meet the capital and surplus requirement as of Sept. 30, 1989, the NASD has granted a temporary exception from this standard pending completion of the merger of Andrews Group and a wholly owned subsidiary of MacAndrews and Forbes Holdings, Inc., which presently owns 57 percent of the outstanding Andrews Group common stock. If at some future date Andrews Group common stock should cease to be quoted on the NASDAQ System, it should continue to be quoted in the over-the-counter market. For the duration of the exception, the Andrews Group common stock NASDAQ symbol will be AGRPC.

DETROIT (JAN. 22) PR NEWSWIRE - Walter J. McCarthy Jr., Detroit Edison Company (NYSE: DTE) chairman and chief executive officer, announced the election today by the company's board of directors of Willard R. Holland, senior vice president, Power Supply, as senior vice president, Energy Marketing and Distribution, succeeding Burkhard H. Schneider, who retires

Feb. 1.

Frank E. Agosti, vice president, Power Generation, was elected senior vice president, Power Supply, replacing Holland. Robert V. Nicolson, was elected vice president, Fuel Supply.

Holland, 53, joined Detroit Edison in 1966 and progressed through various management assignments in the company's Division Organization, Production and Nuclear Operations areas. He was elected a vice president in 1982; vice president, Power System and Services, in 1986; vice president, Operations, in 1987; and senior vice president in 1988. Holland is a trustee of the Michigan Energy and Resource Research Association and a member of the executive board of the East Central Area Reliability Council. In addition, he is a governor of Cranbrook Institute of Science, and a trustee of the Young Men's Christian Association of Metropolitan Detroit and Metropolitan Affairs Corporation of Detroit and Southeastern Michigan. Holland and his wife, Jean, live in Birmingham and have two children.

Agosti, 53, joined Detroit Edison in 1957 and has held positions of increasing responsibility in the company's power plants and production organization. He was elected vice president, Nuclear Operations, in 1986; vice president, Nuclear Engineering and Services, in 1987; and vice president, Power Generation, in 1988. Agosti is a member of various professional and community organizations, including the American Society of Professional Engineers, Engineering Society of Detroit and President's Council of the Michigan Technological Institute. He and his wife, Leslee, live on Grosse Ile and have four children.

Nicolson, 63, joined the company in 1950. He has held a variety of positions since then, including assistant director, Engineering Research Department, in 1968; general superintendent, Electrical System, in 1971; manager, Electrical System and Interconnection Operations, in 1978; and in 1983, Nicolson was elected assistant vice president and manager - Fuel Supply. He is a registered professional engineer and a member of the Engineering Society of Detroit. Nicolson and his wife, Fran, live in Birmingham and have four children.

#90022p0338 01/22/1990 ~PR Newswire

VIENNA, AUSTRIA (JAN. 22) PR NEWSWIRE - The following news release was issued earlier today (Jan. 22) in Vienna:

Chrysler Corporation, Steyr-Daimler-Puch Fahrzeugtechnik (SFT) of Graz,

Austria and the Austrian authorities today signed a preliminary agreement to confirm the building of the popular Chrysler minivans at Graz for the European market.

The preliminary agreement was signed after a meeting here that included Austrian Chancellor Dr. Franz Vranitzky, Chrysler Corporation Chairman Lee A. Iacocca, Chrysler Vice Chairman Gerald Greenwald, Steyr- Daimler-Puch AG Chairman Otto Voisard and representatives of the Austrian government.

Iacocca said the agreement was one where SFT would engineer popular European components and features for application to the minivan and then build minivans for Chrysler in Europe beginning in the spring of 1991 in a joint venture to be formed.

Chrysler currently exports the Voyager minivan from North America, where it is marketed as the most successful vehicle in the North American minivan market segment with Chrysler sales of more than 500,000 units a year. The appeal of the Voyager is growing beyond the production capability of Chrysler's North American plants. The technical capability and the quality of workmanship are important factors in Chrysler's selection of Austria and Steyr-Daimler-Puch Fahrzeugtechnik as the third source in the world for this vehicle with such popular world-wide appeal.

The details of the final agreement will be announced within the next two months.

Iacocca said this program will be the third major step in Chrysler's highly successful return to the European market after an absence of a decade.

In the first step, the company began shipping built-up Chrysler and Jeep vehicles to Europe two years ago, and shipments reached 50,000 units last year.

The second step was the founding of ARCAD, a Chrysler/Renault joint-venture company, which will begin building small sport utility vehicles in Europe in 1992.

EPSOM, ENGLAND (JAN. 22) PR NEWSWIRE - LEP Group plc ("LEP") (NASDAQ/NMS: LEPGY) has made a major expansion move in Germany by acquiring the whole of the issued share capital and interests (other than certain freehold property) of the Wohlfarth Group ("Wohlfarth").

Wohlfarth, established by Herr Paul Wohlfarth 45 years ago, is today one of the leading companies in the German transport and distribution market. It operates from 33 strategic locations, the major locations being Wuppertal, Lundenscheid, Hannover, Villingen-Schwenningen, Ludwigshafen, Geislingen, Rheinau-Freistett, Mannheim, Hamburg, Dortmund, Delmenhorst and Cologne. In addition to its road-based operations Wohlfarth operates road/rail facilities at railheads in Frankfurt, Cologne, Barcelona, Milan and Paris. Wohlfarth will be remaining with the company to manage its integration within LEP's existing distribution network.

Wohlfarth operates nearly 1,000 vehicles and employs over 1,500 people. In the year ended Dec. 31, 1988, Wohlfarth's turnover was DM 264 million (94.6 million pounds sterling) with profits after tax of DM 5.5 million (1.9 million pounds). At Dec. 31, 1989, the net assets being acquired by LEP were approximately DM 13.8 million (4.9 million pounds).

LEP is paying DM 25 million (9.0 million pounds) in cash, no goodwill is expected to arise on acquisition as the net assets will be stated at market value as at the date of acquisition.

The acquisition is a significant step towards the substantial expansion of LEP-Swift and follows the acquisition and subsequent development of successful businesses in Belgium and The Netherlands. As with Swift Transport Services in the United Kingdom, LEP-Swift concentrates on specialist industrial distribution and recent acquisitions mean that LEP-Swift now provides specialized logistic transport services in the major Northern European manufacturing countries under the control of an integrated management team using common systems and methodology.

LEP Group already has a major freight forwarding subsidiary, Lassen Transport, based in Hamburg and operating throughout Germany. Lassen is operating successfully and at present employs 1,100 people at 26 locations. The acquisition of Wohlfarth is a very significant strengthening of LEP's already major presence in Germany.

LEP ordinary shares trade in the form of ADRs on the NASDAQ National Market System.

ZEELAND, MI (JAN. 22) PR NEWSWIRE - Herman Miller, Inc. (NASDAQ: MLHR) announced today that it has signed a letter of intent to purchase Meridian Inc., a closely held manufacturer of metal casegoods located in Spring Lake, Mich.

The acquisition will be accomplished through the exchange of 1.25 million shares of Herman Miller common stock for all of the outstanding stock of Meridian. The transaction may be terminated if the average closing price of Herman Miller common stock for the 30 days immediately prior to closing is less than $20 per share or more than $30 per share.

James H. Bloem, vice president and chief financial officer, commented that the 1.25 million shares to be issued would represent approximately 4.9 percent of Herman Miller's common stock after acquisition. Bloem further stated that it is expected that the transaction would be accounted for as a pooling of interest and would neither materially enhance nor dilute Herman Miller's earnings per share for the fiscal year ending June 2, 1990. The transaction is expected to be completed prior to May 23, 1990. Meridian's net sales for the fiscal year ended June 3, 1989, and the six months ended Dec. 2, 1989, were $36.7 million and $21.9 million, respectively.

No changes in the management or work force of either Meridian or Herman Miller are contemplated. Completion of the transaction is subject to negotiation of a definitive agreement. It also is subject to the provision of the Hart, Scott, Rodino Antitrust Improvement Act.

As one of Herman Miller's marketing alliances, Meridian products have been available through Office Pavilion(R) dealerships for over two years.

"We have been impressed with Meridian's product quality and have found our alliance relationship to be mutually beneficial," Richard H. Ruch, Herman Miller's chief executive officer, said. "It has been our goal to continue to broaden our product lines to satisfy the diverse needs of our customers. The addition of Meridian as a Herman Miller subsidiary gives Herman Miller a full product capability in metal casegoods."

Michael Volkema, Meridian president, commented, "Meridian has enjoyed a strong working relationship with Herman Miller for over two years through the marketing alliance. The product lines of each company complement each other and provide a comprehensive product package for the office environment. We at Meridian are excited about becoming a Herman Miller company."

Meridian, Inc., a Michigan corporation founded in 1970, has 410 employees and over 280,000 square feet of manufacturing and office space in Spring Lake. The firm manufactures lateral and vertical files, freestanding desks, and storage cases. The metal casegoods market segment represents 15 percent of the estimated $8 billion U.S. contract office furniture business.

Meridian product representation is located in Atlanta, Boston, Chicago,

Dallas, Denver, Detroit, Houston, Kansas City, Miami, Minneapolis/St. Paul New York, Philadelphia, St. Louis, San Francisco, Seattle and Washington, D.C.

Herman Miller, Inc. is an international firm engaged primarily in the manufacture and sale of furniture systems, products and services principally for offices and, to a lesser extent, for health-care facilities and other uses. The company is based in Zeeland.

CAMBRIDGE, MA (JAN. 22) PR NEWSWIRE - Jim Vincent, Biogen (NASDAQ: BGEN) chairman and chief executive officer, announced today the appointment of David W. Dennen, Ph.D., to the newly created position of vice president of operations. In this capicity Dr. Dennen will have overall responsibility for manufacturing, process development, and bioprocess engineering for the company.

Dennen joins Biogen from Eli Lilly & Company (NYSE: LLY) where he had served for 35 years in various research and manufacturing capacities in the United States and Europe. In his most recent position, Dennen was vice president, Lilly Research Laboratories and directed Lilly's efforts in biochemical and process development for mammalian cell, recombinant and bacterial products, chemical synthetic products and other related areas.

Vincent commented, "The appointment of a person with Dr. Dennen's talent and experience underscores Biogen's commitment to structuring a management team capable of both building and running an integrated biopharmaceutical company."

Dennen received his B.S. in quantitative biology from MIT in 1954, his M.S. in biochemistry from Indiana University in 1964, and his Ph.D. in microbiology from Indiana University in 1966.

Biogen is a leading biotechnology company principally engaged in developing genetically engineered pharaceuticals. As a result of its early research, Biogen new derives revenues from five products being sold by its licensees in various countries. Biogen currently directs its research and development into areas where the company has particular strength - AIDS, inflammation and selected cancers.

SAN JOSE, CA (JAN. 22) PR NEWSWIRE - International Microelectronic Products Inc. (NASDAQ: IMPX) announced today that revenues for its third fiscal quarter ended Dec. 24, 1989, were a record $18.5 million, an increase of 49 percent compared to the like quarter last year.

The company reported net income of $1.3 million or 5 cents per share for the third fiscal quarter, a significant increase over the $205,000 or 1 cent per share net income reported in the comparable quarter last year.

Compared with the preceding quarter ended Sept. 24, 1989, net revenues increased 8 percent from $17.1 million, while net income was more than five-times greater than the second quarter's $236,000.

Barry Carrington, president and chief executive officer, said, "Our record revenues are the result of good customer demand for several new products that we can now produce in volume.

The earnings increase is coming from factory efficiency improvement associated with higher volume and recent major increases in capacity. We are pleased to have obtained these positive financial results.

They are a direct outcome of our investments in new product development and manufacturing expansion."

IMP designs and manufactures application-specific integrated circuits (ASICs), which represent one of the fastest growing product segments for the semiconductor industry.

The company uses its proprietary cell-based design methods and CMOS process technologies to supply value-added mixed analog and digital and complex digital chips to customers, primarily in the computer peripheral, computer and communications markets. IMP stock is traded over the counter under the symbol IMPX.

MINNEAPOLIS (JAN. 22) PR NEWSWIRE - Medtronic Inc. (NYSE: MDT), and Surgical Laser Technologies Inc. (NASDAQ: SLTI) announced today the introduction to European markets of an advanced laser-powered catheter for vaporizing plaque in blocked blood vessels of the peripheral vascular system.

Developed by a partnership of the two companies, the Tactilaze(TM) Peripheral Angioplasty Laser Catheter incorporates a laser-conducting fiber and unique synthetic sapphire tip designed to enable the physician to precisely control and concentrate high-density, high-power laser energy to vaporize plaque with comparatively little damage to surrounding tissue.

Tactilaze catheter features include the photo-ablative, rapid-cooling contact tip which can be brought into contact with the plaque to optimize positioning and control.

Peripheral vascular disease is a leading cause of disability, and sometimes amputation, of lower limbs. Peripheral angioplasty is a less-expensive alternative to surgical bypass procedures. The angioplasty patient's hospitalization and recovery period is much shorter.

Peripheral laser angioplasty involves insertion of the catheter into the body's arterial system at the thigh and maneuvering it to a point in the vascular system where plaque is obstructing or restricting blood flow. Monitoring the catheter's progress by fluoroscopy, the physician positions the catheter tip at the blockage, then activates a laser power system outside the body. A high-density laser beam is transmitted through the catheter shaft and focused by the tip to vaporize the obstruction.

The Tactilaze catheter is supported by the Surgical Laser Technologies (SLT) Nd:YAG Contact Laser System(TM), a versatile, portable, and cost-efficient unit for multi-specialty application. In addition to the angioplasty catheter, it supports a variety of scalpels and probes used in gynecology, otolaryngology, ophthalmology, orthopedics, urology and most surgical specialties.

The Tactilaze catheter will be distributed by the Medtronic sales force in France and by the SLT distributor network in other European countries.

Clinical evaluations, which have included several hundred angioplasties in Europe, also are under way in the United States.

The Medtronic/SLT partnership began in 1987, as a part of Medtronic's strategy to become a broad-line supplier of devices for improvement of cardiovascular and neurological health. The companies are also jointly developing laser products for use in coronary arteries.

Surgical Laser Technologies, formed in 1983, is a developer and manufacturer of medical devices applying laser technologies. Headquartered in Malvern, Penn., it has manufacturing facilities in the greater Cincinnati area.

#90022p0365 01/22/1990 ~PR Newswire

CHICAGO (JAN. 22) PR NEWSWIRE - Amoco Corporation (NYSE: AN) today reported estimated consolidated earnings of $319 million for the fourth quarter of 1989. This compares with $375 million reported in the fourth quarter of 1988.

Quarterly earnings on a per-share basis were $.62 compared with $.72 earned in the fourth quarter of 1988. Revenues for the fourth quarter of 1989 were $6.8 billion compared with $6.2 billion reported in 1988.

In commenting on comparative results, Richard M. Morrow, chairman and chief executive officer, pointed out that fourth quarter 1988 earnings were favorably impacted by nonoperating factors, primarily gains from natural gas settlements which more than offset losses from property dispositions and abandonments. He indicated that after recognition of such special factors, current quarter earnings are approximately the same as operating earnings for the 1988 fourth quarter.

Morrow explained that current quarter earnings benefited from higher crude oil prices which averaged over $5 per barrel higher than in the fourth quarter of 1988. However, this improvement was offset by lower earnings from both refining, marketing and transportation activities and chemical operations, primarily as the result of lower margins.

Full-year earnings amounted to $1,610 million in 1989, 22 percent lower than the $2,063 million reported in 1988. Earnings in 1989 were adversely affected by restructuring costs and provisions for estimated costs of environmental programs.

In contrast, 1988 earnings included net favorable items, primarily representing natural gas settlements. Excluding these items, earnings from operations for full-year 1989 were essentially the same as in 1988.

On a per-share basis, earnings for 1989 amounted to $3.12 versus $4 per share for 1988. Revenues for 1989 totaled $26.8 billion, compared with $23.9 billion for 1988.

Return on average shareholders' equity for 1989 was 11.9 percent, compared with 16.2 percent in 1988. Return on average capital employed was 10.1 percent in 1989 and 13.5 percent in 1988.

Worldwide capital and exploration expenditures amounted to $3.3 billion in 1989 compared with $4.5 billion spent during 1988. Included in 1988 spending was $900 million for the purchase of certain oil and gas properties from Tenneco. Amoco recently announced a capital and exploration expenditure budget of $3.95 billion for 1990.

LOS ANGELES (JAN. 22) PR NEWSWIRE - Teradata Corp. (NASDAQ: TDAT) a manufacturer of high performance relational database computer systems, today announced revenues and earnings for the three and six month periods ended Dec. 31, 1989.

Teradata's revenues for the second fiscal quarter were $54,607,000, a 59 percent increase over the $34,452,000 reported in the same period a year earlier. Income before extraordinary item for the second quarter rose 77 percent to $4,507,000, or $.31 per share, from the $2,546,000, or $.18 per share, in the second quarter of fiscal 1989.

Revenues for the six months ended Dec. 31, 1989 were $97,586,000, a 63 percent increase over the $59,946,000 reported in the same period a year earlier. Income before extraordinary item for the six month period rose 70 percent to $6,460,000, or $.45 per share, from the $3,790,000, or $.27 per share reported in the first half of fiscal 1989.

Teradata sold 831 processors in 33 transactions during the second fiscal quarter. Twelve of these transactions, comprising 112 processors, were expansions or upgrades of previously installed systems, and 21 were new systems.

Los Angeles-based Teradata -- ranked in 1989 by Inc. Magazine as the fastest-growing small public company in America over the last five years -- is the leading database computer supplier for the large systems market. Teradata designs, manufactures and markets high performance systems and related products and services for relational database management.

#90022p0371 01/22/1990 ~PR Newswire

HOLLAND, MI (JAN. 22) PR NEWSWIRE - Donnelly Corporation (AMEX: DON) today announced financial results for the second quarter of the 1990 fiscal year. Net sales for the second quarter were $50,952,000, which represents an increase of 4.6 percent over $48,728,000 for the same period last year.

Net income for the second quarter was $610,000 compared to $1,283,000 for the second quarter of fiscal 1989. This represents earnings per share for the second quarter of this fiscal year of $.11.

Sales for the first half of the 1990 fiscal year were $95,682,000, up 6.8 percent compared to $89,626,000 for the first half of fiscal 1989. However due to losses incurred during the first quarter of the 1990 fiscal year, the first half resulted in a net loss for the company of $(737,000) or $(.13) per share.

Both sales and earnings are being negatively affected by a number of factors. 1) Donnelly is experiencing a downturn in both of its major markets at the same time (automotive and coated products). 2) The company incurred planned major start-up costs to support new business in its exterior mirror operations during the first quarter. 3) The decrease in the overall market along with increased capacity has resulted in lower prices for display coated glass.

Earnings are being positively affected by managerial actions taken to reduce or delay costs at all levels of the organization. A Profitability Improvement Program was instituted in September of 1989 and will result in reducing the annual rate of overhead spending by over $6 million from planned levels.

As reported earlier, the company is experiencing softness in each of its major markets. U.S. automobile production was down seven percent during Donnelly's first quarter, compared with the same period in 1988.

Production of U.S.-built cars continued to decrease during Donnelly's second-quarter, down 16 percent compared to the same period last year, resulting in a total decrease of U.S. auto production of 12 percent for the first half of this fiscal year. Although a downturn in this market was anticipated, it has been sharper than expected.

The sharp market downturn for consumer products using display coated glass (which began during the summer of 1989) is continuing. The products affected tend to be lower priced electronic products which use liquid crystal displays (such as watches, games and calculators). Donnelly is a major manufacturer of glass coatings for the conductively coated glass used in these displays.

NORMAL, IL (JAN. 22) PR NEWSWIRE - In a white glove ribbon- cutting ceremony, Diamond-Star Motors, located here, today celebrated production of its 100,000th automobile. The milestone vehicle, which rolled off the production line at approximately 2:50 p.m., is an Eagle Talon TSi AWD with a two-liter, turbo charged engine, pewter mist metallic exterior and Malibu cloth dark quartz interior.

The ribbon cutting was done simultaneously by Diamond-Star Motors' (DSM) Yoichi Nakane, president and chief executive officer; Donald Schoene, executive vice president-finance and treasurer; Masayuki Tanji, general manager-manufacturing; as well as one representative of each DSM department, including finance, human resources and administration, manufacturing, procurement, production control and systems, production engineering, quality control, and the UAW.

In his comments to those attending the ceremony, Nakane praised Diamond-Star employees. "We celebrate not only the 100,000th automobile, but also the teamwork that has made this occasion possible," he said. "This car represents the spirit of each of our 2,900 employees. Today, all of Diamond-Star is proud."

Diamond-Star Motors first began commercial production of its automobiles on Sept. 1, 1988. The plant manufactures the Plymouth Laser, Mitsubishi Eclipse and Eagle Talon. Diamond-Star Motors is a 50/50 joint venture of the Chrysler Corp. and Mitsubishi Motors Corp.

NORWALK, CT (JAN. 22) PR NEWSWIRE - Great Northern Nekoosa Corp. (NYSE: GNN) said today that the legal brief filed on Friday by Georgia-Pacific Corp. (NYSE: GP) in opposition to the attorney general of the state of Maine is "just more of what we and the people of the state of Maine have come to expect from Georgia-Pacific."

William R. Laidig, chairman of Great Northern Nekoosa, stated, "Last month Great Northern Nekoosa released to the public a long history of internal documents outlining our plans for the future in the state of Maine.

"We believe that anyone who matches these documents up against Georgia-Pacific's latest litigation outburst will plainly see that Georgia-Pacific's story simply does not hold water. The attorney general did not buy it and we do not think the people of the state of Maine will buy it."

Laidig said that Georgia-Pacific's attack was "clearly an effort to divert attention from Georgia-Pacific's serious credibility problems with respect to their documented intentions as to asset divestitures should their takeover effort succeed. No matter how many litigation papers they file, their contemporaneous documents seem to tell a different story.

"In contrast, Great Northern Nekoosa's historical documents demonstrate our plans for future investment in Maine. While Georgia-Pacific was disparaging Maine and promising to sell the Maine operations, Great Northern Nekoosa was and is pursuing a long-term strategy to continue its development, investment, and substantial commitment to the state of Maine."

ROSEMEAD, CA (JAN. 22) PR NEWSWIRE - In keeping with its pledge to extend and expand business with firms owned by minorities and women, Southern California Edison has increased significantly its credit lines and deposit program with minority-owned banks, the electric utility announced today.

"This is another step forward for Edison's new Comprehensive Equal Opportunity Pledge, developed in conjunction with a broad coalition of major consumer, business, minority, disabled, and women's organizations," said Edison Chairman Howard Allen. "Edison's credit line commitment with minority banks is the largest of any utility in California," Allen said.

He said that Edison has increased minority-owned bank lines of credit from $5 million to $27 million, and has increased the number of minority banks with which it does business from 12 to 23. Of these 23 banks, 13 are owned by Asians, six by Hispanics, three by Blacks, and one is owned by women.

The company has taken a direct role in doing business with each bank, replacing the practice of an agent bank soliciting minority business on Edison's behalf. All of the financial institutions involved are located in Southern California.

Any minority-owned firm interested in doing business with Southern California Edison should contact Edison's Office of Women and Minority Business Development at 818-302-5389.

CONTACT: Bob Goodlow of Southern California Edison, (818) 302-2255.

PLYMOUTH, NC (JAN. 22) PR NEWSWIRE - Ground was broken here today by officials of Pfizer Inc. (NYSE: PFE) and Weyerhaeuser Paper Co. (NYSE: WY) for an onsite facility to manufacture precipitated calcium carbonate (PCC) a specialty pigment used in the alkaline papermaking process.

In his invitation to local dignitaries who assemble for the groundbreaking, Paul J. Schmitt, vice president and mill manager, said the ceremony "marked the beginning of a new era in papermaking at our Plymouth Mill."

The satellite unit, to be built, owned, and operated by Pfizer, is expected to be "on stream" delivering product by Aug. 1. Known as Albacar(R), the high-brightness and high-opacity pigment is used as a filler in premium coated and uncoated fine papers. It will be piped directly from the Pfizer plant to the adjoining Plymouth Mill in slurry form, thereby reducing shipping and production costs.

Robert Pombrio, vice president of operations for Pfizer's Specialty Minerals Group, was joined by Mayor William Flowers, City Manager Robert Gandy, Paul Schmitt and W.H. Collins, fine paper production manager, and Pfizer plant Manager John J. Nicholls at the groundbreaking ceremony.

The Plymouth Mill will be the third Weyerhaeuser facility to be supplied routinely by Pfizer, Pombrio pointed out. A similar PCC unit was dedicated last May at Longview, Wash., and the mill in Rothschild, Wis. - Weyerhaeuser's first to convert to alkaline - is supplied from a Pfizer satellite in Wisconsin Rapids.

Key economic and environmental benefits are driving the paper industry's switch to the alkaline technology in the United States and foreign markets Pombrio said.

Unlike the classic acid-based process, alkaline papermaking permits the substitution of PCC for wood fiber, decreases the level of titanium dioxide and other chemicals, is less corrosive and generates less effluent. "And of course," he continued, "alkaline produces a brighter sheet with improved opacity whose shelf life will endure through the ages."

With the addition of Plymouth, Pfizer has 14 PCC satellites now, operating or under construction in the United States and Canada, according to Paul R. Saueracker, vice president-sales and marketing.

Similar satellites are operating at Consolidate Paper in Wisconsin Rapids; International Paper, Ticonderoga, N.Y.; the Northwest Paper division of

Potlach Corp., Cloquet, Minn.; Mead Paper, Chillicothe, Ohio; IP/Hammermill Paper Co. in Erie and Lock Haven, Pa., and Selma, Ala.; International Paper in Mobile, Ala., and Canadian Pacific Forest Products, Dryden, Ontario, Canada. A Pfizer-built PCC unit also is operating in Japan.

#90022p0381 01/22/1990 ~PR Newswire

MILPITAS, CA (JAN. 22) PR NEWSWIRE - Zitel Corp. (NASDAQ: ZITL) today announced net sales of $7,845,000 for the first quarter of fiscal year 1990 ended Dec. 31, 1989 versus net sales of $7,643,000 for the like quarter of the prior year. Net income for the quarter was $377,000 (7 cents per share) versus net income of $875,000 (17 cents per share) for the like quarter of the prior year. The extraordinary credit from the utilization of net operating loss carryforwards of $48,000 (1 cent per share) was included in the first quarter of last fiscal year. The net operating loss carryforward was fully utilized during fiscal year 1989.

According to Jack H. King, president and chief executive officer, "Given the revenue and earnings results of the past several quarters, the results this quarter are a disappointment. However, gross margins as a percent of sales, as previously reported, was unusually high in the first quarter of the last year due to product mix. The product mix for the current quarter produced unusually low gross margins as a percent of sales.

"Revenue did not grow at the rate we anticipated," continued King, "as several OS/1100 RAMdisk opportunities took longer than expected to close.

"We believe these results, while not as good as we had hoped, are not indicative of the full year performance. We expect to continue the trends of revenue and earnings the company has previously reported."

Zitel Corp. designs, manufactures, and markets high speed storage subsystems for various applications for Original Equipment Manufacturers (OEM) and business end-users of standard mini-computers and mainframe computers. The company is headquartered at 630 Alder Drive, Milpitas, 95035.

#90022p0383 01/22/1990 ~PR Newswire

NEW YORK (JAN. 22) PR NEWSWIRE - Amerada Hess Corporation (NYSE: AHC) reported net income for the fourth quarter of 1989 of $70,829,000 ($.88 per share) compared with net income of $66,277,000 ($.80 per share) for the fourth quarter of 1988.

Fourth quarter 1989 refining and marketing earnings were $85,400,000 compared with earnings of $90,800,000 in the fourth quarter of 1988.

Exploration and production earnings were $33,900,000 in the fourth quarter of 1989 compared with a loss of $300,000 in the fourth quarter of 1988. Fourth quarter 1988 results included a charge of $30,300,000 for capitalized exploration expenses related to certain properties for which the company had no current development plans.

Net income for the year 1989 amounted to $476,349,000 ($5.87 per share) compared with net income of $124,217,000 ($1.51 per share) in 1988. In 1989 and 1988, income taxes relating principally to domestic operations have not been recorded reflecting the utilization of net operating loss carryforwards.

Refining and marketing operations had earnings of $452,600,000 for the

year 1989 compared with earnings of $139,200,000 for the year 1988.

Earnings from exploration and production activities amounted to $128,000,000 for the year 1989 compared with earnings of $64,500,000 for the year 1988, including the charge referred to above.

Consolidated revenues for the fourth quarter of 1989 totaled $1,537,477,000 compared to revenues of $1,193,819,000 for the fourth quarter of 1988. Consolidated revenues amounted to $5,679,327,000 for the year 1989 compared with $4,263,544,000 for the year 1988.

Capital expenditures for the year 1989 amounted to $1,828,700,000, of which approximately $1,729,400,000 related to exploration and production activities. Capital expenditures for the year 1988 amounted to $729,900,000, including $652,,600,000 for exploration and production. The 1989 capital expenditures include $1,248,900,000 for the acquisition of oil and gas reserves.

BILLERICA, MA (JAN. 22) PR NEWSWIRE - BTU International Inc. (NASDAQ: BTUI) today reported that net income for the fourth quarter ended Dec. 31, 1989, will be somewhat below expectations, at approximately 19 cents per share. However, the company reached record earnings of approximately $1.03 per share for the year. Revenues for the fourth quarter and year ended Dec. 31, 1989, are expected to be approximately $25 million and $101 million, respectively.

Paul J. van der Wansem, president and chief executive officer stated, "Fourth-quarter results were primarily affected by accelerated research

and development spending related to new products. Other factors contributing to our fourth-quarter figures were slightly lower revenues and gross margins."

Van der Wansem continued, "As a supplier of equipment to the semiconductor industry, BTU's fortunes are closely tied to those of the industry and, consequently, we saw our book-to-bill ratio decrease to approximately 0.8 for 1989. We are optimistic that the combination of new product releases and a renewed vigor in the semiconductor industry during the second half of 1990 will enable us to continue our growth."

Van der Wansem noted, "Our balance sheet continued to improve through increased liquidity during the fourth quarter."

The company expects to report complete fourth-quarter and year-end results on Feb. 15.

BTU International Inc. is one of the principal suppliers worldwide of wafer-processing systems which are used in the manufacture of integrated circuits.

#90022p0389 01/22/1990 ~PR Newswire

CHICAGO (JAN. 22) PR NEWSWIRE - GTE TeleMessager and R.R. Donnelley & Sons Co. will test an interactive voice response (IVR) system designed to help functionally illiterate adults learn to read. The test will begin here Feb. 1.

The system allows adults enrolled in Literacy Volunteers of America (LVA) literacy-improvement programs to call a toll-free telephone number to identify words they don't recognize. Using a telephone touch pad like a typewriter, they enter the word, and the IVR system pronounces it. R.R. Donnelley has filed for a patent on the system.

"This application is one more example that IVR systems are much more than sophisticated answering machines. They offer real solutions to human problems such as illiteracy, as well as streamline labor-intensive activities such as inventory verification, ordering and time reporting for businesses," GTE TeleMessager General Manager Ward Flora said. "This system can ease an adult's embarrassment at not knowing how to read - plus it is available 24 hours a day."

Flora noted that, according to LVA, there are 27 million functionally illiterate adults in the United States.

"When adults enter a literacy program, they do well as long as they work with their tutor," Flora explained. "But when they get home and start reading alone, they tend to stop when they reach a word they don't know. This system allows them to call an 800 number, type in the unrecognized word on their telephone touch pad, hear the word, and then continue reading."

The system will contain about 800 commonly used words during the test, which will continue for 90 days. About 100 LVA adult clients will participate. Flora noted that many other applications for the IVR system are possible. For example, other educational systems, such as public schools, could subscribe to the system to aid them in teaching students to read.

GTE TeleMessager, headquartered in Irving, Texas, is a market leader in providing high-quality, efficient voice messaging and interactive voice response products and services to businesses.

It is a subsidiary of GTE Information Services (GTEIS) of Tampa, Fla., which offers capabilities in specific applications software, systems integration, data processing, publishing and marketing services. MOUNTAIN VIEW, CA (JAN. 22) PR NEWSWIRE - Genus Inc. (NASDAQ: GGNS) today announced record financial results for its fourth quarter and fiscal year ended Dec. 31, 1989.

Sales for the fourth quarter, 1989, rose to $24.3 million, up 59 percent over sales reported in fourth quarter, 1988. Net income for the fourth quarter was $4.3 million, or 38 cents per share, as compared to net income of $1.5 million, or 21 cents per share for the fourth quarter of 1988.

Sales for 1989 were $87.3 million, net income was $12.8 million and net income per share was $1.22. These results compare to sales of $51.5 million, net income of $3.5 million and net income per share of 50 cents for 1988. All amounts have been restated to give effect to the sale of Genus' Analytical Products Group which occurred during the second quarter of 1989.

Genus Inc. is the industry leader in the manufacture of front end production equipment for tungsten CVD and high energy implantation. Genus' products are used in the fabrication of advanced semiconductor integrated circuits by major semiconductor manufacturers around the world.

CONCORD, MA (JAN. 22) PR NEWSWIRE - Nuclear Metals, Inc., (NASDAQ: NUCM) Concord, Mass. based manufacturer of specialized metal products, today announced financial results for the first quarter ended Dec. 31, 1989.

Net income for the quarter was $39,000 or two cents per share on average shares outstanding of 2,568,179. These results compare with net income of $392,000, or 15 cents per share on average shares outstanding of 2,630,229 for the first quarter of fiscal 1989. Sales for the quarter were $9,924,000 compared with $10,774,000 last year. Lower first quarter sales and earnings are a result of not yet receiving a follow-on contract for DU penetrators for the U.S. Navy's Phalanx Program and delays in receipt of antitank warhead contracts from DARPA. Improved earnings are expected for the second quarter and for the balance of the fiscal year.

Nuclear Metals, Inc. further announced today receipt of initial funding on an additional $6 million contract for the Defense Advanced Research Projects Agency (DARPA) Armor/Anti-Armor Chemical Energy Warhead Program. This contract is aimed at developing highly advanced antitank munitions. The program is geared towards accelerated development of antitank weapons with warheads capable of defeating enemy tanks.

Backlog at the end of the first quarter was $12,970,000 compared with $32,973,000 at the end of the first quarter of last year. This backlog does not include the recently awarded DARPA contract.

#90022p0399 01/22/1990 ~PR Newswire

SYRACUSE, NY (JAN. 22) PR NEWSWIRE - Community Bank System, Inc. (CBSI), an approximately $600 million multi-bank holding company based in DeWitt, has reported that net income for 1989 reached $4.535 million, a 10.9 percent increase over 1988's level; per share results of $1.64 climbed 17.1 percent, owing to fewer shares outstanding.

Fourth quarter net income totaled $1.085 million or $.40 per share, up 2.6 percent and 11.1 percent, respectively, over last year's fourth quarter.

Edwin J. Lyons, president and chief executive officer, stated that these results represent a resumption of the company's historic earnings growth trend, which was interrupted in 1988. After excluding one-time merger expenses plus net gains on investment securities and other assets sold, 1989's core earnings rose 17 percent over last year and exceeded 1987's all-time high by two percent.

The increase in 1989's earnings compared to the prior year was due to a number of factors. First, net interest income (full tax-equivalent basis) rose 5.4 percent, reflecting a 10.1 percent increase in average loans outstanding; the net interest margin narrowed slightly.

Second, other income, excluding non-recurring items, rose almost 31 percent as a result of greater fiduciary fees and expanded activity at the

company's mortgage banking affiliate.

Lastly, the growth in operating expense before one-time items was held to 6.1 percent over last year, despite higher expenses to upgrade data center operations and increased services at holding company headquarters.

For the fourth quarter of 1989, net interest income, recurring non-interest income, and operating expense before one-time items rose 1.8 percent, 19.7 percent, and 6.3 percent, respectively, versus the comparable quarter last year.

The net interest margin was off almost 1/4 percentage point; competition for interest-bearing deposits continues to increase, and greater costs were incurred to lengthen deposit maturities.

The consolidated loan loss allowance ended the year at .77 percent of net loans outstanding, up three basis points from a year ago. The allowance covers 88 percent of non-performing loans, which softened due to several commercial loan credits; these credits have either been written down to conservative valuations or are in the process of being assumed by another lender.

#90022p0403 01/22/1990 ~PR Newswire

HOLLAND, MI (JAN. 22) PR NEWSWIRE - Haworth, Inc., a world leader in the manufacture of office furniture and seating, has reached an agreement with Mueller Furniture Corp. of Grand Rapids, Mich., to acquire the assets of Mueller.

Mueller, a highly respected wood office furniture company with an established design reputation, manufactures wood office seating, casegoods and tables. The company is recognized for its wide array of high-quality transitional and contemporary office furniture.

Mueller's manufacturing and office facilities are located in Grand Rapids, where the company employs more than 200 people. The company also has major showrooms in New York, Chicago and Los Angeles and distributes its products in the U.S., Canada and select international markets.

"We pursued Mueller Furniture to enhance the Haworth position as a full-line supplier of quality office furniture products and services," said Richard G. Haworth, president and chief executive officer.

"Mueller offers exciting possibilities. The combination of Mueller's

products with Haworth's growing product line and worldwide distribution network further strengthens our overall industry position and makes us a significant factor in the seating segment of the marketplace. More importantly, this acquisition will mean we can more fully meet our customers' needs for well-designed quality wood furniture for the office environment."

The acquisition of Mueller will be the third acquisition for Haworth. In 1988, Haworth acquired Comforto, a worldwide office seating manufacturer. And recently, Haworth concluded an agreement in principle to acquire products form SunarHauserman, Inc. of Cleveland. That acquisition will add the RACE freestanding office furniture system to the Haworth product line.

The agreement with Mueller is subject to approval by company's stockholders. It is anticipated that the purchase will be completed in approximately two weeks.

Haworth is known for its metal and wood open plan office furniture, seating, wood casegoods, and freestanding metal office furniture and files. Haworth employs more than 3,600 members (employees), has 27 showrooms worldwide, and had 1989 sales in excess of a half billion dollars.

LANDOVER, MD (JAN. 22) PR NEWSWIRE - Today, Safeway will award the first IBM computer system to Benjamin Stoddert Middle School, Waldorf, Md., at an assembly attended by the entire student body.

Benjamin Stoddert was the first school to reach its goal of earning an IBM Computer PS/2 Model 25 and consequently was eligible to receive Safeway's bonus of an identical Model 25 Computer System.

"This is an exciting and rewarding day for us," said Don Gates, senior vice president and division manager. Gates commented that Safeway's "Food For Thought" program is just one of many ways that Safeway is part of the communities that Safeway serves.

On Nov. 12, 1989, Safeway officially kicked off its "Food For Thought" program in the Baltimore-Washington area which allowed area schools to earn free computers, printers, and software.

Safeway customers could save their cash register tapes for the 23 weeks beginning Nov. 12, 1989, through April 21, 1990, and return them to the school of their choice.

With the enthusiastic support of teachers, parents, friends and neighbors,

Benajamin Stoddert collected register tapes to earn an IBM PS/2 Model 25 Computer System. Their continued enthusiasm has generated enough register tapes to order another PS/2 Model 25 Computer System which they will receive in the near future.

Several other schools in Washington and Maryland have also reached their goals and will shortly receive the computer, printer or software of their choice.

"We hope the success of these schools in reaching their individual goals," commented Gates, "will serve as an incentive to other area schools to reach their goals as Safeway, IBM and the community work together to provide a better education for our children."

BEVERLY HILLS, CA (JAN. 22) PR NEWSWIRE - The Casden Company has acquired from Coast Savings and Loan Association its 50 percent interest in CoastFed Properties, a general partnership of the two companies established in 1982.

The transaction, for an undisclosed amount of cash, extinguishes litigation between Coast Savings and the Casden Company concerning the partnership.

Leading trade publications rank CoastFed Properties among the nation's 20 largest residential builders and third among builders of rental housing.

CoastFed has consistently placed first, second or third among California's residential developers in the annual Los Angeles Times rankings.

The company has developed residential properties with 47,000 dwelling units. One of its projects, the 1,279-unit Warner Center Apartments, is California's largest of its kind. Another, the 315-unit luxury complex known as Hillcreste Apartments, was financed by Shearson Lehman Hutton is one of the most successful offerings of real estate securities by any major investment firm.

CoastFed and its affiliates own or control properties with a total of 60,000 thousand dwellings and a value in excess of $2.5 billion. The company had assets totaling $250 million as of Oct. 31, 1989.

Casden Company Chairman Alan I. Casden said he believes CoastFed, which is to be renamed, "will thrive in its new independence." He said, "Development operations of this kind tend to perform best as

entrepreneurial companies. The ability to respond to opportunities rapidly is essential."

#90022p0428 01/22/1990 ~PR Newswire

MADISON, WI (JAN. 22) PR NEWSWIRE - Oscar Mayer Foods Corp. filed suit in Federal Court here today charging Sara Lee Corp. (NYSE: SLE) with infringement of the patents, trademarks and copyrights covering Oscar Mayer's popular "Lunchables" lunch combination products.

Oscar Mayer charges Sara Lee copied the distinctive and award-winning packaging, features and name of "Lunchables" when developing its Bryan brand "Lunch 'n Munch" product. The suit asks the court to force Sara Lee to pull its products off the market and pay damages to Oscar Mayer.

"We spent substantial time, effort, and money in researching and developing the 'Lunchables' line of lunch combination products," said Joel W. Johnson, senior vice president, marketing and sales, Oscar Mayer.

"The concept, packaging, and marketing are all original to Oscar Mayer and 'Lunchables.' We obtained the necessary patents, trademarks, and copyrights to protect them. Since Sara Lee has ignored our rights, we are pursuing legal remedies."

"Lunchables" is a combination of presliced meat, cheese and crackers separately placed in a package along with a napkin providing consumers with a convenient and easy lunch or snack. The packaging received Food & Drug Packaging magazine's 1989 Package of the Year Award for excellence.

In its suit, Oscar Mayer points out that the packaging used by Sara Lee imitates that of "Lunchables," which was first introduced in 1988 and has been subsequently introduced very successfully in 70 percent of the U.S. Oscar Mayer charges that the Bryan "Lunch 'n Munch" product imitates "Lunchables" in many ways:

- a compartmentalized tray with a square yellow and red carton covering the tray; - exactly matching size dimensions;
- a rectangular window in the carton divided into sections showing the food products;
- a strip across the center of the window on which the product name is printed;
- crackers at the top of the window with the meat and cheese appearing on either side of the bottom of the window;
- the name of the flavor combination on the carton in a third color and the designation "NEW" in the upper left corner of the box in the third color;
- a bordered rectangular white panel on the back of the carton with descriptive language.

FORT WORTH, TX (JAN. 22) PR NEWSWIRE - The Western Company of North America (NYSE: WSN) announced today that it has extended to 5:00 p.m. EST on Jan. 29, 1990 the date by which it may accept for payment Series B Notes tendered in response to its previously announced Consent Solicitation and Offer to Purchase.

As also previously announced, all holders of Series B Notes have tendered such Notes pursuant to Western's offer. Western has offered to purchase such Notes, which aggregate $115 million face amount, at $635 for each $1,000 of principal amount. The purpose of the extension is to provide the company time to consummate a contemplated offering of convertible subordinated debentures, the proceeds of which are intended to be used to consummate the tender offer. The offer was previously scheduled to expire Jan. 23, 1990. A registration statement covering the proposed convertible subordinated debenture offering was filed on Nov. 22, 1989 with the Securities and Exchange Commission.

The Western Company of North America provides pressure pumping services which include cementing, fracturing and acidizing, and offshore drilling internationally. Western's common stock is traded on the New York Stock

Exchange under the symbol WSN.

#90022p0439 01/22/1990 ~PR Newswire

STUART, FL (JAN. 22) PR NEWSWIRE - At the end of 1989 Seacoast Banking Corporation of Florida (NASDAQ-NMS: SBCFA) surpassed $500 million in assets and recorded strong gains in deposits and net loans for the year. Average loans outstanding for 1989 were up 17.0 percent to $335.8 million and average deposits increased 14.5 percent to $453.7 million. Total assets were $512.5 million compared to $487.0 million for the year earlier.

Seacoast recorded net income of $4,498,000 for 1989 compared to $4,497,000 the year earlier, with earnings per share of $1.28 for both years. Net income for the fourth quarter was $1,173,000, or $0.33 per share, compared to $1,160,000, or $0.33 per share, for the same period a year earlier.

At the end of 1989, total deposits were $459.7 million compared to $451.7 million for the previous year and net loans were $348.8 million compared to $321.6 million for 1988. Book value per share was $9.89, up 10.3 percent from the $8.97 recorded the year before. Return on average assets was 0.91 percent, a decline from the year earlier's strong performance of 1.02 percent.

Dennis S. Hudson, Jr., president of Seacoast, attributed the level earnings performance to a combination of factors. The foremost factor, he said, was the narrowing of the net interest margin due to a shift in the deposit mix caused by a declining interest rate environment which influenced consumers to invest in higher cost time deposits. Another factor was the increase in net loan charge-offs, which totalled 0.62 percent of average loans for the year and resulted primarily from an additional charge of $500,000, previously reported in the second quarter, related to a single line of credit with an individual commercial loan customer. Hudson said that net loan charge-offs to average loans were less than 0.20 percent on average over the previous five years and expectations were for the company to return to a reduced level in 1990.

Seacoast's banking subsidiary, First National Bank and Trust Company of the Treasure Coast, has more deposits and net loans than any other bank on the Treasure Coast, a three county area on Florida's south central east coast, which is experiencing one of America's fastest population growth rates.

NEW ORLEANS (JAN. 22) PR NEWSWIRE - Alvin C. Copeland, chairman of the board and chief executive officer of Al Copeland Enterprises Inc. (NASDAQ: ACOPP) announced today that on Jan. 16, 1990, the company's board of directors declared a dividend on its 17.5 percent Cumulative Exchangeable Preferred Stock, payable in additional shares of Preferred Stock.

The dividend is payable at the ratio of one share for approximately each 22.857 shares outstanding. The dividend is payable on Feb. 15, 1990, to shareholders of record on Jan. 31, 1990.

Only whole shares of Preferred Stock in payment of dividends will be issued. Each holder of Preferred Stock who would otherwise be entitled to receive a fractional share in payment of dividends will be entitled to receive a cash payment equal to such holder's proportionate interest in the net proceeds from the sale by an agent selected by the company of the aggregate fractional shares of Preferred Stock otherwise issuable.

Al Copeland Enterprises Inc. operates and franchises quick-service fried chicken restaurants under various trade names, including "Popeyes Famous Fried Chicken and Biscuits" and "Church's Chicken." Al Copeland Enterprises is traded in the over-the-counter market under the NASDAQ symbol ACOPP.

ENGLEWOOD, NJ (JAN. 22) PR NEWSWIRE - Graphic Scanning Corp. (NASDAQ: GSCC) and its founder and former Chairman Barry Yampol, jointly announced today that they had settled all lawsuits and disputes arising out of Yampol's previous relationship with Graphic and executed a final settlement agreement.

Yampol will receive an initial payment of $16 million and a warrant to purchase one million shares of Graphic Scanning common stock exercisable at $10 per share, expiring in one year.

In addition, in lieu of 15 percent of the proceeds of a sale of DMC or $10 million, whichever is greater, as previously announced, Yampol instead will receive a fully secured promissory note for $11 million, bearing interest at a rate of 12 percent, and payable in 90 days.

Graphic's president, Robert Cymbala, said: "We are pleased to put this

issue behind us so that we can concentrate on increasing value for our shareholders. Barry Yampol played a key part in the founding and development of this company and we are pleased to settle our differences with him."

#90022p0445 01/22/1990 ~PR Newswire

KANSAS CITY, MO (JAN. 22) PR NEWSWIRE - DST Systems Inc. (NASDAQ: DSTS) reported earnings for the fourth quarter and year ended Dec. 31, 1989.

Fourth quarter 1989 resulted in a loss of $883,000 or five cents per share as compared to earnings of $499,000, or three cents per share for the comparable 1988 quarter. Full year earnings were $6 million, or 32 cents per share as compared to $11.8 million, or 61 cents per share for 1988.

Revenues for the year 1989 declined to $127 million from $138 million in 1988, with fourth quarter revenues of $32 million also trailing the $34 million posted in 1988.

Fourth quarter results for shareowner processing were impacted by additional costs incurred to accelerate the development of the company's new Image-based processing system, which was installed in a production pilot mode at its affiliate, Boston Financial Data Services Inc.

Additional costs were also expended for the "FLEX" project, a major systems redevelopment effort, which should be completed by mid 1990. Both real estate and "other" results were negatively impacted by valuation reserve adjustments.

1989 results were disappointing when viewed in terms of reported financial results. However, a number of significant events occurred and actions were initiated by the company to establish a base for improved long term results. Unit volume data for all products is shown below:

	Product Lines			
	Mutual Fund Shareowner Accounts (000's)	Portfolio Accounting Portfolios	Securities Transfer Accounts (000's)	Insurance Processing Policies (000's)
1st Qtr. 1988	17,163	393	3,664	462
2nd Qtr. 1988	17,441	809	3,810	511
3rd Qtr. 1988	16,480	827	3,693	533
4th Qtr. 1988	17,883	811	3,687	553
1st Qtr. 1989	17,808	829	3,659	586
2nd Qtr. 1989	18,771	833	3,693	723

3rd Qtr. 1989	19,025	837	3,764	738
4th Qtr. 1989	19,869	859	3,779	762

DST ended 1989 with 19.9 million mutual fund shareowner accounts serviced by its shareowner accounting system on either a full service or remote basis for an increase of 11.1 percent over 1988. Of this increase, 850,000 accounts were added in the fourth quarter. Much of this increase came from conversions of new clients to the DST system, which is the result of a rapidly changing competitive environment.

MIAMI (JAN. 22) PR NEWSWIRE - Florida Power & Light Company announced today the sale of 500,000 shares of 8.625 percent preferred stock, Series R, $100 par value. The new shares will be reofferred to the public at a price of $100 per share. Cost to FPL, after underwriting commissions, is 8.7334 percent.

The net proceeds from the sale (approximately $49.6 million) will be added to FPL's general funds and will be used to repay short-term borrowings and for other corporate purposes which may include, but are not limited to, the redemption or purchase of certain of its high-cost securities. Proceeds not immediately required for the foregoing purposes will be temporarily invested in short-term instruments.

The negotiated sale was underwritten by Merrill Lynch Capital Markets; Goldman, Sachs & Co., and Salomon Brothers Inc. A prospectus relating to the securities may be obtained from any of these firms.

FPL is one of the largest investor-owned electric utilities in the nation and is the principal subsidiary of FPL Group, Inc. (NYSE: FPL).

DOWNERS GROVE, IL (JAN. 22) PR NEWSWIRE - Robert J. Becker, M.D., chairman of the board of HealthCare COMPARE Corp., announced today at the annual meeting of stockholders that the eight current directors of the company were all re-elected for another one year term. The board of directors of COMPARE is comprised of the following individuals:

- Robert J. Becker, M.D., chairman, HealthCare COMPARE Corp.
- James C. Smith, president and chief executive officer, HealthCare COMPARE Corp.
- Ronald H. Galowich, executive vice president, secretary and general counsel, HealthCare COMPARE Corp.
- Daniel S. Brunner, president and chief executive officer, Affordable Health Care Concepts
- J. Patrick Foley, chairman, president and chief executive officer, DHL Worldwide Express (international freight company)
- Melvin Garb, private investor
- Burton Kanter, chairman, Walnut Capital Corp. (private venture capital firm)
- Melvin Simon, chairman, Melvin Simon & Associates, Inc. (shopping center development)

At the annual meeting, James C. Smith, president and chief executive officer of COMPARE, noted that based upon the various contracts that have recently been entered into with new clients and commitments the company has received, he believes that the revenue and earnings estimates of approximately $40,000,000 and $4,350,000 (75 cents per share) projected by several analysts who follow the company are reasonable for calendar 1990, although there can be no assurance that the company will achieve such results.

HealthCare COMPARE Corp. is one of the nation's leading independent managed care/cost management companies. The company provides data analysis extensive utilization management, and provider negotiation services (PPO development and management).

Its services are provided to indemnity health care payers as well as alternative delivery systems. The company manages costs and utilization without compromising the quality of care available to health care plan participants.

CONTACT: James C. Smith or Joseph E. Whitters of HealthCare COMPARE, (708) 719-9000.

#90022p0464 01/22/1990 ~PR Newswire
SACRAMENTO, CA (JAN. 23) PR NEWSWIRE - In financial reports released today, Foundation Health Corp. posted its strongest quarter in the corporation's 11-year history.

Operating income for the second quarter, ended Dec. 31, topped $9.6 million. This compares with a $2.3 million operating gain during the like period last year. Operating income for the six months of fiscal 1990

topped $15.4 million. This compares with a $2.3 million operating gain during the like period last year.

After subtracting amortization and interest on its long-term debt, Foundation also generated $3.9 million in net income for the first half, compared to a net loss of $7.7 million during the like period last year.

"The 1990s mark the beginning of a new era at Foundation Health," said Daniel D. Crowley, president and chief executive officer. "It will be a time of continued financial progress and pioneering efforts to offer quality, affordable health care for our members. Foundation is well on its way to enjoying its best financial year ever. I think even skeptics will agree that Foundation Health is in the midst of a remarkable turn-around."

Evidence of Foundation's firm financial footing is abundant. The HMO's tangible net equity (a measure of net worth) recently topped $10.5 million -- nearly six times the amount required by the California Department of Corporations, which regulates the state's managed care industry. Crowley projects Foundation's TNE will reach nearly $12 million by early summer.

In addition, the corporation's government division was recently awarded a one-year $525 million extension to its CHAMPUS Reform initiative contract with the federal government. The renewal makes Foundation the nation's largest military health care contractor.

The corporation's commercial arm, Foundation Health Inc., is a federally qualified HMO with more than 280,000 members throughout a 23-county area in California. Last year, HMO enrollment increased 14 percent (35,000 new members), making Foundation the second-largest Independent Practice Association-model managed care organization in the state.

#90022p0469 01/22/1990 ~PR Newswire

WASHINGTON (JAN. 22) PR NEWSWIRE - The chairman of a coalition of independent long distance companies today praised a Federal Communications Commission (FCC) decision -- rendered Friday -- that suspended an AT&T tariff that would have given an anti-competitive discount to a single business customer.

"If last week's decision in any indication, it appears that the FCC under new Chairman Al Sikes is more willing to meet its regulatory responsibilities toward AT&T -- and that's good news for consumers and anyone interested in preserving competition in the long distance marketplace," said Lawrence A McLernon, the CEO of LiTel

Telecommunications Corp. and the chairman of FOCUS (Fiber Optic Competition U.S.), a coalition of seven independent long distance companies.

"We fully expect Tariff 15 to be rejected as a result of the investigation that the FCC will now conduct. We are also calling on the FCC to suspend further AT&T custom tariffs while the commission undertakes its comprehensive investigation of AT&T's marketplace practices," said McLernon.

Friday's decision suspended AT&T's Tariff 15, which was offered to only one customer, for the maximum five-month period. It marked the former monopoly's second attempt to implement customer-specific rates under Tariff 15.

"Clearly, Chairman Sikes' FCC is approaching long distance regulation with an open mind -- which is a welcomed change from its predecessor. Had AT&T's Tariff 15 been approved, it would have been tantamount to AT&T deregulating itself -- something that neither consumers nor businesses can afford," said McLernon.

In addition to LiTel, FOCUS is comprised of: Advanced Telecommunications Corp., Atlanta; Cable & Wireless Inc., Vienna, Va.; Metromedia Long Distance, Secaucus, N.J.; RCI Corp, Rochester; Telecom USA Inc., Atlanta; and the Williams Telecommunications Group Inc., Tulsa.

HOUSTON (JAN. 22) PR NEWSWIRE - Bar Harbor Airways announced today the expansion of its Miami hub with new service to Orlando and expanded service to Tampa effective on Jan. 31. Bar Harbor Airways will offer convenient connections to both EASTERN and Continental Airline flights through Miami International Airport.

Bar Harbor will operate to both cities non-stop with four daily departures to Orlando and five to Tampa. There will be a total of 140 seats available per day to Orlando and over 170 seats per day to Tampa. This service will be operated with the 35 passenger Saab 340 aircraft. The Saab 340 is an advanced, turbo-prop aircraft, which is fully pressurized and features overhead storage, fold-down worktables, and inflight service. The Saab 340 is a high-performance aircraft equipped with state-of-the-art avionics, including full weather radar.

Bar Harbor will be increasing its presence throughout Florida for the winter season. On Feb. 9, the regional airline will be operating eighteen

non-stop, daily flights between Key West and Miami, six from Marathon to Miami and increasing to three departures to Freeport. Other destinations from the Miami hub include Governor's Harbour and Sarasota.

Schedule and fare information for the service is available through any local travel agent, or by calling either Continental or Eastern reservations toll free. The Continental Airlines reservations number is 800-525-0280 and the Eastern Airlines reservations number is 800-EASTERN.

ATLANTA (JAN. 22) PR NEWSWIRE - Bramalea Limited (Toronto: BCD) was today awarded the International Gold MIRM for Project of the Year for Balmoral, Bramalea's flagship community in North York. The coveted prize is awarded each year by the National Association of Home Builders at its annual convention.

The Gold MIRM is awarded yearly to the project that represents the best in project marketing and merchandising in North America. The Gold MIRM is the building industry's most coveted award.

''Winning the Gold award here is for the building industry what the Academy Award is for the filmmaking business,'' said an elated David Ptak, executive vice president, residential group at Bramalea Limited.

''Being recognized by our colleagues across North America as the best in marketing and merchandising is extremely satisfying,'' added Ptak.

Balmoral is an exclusive community of 195 homes in North York. Homes are of mansion proportions and sit on lavishly landscaped grounds.

In addition to the strong in-house marketing team, Bramalea Limited worked with a number of outside consultants and agencies to develop the image for Balmoral including Bryon Patton and Associates, G. Ryan Design Inc., The Kerbel Communications Group and Setterington & Co. Inc.

Bramalea Limited is an innovator in the building industry. As the first builder in Canada to come out with a five-year warranty on new residences, it sets the standard for quality and workmanship. Balmoral is also part of Bramalea Limited's Signature Collection of homes. The Signature Collection residences represent the ultimate in elegance and the best that Bramalea has to offer in architectural design, finishes and craftsmanship.

Headquartered in Toronto, Bramalea Limited is one of Canada's foremost real estate developers. For nearly 30 years, Bramalea has created

outstanding residential communities and commercial projects in Canada and the United States.

#90022u0059 01/22/1990 ~United Press International

(JAN. 22) UPI - The Bad Boys of the NBA were delivered a stinging message Sunday by the Los Angeles Lakers.

In a hard-fought, sometimes bitter battle, the Lakers outmuscled the Detroit Pistons for a 107-96 victory at The Palace in Auburn Hills. The Lakers' triumph was their first over Detroit in seven games, including a four-game sweep by the Pistons in last year's NBA Finals.

''It is the most physical any team has played us,'' Detroit Coach Chuck Daly said. ''It is the first time somebody has played us more physical (then we've played them). We just don't see that.''

The Lakers met the Pistons elbow for elbow, shove for shove and stare for stare and were able to keep their composure and hold a fourth-quarter lead.

The Lakers took control by using one of the Pistons' weapons - a stifling defense that allowed just 16 points in the third period.

The 30-16 third-period advantage let Los Angeles take an 80-69 lead into the final 12 minutes. The closest Detroit could come was 85-80 with 8:21 to go.

The roughness of the game was shown in two incidents - both of which cost Detroit the services of a player for the rest of the game. Mark Aguirre went out with a back injury midway through the third quarter while Isiah Thomas was ejected for slapping Mychal Thompson with 56 seconds left in the game.

James Worthy went up to block a driving layup by Aguirre and both players went crashing to the floor in the third period. Worthy suffered a bruised back on his left side, returning to the game in the fourth quarter, while Aguirre left the floor on a stretcher. He was taken to a local hospital for X-rays on his back, which were negative.

Thomas slapped Thompson five times on the head with an open hand and was ejected after the Los Angeles center had come up with the basketball.

Worthy scored 26 of his 31 points in the first half while Johnson scored

21 points for Los Angeles.

Edwards led Detroit with 26 points but had just 7 in the second half. Thomas ended with 20 for Detroit, 15 coming in the second half.

--- AROUND THE NBA ---

In other games, Milwaukee throttled the Heat 127-101, Chicago clipped New York 117-109, Golden State tripped Boston 120-115, and Portland pounded Charlotte 115-100.

Bucks 127, Heat 101

At Milwaukee, Alvin Robertson recorded 19 points, 15 rebounds and 11 assists and Ricky Pierce scored 22 points to lead Milwaukee. The Bucks posted their 13th victory in 16 games. Rony Seikaly led the Heat with 26 points.

Bulls 117, Knicks 109

At Chicago, Michael Jordan scored 42 points, and made 18 straight free throws to power the Bulls. The triumph left the Bulls a half-game ahead of Detroit in the Central Divison. New York lost its third straight.

Warriors 120, Celtics 115

At Boston, Chris Mullin scored 30 points as Golden State gave coach Don Nelson his 600th career victory. Mitch Richmond and Terry Teagle finished with 26 points apiece and rookie Tim Hardaway added 25. Larry Bird paced the Celtics with 37 points.

Portland 115, Charlotte 100

At Portland, Ore., Jerome Kersey scored 26 points and Kevin Duckworth added 23 for the Trail Blazers. The Hornets were led by 18 points from J.R. Reid.

WASHINGTON (JAN. 22) UPI - Insurance policies covering long-term nursing home care cost too much for the overwhelming majority of older Americans, a report released Monday by an advocacy group for the elderly said.

The Families U.S.A. Foundation study said 84 percent of Americans age 65 to 79 would have to spend more than 10 percent of their annual income to pay the average premiums for basic policies.

''Private insurance that claims to protect older Americans from the high cost of nursing homes is itself so expensive that only the richest elderly can afford the premiums,'' said Ron Pollack, the group's executive director.

''The fact is that grandma can't afford long-term care insurance,'' he said.

The group said it hoped its study would influence the bipartisan Pepper Commission on comprehensive health care that is scheduled to report in March on how to pay for long-term care, which cost the nation an estimated

$56 billion in 1987, or 11 percent of America's total health bill.

Private insurers only began to sell coverage for long-term care in recent years, but some 1.3 million policies had been issued as of June.

Famlies U.S.A. said most insurers will not sell policies to people age 80 and older, but ''are now aggressively marketing policies to the 22 million older persons between the ages of 65 and 79.''

The report examined the least expensive plans issued by nine leading insurers - American Express, AARP/Prudential, Aetna, Bankers Life, CNA, John Hancok, Mutual of Omaha, Transport Life and Travelers - that met minimum criteria.

The criteria included a daily benefit of at least $80 a day with inflation protection or of $110 a day without inflation protection.

The annual premiums for the policies averaged $1,255 when bought at age 65 $1,808 at age 70, $2,879 at age 75 and $3,860 at age 79, the study said.

''An elderly couple, where the husband is 72 and the wife is 69, would have to pay $307 every month in premiums if they bought policies on top of their other out-of-pocket health expenses,'' Pollock said.

States where the smallest percentage of older people would be able to afford long-term policies - meaning they would have to spend less than 10 percent of their income and annuitized assets - were Mississippi (7.4 percent), West Virginia (7.4 percent), Tennessee (10.4 percent), Alabama (10.8 percent) and Pennsylvania (12.4 percent), the report said.

The highest percentage of older people would be able to afford such policies in Alaska (24.3 percent), Nevada (23.2 percent), Hawaii (22.1 percent), Montana (21.9 percent) and Wyoming (21.2 percent).

By JOAN HANAUER

NEW YORK (JAN. 22) UPI - Valerie Harper returns to series television in ''City,'' a sitcom that chronicles the adventures of the overworked, underpaid unsung heroes who stand between you and the politicians - the bureaucrats.

''City'' premieres on CBS Monday, Jan. 29, 8:30-9 p.m., and it will be a welcome addition to the network's comedy lineup - a fast, funny show with a fine ensemble cast and a warm, sharp performance by Harper.

She plays Liz Gianni, the city manager who tries to make things work despite venal politicians like the deputy mayor who is redoing his office with city funds in the most elaborate refurbishing project since Jackie Kennedy redid the White House.

Gianni contends with a wide range of bizarre city problems - in the opening episode it's an old cemetery that has been accidently bulldozed, and cadavers are body-surfing down a hill into people's backyards. Do they have the right of peaceable assembly after they are dead?

On top of that, there's the contest for an official city song.

She copes with the help of her right-hand man, Roger Barnett, played with considerable finesse by Todd Sussman, and other members of the office staff including her overprotective secretary (Tyra Ferrell), the opinionated Cuban-born purchasing agent (Liz Torres), the head of the records department (Sam Lloyd), with whom Gianni must haggle for his files the deputy major (Stephen Lee) and Gloria Elgis as the ditzy young social sevices coordinator.

At home, Gianni must contend with her college dropout daughter, Penny, played by LuAnne Ponce. Name sound familiar? She's the sister of Danny Ponce, who plays one of the Hogan boys on NBC's ''The Hogan Family.'' That's the series that originally was named ''Valerie,'' starring Valerie Harper, from which she was dropped, about which she sued and won.

CBS is airing ''City'' opposite ''The Hogan Family,'' something Harper calls an interesting coincidence.

Harper said in an interview that she wants to put the ''Valerie'' unhappiness behind her, although there will be no more ''gentleman's agreement'' working contracts in her life. The actress, whose past series include ''The Mary Tyler Moore Show'' and its spinoff, ''Rhoda,'' said of ''The Hogan Family:''

''I take pride in it in a strange way,'' she said. ''I was with it for its first three years. I always felt there was a sort of subliminal thing there with the viewers - they thought, 'Oh look at Rhoda, she found a nice pilot (pilot man, not TV pilot), isn't that terrific. And she's got three boys. Oh, she always wanted to be married.'''

Liz Gianni is a new character altogether.

''I like this woman very much,'' she said, adding that in some ways she resembles her character and in some ways she does not. ''She's very professional, she has great organizational skills, and she also really, really respects and admires people, which I think I do, too.

''She has wonderful business acumen, which I don't have. She's a good executive which I don't think am, and she can cut to the chase very quickly.

''She can wear soft, feminine things. We don't have to wear Rosalind Russell suits any more. Like a lot of professional women today, she knows we don't have to do it like the boys.

''Gloria Steinem said the geat danger of doing it like the boys is that you are denying your own contribution as a woman. You should be powerful as a woman, so instead of saying what they do about men, they say, 'Boy, does she have ovaries!'''

She also has an intriguing relationship with her daughter - they are going to live like roommates.

''I'll be your girlfriend,'' she tells Penny, who wants her own apartment, adding immediatelly, ''Juice is good for you.''

Her daughter agrees to try the roommate idea, then confides that she has met someone special who has asked her to spend the night. His name? She's not sure. And he's married. Her mother flees and she smiles wickedly and says, ''Got her!''

Harper said originally she and ''City'' creator Paul Haggis went to CBS

with a different show, ''Desperate Women,'' about an Italian family of women - Harper's character, whose marriage was breaking up; her mother, a widow; and her aunt, a nun.

''CBS didn't care for it,'' Harper said, ''so it was back to the drawing board.''

She said her husband, co-executive producer Tony Cacciotti, suggested taking a treatment for a hour show with comedy possibilities and converting it into a half-hour - and ''City'' was born.

''The city where I am city manager is a generic city,'' she said. ''We're never going to identify it as any particular city. That way we avoid law suits and we never have to worry, the way we did with the 'Mary' show, if there's a person in Minneapolis with a name we're using on the show.

''But a lot of these things really have happened. The cemetery thing in the first episode realy happened here in Los Angeles 14 or 15 years ago.''

#90022u0158 01/22/1990 ~United Press International

(JAN. 22) UPI - Washington, D-C, Mayor Marion Barry is to begin taking court-ordered drug tests Monday... following his arrest on cocaine charges last week. On Sunday, Barry told reporters he'll seek treatment. He did NOT say for what. Observers say it's possible Barry did NOT specifically admit to substance abuse in his statement... in order to retain any leverage he might have with the U-S attorney in negotiating a possible plea agreement.

Federal aviation officials have fired the controller on duty when an Eastern jetliner plowed into a private plane on a runway at Atlanta's Hartsfield International Airport. The F-A-A says the controller was ''decertified''... which amounts to dismissal... for NOT following proper procedures. Thursday night's accident killed the smaller plane's pilot and injured the co-pilot.

A successful launch Sunday night for the European Space Agency. A 180-foot liquid-fueled Ariane--4 rocket blasted off from the jungle launch complex on the northern coast of South America. The primary goal of the flight... the agency's first of the 1990's... was accomplished 17 minutes after liftoff with the successful deployment of a French-built Earth observation satellite.

About 10-thousand survivors of the 1984 Union Carbide disaster in Bhopal, India, cheered as Prime Minister V-P Singh said he supports their bid to reinstate criminal liability charges against the U-S-based company. A 470-Million-dollar accord reached by former Prime Minister Rajiv Gandhi

prevents individuals from suing Union Carbide. India's Supreme Court will determine if the pact is valid.

A survey finds overwhelming support among gun owners for stricter gun laws. The poll found 87 percent of those questioned feel the government should require handgun buyers to undergo background checks and wait seven days before being issued a weapon. But, at the same time, only 63 percent believe such laws would reduce violence in the United States.

#90022u0189 01/22/1990 ~United Press International

NEW YORK (JAN. 22) UPI - President Bush is willing to accept a vote in Congress to make the Environmental Protection Agency a cabinet position, after opposing such a move when he was running for office, the New York Times reported Monday.

Bush, who said during the campaign he wanted to be the ''environmental president,'' also said he did not want to add an environment post to the Cabinet because he wanted to keep it to a manageable size, the paper said. There are 14 Cabinet posts now.

But administration officials said Bush now appreciates more the need for a global response to environmental problems, the deep impact EPA programs have on national life and the public's increased concern over environmental issues, the Times said.

Bush has been criticized for his failure to take speedy action on the disastrous oil spill from the Exxon Valdez in Alaska's Prince William Sound, but he has also been applauded for his proposal to strengthen the clean air bill and his appointment of career environmentalist William Reilly to head the EPA.

Rep. John Conyers Jr., D-Mich., the chairman of the House Committee on Government Operations, plans to introduce a bill in the House this week to create a cabinet post to deal with the environment, the paper said.

Conyers said by elevating the EPA to a cabinet post, it would strengthen and balance the agency's relationship with the president and with other federal agencies, and would give it better standing with foreign ministers the Times said.

Democratic leaders in both the House and the Senate believe there is enough support to pass the measure, which would be co-sponsored by legislators from both parties, according to the Times.

The EPA was created in 1970 by President Richard Nixon and carries out environmental statutes enacted by Congress, but because it is an

independent agency, it has a lower standing than cabinet departments.

Quoting administration officials who demanded anonymity, tbe Times reported that Bush has met with Reilly and said he would not object to the move, if there were enough support in Congress.

#90022u0257 01/22/1990 ~United Press International

MELBOURNE, Australia (JAN. 22) UPI - Calm returned to the Flinders Park Monday when Sweden's Stefan Edberg placidly defeated compatriot Jonas Svensson 6-2, 6-2, 6-4 to advance to the quarterfinals of the $3 million Australian Open.

Edberg, two-time winner of the Australian, was in complete control as he dumped Svensson in 130 minutes. The third seed will meet David Wheaton, who upset fifth-seeded Aaron Krickstein 7-6 (7-5), 6-4, 6-3.

Eighth seeded Mats Wilander also advanced to the quarterfinals with a 7-5, 6-4, 6-0 victory over Veli Paloheimo of Finland.

Wilander struggled in the first set but gained control after Paloheimo suffered a sprained ankle in the second game of the second set.

Paloheimo, ranked 120th in the world, fell after turning sharply attempting a backhand. He dropped to the court and grabbed his leg, calling for help. Wilander raced over to the sideline, grabbed a handful of ice, put it in a towel and wrapped it around Paloheimo's ankle.

While Paloheimo was being treated by a tournament doctor he was issued a warning for too much time by the umpire, drawing boos from the crowd.

Paloheimo was helped to his feet and decided to continue but was ineffective for the remainder of the match.

Wilander will meet the winner of Monday's final fourth-round match between Boris Becker and Miloslav Mercir.

Tennis fans, officials and the media were slowly recovering from Sunday's cyclone when fourth-seed John McEnroe was disqualified from the tournament. The fiery New Yorker was defaulted after slammed his racket onto the court and swore at Grand Slam supervisor American Ken Farrar.

Edberg served and volleyed magnificently throught the match and Svensson, ranked 71st in the world, could scrape only three break points in the match.Edberg never lost a serve.

''He was just too good,'' Svensson said. ''Edberg can win this tournament

the way he played today. He hit every ball well, there are no easy points when you play him.''

Wheaton moved into his first Grand Slam quarterfinal Monday when he trounced an injured Krickstein under a blistering sun. Krickstein played with a torn groin muscle.

''This feels great,'' Wheaton said. ''One of my goals for 1990 was to make a Grand Slam semifinal. There was a lot of lunging out there by both of us but Aaron is a great fighter and you have to expect him to come back at you.''

Wheaton said he started to stiffen during the match.

''I served and volleyed well but my hips started to cramp when I had to chase a few of Aaron's lobs,'' Wheaton said. ''Its nice to be in this position now and I am always concious I am representing the United States when I play and that tends to keep me under control,'' he said.

#90022u0272 01/22/1990 ~United Press International

LA PUSH, Wash. (JAN. 22) UPI - A 45-foot fishing boat capsized and split into splinters on a river bar along the Washington coast Sunday, leaving one person dead and six missing, Coast Guard officials said.

''The boat is in a million pieces,'' said Ernie McGill, a witness who works at a resort near La Push on the Olympic Peninsula, about 100 miles from Seattle.

A Coast Guard spokesman in Seattle said nine people were aboard the vessel when it crashed against a Quillayute River bar on Washington's Olympic Peninsula around 3 p.m. Three were pulled from the water and taken to Forks Community Hospital.

One of those fished from the water, a woman, died, but the two others, Jerry Nelson and Ron Wilson, of Aberdeen, were in fair condition and expected to be released Monday, hospital officials said.

The woman's identity and those of the six missing men were not divulged.

The boat, identified as the Gambler, a fishing vessel registered in Tacoma capsized while trying to cross the river bar, the Coast Guard said.

''They were coming in as the tide shifted,'' said McGill ''It (the tide) started going back out ... the boat was pushed into the jetty.''

Witnesses said the boat capsized in 15-foot seas and heavy waves smashed

the boat into splinters.

''There was debris up and down the beach,'' La Push Police Chief Ken Lewis said. ''There were a lot of personel effects.''

The mishap was the second in the area this month involving a fishing vessel. The 50-foot steel-hulled Adventure sank in heavy seas near Cape Avala while traveling from Port Angeles to La Push. Three crew members apparently drowned.

#90022u0276 01/22/1990 ~United Press International

(JAN. 22) UPI - Supporters and opponents of the 1973 Supreme Court decision legalizing abortion will converge on the nation's capital Monday to mark the 17th anniversary of the ruling. U-S Park Police estimate 50-thousand activists on both sides of the issue will take to the streets. President Bush is expected to speak by telephone to participants in the March for Life. Abortion rights advocates will rally at the Republican National Committee's headquarters.

There is support for suggestions that Washington, D-C, Mayor Marion Barry may argue illegal entrapment when he goes to court on his federal drug charge. A t-v station quotes unidentified sources as saying the woman who lured Barry to a downtown hotel Thursday night suggested the two smoke crack cocaine- NOT the other way around, as earlier reported. Despite that, federal prosecutor Jay Stephens told the station he's confident the government's evidence is strong enought to convict Barry.

Another Washington t-v station reports the joint F-B-I-police department sting was NOT the only effort to catch Barry using or buying drugs. The station says the Drug Enforcement Administration believed it had a ''reliable informant'' who said he could get the mayor to buy drugs from him.

Iran's Foreign Ministry is appealing for an end to the violence in Soviet Azerbaijan and for a dialogue between Moslem nationalists and Moscow. The statement was issued after President Hashemi-Rafsanjani met with Iran's National Security Council to discuss the situation in Azerbaijan, which is adjacent to an Iranian region with the same name. Tehran radio, monitored in Athens, says thousands of Azerbaijanis continued to pour into Iranian border towns during the weekend.

TOKYO (JAN. 22) UPI - A section of one of Tokyo's busiest streets collapsed above a bullet train construction site Monday, swallowing

vehicles and pedestrians and leaving eight people slightly hurt and two others missing, police said.

The roadway near the busy Ueno business district suddenly caved in about 3 p.m., creating an oval crater some 30 feet deep and about 30 feet by 65 feet around, police said.

The collapse occurred above an underground construction site of a bullet train that will connect Tokyo's two busiest stations. Police said they suspect an explosion of compressed air used in the construction work triggered the collapse.

Three cars, including a Mercedez-Benz, and a motorcycle fell into the hole.

Eight people were pulled from the crater with minor injuries, but two others were missing, including the driver of a car and motorcycle, officials said.

NEW YORK (JAN. 22) UPI - All you need to know about current Broadway attractions, theaters, leading players and ticket situations (opening dates in brackets):

Credit card holders can order tickets by telephone as indicated. Orchestra seats for musicals run $45, $47.50 and $50 and for plays $37.50 to $40. Tele-Charge and Ticketron add a booking fee, and Ticketmaster adds a service charge. There are no additional fees for theater charge phones. Tele-Charge: 212 239-6200; Ticketron: regional offices or 212 399-4444; Ticketmaster: 212 307-7171.

''Black and Blue'' - Minskoff; an all star cast pays tribute to jazz and blues in a dazzling new musical by the creators of ''Tango Argentino''; available (1-26-89) (Teletron).

''Cats'' - Winter Garden; one of the most fantastically staged shows in Broadway history, a knockout musical based on a T.S. Eliot fable with Andrew Lloyd-Webber music; capacity (10-7-82) (Tele-Charge).

''A Chorus Line'' - Shubert; longest-running show in Broadway history, an absorbing musical about Broadway chorus ''gypsies''; available (7-25-75) (Tele-Charge).

''The Circle'' - Ambassador; Rex Harrison, Glynis Johns and Stewart Granger make this fluffy 1921 Somerset Maugham drawing room comedy sparkle again; available (11-14-89) (Tele-Charge).

''City of Angels'' - Virginia; a new smash hit musical thriller by Larry Gelbart with music by Cy Coleman about the detective novel writer in Hollywood; near capacity (12-7-89) (Ticketron).

''A Few Good Men'' - Music Box; Tom Hulce and Roxanne Hart score in a stunning new play about a military court martial that pits duty against conscience; available (11-15-89) (Ticketron).

''Grand Hotel'' - Martin Beck; Tommy Tune's eye-filling new musical is a generally effective adaptation of Vicky Baum's novel about 1920s Berlin; available (11-12-89) (Ticketron).

''Gypsy'' - St. James; Tyne Daly is a searingly obsessive Mamma Rose in this effective 30th anniversary revival of the Styne-Sondheim musical; near capacity(11-16-89) (Ticketron).

''The Heidi Chronicles'' - Plymouth; Brooke Adams gives a fine performance as a woman comes of age in the feminist era in this new, Pulitzer and Tony prize-winning Wendy Wasserstein comedy; near capacity (3-8-89) (Tele-Charge).

''Jerome Robbins' Broadway'' - Imperial; an electric Tony Award-winning musical smash with emphasis on dancing wrought from the hit shows choreographed by Robbins; near capacity (2-26-89) (Tele-Charge).

''Lend Me a Tenor'' - Royale; a hilarious new comedy set in the 1930s with a powerhouse cast headed by Philip Bosco, Victor Garber and Tovah Feldshuh; available (2-2-89) (Tele-Charge).

''Les Miserables'' - Broadway; the spectacularly staged Tony Award-winning pop opera from London based on Victor Hugo's novel, directed by Trevor Nunn; near capacity (3-12-87) (Tele-Charge).

''M. Butterfly'' - O'Neill; a totally fascinating production about a French diplomat (Tony Randall) in love with a Chinese spy in drag; available (3-20-88) (Ticketron).

''Meet Me in St. Louis'' - Gershwin; a lavishly staged musical version of the 1944 MGM film with 10 new songs and a powerhouse cast; available (11-2-88) (Ticketron).

''The Merchant of Venice'' - 46th Street; Peter Hall's production of Shakespeare's drama notable for Dustin Hoffman's sympathetic Shylock; capacity (12-19-89)(Ticketron).

Phantom of the Opera'' - Majestic; Andrew Lloyd-Webber's enchanting, excitingly staged operatic treatment of the beauty and the beast story set at the Paris Opera; capacity (1-26-88) (Tele-Charge).

''Rumors'' - Broadhurst; Neil Simon hits the jackpot again with a mostly wonderful farce about the coverup of a possible suicide attempt; available (11-17-88) (Teletron).

''Sweeney Todd'' - Circle In The Square; an intimate revival of the Stephen Sondheim's sprawling prmusical about a murderous London barber, starring Bob Gunton and Beth Fowler; available (9-14-89) (Tele-Charge, Ticketron).

''Tru'' - Booth; Robert Morse recreates Truman Capote in a shallow but mesmerizing one-man play set in 1975; available (12-14-89) (Tele-Charge).

#90022u0332 01/22/1990 ~United Press International

RASHAYA, Lebanon (JAN. 22) UPI - The Israeli-backed South Lebanon Army stormed a house in Israel's proclaimed security zone, leaving dead an Israeli officer and four guerrillas, military authorities said Monday.

Col. Yitzhak Rahimov was shot to death when a joint SLA-Israeli force attempted to storm a house in the border village of Yaroun, said the SLA in a statement broadcast on the Voice of the South radio station.

The four guerrillas that were in the house were killed, said an Israeli army spokesman in Jerusalem. One was found dead in the house and the others apparently escaped, but were hunted down and killed Monday, the army spokesman said.

Rahimov, 39, was serving as liaison officer to the SLA, the spokesman said.

The incident started, the SLA statement said, when machine-gun fire from the house hit an SLA patrol. When an Israeli force later attempted to storm the house, the gunmen opened fire killing the colonel instantly, it said.

The guerrillas' allegiance was not immediately known.

In 1985, two other Israeli colonels were killed in fighting in southern Lebanon.

Israel established the frontier security zone north of Israel in 1985 to combat guerrilla attacks.

Friday, Israeli jets bombed a PLO radio station and bases of the Iranian-backed Hezbollah organization in southern Lebanon, killing at least three people, police and sources said. At least eight people were wounded and 10 others were reported dead or wounded in the attacks.

#90022u0334 01/22/1990 ~United Press International

(JAN. 22) UPI - New Englanders dug out Monday from the first ''nor'easter'' of the decade, which dumped between 4 to 10 inches of snow across the region, while snow coated the Cascades in Washington and sunshine settled over California.

After the kind of weekend winter resort operators dream of, the snow kept falling in Vermont and New Hampshire, piling up on ski slopes and covering the bare spots left by a January thaw.

Boston and parts of Rhode Island, clobbered over the weekend by a savage snow storm fed by cold air currents from Canada and known as a ''nor'easter,'' got a dusting of light snow as residents shoveled out driveways and sidewalks.

Light snow also fell in parts of Maine, where the mercury dropped to the single digits and below zero in the far north.

Clouds and light snow spread over over parts of the upper Great Lakes and upper Mississippi valley.

Snow spreading across northeast Minnesota tapered to flurries early Monday with 1 to 2 inches falling from International Falls to Duluth, the National Weather Service said.

Temperatures in Illinois ranged from the mid 40s at Carbondale and Belleville to the freezing mark at Chicago and 41 at East St. Louis.

In the West, snow fell in Washington state's Cascade Range, with as much as a half foot expected through Monday morning, the weather service said.

A Pacific cold front was moving across the Cascades during the morning and snow was expected through the day. Rain also threatened Oregon after a weekend of fair skies.

Sunny skies prevailed in California. Mild Santa Ana winds with gusts to 35 mph boosted temperatures into the low 70s in the Los Angeles basin.

Under a weak high-pressure system, residents of the southwestern states enjoyed mild winter weather and sunny skies Sunday.

Some mid-level clouds covered Texas' lower Rio Grande valley and the middle Gulf Coast plains. Sunday's high temperature in Texas was 71 degrees at Beeville, while the low was 12 at Dalhart, in the northwest panhandle.

Extensive snow cover in New Mexico kept afternoon temperatures from warming much across the northern two thirds of the state. Sunday's lows varied from minus 10 degrees at Angel Fire. N.M. to 26 at Roswell.

Oklahomans enjoyed a very mild mid-winter day, with highs around the state in the 50s in most areas. The exception was in the panhandle, were snow on the ground kept the temperature at Guymon in the 30s.

Most of South enjoyed clear, cool weather because of a high-pressure system over the region. But there were some clouds and widely scattered showers over northeast and central sections of Florida. Temperatures ranged from 35 in Knoxville, Tenn., 40 in atlanta and 69 in Miami.

Up the Atlantic Coast, clouds and snow showers teased parts of Pennsylvania while West Virginia saw clouds with some flurries in the northern panhandle. Lows were in the upper 20s to lower 30s. It was parly cloudy in Maryland, Delaware and New Jersey with mostly cloudy skies and temperatures ranging from the upper 20s to low 30s.

#90022u0359 01/22/1990 ~United Press International

BEIJING (JAN. 22) UPI - China reported Monday a $5 billion trade surplus for 1989 despite domestic economic problems, but admitted Western sanctions imposed after the democracy movement crackdown in June had crippled foreign borrowing and vital technology imports.

A spokesman for the Ministry of Foreign Economic Relations and Trade, announcing the figures at a news briefing, acknowledged they differ with those of customs officials, which show a trade deficit. He attributed the gap to different accounting procedures.

In a statement, the trade ministry said that on total 1989 trade of $81.55 billion, exports rose 6.5 percent over 1988 to $43.27 billion while imports dropped 3.9 percent to $38.27 billion, leaving a $5 billion trade surplus.

The statement noted the ''good results'' overcame inflation and a government austerity program that has slowed industrial production, and were attained ''despite the impact of the Beijing turmoil and the economic sanctions imposed by some developed countries.''

The United States, Japan and the European Community all imposed various economic sanctions against Beijing after the Chinese army fired on pro-democracy demonstrators last June. The World Bank and other international agencies also froze new lending.

But the statement conceded the sanctions had led to a 51 percent plunge in

new foreign loan agreements from the previous year, to a total of $4.8 billion. The carrying out of foreign loans was also down 9 percent, to $5.9 billion.

The sanctions also led to a steep drop in imports of technology needed for China's modernization program. Technology import contracts plunged 25 percent from 1988, to 328 last year, while their value dropped 18 percent to $2.9 billion.

The number of foreign investment projects approved in 1989 also dropped 2.7 percent from the previous year, although the value of the agreed projects rose by 5.6 percent to $5.6 billion.

The ministry statement did not discuss tourism, but earlier tourism agency figures have shown the sharp falloff of foreign tourism last year cost the country at least $1 billion.

Trade ministry spokesman Liu Xiangdong expressed guarded optimism about foreign lending and technology agreements, saying China has received ''oral expressions and a few concrete signs'' that Western nations are preparing to resume lending programs.

''We welcome these signs and actions,'' Liu said. ''But we have no unrealistic fantasies.''

The World Bank is reportedly near a decision to begin a resumption of a $750 million loan program for China suspended after last June. The United States and Japan also have hinted they hope to resume lending, but have not given a timetable.

Liu said the decline in imports last year was the first in recent years, and stemmed from the government austerity program, efforts to conserve foreign exchange reserves to pay off the foreign debt, and the Western sanctions.

Liu denied China would have any problem repaying its more than $40 billion foreign debt as it enters a peak repayment period this year. He said foreign currency reserves as of last Dec. 20 were $16.3 billion and were gradually increasing.

He said officials were cheered by a 20.3 percent drop in imports of large consumer durables, noting the government wanted to reduce sharply purchases of big-ticket luxury items. Imports of automobiles and color televisions were down by half from 1988.

#90022u0427 01/22/1990 ~United Press International

(JAN. 22) UPI - Around the World... Around the Clock... the latest news from UPI...

The Roman Catholic Cardinal of Washington, D-C, has urged a massive turnout at today's ''March for Life'' to stem what he calls the ''pro-abortion mania sweeping the country.'' Supporters of legal abortion have also scheduled rallies in the nation's capital to celebrate the Roe-versus-Wade decision that legalized abortion 17 years ago today.

In addition to the D-C rallies expected to draw 50-thousand people on both sides of the issue... smaller rallies are planned around the country. Supporters and opponents of legal abortion staged demonstrations in state capitals yesterday, to put pressure on state legislatures.

Federal prosecutor Jay Stephens says he's confident that the government's case against Washington, D-C, Mayor Marion Barry will hold... despite a report that Barry will charge that the government used entrapment to tape him using cocaine. Barry told a church congregation yesterday that he would seek help to heal himself of an UNspecified problem.

A news report says President Bush has changed his mind and is now willing to raise the Environmental Protection Agency to a cabinet office. A bill is expected to be introduced in the House of Representatives this week to make the E-P-A the 15th cabinet office.

The Popular Front of Soviet Azerbaijan is reportedly preparing to announce a general strike to last until Soviet soldiers leave. The Soviet army has control of the capital of Baku . But Moslem Azerbaijani separatists are claiming independence in regions that border Iran.

-30- 1767

#90022u0514 01/22/1990 ~United Press International

(JAN. 22) UPI - Abortion advocates and opponents mark an anniversary... China admits that sanctions hurt its economy... reports of a huge Noriega fortune... and a general strike may take place today in Azerbaijan... those stores and more, next from U-P-I.

A memorial modeled after the Tomb of the Unknown Soldier now stands in the shadow of the Capitol... in memory of women who died from UN-safe abortions.

Abortion rights activists erected the memorial yesterday, on the eve of the 17th anniversary of the Supreme Court's landmark Roe versus Wade decision legalizing abortions.

The U-S Park Police say an estimated 50-thousand activists on both sides of the abortion issue are expected to march today in the nation's capital.

National Organization for Women vice president Sheri O'Dell says marching this year in support of abortion is particularly significant because of the Supreme Court's Webster versus Reproductive Health Services decision. Last summer, the decision gave states greater leeway to restrict abortion.

On the other side, Nellie Gray, president of the anti-abortion March for Life in Washington, says this is a black day. She says the anti-abortion movement is NOT going to go away until all innocent life in America is saved.

China's communist government says the country had a five-BILLION dollar trade surplus for 1989... despite reports from customs officials... who say the country had a trade deficit.

The government admits that Western sanctions imposed after the democracy movement crackdown in June has crippled foreign borrowing and vital technology imports.

A spokesman for the Ministry of Foreign Economic Relations and Trade says the figures differ with those of customs officials because they use different accounting procedures.

The United States... Japan... and the European Community... all imposed economic sanctions against China after its army fired on pro-democracy demonstrators last June. The World Bank and other international agencies also froze new lending.

The sanctions led to a 51 percent plunge in new foreign loan agreements from the previous year. The ministry statement did NOT discuss tourism... but earlier tourism agency figures indicated that a sharp drop in foreign tourism last year cost the country at least one-BILLION dollars.

#90022u0537 01/22/1990 ~United Press International

(JAN. 22) UPI - Radio Moscow reports that fighting in the capital of Azerbaijan has quieted down since Soviet troops stormed into the city to restore order.

However, snipers have been shooting at the troops in Baku . And, the Soviet force has yet to pacify the rest of the mutinous republic.

One journalist says Baku could become a dead city if nationalists go ahead with their tentative plans for a general strike across the Trans-caucasian republic. The journalist with Azerbaijan's ministry of culture says the strike will last until the Soviet army leaves.

Baku's military commander says 83 people were killed when Soviet troops entered the city Saturday- 14 of them military people and members of their families at barracks in Baku. The official Tass news agency said 57 civilians were killed and 500 wounded Saturday.

An announcer on Soviet television said the country has NOT experienced such days since World War Two. The announcer added that the Armenian-Azerbaijani strife eclipses the Chernobyl nuclear accident in 1986 as a Soviet tragedy.

A publsihed report says Panama's ousted General Manuel Noriega piled up a huge fortune while he was in power.

The report says Noriega's personal fortune may approach 300-Million dollars. One of his assets reportedly is a 27-Million-dollar castle in France.

Panamanian Controller-General Ruben Carles says the new government plans as early as today to stake a formal claim to the Noriega wealth.

The United States believes Noriega acquired much of the money in the last two years through selling Panamanian visas. They reportedly were sold at huge prices to Cuban and Chinese citizens desperate to leave their countries.

U-S and Panamanian sources say as many as 18-thousand immigrants entered Panama under the scheme. Some paid 10-thousand dollars or more for their visas.

One source described as knowledgeable estimated that Noriega personally made more than 100-Million dollars from the visas.

Noriega also is believed to have made vast sums from his stewardship of the country's customs and tax systems... and his relationship with Colombian drug cartels, which allegedly paid him for his assistance in allowing drug runners to use Panama as a base.

#90022u0538 01/22/1990 ~United Press International

WASHINGTON (JAN. 22) UPI - Supporters of Mayor Marion Barry, fearing they would lose political clout if his career is dashed by drug charges, have joined a group hoping to persuade Jesse Jackson to run for the office, a published report said Monday.

While a Barry spokesman says the mayor will not reach a decision about his political future for 30 days, Barry supporters are beginning to jump ship and are aligning themselves with Jackson, the Washington Post said.

Jackson, the civil rights leader and two-time presidential candidate who moved to Washington this summer, has said he would not seek the job if Barry runs for a fourth term in office.

But Barry's arrest last Thursday on charges he bought and smoked crack cocaine obscures the mayor's political future and opens wide this November's mayoral election. Four established Democrats already are officially running in the heavily democratic city.

Sources close to Jackson told the Post ''there are people who want to remain in power and want to protect themselves, and they see Jackson as'' their best hope for doing so.

Sources said the behind-the-scenes movement, which includes Delano Lewis, president of Chesapeake and Potomac Telephone Co. and Barry campaign co-chairman Robert Johnson, hopes to persuade local politicians, the business community, clergy and union leaders to support Jackson, the newspaper said.

Lewis and Johnson reportedly argued forcefully for Barry's resignation Friday at a meeting with the mayor and some of his key financial backers, said a local businessman who attended the meeting.

''Bob Johnson and Del Lewis want the mayor out because they're jumping to Jesse,'' the longtime Barry supporter said.

The Barry supporters view Jackson as a multipurpose candidate who can win in the November election, and can help restore government credibility and maintain continuity in the wake of Barry's arrest, sources from the city's Democratic leadership and Jackson supporters said.

The move toward Jackson also is portrayed by some as an effort to frustrate the mayoral candidacy of D.C. Council Chairman David Clarke, who would becme acting mayor if Barry resigns.

#90022u0554 01/22/1990 ~United Press International

(JAN. 22) UPI - The European Space Agency successfully launched a rocket last night that placed seven satellites into orbit.

The Ariane 4 rocket took off from French Guiana last night and streaked along the East Coast of the United States to put its satellite payload into an orbit around Earth's poles.

The primary goal of the flight was accomplished 17 minutes after lift-off with the successful deployment of SPOT-2... a high-resolution Earth

observation satellite capable of taking super-sharp photographs of ground targets around the world.

Three minutes later... two small satellites were kicked into space to test new communications techniques... followed one minute later by the ejection of four tiny U-S spacecraft called Microsats, built for education and science.

The Romanian media reports that children of executed dictator Nicolae Ceausescu doN'T want to give up their positions of power and authority... even in prison.

''Nicu'' Ceausescu... nicknamed ''The Little Prince''... reportedly calls himself king of the inmates. His sister Zoia reportedly staged a ''strike'' when she ran out of imported Kent cigarettes and had to settle for domestic brands that smell like burning industrial waste.

Nicu and Zoia are in prison... along with their adopted brother Valentin. The death penalty was abolished after it was used on their parents... but they face other penalties for the UNspecified charges against them.

Meida stories about the former first family describe Nicu as a playboy and Zoia as a nymphomaniac who dated ex-convicts and had them promoted to top ministry jobs if she considered them good lovers.

The provisional government... the National Salvation Front... says the Ceausescus had 21 palaces... 20 hunting chateaus... and 800 servants to wait on them.

-30- 1979

#90022u0575 01/22/1990 ~United Press International

NEW YORK (JAN. 22) UPI - An AIDS-afflicted doctor who blames the city for her infection with the fatal disease braced for more grueling cross-examination.

Dr. Veronica Prego was due back on the witness stand Monday for more testimony in her negligence suit against the city Health and Hospital Corp. and two colleagues. She blames them for her infection by an accidental prick from an AIDS-contaminated hypodermic needle.

The landmark $175 million trial, being heard at state Supreme Court in Brooklyn, has packed one emotional wallop after another.

On Thursday, prodded by a city lawyer, Prego's own doctor told a shocked courtroom that his Argentine-born patient had a year or less to live.

''It is impossible to predict,'' Dr. Gerald Friedland said. ''But it is

probable that her life expectancy will be a year or shorter.''

It was the first time Prego had heard such a gloomy prognosis.

The next day, Prego, her face puffy, sat in the witness chair with her head down.

''I'm sorry. You'll have to speak up. Please speak up,'' said one defense attorney, Barbara Finger.

Instead, Prego turned to Judge Aaron Bernstein.

''I don't think I can go on today. I really don't feel well,'' she said.

At that, Prego's mother, Juana Prego, broke into sobs.

Prego's attorney, Susan Karten, said after the incident that the 32-year-old physician had slept little.

''She's devastated at hearing she's going to live less than a year,'' Karten said. ''She didn't know that.''

Lawyer Stanley Friedman, who asked the doctor the stunning question, later defended his conduct, and said he doubted Prego's breakdown was triggered by the doctor's prognosis.

''I think she must have understood before that she has a short life expectancy,'' he said. ''I don't doubt she may feel ill.

''She is ill. But if she wasn't able to take the stand, that should have been discussed before with her lawyer,'' he said.

#90022u0608 01/22/1990 ~United Press International

(JAN. 22) UPI - Stock prices closed sharply higher Monday on the Tokyo Stock Exchange, posting their second straight rise despite the lightest trading volume since last August.

The key Nikkei Average of 225 selected issues, which rose 91.68 points Friday following four straight drops, surged a hefty 420.47 points to close at 37,257.01.

The Tokyo Stock Exchange index of all listed major shares climbed 34.54 points to 2,735.85.

An estimated 350 million shares changed hands in the lowest trading volume since Aug. 7 when only 306 million shares were exchanged. On Friday, volume amounted to 500 million shares.

Advances outpaced declines 687 to 255, while 180 issues remained unchanged.

Elsewhere in Asia, stocks closed slightly lower on the Hong Kong Stock Exchange in what analysts described as uneventful trading.

The Hang Seng Index, which gained 4.62 points Friday, eased 4.64 points to

2,771.65. Utilities fell 11.94 points, financials gained 1.03, industrials lost 2.59 and properties dropped 10.02 points.

Turnover was a light 457 million shares, compared with 493 million shares changing hands Friday.

In Australia, stocks closed fractionally lower lin listless trading on the Sydney Sharemarket.

The All Ordinaries Index, fell 3.5 points on Friday, slipped 1.8 points to 1672.1. The All Industrials Index rose 8.4 points to 2628.5, while the All Resources Index fell 8.6 points to 944.2.

Volume amounted to around 92 million shares, down from the 109 million shares traded Friday.

Brokers said the resources end of the market dragged the rest down.

#90022u0628 01/22/1990 ~United Press International

SEOUL, SOUTH KOREA (JAN. 22) UPI - President Roh Tae-woo announced Monday he and key opposition leaders Kim Young-sam and Kim Jong-pil have formed a broadly based, conservative political force through the merger of their once hostile parties.

Left out of the meeting that preceded its formation was South Korea's top opposition leader Kim Dae Jung, who denounced the move as ''an act betraying the people.'' He demanded lawmakers resign and stand for re-election so voters could deliver a popular verdict.

The move was certain to force Kim Dae Jung and his Party for Peace and Democracy into political isolation and deepen regional animosity between the southwestern provinces where support for him is strongest, and the rest of the nation.

The declaration of the new party tentatively named the Democratic Liberal Party followed nine hours of talks among the three leaders at the Blue House, the South Korean presidential mansion.

Roh read the joint announcement flanked by the two Kims.

To be registered with authorities by the end of February, the new party is expected to be in full operation by the end of May or within six months after registration at the latest.

The new party was expected to be able to muster easily the two-thirds parliamentary majority needed to enact major changes in the government's

structure and operation.

''We have now decided to put an end to politics of division and confrontation brought about by partisan interests,'' the announcement said. ''It is time that politics absorb and unify various demands of the people and play leading roles for national progress.''

The announcement said the people paid a dear price during the past two years to reach the conclusion that under the current four-party political alignment national problems cannot be properly solved.

Referring to the rapidly changing world, especially in the communist bloc, which is being swept by tides of reform and openness, the three leaders said South Korea required a new thinking and decision to achieve a higher level of national development.

The announcement said the new party will have nationwide support from all moderate, middle-of-the-road democratic forces and will pursue peaceful national reunification based on national self-respect.

''Its basic policy goals will be to realize practical welfare and justice based on liberal democracy and principles of free-market economy, push cultural progress and create a political system and culture mosted suitable for national development,'' it said.

The announcement said Roh and the two Kims will jointly lead the new party until its leadership is picked. Political sources said Roh will become its president and Kim Young-sam its executive committee chairman when an inaugural national convention is held.

The three leaders invited all political parties, organizations and individuals to join the new party, and said they will cooperate with all non-participating parties and factions through dialogue and compromise as long as they believe in parliamentary democracy.

It was the first time since South Korea became independent in 1948 that the government and opposition parties decided to merge to give birth to a new and larger political force.

Business circles welcomed the development. The Federation of Korean Industries, an organization of business leaders, hoped the birth of the new party will assure political stability and help economic progress.

Stock prices soared as Roh and the two Kims got together to finalize their agreement for the new political party.

But an enraged Kim Dae Jung, the top opposition leader, vowed to fight the merger.

''This is a political coup,'' he said. ''It is an act betraying the people to arbitrarily change the political alignment in which the voters gave political control to the opposition.

''If a parliamentary cabinet system is so desirable, all the legislators should resign and seek a popular verdict on the system through new elections,'' he said. ''If it is supported by voters, then President Roh should step down to implement it.''

''Now as the only opposition party, we will resolutely block a one-party dictatorship,'' he said.

The National Democratic Alliance of Korea, a hard-core dissident organization, said ''the merger was not a grand conservative alliance but was a grand pro-American fascist alliance. We will smash this attempt uniting democratic aspirations of all democratic people.''

Kim Young-sam, leader of the No. 2 opposition Reunification Democratic Party, and Kim Jong-pil, a one-time prime minister under former President Park Chung-hee who now leads the No. 3 opposition group, the New Democratic Republican Party, had been in touch frequently since late last year.

Political sources said Roh and the two Kims were in agreement to eventually replace the current presidential form of government with a parliamentary cabinet system through constitutional amendment.

The merger of the three parties was expected to assure enough votes - a two-thirds majority - in parliament for adoption of a parliamentary cabinet form of government. Roh has 127 lawmakers, Kim Dae Jung 70, Kim Young-sam 59 and Kim Jong-pil 35. There are six independents.

Roh won the presidency with only a plurality in December 1987 elections, prevailing against the divided opposition.

#90022u0661 01/22/1990 ~United Press International

BUDAPEST, Hungary (JAN. 22) UPI - Newspaper publisher Rupert Murdoch has purchased a 50 percent interest in two independent Hungarian newspapers for $4 million, the official MTI news agency reported.

The Australian-born entrepreneur closed the deals Saturday amid signs he plans to expand his newspaper empire into Eastern Europe, where democratic reforms have spawned dozens of independent publications.

Murdoch purchased a controlling interest in another Hungarian daily two

months ago, and also has been inquiring into business opportunities in Poland and Czechoslovakia.

His next scheduled stop after leaving Hungary was the Romanian capital Bucharest.

MTI said Murdoch's firm The News Corp. signed contracts Saturday to purchase 50 percent of the shares of the daily newspaper Mai Nap (Today's Day), which has a circulation of 100,000, and the weekly Reform, with a circulation of 400,000.

In addition to the $4 million purchasing price, Murdoch agreed to set up a $750,000 development fund for the two newspapers, MTI said.

Both are independent tabloids that already have a flashy style and sensational content not unlike many Murdoch tabloids in the West.

In November Murdoch purchased a controlling interest in another Hungarian daily, Magyar Hirlap (Hungarian Newspaper), making him the first Westerner to make a substantial investment in Eastern Europe's growing free press.

#90022u0677 01/22/1990 ~United Press International

(JAN. 22) UPI - Jimmy Smith, the dean of America's blues-drenched jazz organ players, had Georgia on his mind one recent day.

He was just back from the Soviet Union, where his concert tour included a gig in Tbilisi, the capital of Soviet Georgia.

''I had the best young audience I've ever had in my life. These people had never heard of Jimmy Smith. But the adults made the young people sit down and listen.

''I even rode in the prime minister's limo - with the flags on the fenders. I'm riding in prime time. I never had people love me like that,'' Smith said from his Nashville home.

''Back here, you're lucky if you get a damn cab.''

Outspoken as ever, Smith, 61, remains the undisputed jazz master of the Hammond B-3 organ, an instrument that is back in fashion in mainstream jazz. While it peaked in popularity in the 1960s, the following decade saw many of Smith's disciples turn to synthesizers.

Smith has used electronic keyboards sparingly, and never had a temptation to do more. ''I don't want to play something Mickey Mouse. If it isn't the B-3, I'm not interested,'' he said. ''Other than giving the music

something with a little different flavor, the synthesizer doesn't have a damn thing to offer.''

His B-3 is front and center on ''Prime Time,'' a new recording on the Milestone label that is Smith's first album in four years. Smith is joined by bassist Andy Simpkins, guitarists Phil Upchurch and Terry Evans, drummers Michael Baker and Frank Wilson, saxophonists Ricky Woodard, Herman Riley and Curtis Peagler, and singer Barbara Morrison on a studio session with the feel of an intense, live club date.

''This album will put some feelers out,'' says Smith, whose last appearance on record was a B-3 solo on Michael Jackson's hit pop single, ''Bad.''

''That wasn't a solo,'' Smith says. ''It was a spurt. I played for 20 minutes, and they used 2 seconds of it.

''Michael asked for me,'' Smith said. ''We've been friends for a long while. I met Michael on a plane when the Jackson Five were kids. Their father introduced them to me. He made them listen to Jimmy Smith.

''I'm not conceited,'' Smith says. ''I'm GOOD at what I do. I don't have to prove anything to anybody. They know who The Man is.''

The man exploded onto the jazz scene in the mid-1950s, signing a contract with Blue Note and putting out a series of several dozen jam session albums, the best known being ''The Sermon,'' ''Midnight Special'' and ''Back at the Chicken Shack.''

As a child growing up near Philadelphia, Smith taught himself to play piano and string bass without ever learning to read music. He turned to the organ in 1953, at age 24, after hearing Wild Bill Davison on the B-3.

''I went and heard Wild Bill in Atlantic City at the Harlem Club. Once I heard that organ, I said 'That's for me.' I was influenced by the way he played, and wondered how he got that big sound.''

While use of the Hammond organ in jazz goes back to Fats Waller in 1939, Smith brought to the instrument a prodigious technique and modern innovations. He played full walking bass lines on the foot pedals, chordal accompaniment in left hand, and the melody - from fast bop lines to stabbing chords - in his right.

Philadelphia soon became the undisputed capital of the jazz organ. Local musicians and visitors all lined up to learn the modern jazz technique from Smith. Shirley Scott, Jack McDuff, Jimmy McGriff, Groove Holmes, the late Don Patterson and Charles Earland, and young Joey DeFrancisco were all Smith students at one time or another.

''The musicians know who to fool with,'' Smith says. ''All of these guys were piano players first.''

Smith's home-base was southern California for the past two decades. He and his wife, Lola, bought a 12 1/2-acre spread near Nashville in 1988 when he got tired of the traffic and smog. They are moving to northern California very soon.

''Being a double Sagittarius, Jimmy can only take so much peace and quiet '' his wife-manager explains.

Smith is quite a storyteller, and keeps listeners laughing - and wondering where the tale ends and the tall tale begins - particularly when the subject is hearses.

In the early 1950s, Smith got tired of hauling his B-3 and his trio around in an old milk truck, so he bought a 1951 Packard hearse, the first of three plush-lined funeral vehicles he used. He put in heavy-duty shock absorbers and a high-speed rear axle that let him cruise quickly between cities.

One time in Detroit in 1959, Smith says, a cop pulled him over on Woodward Avenue, asked for his license and registration and asked to look in the back - where guitar player Quentin Davis, his relief driver, was sleeping on top of the organ.

''The door opened and Quentin sat up,'' Smith says. ''The cop said: 'Close the door, close the door. He's still alive.' We got charged with transporting live bodies.''

Then there was the time, Smith was playing a club in Buffalo, N.Y.

People saw the hearse parked out front, went in, and, as he tells it, they asked ''Is Jimmy Smith dead or what?''

Hardly.

Smith is in his prime - as a player and a talker.

#90022u0685 01/22/1990 ~United Press International

NEW YORK (JAN. 22) UPI - The New York Stock Exchange reported Monday these odd lot transactions by principal dealers through NYSE facilities for Jan. 19: Purchases of 403,833 shares and sales of 432,305 shares including 1,718 shares sold short.

-30- 392
#90022u0736 01/22/1990 ~United Press International
(JAN. 22) UPI - Activists on both sides of the abortion issue agree that a recent Supreme Court ruling makes today's 17th anniversary of the Roe-versus-Wade decision more important than ever. Abortion opponents hope to demonstrate support for their cause with a huge turnout for their annual March For Life in Washington, D-C. Supporters of legal abortion have erected a memorial to women who havedied from illegal abortions.

Moslem Azerbaijanis bury their dead today. Soviet troops say 83 people... including soldiers... were killed when they invaded Baku this weekend. But they deny they fired on women and children. The Soviets invaded to stop Azerbaijani attacks on Christian Armenians. Azerbaijanis say they may begin a strike today to last until soldiers evacuate Baku.

Washington, D-C, Mayor Marion Barry begins taking court-ordered drug tests today. Barry told a church congregation yesterday that the time since his arrest on charges of cocaine posession Thursday has been the most difficult period of his life. Yesterday was supposed to be the day he announced his re-election campaign. But Barry avoided questions about his political future.

Opposition leaders from Haiti are landing in Miami... complaining that military ruler General Prosper Avril is deporting them from the country. Avril is justifying his state of siege by saying it's necessary to fight a wave of terrorism that took the lives of a presidential guard and a journalist last week. But opponents say it's a way to clear the country of opposition leaders for April's scheduled elections.

#90022u0749 01/22/1990 ~United Press International
(JAN. 22) UPI - U-S and Soviet negotiators returned to Geneva earlier than scheduled today to resume talks on 50 percent cuts in strategic nuclear weapons. Officials at the two countries' diplomatic missions in Geneva admit being surprised by the early resumption... saying they found out only on Friday. A U-S diplomat says it's a sign of pressure on the negotiators to reach a basic agreement for June's Washington, D-C, superpower summit.

One of Tokyo's busiest streets collapsed today above a subway construction site. The 30-foot deep crater swallowed three vehicles... a motorcycle and pedestrians. Eight people were slightly hurt and two others are missing. Police suspect that an explosion of compressed air used in the construction work triggered the collapse.

Delegates from Yugoslavia's largest and wealthiest republic are demanding

more autonomy. At a congress of the country's communist party... Slovenian delegates say they will NOT accept being voted down on any major issues. They're demanding that the congress stop meeting in committees... where they feel their influence is diluted... and meet instead as a committee of the whole.

A national poll of college freshman shows political activism on the rise and interst in business careers going down. The number of students who said they took part in a demonstration in the past year is up to an all-time high of 37 percent. 64 percent support legal abortion... 45 percent support laws banning homosexual behavior and an all-time low of 17 percent want marijuana legalized.

#90022u0843 01/22/1990 ~United Press International

(JAN. 22) UPI - Superpower arms negotiators are back in Geneva, hoping to produce the framwork of an agreement to cut in half strategic nuclear weapons. The negotiators are under pressure to do the job in time for the June summit between Presidents Bush and Gorbachev.

New England had its first ''nor'easter'' of the season. Between four and 10 inches of snow has fallen across the northeastern states. The snow is heaviest in Vermont and New Hampshire, making skiers and resort owners happy. Washington's Cascades also have new snow.

A mass burial is being conducted in Azerbaijan's capital today. The victims died Saturday when Soviet troops invaded to break up fighting between Azerbaijanis and Armenians. Baku's military commander says 83 people died.

The Federal Aviation Administration has de-certified the air traffic controller who was on duty in Atlanta when an Eastern jet struck a private plane on a runway. The pilot of the small plane was killed in the collision Thursday night.

A survey indicates that 87 percent of the nation's gun owners believe the government should require hand-gun buyers to have background checks and wait a week before they can get a gun. A smaller majority approves registering guns.

A report says President Bush has changed his mind about a Cabinet-level Environmental Protection Agency and favors it now. Bush is reported to be more appreciative of the need than he was when he ran for president.

A nation-wide survey shows that gasoline prices climbed nearly two cents in mid-January, up to an average of one-dollar 13-point-oh-six cents a gallon. Analyst Trilby Lundberg says gas prices are the highest they've

been since July.

-30- 1866

#90022u0905 01/22/1990 ~United Press International

NEW YORK (JAN. 22) UPI - The captain of the Exxon Corp. supertanker which ran aground and spilled more than 11 million gallons of oil into Alaska's Prince William Sound says he has been scapegoated by the public and the media for the entire disaster.

Joseph Hazelwood, who goes on trial Monday in Anchorage, Alaska, on criminal mischief charges for his role in the oil spill, told Life magazine in his first interview since the accident that ''it gets kind of lonely'' being the only person charged with a crime for the spill.

Hazelwood was the captain of the Exxon Valdez when ran aground on a reef on March 24, 1989, spewing 11 million gallons of oil in the U.S.'s worst oil spill. The oil devastated miles of pristine Alaskan coastline, killing tens of thousands of seabirds, otters and other animals.

Reports initially said Hazelwood was drunk at the time of the accident, but those charges have never been proven. Exxon fired Hazelwood for violating company regulations prohibiting any drinking or even having alcohol aboard ship.

Hazelwood has a history of alcohol abuse and entered a rehabilitation center voluntarily in 1985 for 28 days.

In the interview in the February issue of Life, Hazelwood, who faces more than seven years in prison and $65,000 in fines if convicted, declined to discuss his legal troubles or the specifics of the accident.

But he said he feels the media have blamed him for the entire spill.

''I don't appreciate the sub-rosa message that containment and cleanup were my responsiblity,'' he said. ''For three days, until Easter Sunday when the wind came up, that big puddle of oil didn't impact the shore. I was shocked by the lack of response initially. Angry and amazed.''

Hazelwood, who has been working on a lobster boat in Huntington Bay, N.Y. since he was fired by Exxon, said the memory of the oil spill sometimes jolts him awake at night.

''I wish I could have a moment like Bill Hurt in 'Body Heat,' lying on a cot in his cell, when the light bulb goes on,'' he said. ''Suddenly he figures it all out: Damn! But that's not likely with this byzantine situation I'm in.''

Hazelwood complained that he suddenly found himself pilloried as ''a drunken bum with a parrot on my shoulder who drove his ship aground. Or turned it over to the cabin boy and said, 'Whoopee, call me when you get somewhere.'''

He said he would like to captain a tanker again, if the Coast Guard doesn't revoke his master's license. But more than 150 lawsuits have been filed against Exxon by various groups since the spill, and Hazelwood is named in many of them.

''My legal situation is the star I steer by now,'' he said.

#90022u0941 01/22/1990 ~United Press International
BY ELIOT BRENNER

WASHINGTON (JAN. 22) UPI - The political left is salivating over the ''peace dividend'' - which doesn't really exist - hoping to making it grow with more cuts in the defense budget and figuring ways to spend it.

The protestations of administration and senior Capitol Hill defense leaders that there is no real ''cash in the pocket'' peace dividend notwithstanding, there will be concerted efforts to make significant defense cuts and shift that money to social programs this year.

Capitol Hill and administration defense figures, cautioning about changes on the world scene, also argue against precipitous defense cuts.

The only real money that will be available from the defense budget for spending elsewhere will be that which is taken from it during the year and deliberately earmarked for other causes.

The reduction of $180 billion over the next several years that Defense Secretary Dick Cheney speaks of making is an illusory savings. It is money the country will not have to spend because defense plans have changed, but it is a far cry from money in the bank. And even if it were, there are other ways to spend defense savings.

Take, for instance, the budget deficit and, beyond that, the national debt.

Budgets are being written now for fiscal 1991, which starts Oct. 1, and the Gramm-Rudman budget balancing law says the deficit for the year must come down to $65 billion.

As the nation strives to get the deficit down, what is so wrong with applying every dollar cut from the defense budget to something else vital to the nation's welfare?

No one will deny there are pressing social needs in the country, but the national debt today is three times what it was nearly a decade ago, up to $2.92 trillion from just $908 billion in late 1980.

To put those figures in perspective, today's federal budget is about $1.1 trillion, about a third of the current debt and slightly more than what the entire debt was a decade ago.

A great deal of the increase in the deficit can be laid at the feet of defense. If other government spending can be held relatively constant and defense cut as the threat warrants, the surplus can be applied first to the deficit and then to debt reduction.

With the yearly deficit gone, the psychological worth of a debt payment, even if it were just a few dollars, would be in the billions.

And, over time, the $200 billion-plus a year the government must pay out in interest on the debt would fall, allowing either a tax cut or a redirection of the spending to social programs or the rapidly deteriorating ''infrastructure,'' roads, dams, bridges and the like that the nation depends upon.

The redirection of savings from defenses to the deficit and debt, therefore, could be one of the better investments Washington could make.

It would lift a burden from the generations now coming along and could take this country's financial fate out of the hands of those on other shores who hold some of the debt.

But will it happen? Don't bet on it.

#90022u0945 01/22/1990 ~United Press International

WASHINGTON (JAN. 22) UPI - The Supreme Court agreed Monday to review a court order requiring the government to pay $100,000 in fees to lawyers fighting the detention of Haitian refugees by federal immigration officials.

The justices will hear arguments before the term ends this summer in the appeal brought by the federal government whose lawyers object to procedural policies involving attorney's fees awarded in the case.

The government argues it should not have to pick up the tab automatically for opposition lawyers when those lawyers are attempting to persuade a judge that their fees in a case should be paid by the government.

The federal circuit courts are split on how the ''fees for fees'' issue should be resolved, and the government has asked the high court to settle the matter.

The case before the court stems from a nearly decade-long legal battle involving an Immigration and Naturalization Service policy of detaining without parole Haitian refugees who came to the country primarily through Miami. The policy also included accelerated hearings, held in the absence of lawyers for the refugees, to determine whether the refugees were ''excludable.''

Lawyers for the refugees successfully stopped the mass exclusion hearings and were able to get the detainees released pending determination of their political asylum applications.

According to the Equal Access to Justice Act, victorious parties in a

civil lawsuit involving the government will be awarded attorney's fees and expenses unless a court finds the government's position on the award to be ''substantially justified.''

The trial court found that because lawyers for the Haitians prevailed in the case, the government should pay the Haitians' attorney's fees and that it should pay the $100,000 in fees for litigating the fees.

The 11th U.S. District Court of Appeals affirmed that ruling, holding that the lower court was correct in not considering whether to government's position was substantially justified in the ''fees for fees'' section of the case.

Lawyers for the refugees argued against Supreme Court review.

#90022u0985 01/22/1990 ~United Press International

BRUSSELS, Belgium (JAN. 22) UPI - Crude steel production in the 12-nation European Community rose considerably for the second year in a row in 1989 and demand is expected to remain high in the first quarter of 1990, an EC Commission report said Monday.

On the basis of figures now available, the Commission estimated crude steel production in the EC totaled 141 million tons last year, compared with 137 million in 1988.

Present indications are that steel consumption in the first quarter of 1990 will be as high as in the last quarter of 1989 and production in that period should remain stable at 34 million tons, the report said.

The trend in the transport sector is ''very dynamic,'' the report said, with a favorable climate in the automobile industry and the railroads, while shipbuilding is regaining confidence after a year-long crisis.

Activity in the building sector also remains steady, although weather circumstances could influence it in the early months of the year, the report said.

Between 1980 and 1985, the steel industry experienced a serious crisis and cut down production capacity by more than 31 million tons, closing many units that were considered no longer competitive. As late as 1987, the Commission warned further deep cuts would be necessary in the future as the long-term outlook for steel demand would follow a downward trend.

But in 1988, demand picked up considerably, boosting production to 137 million tons, 11 million more than the previous year.

#90022u0990 01/22/1990 ~United Press International
WASHINGTON (JAN. 22) UPI - The Supreme Court let stand a lower court decision Monday that found an accused criminal may seek out and use confidential information, such as psychiatric records, about someone who testifies against him.

The justices, without comment, rejected an appeal from lawyers for Connecticut who sought the reinstatement of burglary convictions against Michael D'Ambrosia.

D'Ambrosia's convictions were overturned in July by the Connecticut Supreme Court, which found that his Sixth Amendment right to confront ''witnesses against him'' was violated because he was barred from obtaining alcohol treatment records of a witness.

D'Ambrosia wanted access to the records so he could challenge the witness's credibility.

Lawyers for the state, in seeking high court review of the Connecticut court decision, argued the confrontation clause does not govern the disclosure of private records and the decision ''is more favorable to the defense than is constitutionally necessary.''

''The Connecticut Supreme Court erred in requiring disclosure of confidential information without properly balancing the state's interests in non-discloure against (D'Ambrosia's) interest in impeaching (the witness),'' the state lawyers wrote.

(JAN. 22) UPI - Abortion opponents who have flocked to Washington, D-C for the annual March for Life today will be met by supporters of legal abortion who have also descended on the nation's capital. Activists are marking the 17th anniversary of the Supreme Court's Roe versus Wade decision that made abortion legal.

Leaders on both sides of the abortion debate say a recent Supreme Court decision giving states more power to regulate abortion makes this year's ceremonies important. With attention focusing on state legislatures... smaller rallies are planned around the country in state capitals.

Azerbaijanis are mourning their dead today and calling for a general strike to force Soviet soldiers out. Tehran radio says Soviet troops have sealed the border with Iran. Azerbaijani separatists reportedly hold some regions near the Iranian border. Soviet soldiers took the capital of Baku

this weekend in an assault that killed 83 people.

A lawyer for Washington, D-C, Mayor Marion Barry says that resignation is NOT a ''viable option'' at this point for Barry. The mayor takes his first weekly court-ordered drug test today. Legal obervers say the reason Barry has NOT admitted to having a drug problem might have been to retain leverage for a possible plea agreement.

Independent Radio in Haiti says military ruler General Prosper Avril has succeeded in deporting 30 to 40 opposition leaders from the country this weekend... three months before general elections. Avril says his state of siege is necessary to fight what he calls terrorism. The U-S State Department is protesting.

NEW YORK (JAN. 22) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 68.50-71.00 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 113.00 c-lb.

Lead, common, U.S. primary producers 40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $3.39-$3.55 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $135.00-138.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $496.00-$498.00; dealer-approx., $495.00-$505.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $103.33 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 315.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 68.00-68.75 c-lb.

DETROIT (JAN. 22) UPI - Cardinal Edmund C. Szoka, a fiscal hardliner who presided over the largest closing of Roman Catholic churches in U.S. history, will leave the archdiocese of Detroit to take a top financial post in Rome, the Vatican announced Monday.

Pope John Paul II named Szoka, 62, currently head of the nation's fifth-largest archdiocese, as president of the Vatican's Prefecture for Economic Affairs.

Szoka, a Polish-American with close ties to the pope, replaces Italian Cardinal Giuseppe Caprio, 75, whose resignation on grounds of age the pope accepted Monday. Caprio had been president of the prefecture since 1981.

Szoka will leave his post as archbishop of Detroit to take up the appointment in the Roman Curia, the central Catholic Church administration Vatican sources said. He has been head of the 1.5-million-member archdiocese of Detroit since March 21, 1981.

The Prefecture of Economic Affairs is responsible for the overall administration of all the financial affairs of the Holy See, including the budget, which the Vatican announced in October ran a deficit of $57.3 million for the year 1988.

Szoka reportedly was told about the Vatican appointment in early December during a visit to Rome, but kept mum until Monday's announcement. He is expected to leave Detroit for his new post by June. Szoka is known in the church for financial savvy and for ordering the largest mass closing of Catholic churches in U.S. history.

Last year, Szoka ordered 35 parishes in Detroit closed due to sharply declining membership, the result of the massive white flight from Detroit to the suburbs over the past two decades. Angry parishioners and even some priests appealed the closings all the way to the Vatican, but without success.

Szoka's national reputation for financial acumen dates to the early 1980s,

when he was elected treasurer of the National Conference of Catholic Bishops from 1981 to 1984 and, in Michigan, revolutionized archdiocesan fund raising.

Szoka has proven his attentiveness to Rome on many occasions. He has taken action against thelogians he suspected of straying from church doctrine and has followed Rome's instructions to abolish general absolution, a form of group confession popular in southeast Michigan.

WASHINGTON (JAN. 22) UPI - A $62,470 redecoration of the Oval Office including a new grey-blue carpet featuring the presidential seal, new sofas and draperies has been completed, a White House official said Monday.

The oval rug - 30 feet, 10 inches long and 23 feet 5 inches wide - was designed by Mark Hampton and the staff of Hokanson Inc., of Houston, Texas presidential press secretary Marlin Fitzwater said in a statement.

The presidential seal in the carpet is centered and is delineated in gold on an ivory background.

The redecoration was paid for with funds contributed by private donors and was handled by the White House Historical Association.

The new draperies are identical in design to the 15-year-old draperies that were replaced.

A pair of new cream-colored sofas has been added to the room, and between them is a new mahogany coffee table. Other chairs in the room were reupholstered in a variety of colors complementing the new carpet.

#90022u1133 01/22/1990 ~United Press International

ATLANTA (JAN. 22) UPI - The controller directing traffic when an Eastern Airlines jetliner plowed into a private plane on a runway at Hartsfield International Airport has been decertified for failing to follow proper procedures.

The controller, whose identity was withheld, was removed from his normal duties by the Federal Aviation Administration for what the agency called ''non-adherence to procedures'' at the time of the accident Thursday night. He remains an FAA employee.

The National Transportation Safety Board is investigating the accident, which claimed the life of the pilot of a Beechcraft King Air 100 and injured the co-pilot.

None of the 141 passengers and eight crew members aboard Eastern Flight 111 was injured in the accident.

Drucilla Anderson, an NTSB spokeswoman, said the controller, who had worked for the FAA since 1982 and had worked at Hartsfield since October 1988, said he thought the smaller King Air had cleared the runway and was surprised to discover it had not.

She said the controller also said he had just begun his shift at the time of the accident and was distracted by two other aircraft.

Eastern Capt. Ralph Orlando said Friday it was too late to avoid the collision by the time he saw the corporate jet.

''My first instinct was to try to avoid contact,'' Orlando said in an interview from his home in Daytona Beach, Fla. ''I made a sharp left turn to avoid it. But that wasn't enough. But I also had a plane of people to consider. I didn't think I would hit it. I thought it would be close, but that we'd miss it.''

Orlando, who said controllers failed to warn him about the smaller plane, said the King Air was poorly lit and was either stopped or moving very slowly at the time of the collision.

''We should have been advised, at minimum, that there was a small airplane and that it might not be cleared from the runway,'' Orlando said. ''They should have at least let us know about it.''

FAA procedure calls for aircraft to be cleared from a runway before planes are allowed to land, authorities said, and under normal circumstances, airplanes landing on the same runway should be flying 3 miles apart.

The dead pilot of the Beechcraft, owned by Epps Air Service of Atlanta, was identified as Eric Thomas, 30, of Acworth, Ga. The injured man, Daniel Olthoff, 26, of Norcross, Ga., was hospitalized in stable condition with a concussion, officials said.

#90022u1157 01/22/1990 ~United Press International

PHNOM MALAI, CAMBODIA (JAN. 22) UPI - The Chinese-backed Khmer Rouge have cut off supply routes to Battambang, Cambodia's second-largest city, in an attempt to starve out government troops garrisoned there, a senior Khmer Rouge military officer said Monday.

''We will not attack inside Battambang, but we will carry on surrounding the city to force the enemy to surrender when they run out of supplies,'' said Mit Yam, deputy commander of the 2nd regiment of Khmer Rouge 450th Army Division.

Yam, speaking to reporters at a base at Phnom Malai, about 3 miles from the border with Thailand, said his forces had completely blocked the three main supply routes linking the city to the Cambodian capital of Phnom Penh 150 miles to the southeast.

Earlier this month, the Khmer Rouge announced it had attacked and briefly occupied the city of about 50,000 people.

The Vietnamese-backed government in Phnom Penh, however, said the guerrillas were turned back more than 5 miles from the city center and were never in a position to capture Battambang.

Yam said the Khmer people had a positive view of the Khmer Rouge despite their brutal rule from 1975 to 1979, when an estimated 1 million people are believed to have been murdered or died from disease and starvation.

''The people voluntarily helped us carry arms from Phnom Malai military base to nearby Battambang,'' Yam said.

Defectors from the Khmer Rouge have said in the past they were coerced into the dangerous job of carrying arms and ammunition to the battlefield.

The Khmer Rouge commander said more than 2,000 Khmer civilians from the Site 8 refugee camp in Thailand had moved to the Thai-Cambodian border line and planned to settle at Phnom Malai.

Site 8 is supplied by the U.N. Border Relief Operation, which has objected to the unsupervised return of camp inmates to Cambodia because of concerns about the safety of the area.

The Khmer Rouge recaptured Phnom Malai from Cambodian government troops last November. The town is now being prepared for local Khmer Rouge administration, Yam said.

(JAN. 22) UPI - Iran said today Soviet troops have stopped the flow of refugees over the border to Iran. Tehran radio says Soviet forces are NOT letting people out of Azerbaijan... but are letting those who fled return. Iran says about 20-thousand people fled by yesterday... but most returned to the Soviet Union later and only a few hundred still are in Iran. Thousands fled Azerbaijan and Armenia for other areas of the Soviet Union when heavy fighting broke out last week.

In the capital city of Baku today, Soviet troops are staying off the streets. People in Baku are defying a ban on meetings by preparing for a mass funeral of those killed when the army stormed the capital Saturday. There's also a call for a general strike to last until the 24-thousand Soviet troops leave.

A Western diplomat says Genghis Kahn is being rehabilitated a democratic movement is being born in Mongolia. Diplomats say Mongolians are developing feelings of nationalism and discontent with the slow pace of reform in the Soviet satellite. Yesterday, nearly 40-thousand Mongolians defied a ban on UNauthorized protests and staged the fourth demonstration in six weeks.

A 13th round of superpower arms talks is opening in Geneva today. U-S and Soviet negotiators are under pressure to produce a basic agreement for the June summit conference between Presidents Bush and Gorbachev. The goal is... 50 percent cuts in strategic nuclear weapons. The negotiators already have a draft treaty outline that's one-thousand pages long.

#90022u1177 01/22/1990 ~United Press International

WASHINGTON (JAN. 22) UPI - Dr. Robert Harmon, chief of the Missouri health department, has been chosen to head the Health Resources and Services Administration, federal officials announced Monday.

Health and Human Services Secretary Louis Sullivan said Harmon would start Feb. 1 as administrator of the agency, which is charged with providing leadership for public and private health care systems.

''The Health Resources and Services Administration has key responsibilities in improving infant and maternal health, in providing access to health services for disadvantaged Americans, and in helping our nation's health care system to serve the growing number of poeple with AIDS,'' Sullivan said.

''I am very pleased he (Harmon) has agreed to serve in the important post '' the health sercretary added.

In 1989, the Health Resources and Services Administration supported health care services for more than 5 million people. The agency has a total staff of about 2,200.

Harmon has been director of the Missouri Department of Health since January 1986, He is also a clinical professor of family and community medicine at the University of Missouri-Columbia medical school.

Before taking the Missouri post, Harmon was public health director for Maricopa County, Ariz., and served as president of the National Association of County Health Officials.

Harmon holds bachelor's and medical degrees from Washington University in St. Louis and a master's degree from Johns Hopkins School of Public Health in Baltimore.

#90022u1197 01/22/1990 ~United Press International

JOHANNESBURG, South Africa (JAN. 22) UPI - The South African economy registered a 14.7 percent inflation rate in 1989, up nearly 2 percent from the previous year, the Central Statistical Services reported Monday.

The announcement coincided with a forecast by executives of the top 100 companies on the Johannesburg Stock Exchange of a continued economic downturn in 1990 and an even higher annual inflation rate of 16.1 percent.

In a survey conducted by Pretoria's University of South Africa Bureau of Economic Research released Sunday, the executives forecast a decline in economic growth to 1.8 percent from 2 percent in 1989.

Some 74 percent of the executives expected an increase in unemployment in 1989 and 51 percent an increase in labor unrest and strikes.

The CSO reported the average inflation rate of 14.7 percent compared with 12.9 percent in 1988, 16.1 percent for 1987 and 18.6 percent in 1986.

#90022u1204 01/22/1990 ~United Press International

SYRACUSE, NY (JAN. 22) UPI - A computer sciences student who created a ''worm'' that infiltrated and crashed computers nationwide clearly unleashed his destructive program deliberately, a federal prosecutor said in closing arguments Monday.

Defendant Robert Tappan Morris, who claims the incident was the result of an experiment gone awry, actually wrote the rogue program carefully to avoid detection and then set it loose, Justice Department attorney Ellen Meltzer said.

''He took each and every one of these steps to avoid ever being recognized as the creator of this worm,'' she said.

Meltzer told jurors in U.S. District Court that there was no question Morris created the worm program and sent it out over a national computer

network with the intention of gaining access to federal computers he was not authorized to use.

Morris did so with the knowledge his program would cross state lines and that investigating and counteracting it would take computer experts a considerable amount of time, Meltzer said.

Morris, then a Cornell University graduate student, is accused of unleashing a computer ''worm'' that shut down some 6,000 computers nationwide in 1988. The affected systems included ones at a National Aeronautics and Space Administration facility at Moffett Field, Calif., and the Air Force Logistics Command system at Wright-Patterson Air Force Base in Dayton, Ohio.

Morris, 24, of Arnold, Md., the son of the chief scientist for the National Security Agency's computer security division, is charged with intentionally and without authorization gaining access to federal computers, preventing the authorized use of the machines and causing a loss of at least of $1,000.

He is the first person to be prosecuted under a portion of the 1986 Computer Fraud and Abuse Act, and faces up to five years in prison and a $250,000 fine if convicted of the felony.

Meltzer said Morris took advantage of flaws in existing computer systems, but said the flaws did not create the damage witnesses from 14 institutions testified was created by the worm program.

''Indeed, Robert Morris did not put those bugs in the software, but those weaknesses did not create the worm. Robert Morris created the worm,'' Meltzer said.

Meltzer told jurors that the arguments he expected defense attorney Thomas Guidoboni to offer later Monday did not constitute a valid defense.

''The fact that the worm did not cause permanent damage to computer files, when it could have, is not a defense to this crime,'' Meltzer said.

Guidoboni was expected to argue in his closing statement the program was an experiment that went wrong and that Morris intended no harm.

Meltzer told the jury, ''Each and every one of you must understand that the worm was not merely a mistake. It was a crime against the government of the United States.''

Morris was suspended from Cornell after a university committee determined he worked alone on the program. The panel said the program propagated itself through a computer system and was therefore a ''worm'' and not

technically a computer ''virus,'' which is a program that inserts itself into a host program to propagate.

Testifying in his own defense Thursday, Morris said he miscalculated while writing the program, which he termed a ''dismal failure.''

#90022u1221 01/22/1990 ~United Press International

JOHANNESBURG (JAN. 22) UPI - At least 10 people were killed and more than a dozen private homes damaged in arson attacks in black townships over the weekend, police said Monday.

The worst weekend incident occurred in the township of Kwa Makutha in strife-torn Natal province, where a woman and two children were burned to death when arsonists attack their house with a gasoline bomb, a police statement said.

In the Natal province township of Sweetwaters, hit by a wave of factional violence last week, police said a 17-year-old youth was stabbed to death.

Police reported two killed in two other incidents near the central city of Bloemfontein and the east coast town of Margate.

Monday's unrest report raised to 10 the number known to have been killed Saturday and Sunday. On Sunday, police reported four killed in Natal.

The province has been the scene of an intense power struggle between supporters of conservative Zulu leader Mangosuthu Buthelezi and the more radical United Democratic Front, a struggle that has left an estimated 3,000 dead since 1987.

#90022u1255 01/22/1990 ~United Press International
BONN, West Germany (JAN. 22) UPI - The government said Monday West Germany's seven-year economic boom would continue this year with a 3 percent growth rate, booming investment and higher income.

''It is clearly continuing to go uphill,'' Economics Minister Helmut Haussmann said, presenting the government's 1990 Annual Economic Report at a news conference.

Haussmann contrasted West Germany's economic success with the failure of East Germany's socialist economy.

''Socialism is dead economically,'' he said. ''Any reform effort amounts to little more than playing with a dead body.''

The report forecast West Germany's Gross National Product would increase by at least 3 percent in 1990, following its record 4 percent growth last year.

Exports were expected to grow by 5 percent to 6 percent in real terms, down from the 10-percent record high in 1989, while imports were forecast to grow by 7 percent.

Haussmann said the government expected economic activity to be spurred by a 3 percent to 5 percent increase in private spending while prices were likely to remain stable with a low increase rate of 2.5 percent.

Economic developments were bound to reflect the recent changes in Eastern Europe, the report said.

The opening up of East German and other Eastern European markets was expected to result in a further increase of investment levels which already grew by 7 percent in 1989.

The continuing influx of East Germans and ethnic Germans from other Eastern European countries, combined with a resulting housing shortage, was expected to boost investment in the construction sector by 4 percent to 5 percent in 1990.

Although the report foresaw job openings would increase by about 300,000, unemployment figures were not expected to decline because of the continuing influx of immigrants from Eastern Europe who have a claim to West German citizenship.

Last year, about 720,000 East Germans and ethnic Germans emigrated to West Germany.

BOSTON (JAN. 22) UPI - Vice President Dan Quayle visited a grammar school Monday in a Boston neighborhood shaken by racial tensions, urging students to understand the importance of education and the dangers of drug use.

Quayle, who braved the second day of a major New England snowstorm for a full day of activities in Boston, sat hunched in a small classroom chair at the Our Lady of Perpetual Help Grammar School listening in on a first-grade class and answering students' questions.

Asked by one child if his job was hard, Quayle responded, ''I wouldn't call it a hard job. There are many challenges. It's easy to work with President Bush. The president is a very honorable, decent, caring person.''

Later Quayle met privately with a parent-teacher council at the school and then addressed a school assembly of about 150 children. He spoke of the importance of education and of abstaining from drug use.

''I want you to know how important education is because you are learning about the importance of the individual,'' he said.

''Have hope, kids. You have a tremendous group of people here,'' he said, referring to teachers and administrators at the school. ''I care about you. The president cares about you.''

At one point, Quayle explained Bush's ''thousand points of light'' campaign philosophy promoting American volunteerism, pointing to the school's teachers as an example.

''He's talking about your teachers, who are trying to help you,'' Quayle said. ''You may not think of your teacher as a shining light every day, but let me tell you something, she is.''

Quayle made no mention of racial problems that have plagued the Mission Hill neighborhood since the Oct. 23, 1989, shooting of a pregnant lawyer in that area.

Boston furrier Charles Stuart had initially told police a black gunman robbed and shot he and his wife, Carol, that day. But authorities now believe Charles Stuart, who committed suicide earlier this month, fabricated the story and had killed his wife and wounded himself in an elaborate scheme to collect insurance money.

The incident, which initially gained the nation's sympathy, outraged Boston's black community - particularly the Mission Hill neighborhood, where police last fall aggressively searched for a possible suspect in the slaying.

Later Monday, Quayle was to address a Massachusetts Republican Party fund-raising luncheon in downtown Boston and a luncheon of the Boston Police Patrolmen's Association, which endorsed the Bush-Quayle ticket in the 1988 presidential race against Massachusetts Democratic Gov. Michael Dukakis.

LOS ANGELES (JAN. 22) UPI - Ousted Panamanian strongman Manuel Noriega may have stockpiled a personal fortune of up to $300 million, including a $27 million castle in France, the Los Angeles Times reported Monday.

But a Monday story in The Miami Herald said the State Department had grossly overestimated Noriega's wealth and that many of the assets attributed to him actually belonged to friends or to the Panamanian Defense Forces.

''All these properties cited by the U.S. government exist but were not his '' The Herald quoted Mario Rognoni, a former commerce minister with the Noriega regime, as saying.

''It's like saying that Camp David belongs to (President) Bush.''

The Times, quoting U.S. and Panamanian sources, said the U.S. government believes Noriega sold Panamanian visas at huge prices to Cuban and Chinese citizens desperate to leave their countries.

Up to 18,000 immigrants, some who paid $10,000 or more for the documents, are believed to have entered Panama under the scheme, which was coordinated by Noriega, the newspaper said. One source described as knowledgeable estimated that Noriega, currently in U.S. custody in Miami facing drug trafficking charges, personally made more than $100 million from the scheme, the Times said.

Noriega is also believed to have made vast sums from his stewardship of the country's customs and tax systems, and his relationship with Colombian drug cartels, which allegedly paid him for his assistance in allowing drug runners to use Panama as a base, the Times said.

Included in the fortune, the Times said, is a surprising amount of real estate, including a castle in the south of France, a large estate in Sweden and expensive houses in Europe.

The Times quoted Panamanian Controller-General Ruben Carles as saying that the new government plans to stake a formal claim to the Noriega wealth, possibly as early as Monday.

The Herald, however, said documents emerging from Panamanian government offices follwing the Dec. 20 invasion show that many of the assets thought to be Noriega's were not actually his.

For example, in an August speech to the Organization of American States, U.S. Deputy Secretary of State Lawrence Eagleburger said Noriega owned a Bowing 727 aircraft, three Lear jets and three luxury boats - the Macho I, Macho II and Macho III.

In reality, The Herald said, documents found in government offices show none of the boats and planes were Noriega's. The Boeing 727 jet was first acquired by the state-run Air Panama airline and later transferred to Panama Defense Forces, air traffic authorities said.

One of the three executive jets was rented by the Panama Defense Forces from a Miami company, and a second appears to be owned by Carlos Duque, a businessman and associate of Noriega. The investigators said they did not know of a third jet used by Noriega.

The Macho I and Macho II yachts were owned by Carlos Wittgreen, another businessman who profited from his association with Noreiga, The Herald said. No records on the third boat have been found.

Eagleburger's speech also cited ''nearly 50 valuable oil paintings'' in the general's home in Panama City. But reporters who toured the home after the U.S. invasion found only about two dozen oil paintings, mostly gifts to the general from unknown Panamanian artists.

None was worth more than $2,000, The Herald quoted an art connoisseur as saying.

The French castle is owned by a Noriega relative, The Herald said.

The State Department listing of Noriega's fortune also included a $60,000 family mansion in Panama City, a vacation home in Madden Lake, Panama, and several luxury homes in the Dominican Republic.

Those, and other smaller properties in Panama, are registered under Noriega's name or those of relatives, The Herald quoted Panamanian officials as saying. But legal ownership of the foreign properties remains to be established, they said.

The $25 million Noriega reportedly had in an account at the Bank of Credit and Commerce International was actually a Panama Defense Force Account, The Herald said. And most of the pornographic books, voodoo objects and statues displayed in Noriega's home were gifts from constituents, the newspaper said.

''To pretend that he somehow purchased all these things is crazy,'' said Eliecer Gaitan, head of Noriega's 60-man personal guard.

MATAGORDA, TX (JAN. 22) UPI - Volunteers sloshing through marsh waters and mud Monday pressed the grim task of collecting the carcasses of 25 dolphins in East Matagorda Bay while keeping a watch for more dead mammals.

It was not known what killed apparently the entire population of Atlantic bottlenose dolphins in the nearly landlocked section of the bay, and biologists said it was too early to tell if the deaths could spread along the Texas Gulf Coast.

''We have not seen any live dolphins in East Matagorda Bay,'' said Dr. Jackie Cole, a veterinarian with the Texas Marine Mammal Stranding Network. ''We have been crossing the area the last three days in helicopters. You would think we would see a live dolphin if there are any.''

The dead dolphins found so far are decomposed enough that if whatever killed them was spreading down the coast, more carcasses should have been found in other areas, Cole said.

''But it's a little early to say,'' she said. ''We're concerned about it, but we're not scared to death because we're not really seeing a lot of extra numbers coming up. We should have seen larger numbers in the last couple of weeks if it has spread.''

Fifteen carcasses were pulled from shallow waters Sunday, and efforts to retrieve the others continued Monday. Searchers also were looking in a wider area for additional dead dolphins.

''It's a very difficult task because the water where the dolphins are being found is only about six inches deep,'' Cole said. ''That's too shallow for a boat and too deep for a truck. People are having to get out of boats and wade through the mud to drag the dolphins out to the boats.''

Immediate speculation on the cause of the deaths focused on record cold in December that left the bay iced over, said Steve Marwitz, a biologist with the Texas Parks and Wildlife Department.

''Right now, we're looking at it (the cause) being the freeze that we had around Christmastime, but we're not absolutely sure,'' he said.

The dolphins could have suffocated or developed pneumonia if the ice kept them from surfacing to gain air, biologists said.

''It's never happened before,'' Matagorda fisherman H.F. Fuselier said of the die off. ''It ain't fair, it ain't right.''

The carcasses are being frozen until tests can be performed. Biologists said it could be several weeks before lab results are available.

''It was a complete cross-section of the population,'' Cole said of the dead dolphins. ''There were very old animals, there were juveniles. Some were pregnant females with either neonates freshly born or aborted right before death.

''It's extremely alarming becuase if it's just East Matagorda Bay and it was a die off concerned with the freeze, what we've lost is an entire family, an entire group that was sort of land locked in there. That's sad. That's incredibly sad. If it was not related to the freeze, then to have a die off of this size is a concern if it begins to spread up and down the coast.''

Marwitz said the stranding network, a volunteer operation, was notified of the stranding Saturday by a helicopter pilot who flew over the bay.

Texas Game Warden Arthur Lawrence noted that the late December freeze killed thousands of fish along the state's coastline.

''There was a considerable amount of ice out there,'' he said. ''These are primarily resident animals who stay primarily in this almost landlocked East Matagorda Bay.''

Biologists were not sure why the dolphins' bodies did not surface sooner if they died in December, but some said diverse tides and winds could have been responsible, while others said the dead dolphins may have sunk and were only brought up by the advanced stage of decomposition.

#90022u1315 01/22/1990 ~United Press International

NEW DELHI, INDIA (JAN. 22) UPI - The government Monday formally alleged kickbacks were paid in a $1.3 billion artillery purchase from A.B. Bofors, filing preliminary charges against unnamed Indian officials and past and present officers of the Swedish arms firm.

The preliminary charges, outlined in a 66-page First Information Report lodged with Magistrate R.C. Jain, also targeted the company's one-time New Delhi agent, London-based Indian businessman G.P. Hinduja.

The document also referred to dummy corporations that controlled secret Swiss and Panamanian bank accounts, into which about $38 million was

deposited by Bofors.

Announcing the development, the head of India's premier police intelligence agency said that, ''if necessary,'' investigators would question former Prime Minister Rajiv Gandhi and others who served in his government.

''The (report) is a launching pad to mount a full-fledged investigation,'' Rajendra Sekhar, the chief of the Central Bureau of Investigation - India's equivalent of the FBI - told a news conference.

''We are convinced ... a case has been made out and are justified to file the case,'' said Sekhar, who recently replaced a CBI chief widely believed to have impeded an investigation into the scandal to protect his superiors.

He said his agency would formally approach Swiss banking officials for cooperation. The Swiss previously declined to help because Gandhi's government did not meet a requirement of filing criminal charges.

The scandal erupted in April 1987, when state-run Swedish Radio reported that Bofors paid massive kickbacks to Indian officials via middlemen to win the howitzer contract, despite an order by Gandhi banning agents in arms deals.

Sekhar said the new report contained charges of corruption, criminal conspiracy to hide wrongdoing and abuse of power in the $1.3 billion purchase of 400 self-propelled 155mm howitzers from Bofors in Sweden's biggest export deal.

The report named a former Bofors president, Martin Arbdo, who was recently convicted in Sweden of illegal arms sales, as well as unnamed directors of the firm, its former Indian agent, W.N. Chadha and his company, Hinduja, and ''certain public servants of the government of India.''

Also targeted were the dummy companies Svenska, A.E. Services and Pitco-Moresco-Moineao.

The document filed Monday charged Bofors violated the ban on middlemen, a finding originally confirmed in a 1987 investigative report by the Swedish National Audit Bureau, which identified Chadha as one of the go-betweens. Hinduja's firm also has been linked in a newspaper report to a secret Swiss account.

Bofors contended the funds paid were ''winding-up charges'' it had to pay representatives to cancel contracts and comply with the ban on middlemen. But the new report said, ''Bofors falsely claimed to have terminated the agencies.''

The charges are the latest move taken by the new minority National Front government of Prime Minister V.P. Singh to fulfill a pledge made during the campaign for November parliamentary elections to expose alleged wrongdoing in India's largest-ever foreign military purchase.

Allegations that high-ranking members of Gandhi's Congress (I) Party shared in illegal kickbacks from Bofors helped deprive the party of the votes required to retain power in the polls.

Opponents charged that Gandhi, who was defense minister when the deal was signed in 1986, and members of his family accepted money. No evidence has been made public to support the allegations, which are vehemently denied by the former prime minister.

Sekhar said his agency would also look into the Gandhi's refusal to cancel the artillery contract after the scandal broke, as recommended by a number of senior officials.

#90022u1328 01/22/1990 ~United Press International

GENEVA (JAN. 22) UPI - The United States and Soviet Union, in a breakthrough step towards a strategic arms reduction treaty, said Monday they have reached agreement on reciprocal trial inspections of each side's nuclear warheads.

Letters formalizing accord on the inspections were signed and exchanged by chief arms negotiators at an earlier than scheduled resumption of the talks on 50 percent cuts in long-range strategic nuclear arsenals.

U.S. delegate Richard Burt and his Soviet counterpart, Yuri Nazarkin, have instructions from presidents George Bush and Mikhail Gorbachev to complete a basic treaty outline in time for the next superpower summit in June.

At the last round of talks, which ended Dec. 8, the two powers agreed to experiment with such proposed treaty compliance verification measures as ''tagging,'' or electronically labeling, missiles and putting heavy bombers on display.

But agreement to look at each other's nuclear warheads would have been unthinkable one year ago and resulted from what Burt and Nazarkin called ''a new era'' in superpower relations.

''This agreement to conduct trial re-entry vehicle inspections marks the first time in history that the United States and the Soviet Union will inspect each other's nuclear warheads,'' an American delegation statement said.

''As such, it is not only an important step toward an effectively verifiably START (Strategic Arms Limitation) treaty, but also a step toward greater transparency, and, hence, greater predictability, in the U.S.-Soviet strategic relationship,'' it said.

The statement said that U.S. experts will demonstrate procedures for monitoring warheads for the Peacekeeper land-based intercontinental missile and the Trident II sea-launched strategic missiles. Moscow will do the same for warheads on its SS-18 intercontinental and SS-N-23 sea-launched missiles.

''A date will soon be set for the first trial inspections, which will be in the United States of a Peacekeeper missile,'' the statement said.

''The purpose of the trial inspections is to demonstrate procedures for verifying that the number of re-entry vehicles on a ballistic missile is no greater than the number permitted on that type of missile, as will be specified in the START treaty,'' it said.

Re-entry vehicles are commonly known as warheads. Up to 10 in number, they separate from the ''delivery vehicle'' - a missile or bomber - at high altitude and guide themselves down to strike different pre-assigned targets.

Washington and Moscow aim in the planned START treaty to limit each other to 6,000 strategic nuclear warheads on 1,600 missiles and bombers.

Negotiators are working on a draft treaty outline and accompanying protocols which already run to more than 1,000 pages.

''There is a a good chance of having the major pieces together by June, but everyone, including President Bush, realizes that the final legal language needed for signing a treaty will take longer,'' an American delegate said.

The latest round of negotiations was the 13th since the outset in 1985 and was opened by Burt and Nazarkin at a one-on-one meeting in the afternoon at the U.S. delegation.

Under pressure from the national leaders, the talks were resumed without waiting as had been planned until after the Feb. 6-7 meeting in Moscow between U.S. Secretary of State James Baker and Soviet foreign minister Eduard Shevardnadze.

Officials said Burt and Nazarkin would go to Moscow for that meeting and probably receive new instructions designed to accelerate work on the START treaty.

Negotiations will mainly take place in various working groups and likely

run without break to around the end of May, they said.

Baker said recently that presidents Bush and Gorbachev want at least a ''political agreement'' on a START treaty in time for their June summit in Washington.

The Geneva talks originally covered medium-range missiles as well as strategic weapons and anti-missile Star Wars space defense research.

Elimination of ground-based intermediate missiles was reached in 1987 when Gorbachev accepted on-site compliance inspections and dropped demands for a parallel ban on the U.S. Strategic Defense Initiative, or SDI, space program.

One major issue for reducing long-range weapons involves sea-launched subsonic and low-flying cruise missiles. Moscow wants them included in the treaty, but Washington says verification would involve overly intrusive inspection of ships and naval ports.

#90022u1337 01/22/1990 ~United Press International

WASHINGTON (JAN. 22) UPI - President Bush and Congress meet on a collision course Wednesday in a vote that will reflect widespread displeasure with his diplomatic overtures to China and concern over the repression of human rights in the world's most populous nation.

The House is expected to vote by a crushing margin to kill the president's Nov. 30 veto of a bill extending visa extensions for Chinese scholars in the United States. Senate Republican leader Robert Dole of Kansas said there is a chance the veto may be upheld in the Senate.

The votes will be first opportunity for Congress since its two months' recess to express opposition and discontent with the president's politically risky efforts to improve relations with China since its brutal crackdown on pro-democracy demonstrators in Tiananmen Square last June.

Democratic leaders have accused Bush of ''kowtowing'' to China's hard-line leaders by sending two of his senior advisers on secret missions to Beijing in July and December, and by easing political and economic sanctions he ordered to show American outrage about the Tiananmen Square tragedy.

Bush defended the two missions by Brent Scowcroft, his national security affairs adviser, and Deputy Secretary of State Lawrence Eagleburger as vital to maintaining communications with the Chinese, giving him the forum to press Beijing for moderation.

But the gamble of diplomacy has played poorly in Congress, particularly in the House. Republicans are lining up with Democrats to override the president's veto of the bill that would allow more than 33,000 Chinese nationals on student visas to seek permanent resident status without first returning to China for two years.

The House approved the bill, 403-0, in November, and the Senate approved it by a unanimous voice vote. Bush put the protections into force by executive action, but it was not enough for Congress, including one of the president's strongest supporters, Rep. William Broomfield, R-Mich.

''There is no intention on the part of the president to change the status of these students, but this is an opportunity for Congress to go on record about how we feel about human rights in China,'' Broomfield said.

Scowcroft pressed China to act in several areas to improve its human rights record and to give Bush a political benefit for his efforts to improve relations.

The Chinese made several concessions - lifting martial law, allowing the Voice of America to reopen its bureau, a pledge not to sell ballistic missiles to Middle East nations, and calling for a U.N. role to settle the conflict in Kampuchea.

But VOA broadcasts are still jammed and student exchanges are cut back. There is a broad policy of political repression in China with untold numbers of political dissidents in jail. Two leaders of the pro-democracy movement have been in refuge in the American embassy in Beijing since June.

Broomfield called the lifting of martial law ''more blue smoke and mirrors '' saying political repression is still severe.

''Congress will not stand still for this,'' he said. ''The lifting of martial law is not enough. While the administration has given its assurances (on protections for Chinese students), it is important for Congress to express its attitude on human rights and send a strong signal to the Chinese leadership. It has got to do more to have better relations with the United States.''

#90022u1338 01/22/1990 ~United Press International

WASHINGTON (JAN. 22) UPI - In a policy shift prompted by pressure at home and abroad, the United States will support a relaxation of curbs on high-technology exports to reformist Central and East European nations, the White House announced Monday.

White House press secretary Marlin Fitzwater said the National Security

Council has recommended ''a new approach'' to export controls in recognition of democratic change in Central and Eastern Europe and the decline in East-West tensions.

Although he said no final decisions had been made on the scope of that new policy, Fitzwater said the United States was preparing ''certain immediate steps to adapt to this changing environment'' of improved East-West relations.

While still committed to the protection of ''truly strategic goods and technologies,'' he said the United States will support decontrol of ''off-the-shelf commodities readily available to the general public'' and a ''rapid modernization'' of the list of products now prohibited.

Fitzwater said the administration would agree to the sale of more powerful computers than those now available to the East Bloc and to looser rules on sales of some fiber optic telecommunications equipment and machine tools.

The revised U.S. position is to be formally presented at a meeting next month of the Coordination Committee for Multilateral Export Control (COCOM), the organization through which the NATO allies, Japan and Australia regulate high-tech trade with communist countries.

U.S. officials were in Europe this week to brief allied governments on the long-awaited change in policy by the United States, which has long taken a harder-line position than other COCOM members on export control.

The administration, which has had a long and sometimes intense internal debate over how fast to relax export controls in response to the liberalization under way in Eastern Europe,

Within the administration, the issue has been the source of a long, intense internal debate that has seen the Pentagon argue for continued tight hold on technology the Soviet Union and its allies might use for strategic gain.

But with countries such as Poland and Hungary desperate for Western technology to help modernize their economies, Fitzwater said the administration concluded ''that COCOM can and should adapt to the changes in Eastern Europe in a comprehensive yet flexible manner.''

''The U.S. is advocating a response that will complement Western efforts to support reform and development in these countries while protecting critical strategic interests,'' he added.

Officials have said the new policy will be one of differentiation, permitting permit sales of some of previously barred products to East Bloc nations but continuing to prohibit some of the same sensitive exports to

the Soviet Union.

In explaining that approach last month, Commerce Secretary Robert Mosbacher said that even as the fall of the Iron Curtain has moved the focus of East-West relations from military competition to economic cooperation, the Soviet Union remains ''the only nation that I know of in the world that has the capability of being a serious threat to the United States.''

The more open door for high-tech exports is conditioned on strict terms for ensuring those products are used only for civilian purposes and firm guarantees from Poland, Hungary and other countries that may benefit from the new rules that items still on the Soviet COCOM-restricted list will not fall into Soviet hands.

The United States has been under pressure for some time from its European allies and from American business interests to open the door to expanded trade with the East Bloc in computers and other sophisticated technology.

Such exports have been restricted in the past for strategic reasons to prevent the Soviet Union and its client states from gaining access to Western technology with military applications.

However, as East European nations have thrown out their communist rulers and moved away from direct control from Moscow, demand has grown for the West to provide those countries with technology needed to modernize their economies.

#90022u1343 01/22/1990 ~United Press International

WARSAW, POLAND (JAN. 22) UPI - About 60 students invaded the regional Communist Party headquarters in Krakow Monday and seized private files in a simmering dispute over the disposition of party property following the end of its monopoly on power.

Squads of police surrounded the four-story building after it was occupied by activists from the political party KPN, or the Confederation for Independent Poland, and from the Independent Students Association.

In Gdansk, Solidarity leader Lech Walesa met with Tadeus Fiszbach, communist deputy speaker of the Sejm, the lower house of the Polish Parliament, but they disagreed on how to resolve the property matter.

''The parties' properties are the property of society,'' he said, referring to the communist Polish United Workers' Party, or PZPR, as well as two other minor parties formerly controlled by the communists.

Fiszbach, who represents the Communist Party's progressive wing, said that while everything should be correctly accounted for, ''No one should have anything that is his taken away from him.''

At issue are vast assets held by the Communist Party, including hundreds of buildings housing publishing houses, scientific institutions and other enterprises, parcels of land and other property throughout Poland. They were directly seized after the communist takeover during World War II or turned over for party use by the communist-controlled government.

The extent of the holdings has not been publicly disclosed.

A spokesman for the occupying youths in Krakow said they seized personnel files for ''safekeeping.'' He said a search of the basement found piles of archives, including anti-Solidarity propaganda materials left over from the parliamentary elections in June 1989 that brought Solidarity to power.

''We think that the whole property of PZPR should be turned back to the nation, and, in the case of Krakow, to the municipal authorities,'' spokesman Jan Chlapkowski said by telephone. ''We want the party headquarters in Krakow to become a hospital or to be used by NZS.''

Walesa's meeting with Fiszbach was seen as support for Fiszbach's possible leadership of a new Communist Party that is expected to emerge from a special party congress beginning Saturday.

''If the slogans and ideas for which Mr. Fiszbach stands were present for the past 10 years, we would have been much further toward reforming Poland '' Walesa said.

The party property issue has been simmering for several weeks, and there have been several previous occupations of party headquarters elsewhere.

The Sejm held a stormy debate on the issue Saturday and will return to it Thursday.

The Sejm will consider a compromise resolution, drawn up by both Solidarity and communist deputies, that would order the government to draw up by March 31 a list of the properties and determine on which of them the party holds title.

When the property-holder does not have a proper title, ''the property in accordance with binding regulations ought to be passed on to its proper owners,'' the resolution said.

Such a step would force the party to give up a substantial portion of its property.

Solidarity deputies earlier had proposed a law that would call for outright confiscation of all party properties.

''The adoption of this law would be a revengeful abuse of freshly won power,'' complained a commentary published Monday in the party daily Trybuna Ludu.

''The bill also reinforced anti-reform currents in the U.S.S.R.,'' it said referring to the growing opposition to the glasnost and perestroika of Soviet President Mikhail Gorbachev.

#90022u1362 01/22/1990 ~United Press International

LONDON (JAN. 22) UPI - Stock prices closed sharply lower in thin trading Monday on the London International stock exchange as worries over higher wage demands, inflation and interest rates continued to plague the market.

The Financial Times 100-stock index, which slipped 1.9 points Friday and 45.01 points overall last week, tumbled 37.9 points to 2,297.1. The narrower top 30 industrial average fell 27.9 points to 1,840.1.

Volume amounted to around 360 million shares, compared with 391 million shares changing hands on Friday.

Analysts said market sentiment remained fragile, adding that genuine buying interest was not likely to emerge until concerns over domestic and foreign economies subside.

Stocks also moved lower on news from the Central Statistical Office that Britain's industrial output fell a provisional, seasonally adjusted 0.5 percent in November from October, but was up 0.6 percent from a year ago.

Industrial output measures manufacturing and energy production.

Manufacturing production fell 0.7 percent in November from a month earlier but was up 2.0 percent year over year, the government agency said.

Economists had been expecting a 0.3 percent rise in industrial output and said the disappointing figures reflected the effects of high interest rates on production.

In a separate report, the Department of Employment said wages and salaries per unit of output in manufacturing industry rose 1.2 percent in November from October and were up 5.5 percent from a year ago.

Among the most widely traded stocks, Coloroll, the wallpaper and paints firm, lost more than half its value, tumbling 53 cents to 46 cents a share

after issuing a second half profits warning.

Rechem Environmental Services recovered from the profits warning it issued last week, adding 27 cents to $8.40, while Burmah Oil lost 23 cents $10.32 as bid hopes faded.

Rank Organization gained 14 cents to $13.63. The entertainment and leisure group is expected to report its latest earnings Thursday.

Racal Telecom gained 14 cents to $5.93 ahead of the company's presentation next Wednesday to market analysts.

Cable & Wirless lost 21 cents to $8.54 after investment bank Barclays de Zoete Wedd switched its recommendation from buy to hold.

Rio Tinto Zinc, the world's largest mining group, fell 19 cents to $8.54, reflecting the mood of brokers on metal prices.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed slightly higher in light trading.

The German Stock Index, which tumbled 82.10 points last week, including 5.61 points Friday, gained 5.74 points to 1,779.30.

#90022u1369 01/22/1990 ~United Press International

VATICAN CITY (JAN. 22) UPI - Pope John Paul II said Monday that ''new ways of thinking'' are needed to end the violence in Northern Ireland.

He referred to ''the tragedy of Northern Ireland, where violence continues to reap death, injury and destruction, as well as untold material and spiritual privation for the members of both communities in that province.''

The pope was addressing the Irish Republic's new ambassador to the Holy See, Patrick Power, 63, during a Vatican ceremony at which the ambassador presented his credentials.

John Paul's condemnation of the violence between Catholic and Protestant extremists in the British province of Northern Ireland was in line with his condemnation of what he called ''the men of violence'' during his visit to the independent Irish Republic in September 1979.

''The Holy See expresses ready support for those steps being taken by the governments involved to bring about the conditions required for peace, especially the elimination of injustices and discrimination,'' the pope told the ambassador.

''We can only hope that the people of Northern Ireland themselves will urge their representatives to engage in dialogue about the situation as it really is, a dialogue without partisan, constitutional or political prejudice and without exclusion,'' he said.

''There, too, new ways of thinking are needed, more fully centered on achieving the integral well-being of all sectors of the population,'' he said. ''I express the hope to you that the steps toward greater harmony in Europe will become ever more a reality in Northern Ireland as well.''

The pope praised the role Ireland played ''in the historical development of this continent'' and expressed the hope that ''the best energies of the present generation of Irish men and women may be directed in a similar way.''

Noting that the new ambassador's mission coincided with Ireland's presidency of the European Economic Community, the pope said, ''This is a time of extraordinary ferment and change in Europe itself.

''A new era seems to be dawning, marked by great hope of freedom, of responsibility, of solidarity, of spirituality,'' the pope said. ''People everywhere are looking with intense yearning towards a more peaceful and productive future.

''Old ways of thinking about development, defense, unity, and even the environment often seem inadequate to the new situations arising with increasing rapidity,'' he said.

''But at the same time, no one can overlook the fact that former uncertainties and threats have been replaced with equally challenging and potentially destabilizing tendencies which those responsible for the life of nations are called upon to meet with intelligence and foresight,'' the pope said.

#90022u1389 01/22/1990 ~United Press International

NEW YORK (JAN. 22) UPI - Small investors took their worst beating in more than a year on the stock and bond markets last week, according to a Money magazine survey released Monday.

The magazine's Small Investor Index declined 1.1 percent, almost twice the drop for the week that included the Oct. 13, 1989 mini-crash when the Dow Jones Industrial Average fell 190 points.

The index, which tracks individual investors' performance, showed the value of an average adult's holdings fell $448 last week, standing at $41,546.

Stocks fell $378 and bonds fell $94, the index showed.

The drop in the index was the worst since August 1988, the magazine said.

The Dow has fallen 144 points since reaching a high of 2810 Jan. 2, due to rising interest rates and disappointing fourth-quarter earnings reports by several major companies, the magazine said. Also, investors' fears of higher inflation have caused prices of long-term bonds to drop as much as 3.8 percent, Money said.

Analysts expect further poor earnings reports will depress stock prices over the next few weeks, the magazine said.

A rapid rise in money-market funds assets, which were up $14.3 billion over the past two weeks, suggests small investors are building cash reserves in anticipation of further market declines, the magazine said.

''Raising your cash reserves isn't a bad thing to do if you're a long-term investor,'' said Douglas Loudon, market strategist at Scudder Stevens & Clark in New York. ''Stocks are cheaper now than they were a month ago, but they may be even cheaper a month from now.''

Individual investors continue to invest heavily in stock mutual funds, however, the magazine noted. At the Vanguard group, for example, equity funds attracted $245 million during the first 12 days of January, compared with $322 million in the entire month of January 1989, the magazine said.

The magazine's index is based on a portfolio that includes stocks, bonds, short-term assets such as certificates of deposit as well as real estate and gold.

#90022u1435 01/22/1990 ~United Press International

SRINAGAR, INDIA (JAN. 22) UPI - A gunfight Monday between state and federal police, apparently stoked by tensions over growing pro-secession violence in Kashmir, left an officer and a bystander dead, while related unrest claimed at least six other lives, official sources said.

The sources also confirmed at least 35 protesters were killed by security forces during weekend rioting in Srinagar, in the worst unrest related to a popular movement against Indian rule in the predominantly Moslem region of Kashmir.

Authorities struggling to contain turmoil leaving more than 50 dead this year clamped curfews on seven more towns to head off possible protests over the violence Saturday and Sunday.

Curfews are now imposed on at least 11 towns, where troops ordered to shoot rioters on sight backed local and paramilitary police.

In New Delhi, meanwhile, Pakistan Foreign Minister Shahabzada Yaqub Khan spoke with Prime Minister V.P. Singh and Foreign Minister Inder Kumar Gujral. In the talks, scheduled to continue Tuesday, India was expected to reiterate a demand that Pakistan end its alleged support for militant groups in Kashmir.

Foreign Ministry spokesman Aftab Seth would not reveal details of the talks, saying only "all subjects" involved in frosty Indo-Pakistan relations were considered.

India and Pakistan dispute each other's claims to Kashmir and have battled there in all three wars they have fought since 1948. India now controls two-thirds of Kashmir, which makes up the northern half of the state of Jammu and Kashmir. Tensions with Pakistan have been rising over the Kashmir unrest.

Radical groups called for a strike across Kashmir to protest the exclusion of what they called "the aggrieved party" in the Indo-Pakistan talks, but curfews on virtually all major towns negated the impact of the strike.

In Srinagar, the state's summer capital, 400 miles north of New Delhi, tensions between officers of the Jammu and Kashmir Armored Police and the federal paramilitary Central Reserve Police Force ignited in a shootout, official sources said.

The sources said one state officer and a bystander was killed in the clash in the Shaheed Gunj locality, but could not say exactly what started the battle.

Many of the state's mostly Moslem policemen sympathize with secession demands and are resentful of the Hindu-dominated federal government contingents, especially because of their alleged excesses against Kashmiris.

Also, at least one CRPF officer was killed in the city's Hawal area in a clash between his unit and armed radicals, official sources said. They gave no further details.

Hours earlier in the same area, pro-secession demonstrators gathered in defiance of the curfew and hurled rocks at security personnel, who responded with gunfire that wounded three protesters, the sources said.

They said a Hindu bystander was killed when security forces in the Zainagar Mohalla area of the city fired on a few protesters violating

curfew.

A child was shot dead in cross fire between security personnel and militants concealed amid protesters in the Kanyar neighborhood, the sources said.

A new appeal for calm was issued by Jammu and Kashmir Gov. Jagmohan, who took control of the state on behalf of New Delhi on Friday following the resignation of the unpopular chief minister and his Cabinet.

Speaking on state-run radio, he asked ''those who have misguidedly come to possess illegal arms and weapons'' to surrender them.

Virtually all of Kashmir's 3 million Moslems back underground militant groups that have staged an escalating drive of shootings, bombings, arson and protests since August 1988 to end Indian rule of the picturesque Himala region.

Residents contend the area has been ignored by the Hindu-dominated central government and say Kashmir never got a choice - before or after the 1947 partition of the subcontinent - on joining India or Pakistan or becoming independent.

Communal bloodshed in India also has reinforced perceptions that the country's 100 million Moslems are discriminated against by the Hindu majority of more than 650 million.

Radical groups using modern arms and explosives are divided, some advocating a merger into Pakistan and others calling for complete independence.

India contends that Pakistan trains and arms radicals in camps on its side of the border. Pakistan denies the allegations, but militants have confirmed them.

#90022u1448 01/22/1990 ~United Press International

NEW YORK (JAN. 22) UPI - Former Houston police chief Lee Brown was sworn in by Mayor David Dinkins Monday as New York City's 36th police commissioner, promising to make the city safer and more livable.

Brown, 52, the city's second black police commissioner, took over a shrinking force plagued by a tightening budget and a tidal wave of violent crime and drugs.

He was selected despite strong pressure from some quarters to reappoint outgoing Commissioner Richard Condon, a veteran of the force.

After taking the oath in City Hall's packed Board of Estimate chamber on a Bible held by his wife, Yvonne, Brown received a standing ovation from a host of city and state law enforcement officials and political leaders.

''I look forward to striving with you, Mr. Mayor, and the men and women from the New York City Police Department and the people of this city of New York for bringing about a safer, for bringing about a more secure, for bringing about a more livable city for all New Yorkers,'' Brown said.

He described the police force as the largest and most respected in the nation and said to be its chief is ''to reach pinnacle of the American law enforcement profession and, for me, it is the realization of a lifetime ambition.''

Dinkins reminded the audience he promised the electorate during his mayoral campaign last year to be the toughest mayor on crime the city has ever seen and said he thought he had hired ''the wisest police official'' in America to head New York's ''finest.''

''Lee, the people of this city are aching. They hate drugs and what they are doing to our communities and children,'' he said. ''We despise the despair caused by crime and we are ready to join together to take back our streets and parks, by night as well as by day.''

Brown succeeded Condon, who was appointed by former Mayor Edward Koch to take over the department when Benjamin Ward, the city's first black police commissioner, retired for reasons of health last October.

Condon was openly resentful at having been passed over by Dinkins and was reported to be vacationing in Florida at the time of Brown's swearing-in.

#90022u1456 01/22/1990 ~United Press International

OTTAWA (JAN. 22) UPI - The planned American testing Tuesday of an unarmed cruise missile over Canada's northern territories will be virtually ignored by peace and environmental groups, a spokesman for the Toronto-based Greenpeace said Monday.

''We have no plans for action against it,'' Greenpeace spokesman David Croft said. ''The issue is by no means dead, but we are concentrating on other things.''

Late Monday night, a U.S. B-52 bomber with an unarmed missile cradled under its wing will leave Carswell Air Force Base in Texas. The missile will be launched in the air over the Beaufort Sea in the Canadian Arctic between 9:30 a.m. EST and 11:30 a.m. EST on Tuesday.

Earlier tests of the cruise missile and last year's test of an advanced ''stealth'' cruise missile were vigorously protested by peace groups.

Croft said the tests remained a ''crucial issue'' for Greenpeace and would become more important as Canada continues to test such destablizing weapons in the 1990s.

''The Canadian government has been unable to articulate a coherent defense policy,'' Croft said.

Canadian Forces spokesperson Jan Martinsen said in a telephone interview that the missile to be launched Tuesday will follow a four-hour course along the Mackenzie River to near Dawson Creek, British Columbia, and on to the target area at the Primrose Lake Evaluation Range at Cold Lake in northern Alberta.

Canadian fighter jets and U.S. Air Force F-15 and F-16 aircraft will attempt to locate and track the missile, Martinsen said. She said the missile will be accompanied by an advanced range instrumentation aircraft, which has the ability to take over manual control of the missile or terminate the test.

Canada has hosted free-flight testing of the cruise missile since February 1984 and the five-year agreement governing the tests was renewed last year until 1993. The agreement allows up to seven tests in any year.

In the last few years, tests of cruise missiles have been delayed 12 times because of bad weather. Martinsen expected the scheduled flight would proceed, since weather over northern Alberta is mild.

#90022u1480 01/22/1990 ~United Press International

HOLLYWOOD (JAN. 22) UPI - Karl Malden, president of the Academy of Motion Picture Arts and Sciences, and actress Geena Davis on Feb. 14 will announce the nominees in the 62nd annual Oscar race.

The announcements will be made at 5:30 a.m. for the convenience of the three major network early morning shows, which emanate from the East Coast to ensure maximum TV coverage of the event.

More than 300 members of the media will be on hand to record Oscar nominees in more than 20 categories to be revealed at the pre-dawn news conference.

"INDY" IS TOP GROSSER

So, you thought ''Bat Man'' was the top grossing movie in the world in 1989. Think again.

Paramount Pictures has announced that ''Indiana Jones and the Last Crusade'' grossed $440.1 million worldwide.

Barry London, president of Paramount's Motion Picture Group, said, ''As last year's largest-grossing film, 'Indiana Jones and the Last Crusade' shows the continuing importance of the growing global marketplace.''

The domestic gross for Indy was $196.2 million.

HARPER RETURNS

Valerie Harper returns to network television to star in a half-hour CBS-TV sitcom titled ''City.''

Scheduled to debut Jan. 29, ''City'' finds Harper in the role of Liz Gianni, a city manager driven by a desire to make her town a happier, gentler community.

Her work is complicated by the return home of a 19-year-old college drop-out daughter played by LuAnne Ponce and co-workers played by Todd Sussman, Tyra Ferrell, Sam Lloyd, Liz Torres and Mary Jo Kennan.

POITIER ROLE

Sidney Poitier will star in ''Separate but Equal,'' a four-hour, two-part ABC-TV mini-series in which he will portray Supreme Court Justice Thurgood Marshall.

The role will mark Poitier's first dramatic performance on TV since ''A Man is Ten Feet Tall,'' which was broadcast in 1955.

''Separate but Equal'' dramatizes the events leading to the U.S. Supreme Court's 1954 decision to desegregate the nation's schools. It is scheduled for broadcast during the network's 1990-91 season.

PLAY CAST

A trio of movie-TV actresses have joined forces to co-star in a stage production of the new play ''Meetin's on the Porch,'' written by Donald MacKechni and directed by Richard Oliver.

The cast stars Susan Clark, Patty Duke and Carrie Snodgress at the Canon Theater in Beverly Hills for a limited run ending March 4.

Set in a small Midwestern town, the story involves three women who grow up

together and share their experiences and secrets of love, death, marriage, children and adultry.

FRENCH LIMIT AMERICAN TV

The French government has banned the televising of Hollywood shows for 60 percent of primetime broadcasting.

Minister of Culture Jack Lang announced that French networks will be required to air European programming during 60 percent of all broadcasting with half of that French programming during prime hours from 6-11 p.m.

The regulations take effect Jan. 1, 1992.

#90022u1502 01/22/1990 ~United Press International
WASHINGTON (JAN. 22) UPI - Senior NAACP leaders told President Bush on Monday that racism and violence are increasing in the United States, and Bush pledged to use Justice Department resources to battle the problem.

Bush met for more than half an hour with the organizaton's executive director, Benjamin Hooks, Board of Directors Chairman William Gibson and officials with a number of NAACP offices from around the country.

The meeting was arranged as a follow-up to an earlier meeting that dealt with the package bombs sent to NAACP offices and judicial officials in the South.

''We're concerned about the climate that has caused race relations to deteriorate and increased acts of violence,'' Hooks said afterward, adding that he urged that there be greater contact between federal agents and his group's 1,700 chapter leaders.

Gibson termed the meeting productive and added, ''We are concerned about the climate of racism, the climate of race relationships in America ... (and) scizms between blacks and whites in America.''

Gibson said, ''We encouraged the president to use the office of president to get the word out that we feel there needs to be more negotiations, discussions between black and white America.''

He added that Bush agreed that the Justice Department's Community Relations Service be used to help the problem.

Gibson also said he suggested that Bush use his State of the Union address to focus on racism.

As for their assertion that racism was on the rise, Gibson said, ''We didn't get an assent, but he agreed that he would deal with the kind of remedies I felt were needed.''

Attorney General Dick Thornburgh and FBI Director William Sessions sat in on the meeting and will meet later with NAACP leaders. Gibson and Hooks said Thornburgh said progress was being made in the investigation into the bombings.

''We were fairly well satisfied that the Federal Bureau of Invstigation and the Justice Department were doing their best, but we came to make clear we want to stay with this and to make sure the president was exercising the proper direction in making sure this happens,'' Hooks said.

White House press secretary Marlin Fitzwater, asked about Hooks' contention that racism was on the rise, said, ''The president is very concerned about it. ... There's no place for racial bigotry, racisim in America.''

He noted Bush's desire that the Justice Department work on the issue and Bush's use of a variety of forums to declare that racism cannot be tolerated.

#90022u1519 01/22/1990 ~United Press International

WASHINGTON (JAN. 22) UPI - The Supreme Court tacitly gave its blessing Monday to random drug testing of some federal employees at the Justice Department and civilian Army workers, refusing to review a pair of decisions.

The court rejected appeals by the employees of rulings by the U.S. Circuit Court of Appeals for the District of Columbia.

The cases at issue concerned random drug testing of employees with top secret clearances in the Department of Justice and civilian workers in the Army's Alcohol and Drug Abuse Prevention and Control Program.

Last year, the Supreme Court narrowly upheld two job-related drug testing plans, one for Custom Service workers seeking certain jobs and the other covering railway workers involved in accidents. Those plans were not considered random, since they were triggered by certain actions, such as an accident or a job transfer.

At issue in the cases is whether such tests violate the Fourth Amemdment provisions against unreasonable search and seizure. A host of cases have arisen over drug testing, many of which are still working thier way through federal and state courts.

The various programs operate differently. In the private sector the most prevalant is pre-employment drug testing, while the federal government is pressing ahead with a plan to have employees already on the job face widespread, random tests.

In seeking high court review, attorneys representing the civilian Army workers said the court's previous drug testing rulings did not address the ''constitutionaly of a random drug testing program for employees who pose no direct or immediate threat to public safety or national security.''

Attorneys in the Justice Department case said the case would effect hundreds of thousands of federal employees who are facing similar tests.

#90022u1569 01/22/1990 ~United Press International

OSHAWA, Ontario (JAN. 22) UPI - General Motors of Canada said Monday production at its Oshawa No. 2 car assembly plant will be halted for one week beginning Feb. 5, idling about 3,500 workers.

GM Canada said in a statement ''the action was taken to balance inventories with current North American vehicle demand.''

Workers at the car plant assemble Buick Regal and Chevrolet Lumina models.

A spokesman for GM could not be reached immediately for further comment.

The auto maker had previously announced the indefinite layoff of about 800 workers from its Oshawa assembly plants and its Oshawa fabrication plant, effective Jan. 22.

Last week GM Canada announced an additional two-week layoff for 2,500 assembly workers at its full-size van plant in Scarborough, Ont. The workers have been off the job since Jan. 2.

#90022u1579 01/22/1990 ~United Press International
(JAN. 22) UPI - Tehran Radio reports Soviet troops sealed Azerbaijan's border with Iran today to end the flow of thousands of Azerbaijanis out of the republic. The broadcast says ''only those people from Soviet Azerbaijan who are already in Iran are being given permission to return.'' Soviet forces stormed Azerbaijan's capital during the weekend to end ethnic fighting.

Washington Mayor Marion Barry is scheduled to get the first of weekly court-ordered drug tests today, as city administrator Carol Thompson faces her first full workday as acting mayor. Barry is accused of buying and smoking crack cocaine. His lawyer says that ''at this point, resignation is NOT a viable option for the mayor.''

The captain of the Exxon Valdez told Life magazine that ''it gets kind of lonely'' being the only person charged with a crime in the nation's worst oil spill. Joseph Hazelwood goes on trial in Anchorage, Alaska, today, accused of criminal mischief after the tanker ran aground last March, spilling 11-Million gallons of oil.

Federal prosecutors in the New York trial of reputed Mafia honcho John Gotti hope their first witness today fingers Gotti as the head of the powerful Gambino syndicated crime family. A published report says Vincent ''the Fish'' Cafaro, a renowned mob informant, met Gotti four years ago in the Manhattan Correctional Center.

A published report says President Bush has reversed his opposition to the elevation of the Environmental Protection Agency to Cabinet-level status. Democratic leaders believe there's enough support on Capitol Hill to push through a measure to create a cabinet post to deal with the environment.

-30- 1826

#90022u1582 01/22/1990 ~United Press International
WASHINGTON (JAN. 22) UPI - Rep. Augustus Hawkins, D-Calif., chairman of the House Education and Labor Committee, called Monday for doubling the federal education budget and for requiring equal per-student spending in all districts of a given state.

On the eve of Congress's return to work, Hawkins also announced plans for legislation that would require an Education Department study on the affect of state and federal regulations on schools.

Education Department officials rejected the Hawkins proposals. They said enough money already is being spent on education, that it is not the federal government's job to equalize funding in the states, and that the time has come for regulations to be eased instead of studied.

The Hawkins plan calls for $24.2 billion in new education spending in the 1991 fiscal year, doubling 1990 levels. After Hawkins' proposal, the Committee for Education Funding, a coalition of 100 education organizations, called for a $30.5 billion increase.

Hawkins, accusing the Bush administration of ''suggesting one gimmick after another'' to cure the nation's educational woes, said the new spending would not require a tax increase but could be obtained by ''reordering'' priorities.

''I'm not so naive as to believe we're going to get every dollar of it. But that's what we're going to fight for,'' he said. ''The consequences of not spending this money is we'll become a second-rate nation.''

Hawkins also said he would introduce legislation Tuesday that would make federal education aid dependent on state and local funding per student being equal in all districts of a state.

Courts in several states have ruled disparaties between districts are unconstitutional, but the Supreme Court has said such state systems cannot be challenged under the U.S. Constitution.

In support of his proposal, Hawkins released a Congressional Research Service study that found education spending is twice as great in some districts as in others in more than half the states. In Illinois, for example, one elementary school district spent $1,162 per student and another $7,040, the study said.

Charles Kolb, undersecretary of education, said the Bush administration believes equalizing funding between districts ''is not a federal issue.''

Kolb refused to disclose how much education spending President Bush would seek in his 1991 budget but repeated the administration's position that school restructuring - not more spending - is the key to educational improvement.

#90022u1597 01/22/1990 ~United Press International

SAN FRANCISCO (JAN. 22) UPI - Network television news programs predominantly turned to Republican male experts from the East Coast to interpret events in 1988 and 1987, Mother Jones magazine reported.

The ten experts who appeared most often on the ABC, CBS, and NBC nightly news were "men rather than women, East Coasters rather than West and Republicans (along with a few conservative Democrats) rather than critics of the political establishment," according to a study published in the February-March issue of Mother Jones, an activist magazine based in San

Francisco.

The ten appeared 336 times during the two years, according to article co-authors Lawrence Soley, who conducted the study at the University of Minnesota, and Marc Cooper, who teaches media studies at California State University at Northridge. According to the study, the 10 were:

- William Schneider, 58 appearances, who taught politics at Harvard and is a fellow at the American Enterprise Institute think tank.
- Ed Rollins, 51 appearances, former campaign chairman for Jack Kemp.
- Norman Ornstein, 42 appearances, also a fellow at the American Enterprise Institute.
- Kevin Phillips, 43 appearances, former special assistant to John Mitchell when Mitchell was attorney general.
- Harrison Hickman, 33 appearances, Democratic pollster.
- Robert Beckel, 27 appearances, former campaign manager for Walter Mondale.
- David Gergen, 24, former communications director for President Reagan.
- Fouad Ajami, 21 appearances, professor at Johns Hopkins University who specializes in the Middle East.
- Steven Hess, 19 appearances, a fellow of the Brookings Institute who edited the 1976 Republican National Platform.
- Robert Squier, 18 appearances, former adviser to President Carter.

The article also cited a report by Fairness and Accuracy in Reporting last February indicating that ABC's "Nightline" most frequently interviewed white males associated with the Reagan administration.

LUSAKA, ZAMBIA (JAN. 22) UPI - Leaders of southern Africa's black-ruled ''Frontline States,'' attending a summit Monday with the leadership of the anti-apartheid African National Congress, endorsed a secret agenda offered by imprisoned ANC head Nelson Mandela for negotiations with the South African government.

The chairman of the six-nation Frontline organization, President Kenneth Kaunda of Zambi',,said Mandela's secret proposal contained 10 distinct points,but he refused to disclose any details. The ANC has also declined to make Mandela's agenda public.

''We have endorsed Mandela's proposals, which he put forward to the national executive committee of the ANC,'' Kaunda said of the document, which arrived at the ANC's headquarters-in-exile in Lusaka several weeks ago.

Mandela, 71, who was imprisoned for life in the 1960s for plotting to overthrow the white minority government of South Africa, is widely believed to have submitted the 10-point agenda to South African President Frederik de Klerk when the two men met in Cape Town in December.

Mandela, still serving his life term, has emerged as a key player in launching the power-sharing negotiations De Klerk proposed last year to end the country's racial conflict.

The summit, called at the request of the exiled ANC leadership, brought together the presidents of Angola, Botswana, Mozambique, Tanzania, Zimbabwe and Zambia.

Also present at the meeting were eight former political prisoners in South Africa, including former ANC Secretary-General Walter Siuslu, 77, who was freed unconditionally from life imprisonment by De Klerk in mid-October.

The summit followed the end Sunday of a three-day session of the ANC's national executive committee. The committee reasserted the ANC's willingness to negotiate with the Pretoria government if it meets key conditions.

Endorsed by the United Nations in the so-called Harare Declaration, these include the release of all political prisoners, including Mandela, and the lifting of a 3-year-old state of emergency.

BOSTON (JAN. 22) UPI - Environmentalists Monday called for a halt to new incinerator construction in Massachusetts, citing a threat to marine and human life by mercury emissions from the trash-burning plants.

Clean Water Action, a grassroots environmental group operating nationwide, released a report on how mercury in household products - such as batteries paints and plastics - is vaporized by trash incinerators and enters the food chain.

''New information on how mercury emissions from trash incinerators are contaminating our food supply shows a growing national threat to public health, and that Massachusetts is at special risk,'' said the report's author Robert Collins, the director of Clean Water Action's National Solid Waste Program.

The report recommends that Massachusetts prohibit construction of additional trash incinerators; separate and treat as hazardous waste items containing mercury and other heavy metals; study the effectiveness of pollution control equipment on incinerators; and test waterways regularly for mercury levels.

Collins presented the report at a news conference and later to a public hearing of the New England division of the Environmental Protection Agency

on proposed new federal regulations for trash incinerators. Similar hearings were held in Detroit and Seattle.

''These regulations totally ignore the mercury threat,'' Collins said. ''They give no standard at all for mercury and approve pollution control technology that is ineffective at controlling mercury.''

His report said pollution control equipment commonly used on Massachusetts trash incinerators is ineffective in controlling mercury emissions.

Massachusetts burns about 11,000 tons of trash daily - about 50 percent of its garbage and more than 14 percent of all trash incinerated in the nation, the report said. The study estimated the state's eight operating incinerators in the state release about 19 tons of mercury each year.

Incinerators, which operate at temperatures as high as 2000 degrees, vaporize mercury found in household products. The mercury is then released into the air as a gas and deposited by rain or snow onto the land and in waterways, the report said.

Mercury's most significant affect on health is through the food chain. Mercury in aquatic birds or fish eaten by humans is retained by the body, gradually accumulating to toxic levels, the report said. A fish with mercury concentrations of 1 part per million is considered an unsafe amount by the Food and Drug Administration.

Exposure to mercury can damage the central nervous system and kidneys and cause birth deformities in pregnant women, the report said.

#90022u1637 01/22/1990 ~United Press International

(JAN. 22) UPI - An advocacy group for America's elderly says most seniors canNOT afford the cost of insurance policies for long-term nursing home care. According to a study by The Families U-S-A Foundation, 84 percent of Americans between ages 65 and 79 would have to fork over more than 10 percent of their annual income to pay the average premiums for basic policies.

Biologists in Texas say that bitter cold in December might have killed about 25 Atlantic bottle-nosed dolphins whose bodies washed ashore during the weekend. Texas Parks and Wildlife officials in Matagorda say tissue samples from the dolphins will be analyzed for the cause of death, but it may be weeks before the lab results are available.

Tokyo police say an explosion of compressed air used at an underground construction site probably caused today's collapse of a section of one of the city's busiest streets. The cave-in of the roadway near the Ueno

business district swallowed vehicles and pedestrians, leaving eight people injured and two others missing.

The Israeli government has given in to international pressure and released prominent Palestinian peace activist Faisal Husseini after detaining him three days for allegedly belonging to a hostile group. Husseini says his arrest stems from the desire of conservative Israelis to exclude him from the Palestinian-Israeli peace process.

South Korea's president has announced the formation of a coalition with key opposition leaders into a conservative political force, through the merger of their once hostile parties. But Korea's top opposition leader Kim Dae Jung denounced the move ''as an act betraying the people.''

#90022u1644 01/22/1990 ~United Press International

BY VERNON SCOTT

HOLLYWOOD (JAN. 22) UPI - Hardly anyone protests the fact that show business awards are, by and large, self-serving promotional devises designed to grease the turnstiles and glorify the personalities.

January's Golden Globe Awards were typical - no worse and no better than the Oscars, Tonys and Emmys, not to mention the plethora of music awards.

Most Hollywoodians prefer attending the Golden Globes over the prestigeous Oscars because they are more relaxed and unpredictable. They also have the advantage of being the first Hollywood film awards of the year. Plus they are preceded by a banquet, which can't hurt.

Also, there's a touch of doubt about just how kosher the awards are. They are, after all, the result of a poll of 84 members of the Hollywood Foreign Press Association, a relatively small number of voters.

Is it simple coincidence that the winners are almost always at hand when a Golden Globe is conferred? Is it as coincidental that most of the nominees are absent if they don't win an award?

This year ALL the major winners in the motion picture categories were present.

Morgan Freeman won the Globe for best actor in a comedy or musical for his performance in ''Driving Miss Daisy.'' His co-star, Jessica Tandy, won for best actress in the same picture. Both were present.

How anyone in his right mind could classify ''Driving Miss Daisy'' - a superlative character study of profound social comment performed impeccably by brilliant actors - as a musical or comedy is beyond comprehension.

Tom Cruise attended the bash and won best actor in a drama for ''Born on the Fourth of July.''

Cruise arrived very late in the show - but before his name was read as a winner.

Afterward, the 27-year-old actor expounded on Vietnam, American foreign policy, the plight of wounded war veterans and other subjects to a worshipfully attentive media.

And, surprise! Michelle Pfeffier was there.

The award for best actress in a drama was bestowed on Pfeiffer for her outstanding performance as a sultry songstress in ''The Fabulous Baker Boys.'' The triumph was a foregone conclusion. She dominates many critics' lists for best actress of the year.

Best dramatic picture was won by ''Born on the Fourth of July,'' best musical or comedy by ''Driving Miss Daisy.''

Ever wonder why the Golden Globes are widely considered to be a foretoken of the Academy Awards?

Well, they are given in two of each of the top three categories - two for best film and two for best acting categories - statistically reducing the odds for picking the losers.

This year's Oscar race could come down to ''Born on the Fourth of July'' and ''Driving Miss Daisy,'' but one should not overlook ''Glory'' or ''Do the Right Thing.''

Getting back to winners being present and losers being absent:

Best actor nominees Jack Lemmon, Daniel Day-Lewis, Al Pacino and Robin Williams were not on hand.

Not in evidence either were nominees for best actress - Jessica Lange and Liv Ullman.

Sam Elliott and Cybill Shepherd made dignified, low-key co-hosts who avoided becoming cheerleaders for the winners.

Ted Danson, winner of best TV actor in a series (Cheers), was there. He suggested a return to 1960s political activism.

One TV winner who did not attend was Robert Duvall, for best actor in a mini-series, for his performance in ''Lonesome Dove.''

Angela Lansbury accepted her award for best actress in a dramatic TV series, ''Murder, She wrote.''

Pauline Collins, who starred brilliantly in ''Shirley Valentine'' and was a nominee for best actress in a comedy, flew all the way from London and came away empty.

Because the show was broadcast live on cable, Turner Network Television, the language used by some performers was more earthy than anything heard on network awards shows.

The funniest moment was an improvised interruption by comedians Billy Crystal (who will emcee the Oscars) and Steve Martin who walked to the stage demanding to know who was second to Morgan Freeman. Both Crystal and Martin were nominees.

For Best moment: Audrey Hepburn accepting the Cecil B. DeMille Award. Rapid-fire, she recited the names of the distinguished directors and leading men who had contributed to her career.

#90022u1652 01/22/1990 ~United Press International

CHICAGO (JAN. 22) UPI - Wheat futures were moderately higher at the close Monday on the Chicago Board of Trade, supported by professional buying and the lack of selling interest.

The other grains were lower and soybeans were mixed.

Some of the buying in wheat was attributed to short-covering and ideas the market had been oversold. Rumors the Soviet Union may be offered more wheat under the export bonus program also were supportive.

Soybeans were lower much of the day but recovered on short-covering. Nearby January went off the board 3 1/2 cents lower in quiet trading. The rally from the lows in the rest of the beans came after the January contract expired.

March soybeans fell to a contract low of $5.61 1/2 per bushel but ended the day with a gain of one-half cent.

Corn was at or near session lows at the final bell, pressured by fairly active selling by commercials and professionals. The lack of exports and lower basis levels contributed to the weakness.

At the close, corn was off 1 1/4 to 2 3/4, soybeans down 3 1/2 to up 1 1/4, wheat up 1/2 to 3 1/2 and oats down 2 to 2 3/4.

WASHINGTON (JAN. 22) UPI - President Bush Monday nominated L. Joyce Hampers, 51, to be an assistant secretary of commerce for economic development.

Hampers since 1985 has worked in a Boston law firm and previously held a number of posts in state government.

A native of Mount Vernon, Ind., Hampers now lives in Chestnut Hill, Mass., with his wife and three children.

#90022u1699 01/22/1990 ~United Press International

LOUISBURG, NC (JAN. 22) UPI - A 20-year-old woman accused of killing her three children sobbed softly Monday as her lawyer asked a judge to delay a competency hearing until a private psychiatrist can examine her.

Katrina McKay, wearing a purple dress and white bobby socks, entered the Franklin County courtroom with her head down and sat slumped over in a chair, dabbing her cheeks with a tissue throughout the brief hearing.

Defense attorney Conrad Sturgis urged District Court Judge Robert Hobgood to assure that the rights of his client - who used a kitchen knife to stab and disembowel her children last November - are safeguarded in the legal process.

''We're doing everything we can to protect this lady,'' Sturgis said. ''A state psychiatrist has examined her and we feel we should have our own psychiatrist examine her. It's standard procedure.''

District attorney David Waters argued the competency hearing should be held immediately, saying there is little likelihood a private psychiatrist will conclude McKay is not able to stand trial.

''We don't think there is any substantial right being violated here,'' said Waters. ''I don't think even a private psychiatrist would come to the

conclusion she is not capable of standing trial.''

After reviewing McKay's file, the judge ordered her returned to the Women's Prison in Raleigh to await private evaluation before a new competency hearing is scheduled.

Waters said he has not decided whether to seek the death penalty in the case. If McKay is found incompetent, the trial will likely be delayed until she is declared able to understand the charges against her.

McKay was arrested last November after carrying the mutilated bodies of her children to her neighbor's porch. She was taken to Dorothea Dix Hospital to undergo mental evaluation, then transferred to Women's Prison.

The children were identified as Shenika Chantel McKay, 2, Terrell Quinton McKay, 1, and Quincy McKay, 2 months.

McKay is accused stabbing her children hundreds of times with a steak knife in the bedroom of the rural house she shared with the brother of her foster mother.

The children's organs were strewn about the bedroom, according to Dr. J.B. Perdue Jr., county medical examiner. The two older children were choked and an eye of one child had been removed.

McKay, a large woman who was nude at the time, dropped the bodies of her children on her neighbor's porch and then forced herself into the home.

Authorities said McKay was unmarried and unemployed. She collected about $291 a month in welfare following the birth of her third child.

#90022u1718 01/22/1990 ~United Press International
SOFIA, BULGARIA (JAN. 22) UPI - An estimated 4,000 public transport workers who formed their own union-style Strike Committee returned to work Monday following their first organized strike ever - a 13-hour walkout that won them higher wages.

Also Monday, the Communist Party granted opposition groups access to television and the right to publish a newspaper for the first time in more than four decades.

The official news agency BTA said the strike began early Monday morning, partially paralyzing public transport and forcing thousands of residents to walk or take cabs to their jobs. The agency said all the demands of the bus and electric bus drivers and other transport workers were met and they resumed their work later in the day.

In an indication that Bulgarian workers are becoming better organized under the reforms sweeping Eastern Europe, the transport workers formed a

Strike Committee which demanded firing of the transport director and his deputies and urged management to give them unspecified wage hikes.

The strikers had ignored a call by municipal authorities to return to work.

''The strike is just, and a last measure against the tardy reaction of the company's management to the demands placed more than a month ago,'' the strike committee spokesman said.

During the first day of a second round of talks aimed at changing Bulgaria's political system, the Communist Party granted opposition political groups access to television and the right to print an independent newspaper for the first time in four decades.

The spokesman for the independent groups said the new daily newspaper, called ''Democracy,'' will have an initial circulation of 70,000 copies. Opposition newspapers have published underground in the past, but Democracy will be the first to be legally permitted by the Communist Party.

The first round of the round-table talks between leaders of the Bulgarian Communist Party and new independent groups, including representatives of the free labor union Podkrepa, which is similar to Poland's Solidarity, began on Jan. 3.

Also Monday, BTA said deposed Communist Party leader Todor Zhivkov, 75, who was recently arrested on charges of abuse of power, is likely to be handed a verdict of up to 30 years in jail.

Zelu Zelev, the Chairman of the Union of Democratic Forces which is an umbrella organization for several opposition groups, said the discussion at the round-table will focus on quick dismantling of the remnants of the communist system.

''Rapid dismantling of the totalitarian system should be sped up,'' he said.

He said laws must be worked out on how to depoliticize the Communist-controlled army and police as well as to create principles on the operation of the other new parties which are expected to be formed.

The new round of talks was scheduled to run for about two weeks during which leaders of the independent groups will be allowed to appear on television and present their views.

#90022u1737 01/22/1990 ~United Press International

PORT-AU-PRINCE, Haiti (JAN. 22) UPI - Security forces appeared to be extending a crackdown on political opposition into the provinces Monday amid reports a leading activist was arrested in Cap-Haitien, the second largest city in the island nation.

Two other people were reported arrested in the capital where some opposition leaders were believed in hiding and many media outlets chose not to broadcast news on efforts by military ruler Gen. Prosper Avril to arrest and deport opponents three months before elections.

Max Montreuil, leader of the Neighborhood Committee of Cap-Haitien, was arrested Sunday afternoon, according to Cap-Haitien residents arriving in Port-Au-Prince Monday. Montreuil's reported arrest would be the first of a political opposition leader outside the capital since the crackdown began.

The military government has not released any official information about the crackdown.

But the independent radio station Metropole said Sunday between 30 and 40 people were arrested over the weekend under a 30-day state of siege declared by Avril Saturday as a means of cracking down on ''terrorism'' in the wake of a military officer's assassination.

In Washington, the State Department called Monday for the government of Haiti to move ahead with local elections in April, despite the deportation of main opposition leaders and the state of siege suspending constitutional rights.

Spokeswoman Margaret Tutwiler said Avril's government was ''putting to risk the democratic transition'' in Haiti with its crackdown on political opponents. The government has deported several leading opposition figures to the United States, including Dr. Louis Roy, a co-author the country's 1987 constitution.

Max Doujolly, secretary of the United Party of Haitian Communists, also was one of the high-ranking opposition officials arrested. But the top official of Doujolly's party, Rene Theodore, was believed to remain in Port-Au-Prince in hiding and his telephone was out of service.

Sylvio Claude, leader of the Democratic Christian Haitian Party, also was believed in hiding after security forces broke into and searched party

offices.

Sources said Monday at least two other people were arrested in the capital Sunday, Marie Denise Douyon, a 25-year-old graphic artist, and Gerard Laforest, a former teacher.

Streets of the capital were calm Monday and no troops were visible. Most shops remained open and public transportation operated normally, but parents kept most students home from school.

Independent and commercial radio and television stations did not broadcast news Monday in apparent self-censorship, but the Catholic Church station Soleil and the Protestant-run Radio Lumiere did run newscasts.

Foreign diplomats in Port-au-Prince have condemned the crackdown and said it could jeopardize Avril's promise to hold free elections for a new national government in April.

The French Embassy postponed the official visit of French Minister of Cooperation Jacques Pelletier, which was scheduled for Monday.

Avril took control of the country, which shares the Caribbean island of Hispanola with the Dominican Republic, after he ousted Lt. Gen. Henri Namphy in a 1988 coup.

Namphy had overthrown civilian President Leslie Manigat, who had been elected only four months before his ouster. His election had ended two years of rule by a Namphy-led military junta that ruled Haiti since shortly after Jean-Claude Duvalier fled into exile Feb. 7, 1986.

Roy was among those who arrived in Miami Sunday after being deported by authorities.

Conservative leader Hubert de Ronceray arrived in Miami late Saturday and said he was the intended target of an assassination plot that on Friday killed Col. Andre Neptune of Haiti's presidential guards. Neptune, his wife and a servant were slain about 100 yards from de Ronceray's home.

Avril announced the state of siege Saturday in a presidential communique broadcast by national television, but as of late Sunday the government had not released any official information about the arrests.

Politicians said the directive meant that some constitutional guarantees had been set aside, allowing authorities to arrest people and search homes without warrants.

Despite the crackdown, residents took to the streets Sunday evening for music and dancing as part of an annual prelude to next month's nationwide

carnival.

#90022u1739 01/22/1990 ~United Press International
WASHINGTON (JAN. 22) UPI - President Bush told 35,000 protesters marking the 17th anniversary Monday of the Supreme Court decision legalizing most abortions that ''human life in all forms must be respected.''

Bush, speaking by telephone hookup to a smaller than expected March for Life rally, also used the occasion to press the ''self-evident moral superiority'' of adoption and expressed his gratitude ''to the families that adopt babies, giving them care and love and a chance for a wonderful life.''

''Human life in all its forms must be respected,'' Bush said. ''The continuing strong presence of the March for Life reminds those of us in decision-making capacities in the White House and in the Congress and in the court, that millions of Americans care fundamentally about this issue and are committed to preserving the sanctity of life.''

Even as Bush spoke, however, some 75 GOP supporters of abortion rights marched on Republican National Committee offices carrying signs that read "Anti-choice is Anti-Republican,'' and ''We know in her heart Barbara Bush is Pro-choice."

They urged the GOP to drop its adamant opposition to abortion from the party platform, and Sen. Bob Packwood, R-Ore., one of the Senate's strongest supporters of legal abortion, told the crowd, ''I will do everything I can to assure that that plank is out of our platform forever, and to see that this issue is behind our party forever.''

Republican National Committee Chairman Lee Atwater came out to talk to the demonstrators but sidestepped the issue of changing the platform.

''We are big a big enough party to have diverse viewpoints on this issue '' Atwater said. ''I am trying to be as accomodating as I can. I'm not about to comment on the platform.''

The annual March for Life in Washington is the centerpiece of activities around the nation on both sides of the volatile issue marking the Jan. 22, 1973 Supreme Court ruling that made most abortions legal.

In New Jersey, 150 abortion opponents rallied at the Statehouse but Gov. James Florio, whose election last November turned on his support of abortion rights, told reporters the 1973 decision ''was the correct decision.''

In St. Paul, Minn., about 40 demonstrators were arrested on trespassing charges for attempting to block the doors of a hospital they said performed abortions.

But in Chicago, supporters of legal abortion told a news conference they doubted the Illinois Legislature will enact any restrictions on abortion rights during its session.

In San Francisco, meanwhile, police said that on Sunday they had arrested Norma McCorvey, the Jane Roe of the 1973 decision, for helping to cover 43 signs for Webster street with contact paper with the word ''Roe'' written on it. Webster is common name for last July's court ruling.

U.S. Park Police estimated the Washington crowd, which rallied on the Ellipse behind the White House before marching on Capitol Hill and the Supreme Court, at 35,000. Earlier predictions of this first test of the anti-abortion movement's strength since last July's Surpeme Court ruling allowing states more latitude in restricting abortion suggested the march would draw 50,000.

The marchers, who came from as far away as Kansas and Missouri, gathered with unseasonably warm winter weather on their side and carried placards emblazoned with roses, the symbol of the March for Life, as well as pictures - often graphic - of fetuses. Many of the marchers pushed baby strollers.

''I think it's (the national mood) changing in our favor. The problem is, the people who are pro-life may rest on their laurels. But now is the time to charge forward,'' said Tonia Long, 25, of Rochester, N.Y.

Shirley Scott of Blackstone, Mass., said, "We have definitely won some

battles this year, but to say the tide has turned, well, it would be too early to say that.''

''Abortion is wrong,'' Alvin Richardson, 16, Bowie, Md., said simply. ''Period. Once it's conceived, it's a life.''

Earlier in the day, however, supporters of legal abortion, also rallied and pressed their view on members of Congress.

Kate Michelman, executive director of the National Abortion rights Action League, told a Capitol Hill briefing her side now has the political momentum on the issue.

Although Michelman said the threat to legal abortion ''is still very real and very ominous,'' she added that ''voters are rallying in support of the right to choose and the power of their commitment is forcing long-time anti-choice politicians to reassess their positions.''

But leaders of the National Right to Life committee said they would press for passage of laws restricting abortion in more than two dozen states.

#90022u1762 01/22/1990 ~United Press International

RIO DE JANEIRO, Brazil (JAN. 22) UPI - A strike by 60,000 workers of state-oil company Petrobras entered its seventh but possibly last day Monday with a back-to-work order expected to be issued by the national Labor Court.

The Supreme Labor Court in Brasilia scheduled a meeting for Monday night to decide on the legality of the strike, taking into consideration both the workers' salary demands, and the company's position.

A Petrobras official said the court would also weigh in the possible suspension of gasoline exports resulting from an extended strike.

Both the National Federation of Petrobras Workers and Petrobras President Carlos Sant'Anna have pledged to abide by the court's decision.

Workers called the strike Tuesday last week, demanding salary raises. The action has caused fuel shortages across Brazil, and shut down all 11 of the Petrobras refineries and the national fuel distribution network.

The workers' federations, in written statements to the press, said strikers were confident that the court would declare the strike ''legal,'' and said they would meet after the decision was handed down.

If the stike were declared illegal, the company could fire the strikers,

as it already threatened to do.

Workers are demanding a salary raise of nearly 65 percent, and rejected a company offer for a 21 percent pay hike.

The workers claim the raise would make up for a huge drop in real income resulting from inflation.

Inflation rose over 53 percent in December, and the hike for the past 12 months was more than 1,760 percent.

Petrobras officials said they could not meet workers' salary demands.

Petrobras exports about 6.2 million gallons of gasoline daily, most of which goes to the United States.

Petrobras Superintendent Carlos Alberto Luna Freire said that, even if workers returned to their jobs Tuesday, it would take until the end of February to fully replenish reserves.

Luna Freire said that Petrobras, before the strike, had refined an average of 1.1 million barrels of crude oil.

WASHINGTON (JAN. 22) UPI - Yields for 13-week and 26-week Treasury bills were mixed at Monday's weekly auction.

The Treasury Department auctioned $7.613 billion worth of 13-week bills at an average discount of 7.66 percent, down from 7.68 percent at last week's auction. It was the lowest rate since Jan. 8, when the auction yielded a rate of 7.57 percent.

The government also sold $7.620 billion worth of 26-week bills at an average discount of 7.58 percent, up from 7.54 percent last week. That was the highest rate since Dec. 26, when the rate stood at 7.64 percent.

The discount rate understates the actual yield to investors. The investment, or coupon-equivalent, rate was 7.92 percent on the 13-week bills at an average price of $9,806.40 per $10,000 face value. The investment rate on the 26-week bill was 7.99 percent at an average price of $9,616.80 per $10,000 face value.

#90022u1817 01/22/1990 ~United Press International

BY VERNON SCOTT

HOLLYWOOD (JAN. 22) UPI - It's too bad filmgoers so regularly eschew Shakespeare, because one of the year's best films is ''Henry V,'' directed by a brilliant young Irishman named Kenneth Branagh.

Laurence Olivier's ''Henry V'' in 1946 was lavishly praised by critics. ''Hamlet'' won the best picture Oscar in 1948, and Olivier got the best actor award. Olivier's ''Richard III'' in 1956 won him another Oscar nomination.

The theaters, meanwhile, were empty.

Richard Burton and Elizabeth Taylor suffered a similar fate at the 1967 box office with ''The Taming of the Shrew.''

Even the genius of Orson Welles directing and starring in ''Macbeth'' could not keep it from bombing.

Both Olivier's and Welles' versions of ''Othello'' capsized financially.

Some of the finest movies made have been Shakespeare's works but, like the Elizabethan language, they don't translate well for fans of ''Ghostbusters'' or ''Back to the Future.''

More's the pity because one of the year's best films currently in release and with Academy Award potential is ''Henry V,'' directed by and starring Branagh.

The National Board of Review, in fact, voted Branagh best director.

''Henry V'' is testimony to Branagh's massive talent, especially considering this is the first movie he has ever directed. He is only 29.

Welles was proclaimed a genius when at 25 he directed and starred in ''Citizen Kane'' back in 1941. ''Citizen Kane'' became a classic.

But Kane was a thinly disguised William Randolph Hearst, not a long-dead English monarch, so the picture did well at the box office after many hassles over its release.

For whatever reason, Shakespeare's antiquity would appear to work against him, no matter how brilliantly and well-mounted his works are presented in motion pictures.

Public apathy to Shakespeare, it has been opined, is attributable to the mentality of the largest demographic representation of filmgoers, who would prefer ''Leathal Weapon'' over ''The Merchant of Venice'' any time.

Branagh, standing around the other day backstage at the Mark Taper Forum where he was directing rehearsals of ''King Lear,'' was an unremarkable looking man of medium height, brown hair and an unassuming demeanor.

But his eyes flash when he speaks of Shakespeare and movies.

''Shakespeare was a man of his time who wrote for Elizabethans about Henry V, who was a great legend,'' Branagh said. ''Henry lived 200 years previously and was beloved for his victory at the battle of Agincourt. Henry was a great star.

''Shakespeare treated Henry V more kindly than he did other kings. Richard II was too vain. Henry VI was too weak. Richard III was too evil. Henry IV was a usurper. Henry V was a regular guy with the common touch and he was a young man, which was very important.''

Branagh had hoped that as a youthful actor playing a heroic, youthful king realistically he would entice young Americans to theaters.

''To some degree we've succeeded,'' Branagh said. ''Those young people who have seen 'Henry V' are very enthusiastic about it.

''Henry was exotic, flamboyant and exciting. He was a complicated person and with the perspective of time he became larger than life.''

Branagh admits English kings and queens and other European royalty have proved a pretty dull lot in the past 100 years, hardly subjects for a contemporary playwright looking for fascinating material.

''Maybe the secret lives of the current royals will seem exotic 100 years from now,'' he said. ''Our proximity to them does not make for heroic figures.

''Distance allows writers, directors and performers to take license, as I did with Henry V, presenting him in extremes. The part offers the richness and variety that 'Hamlet' offers a young actor.

''You must work on all Shakespearean plays in great detail to reduce them to the simplicity with which they first strike you when you read them. Today's actors have to avoid the declamatory acting style.

''The trick is to make historic figures real people, not stentorian caricatures or talking robots. In reality, the great historical monarchs made contact with their subjects, else they would have been driven out.

''All kings weren't patricians. They spoke as ordinary humans spoke and felt the same emotions.''

Branagh admires Olivier, Peter O'Toole, Richard Burton, Albert Finney, John Gielgud and other great Shakespearans, but he thinks modern acting techniques require different performances than those stars delivered.

One of his contemporary idols is Anthony Hopkins.

''In acting I tend to free the demons inside myself,'' he said. ''I approach my work viscerally, not cerebrally. You really have to let yourself go to play Shakespeare well.

''You must live through your guts to reach audiences. O'Toole and Hopkins do that. They put their whole selves into the role. You stop thinking about acting. They cross that particular Rubicon and it's quite exciting.''

Young Branagh manages to do just that in ''Henry V,'' which will not be seen by even a tiny fraction of the people who have gone to see ''Look Who's Talking'' twice.

#90022u1862 01/22/1990 ~United Press International

WEST BERLIN (JAN. 22) UPI - East German Finance Minister Ute Nickel resigned Monday following charges she misappropriated funds while she was a Leipzig city official, delivering another blow to the nation's transitional government.

More than 100,000 people, calling for the disbanding of the beleaguered Communist Party, took part in demonstrations in various East German cities Monday night.

The rallies coincided with a growing problem within the party that reached crisis proportions Sunday when the party's deputy chairman, Wolfgang Berhofer and 39 other officials resigned their membership.

In the southern city of Leipzig alone an estimated 100,000 people

protested the communists' policies Monday.

''Down with the SED'' one banner urged. The Communist Party is formally known as the Socialist Unity Party of Germany-Party of German Socialism, or SED-PDS. Most East Germans shorten the name to SED. Other slogans called for German reunification.

Similar protests were also held in other East German cities, in what has become a Monday night tradition since massive pro-democracy demonstrations last fall forced the resignation of the country's hard-line Communist leadership.

The resignation occurred as East Germany's beleaguered Communist Party was desperately trying to clean up an image stained by claims that corruption was rampant among senior party officials.

The development came after the deputy chairman of the Communist Party, a pro-reform communist considered the favored candidate for the post of prime minister in spring elections, and dozens of other party members resigned.

The resignations followed an emergency congress of the party, which ended Sunday with former leader Egon Krenz and other officials being stripped of their memberships. In spite of some drastic changes under his leadership, including the dramatic Nov. 9 opening of the Berlin Wall, Krenz had been unable to shake off his reputation as a tough orthodox communist.

Krenz, who headed the security department, a sub-division of the Sate Security Ministry, before taking over as leader from Erich Honecker in October, said he had litlle influence over the dealings of the hated secret police, known as Stasis, which enforced Honecker's 18-year-rule.

Krenz told an official hearing into security matters that decisions on internal policing were taken exclusively by Honecker and his minister for State Security, Erich Mielke, and were treated ''like military directives.''

Krenz apologized to all those "who suffered under the old security doctrine."

Prime Minister Hans Modrow Modrow, himself a pro-reform Communist, said he had accepted Nickel's resignation Monday after the Leipzig state prosecutor announced over the weekend he had begun an investigation into the charges against her.

Nickel was accused of authorizing illegitimate payments while she was a city official in Leipzig, but Modrow said Monday she was not charged with profiteering.

Modrow reiterated his offer to the opposition of a chance to participate in the Communist-dominated government coalition and urged interested movements to present candidates in the next few days.

''The revolutionary transformation is entering a new phase,'' Modrow told delegates at round-table talks among government officials, political parties and opposition movements.

Modrow also rejected reports in a West German newspaper that former East German secret police were preparing for insurgency.

The mass-circulation daily Bild said the Stasi, backed by some army units, were arming themselves in preparation for a civil war that would aim at toppling the government. Modrow described the report as a "provocation."

Modrow's appearance at the round-table session followed claims the Communist Party was abusing its dominant position in the government for electoral gains in spring elections.

''I see my responsibilities as prime minister as exclusively to the people and not to any (political) party,'' said Modrow, a member of the ailing Communist Party .

Popular outrage over revelations of widespread corruption among former Communist Party officials as well as claims the party was not responsive to demands for swifter change have considerably weakened the party in recent months.

#90022u1864 01/22/1990 ~United Press International

(JAN. 22) UPI - The Supreme Court also upheld random drug testing for some Justice Department and civilian Army workers by refusing to hear appeals in two cases. The cases concerned random drug testing of workers with top secret clearances in the Justice Department and civil workers in the Army's Alcohol and Drug Abuse Prevention and Control Program. The court rejected appeals by the employees of rulings by a federal appeals court in Washington, D-C.

Abortion opponents gathered in Washington, D-C, to mark the 17th anniversary of a Supreme Court decision legalizing abortion. Police estimate some 50-thousand people will join the March for Life rally behind the White House, with President Bush expected to address the crowd by phone before the group marches toward the Supreme Court. Each year on the anniversary of the 1973 Supreme Court decision, a March for Life is held to press for an amendment overturning the ruling.

U-S and Soviet arms negotiators returned to the bargaining table in Geneva

today in a bid to come up with a basic strategic arms reduction deal in time for a June super-power summit. The talks were originally set to begin next month after Secretary of State Baker and Soviet Foreign Minister Shevardnadze meet in Moscow. But officials on both sides say President Bush and Soviet leader Gorbachev want major portions of the strategic arms deal to be ready in time for their summit in Washington.

Bush administration officials confirm the United States will join its major allies in easing curbs on high-tech exports to East European nations engaged in political and economic reform. The officials confirm the decision was made last week to join other major U-S allies in relaxing limits on sales of Western technology to the East Bloc. Officials say the revised U-S position will be formally made next month to a group that includes NATO allies, Japan and Australia.

#90022u1874 01/22/1990 ~United Press International

(JAN. 22) UPI - Radio reports from Tehran say Soviet troops have taken up positions near the Iranian town of Bileh Sowar and the Caspian port of Astara in an attempt to seal the 480-miles of open border with Iran. Soviet news reports indicate Azerbaijani nationalists crossed over to Iran and obtained weapons from fellow Moslems. The report comes amid a call from the republic's Supreme Soviet that Soviet troops withdraw from the mutinous region.

The Federal Aviation Administration says it has decertified the air controller directing traffic at Atlanta's Hartsfield International Airport Thursday night for ''NON-adherence to procedures.'' The unidentified tower worker was on duty when an Eastern Airlines jetliner plowed into a private plane, killing the small craft's pilot and injuring the co-pilot.

After recently getting the federal government's approval to test a temporary artificial lung on humans, doctors at Penn State University's Hershey Medical Center are on the look-out for a recipient. Among the candidates for the new device are victims of near-drowning, smoke inhalation and pneumonia. Doctors hope the intra-vascular oxygenator will take over lung function until the patient's own lungs can heal.

A published report says deposed Panamanian dictator Manuel Noriega gained a personal fortune close to 300-Million dollars during his years in power. A Panamanian official says he'll legally pursue Noriega's illicitly amassed wealth. But he faces an obstacle- Noriega has transformed a surprising amount of his fortune into foreign real estate, which is more difficult to confiscate than bank accounts.

WASHINGTON (JAN. 22) UPI - President Bush Monday appointed movie muscle man Arnold Schwarzenegger as chairman of the President's Council on

Physical Fitness and Sports, predicting fitness will be a priority for Americans in this decade.

The actor was ushered into the Oval Office Monday morning for a brief ceremony with Bush.

Bush challenged the actor - who gained stardom for portraying monosyllabic figures in science fiction and adventure movies - ''to raise the consciousness of all Americans on the importance of good health through physical fitness.''

The president said he asked Schwarzenegger to head the council ''because I believe he is uniquely qualified to address and influence national health and fitness issues especially among our youth.''

Bush said he has asked the past chairman, Dick Kazmaier, to remain on the council to assist Schwarzenegger.

WHIDBEY ISLAND NAVAL AIR STATION, WA (JAN. 22) UPI - The pilot and navigator of a Navy attack bomber ejected shortly after taking off Monday and the disabled aircraft crashed on the runway and caught fire, base officials said.

The two men were taken to a hospital in Oak Harbor where one was listed in serious condition and the other in good condition. Their names were witheldpending notification of relatives.

''The plane left the ground but it couldn't have been up very far, because it sat down again before reaching the end of the runway,'' said base spokesman Howard Thomas.

Thomas said the empty plane, an A-6E Intruder attack bomber, hit the runway and skidded about 150 yards before catching fire. The blaze was quickly extinguished by base fire crews.

The jet appeared to be intact, covered with white, fire retardant foam sprayed around the area, Thomas said.

Authorities were not sure what caused the crew members to eject, Thomas said.

The A6-E Intruder and its cousin, the A-6 Prowler jet, have been involved in a number of crashes during the 1980s. This was the second crash involving the A-6E in the last six months.

#90022u2028 01/22/1990 ~United Press International

ATHENS, GREECE (JAN. 22) UPI - Foreign Minister Antonis Samaras Monday introduced a bill in Parliment to grant a six-month extension for U.S. military bases in Greece.

Officials said the bill was a formality and expected to be passed in two weeks because Greece's two main political parties, the conservative New Democracy and the Pan-Hellenic Socialist Movement (PASOK), had already agreed to the extension.

Four large military bases and some 20 smaller installations operate in Greece under a five-year agreement which expired in December 1988.

The United States had until May 1990 to dismantle them unless a new agreement on economic and defense cooperation between the two countries was signed. The bill would extend the stay of the bases in Greece until November.

Talks on a new agreement were interrupted in May last year as Greece began preparing for general elections.

The talks were expected to be resumed by the government that emerged after the June elections, but a decision on the bases was postponed by two successive interim governments.

The Communist-led Alliance of the Left, which participated in both governments after the June and November elections, was responsible for forcing the postponements, but said last month it would not quit the government if the bill was passed.

Greece is headed for new elections in April, and political analysts said whether the conservatives or the socialists win a clear majority, either would renew the agreement on the bases.

#90022u2062 01/22/1990 ~United Press International

NEW YORK (JAN. 22) UPI - A Brooklyn judge ruled Monday statements by a suspect in the Bensonhurst racial killing that directly link the accused triggerman to the shooting can be used as evidence in the trial.

State Supreme Court Justice Thaddeus Owens also set March 5 as the trial date for the racially explosive case.

Owens refused to suppress statements Keith Mondello made to police the day after 16-year-old Yusuf Hawkins was shot. Mondello, 19, is one of five youths charged with murder in the Aug. 23, 1989, attack.

In the statement, Mondello accuses co-defendant Joseph Fama, 19, of pumping four bullets into the unarmed Hawkins after he and three black friends wandered into the all-white neighborhood and were mistaken for the friends of a Bensonhurst girl.

Mondello's attorney, Stephen Murphy, told the judge that the statement was taken ''in violation of (Mondello's) contitutional rights'' by a detective who ''put a gun to his head'' when he came to Mondello's girlfriend's house to question him.

Murphy said the statement should not have been taken because his client was not under arrest at the time.

But detective Darcy Callahan defended the arrest. He told the judge he found Mondello at his girlfriend's apartment after a search through the neighborhood.

''He was in bed with the sheet covering half of his body,'' Callahan said, adding that he drew his gun and pointed it at Mondello because he couldn't see his hands.

''I told him don't move, take your hands out from under the covers and get out of bed,'' he said.

Callahan said he asked Mondello to come with him to the 61st Precinct stationhouse, where he read him his rights before taking a statement. He was not under arrest at the time, Callahan admitted.

Owens characterized the detective's account of how the statement was obtained as ''credible.''

In the statement, Mondello said he and about 20 to 25 Bensonhurst residents gathered to face what they thought would be a gang of black youths coming into the neighborhood to fight.

Fama, 19, was the first to call the alarm, Mondello's statement said.

''Fama said, 'They're here, they're here, the blacks are here,''' the statement said. When the group rounded the corner they found Yusuf Hawkins and his friends and surrounded them.

''I saw one of the blacks back up to the wall,'' the statement said. ''I saw Joey Fama about 12 feet away from me, by the curb. I heard one shot. I

looked and saw Joey Fama with a gun in his hand. Then I heard three more shots. Then I saw the black fall to the ground.''

#90022u2083 01/22/1990 ~United Press International

(JAN. 22) UPI - A lawyer for embattled Washington, D-C, Mayor Marion Barry says he entered an out-of-town alcohol treatment facility today after admitting he needs help- quote- ''to heal by body mind and soul.'' Attorney R. Kenneth Mundy says Barry and his wife left the nation's capital this morning for an alchohol treatment facilty. Mundy refused to name the facility, but the Betty Ford Clinic in Rancho Mirage, California, was considered a strong possiblity.

U-S Supreme Court justices today decided the constitutional right to a trial by an ''impartial jury'' is NOT violated when blacks are excluded from a white man's jury. Justice Antonin Scalia wrote for the majority in the 5-4 ruling, saying that past rulings make it clear that blacks may NOT

be systematically excluded from juries. But in a dissenting opinion, the Supreme Court's only black member, Thurgood Marshall, accused the majority of insulating- quote- ''an especially invidious form of racial discrimination.''

President Bush addressed throngs of abortion opponents saying he stands with them in efforts to make abortion illegal. Bush, speaking via a telephone hook-up, told the March for Life rally that Americans should consider what he called the ''self-evident moral superiority'' of adoption over abortion. Police estimated 50-thousand people are attending the March for life rally behind the White House to press for a constitutional amendment banning legal abortion.

Federal prosecutors at the Manhattan trial of alleged Mafia chieftain John Gotti got what they wanted from their first witness this morning. Mob informant Vincent ''the Fish'' Cafaro told government lawyers that Gotti is- quote- ''supposed to be the boss.'' He also said that problems he had with the head of the Genovese mob were cleared up when Gotti intervened on his behalf.

(JAN. 22) UPI - Closing arguments are being made today in the Syracuse, New York, trial of a computer sciences graduate student whose ''worm'' program created havoc for computer programs nationwide in 1988. Federal prosecutor Ellen Meltzer says defendant Robert Tappan Morris deliberately set the rogue program loose after carefully devising it. Morris's lawyer is expected to argue the program was an experiment that went wrong and Morris meant NO harm.

News reports from South Korea say police arrested more than 200 students today in Seoul and other cities during bloody rallies in support of a newly formed workers' group. A fierce battle occurred when more than 600 riot police stormed a university campus, 25 miles south of the capital, to break up a demonstration. Many of the nearly 600 protesters responded to

the police attack by hurling stones and firebombs. Authorities assumed control after about one hour, making 100 arrests in the process.

A weekend gathering of marijuana activists in Portland, Oregon, led to some interesting alternative uses for the illegal substance. Several speakers suggested the use of pot in such mainstream items as linen-like fiber for fabric as well as paper pulp. Advocates of the paper idea say their notion is attractive since it would NOT require the environmentally destructive process of chlorine bleaching as is the case in U-S mills.

CAIRO, EGYPT (JAN. 22) UPI - Foreign Minister Esmat Abdel Meguid, fresh from talks in Washington, said Monday that Secretary of State James Baker has not shelved his five-point formula to mediate Palestinian-Israeli talks.

''Secretary Baker sticks to his proposals and is keen on pushing ahead the peace process,'' Meguid said on his return. ''This is a positive position we encourage and appreciate.''

Baker has recently indicated he was losing patience over the complicated Middle East issue, particularly in view of other major regional developments including those in Eastern Europe, and prompted strong Egyptian concern.

Egypt and Israel have agreed in principle to Baker's peace initiative, while the PLO has said its response to the plan was highly flexible but positive.

On Monday, Palestine Liberation Organization Chairman Yasser Arafat stopped briefly in Cairo for talks with a senior adviser of President Hosni Mubarak on the eve of a private visit by Israeli Finance Minister Shimon Peres. Peres was expected to meet with Mubarak and Meguid on Wednesday.

In an interview published Tuesday in the semi-official Cairo daily Al Ahram, Peres reaffirmed his committment to the peace process and said his Labor Party would quit Israel's ruling coalition government if there is no headway.

''The Labor party is united over the peace process,'' Peres said. ''So if there is a peace process, we will continue to remain in the government, but if the peace process was brought to a halt, then we will not remain in the government and would look for the alternative.''

On the subject of his Cairo visit, Peres said, ''It is better to meet friends and the personalities having an important role in the peace march particularly in view of the fact that the peace process stumbles every now and then with difficulties. And it is necessary that we overcome these difficulties. I will discuss in Cairo the peace march and economic future of the Middle East.''

Asked if he was carrying fresh proposals to Cairo to help promote peace in the region, Peres said, ''The new thing is that we are now very close to the decisive points.''

Asked to elaborate, Peres said, ''We only have got to decide on the Palestinian delegation and the Israeli-Palestinian meeting.''

Peres said his party agrees to the inclusion of expelled Palestinians in the proposed Israeli-Palestinian dialogue.

Israeli Prime Minister Yitzhak Shamir, leader of the Likud party, the other major partner in the ruling coalition, has said he is strongly opposed to the idea of including Palestinian deportees.

In an interview published Sunday, Mubarak said he hopes a meeting of the Israeli, Egyptian and U.S. foreign ministers would take place to help begin a Palestinian-Israeli dialogue, as proposed by Baker in his five-point formula.

''I hope that this meeting will take place,'' Mubarak said in the interview published in the newspaper Al Gomhuria Sunday.

The meeting is expected next month in Washington.

Mubarak again expressed the view by the PLO that the proposed dialogue should be open to all issues and not just an elections proposal made by Shamir.

In a related development, prominent Palestinian nationalist Faisal Husseini was freed from police custody in Israel and said his arrest three days earlier was a political move aimed at disrupting the Middle East peace process.

And the Israeli attorney general said he had ordered a police investigation into allegations that maverick Cabinet Minister Ezer Weizman had met with PLO leaders. Weizman, who supports negotations with the PLO, denied the charges. Five people in Israel have been convicted of violating the 1986 law.

In an interview published Friday in the weekly magazine Al Mussawar, Arafat said he would be willing to relinquish his post as head of the PLO if the new round of peace talks did not bear fruit.

Arafat also criticized U.S. efforts, saying, ''I regret to say that former U.S. Secretary of State (George) Shultz was more positive in his negotiations with us compared to Baker.''

#90022u2123 01/22/1990 ~United Press International

NEW YORK (JAN. 22) UPI - The dollar moved up briskly in light New York trading Monday with sentiment on the same mildly bullish wavelength as last week, benefiting from firmer U.S. interest rates and market nervousness about West German mark commitments amid East Bloc political travails.

Several weeks ago, interest rates paid on West German short-term financial instruments exceeded those for on comparable dollar-priced investments, said economist Kevin Logan of the Swiss Bank Corp. Now U.S. interest rates have crept back up to overtake German rates, however narrowly.

Pushing U.S. rates higher is the market consensus attained last week that the Federal Reserve Board will not bring short-term interest rates any lower until it faces new evidence of serious economic slowing.

This, added to bloodshed in the Soviet Transcaucasus and an apparently rising wave of frustration in East Germany and Poland with the pace of reform, gives the dollar a slight edge over the mark. ''People no longer feel a lot of confidence in the deutsche mark,'' Logan said.

Late in the New York session the dollar was trading at 1.7235 German marks more than a pfennig ahead from 1.7105 Friday. The U.S. currency was

changing hands at 146.50 yen, also up from 145.85 yen.

The dollar was ''reasonably well-bid in a quiet fashion,'' said foreign exchange manager David Puth of Chemical Bank. It was approaching the critical barrier of 1.73 German marks - the point at which the West German central bank intervened to great surprise and effect Jan. 4.

But the Bundesbank may not weigh in to stifle the dollar rally as soon as the unit breaks through the 1.73 level. ''I think they'll take their time with this one because it had such a big impact last time and was so destabilizing and that wasn't their intention,'' Puth commented.

But the dollar could be reined in when U.S. Gross National Product data for the last quarter comes out Friday. Analysts look for flat growth or a negative figure, which could deal the dollar a hard blow.

In New York trading the British pound fell to $1.6365 from $1.6465.

Other dollar rates: 1.5350 Swiss francs, up from 1.5210; 5.8565 French francs, up from 5.8140; and 1,182.50 Italian lire, up from 1,273.

In European trading the dollar moved up, closing in Frankfurt at 1.722 German marks against 1.71 marks Friday. The U.S. unit also advanced in Zurich to 1.5265 Swiss francs against 1.5175.

In Paris it ended at 5.8430 French francs, up from 5.8240 and in Brussels it closed at 35.94 Belgian francs, up from 35.89. In Milan the dollar closed at 1,278.10 Italian lire against 1,276.05.

In London, the pound closed lower at $1.6390 against $1.6455.

Republic National Bank in New York closed cash gold at $407.25 an ounce, off from $410.50 Friday.The New York Commodity Exchange settled gold at $407.20 an ounce, off from $410. Gold fell in Zurich to $405.50 an ounce from $409.50 and in London eased to $405.25 an ounce from $413.50.

Republic closed cash silver at $5.28 an ounce, up from $5.22. Comex spot silver rose to $5.268 an ounce from $5.202. Silver was unchanged in Zurich at $5.20 an ounce, but it fell in London to $5.19 an ounce from $5.22.

WASHINGTON (JAN. 22) UPI - Sen. Alfonse D'Amato, R-N.Y., upon returning Monday from a three-day visit to Panama, said he will propose a free-trade agreement with the new government of Panama to allow tariff-free exports to the United States.

''It would help Panama become economically self-sufficient and open our markets to them. Be it sugar ... textiles ... and give them the opportunity to put many people to work,'' D'Amato said at a news conference.

D'Amato said a free-trade agreement - involving tariff or duty-free exports similar to those the United States has with Canada and Israel - would ''pay dividents by putting 25,000 people to work'' in Panama while ''not injuring'' American industries.

Officials of the American Sugar Alliance and American Textile Manufacturers Inc. had no immediate comment.

He said that because of so many trade restrictions imposed on Panama, the country does not enjoy the more liberal trade status the United States has with several Caribbean nations.

D'Amato said that while Panamanian President Guillermo Endara has asked for approximately $1.5 billion in U.S. aid, D'Amato said the administration ''would be hard-pressed to come up with that.''

While some actual financial aid no doubt will be made available, D'Amato said other assistance could include loan guarantees and reduced trade restrictions.

And, D'Amato turned a deaf ear to Justice Department pleas for U.S. officials to reduce the harsh rhetoric about former Pananamian leader Gen. Manuel Noriega for fear it could interfer with his right to a fair trial in Florida on drug charges.

''There's freedom of speech in this country. He's a crook. He's a thief. He was an enemy of his people, a scoundrel of the worst type, and I think he's going to be slam-dunked in court. He should be. I am convinced ... the evidence is absolutely strong, overwhelming and convincing without the additional information coming into our hands,'' he said.

#90022u2156 01/22/1990 ~United Press International

MOSCOW (JAN. 22) UPI - Soviet soldiers sealed the border with Iran Monday as an estimated 100,000 Azerbaijanis crowded a hilltop park overlooking the Azerbaijan capital of Baku to bury those killed from the Red Army assault on their capital city.

Azerbaijan's parliament, meanwhile, declared the Kremlin imposed state of

emergency null and void and demanded that the Soviet army leave as nationalist leaders vowed a campaign of civil disobedience.

The official news agency Tass said riots broke out in several areas of the troubled republic. In the town of Pushkino, mobs destroyed the Communist Party building and a monument to the founder of the Soviet state, Vladimir Lenin, the agency said.

In Dzulfa in the self-declared independent province of Nakichevan, mobs destroyed party documents, the writings of Lenin and a statue of Lenin, the government newspaper Izvestia said. No further details were provided.

Threats were made to set ships on fire in Baku harbor unless troops leave the city, Tass said.

Revising the official death toll, Izvestia said 62 civilians were killed and more than 200 wounded Saturday when the Soviet army stormed into Baku in an effort to end what President Mikhail Gorbachev called fratricidal killing between Moslem Azerbaijanis and Christian Armenians.

Unofficial figures by Azerbaijani nationalists put the death toll at up to 500, and the U.S. Embassy in Moscow estimated the number of dead in Baku to be 83, higher than the official Soviet count.

The State Department said Monday the Soviet government's use of force in Azerbaijan to quell civil violence was justified.

In a prepared answer to reporters' questions about the situation in Azerbaijan, spokeswoman Margaret Tutwiler said, ''Violence by some militants gave rise to events that created a need for force to restore order. There is a fundamental difference between the short-term use of force to restore order, and the use of force to suppress peaceful and legitimate political expression."

On Monday, the Soviet army moved to seal Azerbaijan's 480 miles of open border with Iran in an apparent move to prevent the flow of arms to Azerbaijani nationalists across the frontier. Moslem Azerbaijani nationalists overran the barbed-wire frontier in a three-day rampage over New Years.

Tehran radio, monitored in Athens, said Soviet mechanized troops took up positions near the Iranian town of Bileh Sowar and the Caspian port of Astara, stopping Azerbaijanis from crossing into Iran.

Foreign Ministry spokesman Gennady Gerasimov later confirmed the border sealing, saying, ''I think the task of the military forces now in Azerbaijan is to close the border so that there is no transporting over of weapons. Both Iran and the Soviet Union are interested in having a calm

border.'' The Tehran Times denied that Iran had supplied arms to the Azerbaijani nationalists in the rebellious southern Soviet republic.

Commenting on the weekend declaration of secession by Nakhichevan, an Azerbaijani territory bordering Iran and Turkey, Gerasimov belittled the move as ''not thought through. They want to join someone else across the border, such as Turkey, but nobody wants them.''

The dispute that prompted the army assault on Baku stems from a 2-year-old ethnic conflict between Azerbaijanis and Armenians over the disputed enclave of Nagorno-Karabakh in Azerbaijan, populated mainly by Armenians. The disturbances have killed over 300 people, at least 150 since Jan. 13, when the Azerbaijani nationalists called for renewed pogroms.

Reports from Baku from spokeswoman Leila Unusova of the Azerbaijan Popular Front and Ragim Nazimov, an independent journalist, put the number of those attending the funeral in Baku at 100,000. Tass said only that ''thousands have gathered at Kirov Park for the funeral and burials.''

Salek Aliyev, a historian and member of the People's Front, said in Moscow that the bodies had been washed according to the Islamic rite for for burial.

Azerbaijanis honked car horns and blew factory whistles during a funeral procession through Baku that passed houses draped with black flags of mourning. The procession ended at Kirov Park overlooking the Caspian Sea port for the burial of the civilian victims, news reports from Baku said.

Although the public funeral ceremony in Baku technically defied the state of emergency's ban on meetings, Soviet soldiers kept off the streets Monday, one of the three days of mourning declared in the Azerbaijani capital.

The Izvestia death toll increased by five an earlier death toll of 57 but cut by half the injured total. Various spokespeople of the Azerbaijani Popular Front have put the number killed at between 300 to 500. Baku's military commander, Lt. Gen. Vladimir Dubenuk, has said 83 people were killed.

WASHINGTON (JAN. 23) UPI - The record-high milk prices of recent months, which led to a 10 percent rise in retail dairy prices, should fall sharply in the first half of this year, the government forecast Monday.

In an outlook report, the Agriculture Department said 1989 was the only year during the 1980s when retail dairy prices went up faster than food prices overall. Retail prices at the end of the year were 10 percent higher than a year earlier.

Prices zoomed because of an unexpected downturn in milk production during the closing half of the year, coupled with strong demand for cheese and large exports of nonfat dry milk. The average price for milk sold to dairy plants last month was a record $12.40 per 100 pounds of milk, up $2.40 from the same month in 1989.

Milk production was projected to increase by 1 percent to 3 percent this year, meaning a larger supply and lower prices.

''Farm milk prices will drop sharply during the first half (of the year) and probably will average $1 below last year for all of 1990,'' the department said. ''By the flush season (late spring and early summer), milk prices and most wholesale product prices are likely to be below a year ago.''

The department recently forecast retail dairy prices would hold steady or rise slightly this year. Dairy prices usually are among the most stable of food prices, showing only minor increases.

The high farm-gate prices for milk, along with better-quality forage and cost reductions ''will add impetus to 1990 milk production,'' the government said. ''Growth may be slowed by concern about new investment.''

For farmers, milk prices last year averaged $13.49 per 100 pounds, up $1.25 from the preceding year.

Although retail prices ended the year 10 percent above the same point in 1988, the department said dairy prices averaged a 7 percent increase for the year. Food prices were up an average of 5.7 percent.

Milk production last year totaled 145.3 billion pounds, nearly 200 million pounds below 1988's levels. Government purchases of dairy surpluses are likely to run below last year's total of 9 billion pounds, department economists said.

#90022u2242 01/22/1990 ~United Press International

ANAHEIM, CA (JAN. 23) UPI - Jim Everett of the Los Angeles Rams Monday joined the ranks of the highest-paid quarterbacks in the NFL, signing a 6-year contract reportedly worth more than $2 million per season.

The former Purdue star, who just completed his fourth year in the NFL, becomes the highest-paid Ram in franchise history. He threw for a club-record 4,310 yards in 1989, and his 29 touchdown passes enabled him to top the league for the season straight year.

Everett, who turned 27 on Jan 3, could have become a restricted free agent Feb. 1, meaning he could have signed with another team and left for two first-round draft picks. The Rams would have had an opportunity to match the offer sheet.

But it was clear that Everett leaving Los Angeles was never a possibility. Negotiations between agent Marvin Demoff and the Rams began in August, and both parties said talks throughout the season went smoothly.

Only Joe Montana of San Francisco and Randall Cunningham of Philadelphia are believed to draw higher salaries than Everett.

''I don't think more money would have made me happier,'' Everett said during a news conference at Rams Park. ''The fact is I wanted to be here, and the Rams wanted me here.''

Demoff, who said Everett's salary ''is right at the top,'' said there was little risk in Everett being locked into a long-term contract while quarterback salaries soared around him.

''Most of the top quarterbacks are signed for years to come,'' Demoff said. ''The market for quarterbacks probably is not going to change until at least 1994.

''He is making more money than anyone in his first 10 seasons of football. That's enough.''

Everett just concluded a four-year contract that reportedly paid him $450,000 in 1989.

Los Angeles acquired Everett in 1986 after he failed to come to terms with the Houston Oilers, who drafted him in the first round.

''The fact the Rams brought him here means a lot to him,'' Demoff said. ''He could be playing behind Warren Moon or involved in a quarterback controversy in Houston. He didn't have to go through that here.''

Everett, who completed 58.7 percent of his passes this season, guided the Rams to an 11-5 record. Los Angeles then beat Philadelphia and the New York Giants on the road in the playoffs, but fell 30-3 to the 49ers in the NFC Championship game.

''This offseason we will live with the embarrassment of that last game,'' Everett said. ''We felt we matched up best with the 49ers and we didn't play the kind of game we could play.

''Personally, I'm on cloud nine (after signing the contract), but as a unit we ended up on a sour note, and it has left a bad taste in our mouths.''

Auto Racing

A co-pilot in the 58th Monte Carlo Rally was killed and the driver seriously injured when their car slid off the road after failing to negotiate a turn. Francis Malaussene of France died when the Renault 5 GT crashed in an embankment near Privas, France, in the Ardeche mountains.

Baseball

New York Yankees outfielder Luis Polonia underwent successful arthroscopic surgery on his right knee. He is expected to be ready for spring training.

Basketball

The Los Angeles Lakers will retire Kareem Abdul-Jabbar's No. 33 jersey March 20. Abdul-Jabbar, the NBA's all-time leading scorer with 38,387 points and the only six-time Most Valuable Player, retired following last season. He spent 14 of his 20 seasons with the Lakers. ... The Dallas Mavericks released guard Kelvin Upshaw from his second 10-day contract so he can play for a foreign team ... Former Piston Dave Bing has won the first Schick Achievement Award, honoring a former NBA coach or player who has achieved prominence after his playing career. ... Atlanta Hawks guard Glenn ''Doc'' Rivers had his back X-rayed and learned he has a herniated disc which will sideline him for at least the next two games. ... The Philadelphia 76ers released guard-forward Lewis Lloyd and activated forwards Kenny Payne and Lanard Copeland. Lloyd, who had been suspended from the NBA for violating the league's anti-drug policy, had been trying to make a comeback with the Sixers despite an ankle injury.

College

Rick Smith and Daryl Dickey were named assistant football coaches at the University of Kentucky, completing the staff of Coach Bill Curry. Smith, 41, will coach defensive backs, having served in the same capacity at Baylor University the past three seasons. Dickey, 28, was quarterback coach at Florida State last season and will hold the same position at Kentucky.

Golf

Greg Norman heads the Sony weekly men's golf rankings with a points average of 17.57. Nick Faldo is second and Seve Ballesteros third. ... Prize money for the 1990 LPGA Dinah Shore has been increased $100,000 to $600,000. First prize will be $90,000, up from $80,000.

Hockey

The Minnesota North Stars acquired Winnipeg Jets goaltender Daniel Berthiaume for future considerations. Berthiaume, 23, is in his fourth NHL season and has collected a career record of 50-45-13 and a 3.63 goals-against average in 120 games.

Honors

Alvin Robertson of the Milwaukee Bucks was named NBA Player of the Week for the period ending Jan. 21. Robertson averaged 23.3 points, 11.3 rebounds and 7.3 assists in four Milwaukee victories. ... Kansas City forward Dale Mitchell was named MISL Offensive Player of the Week and teammate goaltender Mike Dowler was named top defensive player. ... RPI

left wing Gary Woolford was named ECAC Hockey Player of the Week.

Tennis

Henri Leconte, Yannick Noah, Guy Forget and Jean Fleurian will represent France in the first round of the 1990 Davis Cup. The round will commence Feb. 4 in Perth, Australia. ... Boris Becker has agreed to take part in the $350,000 Austrian Open at Kitzbuehel, Austria. Plans are also underway to increase the purse to $750,000 by next year in an effort to attract more top names to Austria's biggest men's tournament.

Track and Field

Men qualifiers for the Olympic Marathon Trials in 1992 must run a 2:20:00 or better on a TAC-certified course between Nov. 11, 1990 and March 31, 1992. A female athlete must run a 2:45:00 or better on a TAC-certified course between June 23, 1990 and Dec. 31, 1991.

#90022u2258 01/22/1990 ~United Press International

ENTERPRISE, AL (JAN. 22) UPI - About 100 federal and local investigators searched a house, an Army surplus store and an abandoned warehouse Monday for evidence linked to bombings that killed a federal judge and a Georgia civil rights lawyer.

The FBI declined to reveal the result of the searches in two towns in southeastern Alabama except to say no arrests were made.

''Federal investigators searched three locations in southeast Alabama early (Monday) for evidence in last month's mail bombings that killed a federal judge near Birmingham and an attorney in Savannah, Ga.,'' the FBI said in a statement issued in Washington.

''Warrants issued by a U.S. magistrate in the Middle District of Alabama authorized searches of a residence in New Brockton and a salvage business and abandoned warehouse in Enterprise,'' the FBI said.

Authorities also questioned an unidentified man about the bombings.

Tina Summerville, who lives near the Old and New Surplus and Salvage store said FBI agents questioned her about the owner of the business, asking if she had ever known him to be violent. Summerville said she told agents she did not know the man well.

''The questions they asked kind of scared me,'' Summerville told Enterprise radio station WKMX-FM. ''They said they might be back in touch with me.''

The FBI said over the weekend that it was putting its agents on six-day work weeks and assigning 50 more agents to its Atlanta bureau temporarily to help out with the bombing case.

Judge Robert Vance of the 11th U.S. Circuit Court of Appeals was killed Dec. 16 when a pipe bomb exploded in his home outside Birmingham. Two days later, a similar bomb killed Savannah, Ga., lawyer and City Councilman Robert Robinson.

Bombs also were mailed to the 11th U.S. Circuit Court of Appeals in Atlanta and the NAACP headquarters in Jacksonville, Fla. These devices did not explode.

FBI officials have said they believe the bombings were racially motivated.

On Dec. 27 a group calling itself Americans for a Competent Federal Judicial System mailed a letter to Atlanta television station WAGA claiming responsibility for the fatal bombings and threatening more.

The typewritten letter, which had what appeared to be some broken type, said Vance and Robinson were killed in reprisal for the atrocities inflicted upon Julie Love, a white Atlanta preschool teacher who was raped and killed last year. Two black men have been charged in that slaying, and one already has pleaded guilty.

The letter blamed the 11th U.S. Circuit Court of Appeals for returning verdicts that the writer said were ''quick to stress the importance of civil rights for blacks, but slow to stress the importance for blacks to demonstrate civil responsibility.''

Although FBI agents said they had never heard of Americans for a Competent Federal Judicial System, they said they took the letter seriously and felt it was possibly written by someone involved in the series of bombings and attempted bombings.

WAGA reported that federal agents have determined that a manual typewriter used to write threatening letters in the bomb case also was used in another piece of correspondence with the 11th U.S. Circuit Court of Appeals in Atlanta.

The FBI has identified the author of the correspondence, which led to search warrants being issued in the towns of Enterprise and New Brockton, Ala., the television station reported.

(JAN. 22) UPI - A lawyer for Washington, D-C, Mayor Marion Barry says his client has left the nation's capital to enter an out-of-town alcohol treatment program. There's NO word where Barry was headed. Taking the reins of control in Barry's absence is City Administrator Carol Thompson.

President Bush addressed thousands of anti-abortion protesters gathered on the Ellipse behind the White House today to mark the 17th anniversary of the Supreme Court ruling legalizing abortion. Using a telephone hook-up, the president urged Americans to consider what he called the ''self-evident moral superiority'' of adoption over abortion.

Members of the Supreme Court traded harsh words today as the justices ruled the constitutional right to a trial by an ''impartial jury'' is NOT violated when blacks are excluded from a white defendant's jury. Writing for the majority, Justice Antonin Scalia accused Justice Thurgood Marshall of inappropriately waving the red flag of racism.

Congress will get a chance to express its discontent with President Bush's softened stance toward China Wednesday. Both Republicans and Democrats are lining up to override Bush's veto of a unanimously approved measure that would allow Chinese nationals on student visas to seek permanent visa status without having to return to China.

U-S and Soviet arms negotiators in Geneva say they've reached an agreement on the bi-lateral inspection of nuclear warheads. The accord includes trial inspections of each side's missiles and heavy bombers. Negotiators also are working on a basic treaty outline in time for the June super-power summit in Washington.

#90022u2354 01/22/1990 ~United Press International
NEW YORK (JAN. 22) UPI - Merrill Lynch & Co. Inc. Monday reported a fourth-quarter loss of $361.8 million, reflecting a pretax charge of $470 million, the largest in the firm's history, related to a restructuring of operations.

Net income was down 231 percent from 1988 fourth-quarter earnings of $275.8 million, or $2.59 per share fully diluted, the company reported.

Revenues for quarter ended Dec. 29 were $2.79 billion, compared with $2.67 billion a year ago.

Without the restructuring charge, fourth-quarter net earnings would have been $33.2 million, the company said.

Merrill Lynch lost $213.4 million for the full year 1989, off 146 percent from net income of $463.2 million, or $4.21 a share fully diluted, in 1988. Revenues for 1989 were $11.3 billion, compared with revenues of $9.75 billion in 1988, the company said.

Without the restructuring charge, annual net income would have been $181.6 million, the company said.

The restructuring charge reflected the firm's decision to ''divest certain non-strategic product lines and business activities,'' consolidate and relocate some domestic and international retail, institutional and support facilties and reduce the size of other operations, the company said.

The charge included the cost of lease obligations, severance payments and asset write-offs associated with reduced or discontinued operations, Merrill Lynch said. The restructuring is expected to result in annual cost savings of more than $100 million, the company said.

-30- 1721
#90022u2358 01/22/1990 ~United Press International
LOS ANGELES (JAN. 22) UPI - Sen. Alan Cranston, under fire for his role in the Lincoln Savings and Loan scandal, said Monday he will introduce a bill allowing investors who bought now-worthless bonds from the failed thrift to recoup their losses by suing the federal government.

Some 23,000 small investors, most of them from California, stand to lose an estimated $200 million from unsecured debentures sold by Lincoln's parent company, American Continental Corp. through branch offices of the thrift.

The bonds were rendered virtually worthless last spring after American

Continental filed for bankruptcy and federal regulators seized Lincoln.

At a news conference at his Los Angeles office, Cranston said federal regulators were at fault for allowing the bond sales ''despite information they had that led them to doubt the finanacial solvency of American Continental.''

Regulators also ''failed to monitor the sale, thereby violating Federal Home Loan Bank Board regulations,'' Cranston said.

He said documents he has received from federal regulators and congressional auditors in Washington ''are clearly enough evidence on which to bring a case of negligence against the government.''

Cranston said he plans to introduce legislation after Congress reconvenes Tuesday to allow the bondholders to sue the federal government to recover their losses if they fail to recover from American Continental or Lincoln.

Statutory authority for such lawsuits is required under the doctrine of sovereign immunity, which prohibits civil action against the federal government unless it allows itself to be sued.

Seventeen bills waiving sovereign immunity for various lawsuits against the government were enacted during the last Congress, said Suzanne Martinez, an aide to Cranston.

Cranston is one of five senators under investigation by the Senate Ethics Commmittee for intervening with federal regulators on behalf of Lincoln in April 1987, when the Irvine-based thrift was being examined by the bank board.

Federal regulators seized control of Lincoln two years later - in April 1989 - in a bailout that is expected to cost $2.5 billion, the nation's costliest.

Cranston and the others have denied any wrongdoing in the Lincoln affair, saying they were merely seeking an explanation of why the examination of a constituent financial institution was taking so long.

But Edwin Gray, former chairman of the bank board, has suggested the senators overstepped the bounds of legitimate constituent service and exerted improper influence on behalf of a major contributor.

Lincoln's owner, Arizona real estate executive Charles Keating, and his associates have made corporate donations, gifts and campaign contributions totaling more than $1.4 million to the five senators and some of their causes.

The Lincoln takeover came one day after its Phoenix-based parent company, American Continental, also owned by Keating, filed for protection from creditors under the U.S. Bankruptcy Code.

In Jan. 16 letter to Attorney General Dick Thornburgh, Cranston asked the Justice Department to support his legislation and to take the following steps to help the American Continental bondholders recover their losses.

-Make any assets seized in civil or criminal actions against American Continental, Lincoln and Keating available to reimburse the bondholders.

-Ask federal courts to extend Federal Savings and Loan Insurance Corp. coverage to the uninsured bonds.

-Conduct a worldwide search for any American Continental holdings that may be hidden overseas.

As he has in the past, Cranston blamed the plight of American Continental bondholders on Gray - his chief accuser - and the FHLB, forerunner of the federal Office of Thrift Supervision.

''The Federal Home Loan Bank Board had primary responsibility for the approval of the debt issued by American Contienental,'' he said, quoting a report prepared late last year by the OTS.

''The bank board was headed by Ed Gray, so he, not the five senators he accuses, was responsible for the tragic loss of savings suffered by the 23,000 Californians,'' Cranston said.

#90022u2555 01/22/1990 ~United Press International

(JAN. 22) UPI - Washington Mayor Marion Barry checks into an alcohol treatment center in Florida... Tens of thousands protest abortion... Soviet troops reportedly seal Azerbaijan's border with Iran... These top stories and more, next, from U-P-I.

Four days after his arrest on a federal charge of possession of crack cocaine, and one day after admitting he needed to heal himself, Washington D-C, Mayor Marion Barry is headed for a rehabilitative program.

Barry's attorney refused to disclose the destination of his client. But sources say the embattled mayor flew to West Palm Beach, Florida, where he reportedly will be admitted to the Hanly-Hazelden Center at St. Mary's Hospital.

Serving in Barry's place at the helm of the District of Columbia is City Administrator Carol Thompson. In her first full-day in the interim post,

Thompson vowed- quote- ''there will be NO leadership vacuum in this government.''

Barry's term lasts another 11 months, and his lawyer says he will NOT step down.

A published report indicates some of Barry's aides have jumped ship and are trying to convince Jesse Jackson to become a candidate in November's mayoral contest.

-30- 1338

#90022u2575 01/22/1990 ~United Press International

(JAN. 22) UPI - President Bush told 25-thousand anti-abortion protesters today- ''Human life in all forms must be respected.'' The president made the remarks via a telephone hook-up to thousands of abortion opponents gathered on the Ellipse behind the White House.

A smaller than expected crowd participated in the annual March for Life rally to mark the 17th anniversary of the Roe versus Wade decision that gave women the legal right to terminate pregnancy.

Abortion rights supporters also commemorated the anniversary today. Pro-choice demonstrators gathered on Capitol Hill in front of a wooden model of an abortion rights memorial.

Karen and Bill Bell of Indianapolis, Indiana, stood beside the structure in honor of their 17-year-old daughter, Becky, who died of a self-inflicted abortion in September 1988. Indiana law requires minors to get their parents' permission before undergoing an abortion.

Quoting Karen Bell- ''The fact that my daugher didN'T tell me scares me... how many others out there wouldN'T tell?''

Other marches and rallies were held throughout the nation, including in Chicago, St. Paul, Minnesota, and New Jersey.

Heated words were exchanged in the Supreme Court today- but NOT between legal opponents.

In a 5-4 decision, the high court ruled the constitutional right to an ''impartial jury'' was NOT violated when blacks are excluded from a white defendant's trial.

In writing the conservative majority's ruling, Justice Antonin Scalia accused Justice Thurgood Marshall of being a racial alarmist.

In his 13-page decision, Scalia wrote- quote- ''Justice Marshall's

dissent rolls out the ultimate weapon, the accusation of insensitivity to racial discrimination.''

Scalia says such a charge is invalid because the heart of the Sixth Amendment guarantees an objective jury- NOT one that represents the racial makeup of a community.

Marshall- the high court's sole black member- stuck to his guns, charging the conservative members of the bench with insulating an- quote- ''especially invidious form of racial discrimination.''

-30- 2284

#90022u2591 01/22/1990 ~United Press International

BY JOAN HANAUER

NEW YORK (JAN. 22) UPI - It has been a year since Patrick Purdy fired 100 bullets from the AK-47 into a schoolyard full of children in Stockton, Calif. - and almost a year since Stockton banned the sale of assault rifles.

ABC News anchor Peter Jennings looks at Stockton - and gun control - a year later in ''Peter Jennings Reporting: Guns,'' the first of at least four ''Peter Jennings Reporting'' news specials he will do this year. ''Guns'' airs Wednesday, Jan. 24, 10-11 p.m. Eastern time.

It will be followed, after the late evening news, by a 90-minute live forum on gun control, anchored by Jennings and pre-empting ''Nightline.''

In Stockton, during the year that began with the school shootings, the city and county together had 45 murders by gun, 38 suicides using a gun and five accidental deaths involving guns.

Nationally, gunfire kills more than 30,000 Americans a year - despite a maze of some 20,000 local, state and federal gun laws.

Dale Thurston, a Stockton realtor who heads a group working to repeal the assault gun ban, says, ''The perception is that we have a gun problem and the fact is we have a criminal problem.''

Thurston wants society to go after the people who use guns illegally, not the guns themselves. The illegal drug trade, everyone agrees, is one target.

''Those who say go after the criminal not the gun meet reality here in the courtroom,'' Jennings says. ''The Stockton court system already has more cases than it can handle - all types of crimes. Extra sentences for those who commit crimes using guns have not reduced the number of gun cases. And

voters have resisted paying for more courts and jails.''

The jail for Stockton and San Joaquin County is so overcrowded it is under federal order to reduce its population and the district attorney's office estimates that if every person illegally carrying a firearm were jailed, 10 new prisons would not be enough.

Jennings and company show you the victims of gunshots and their families, they explain the crimes - and some of them would not have happened if a gun had not been handy.

There is the emergency room nurse who wakes up during the night and remembers the children in the schoolyard - the five who died and the 29 children and one adult who were wounded:

''I see one or two of those little bodies lying there, the pink tennis shoes, the mittens and the gloves, the scarves, the school books. It's ingrained in me forever.''

Jennings suggests a lack of national will in this matter and he concludes: ''In 50 years all those laws have not reduced the level of gun violence in America. To the contrary, more than 30,000 people die every year as a result of gunfire. Perhaps Americans are simply willing to accept the violence.''

The CBS News show ''48 Hours,'' which recently celebrated its second year on the air, goes show biz this week when it expands to 90 minutes in order to spend more time with former Beatle Paul McCartney.

Beatles fans will hear McCarney, 47, perform something old and something new and talk about the Beatles, John Lennon, and McCartney's long quest to prove there is life after Beatles.

He speaks fondly of Lennon, honestly about his failure of self-esteem after the breakup - and with some annoyance about what has happened since Michael Jackson bought the Beatles old songs and they started popping up as commercials.

The show offers a pleasant time with a show business great - but, hey, wait a minute, this is ''48 Hours,'' the show that covers hurricanes and crack and stuff like that. What's happening here?

Executive producer Andrew Heyward said this is not a trend - nor a response to any network pressure to get the ratings up.

''We get surprisingly little pressure from above on anything,'' Heyward said in an interview, and he added:

''I dont think this is going to be a ratings smash because demographically a lot of the people who would be drawn to it are religious 'Cosby' viewers who may not come over. And it's such a departure for us that our regular audience may wonder, What is this?

''I think even if the ratings went through the roof, even if we were under pressure, even if I wanted to pander to that pressure, which I don't - there still aren't that many figures of this stature who are worth an hour let alone 90 minutes, in prime time.''

He called McCartney ''an artist who's part of our culture history.''

''I don't think there are that many artists who are worthy of that kind of attention,'' he said. ''So you're not going to see '48 Hours' become a celebrity documentary series. We're going back to the streets as quickly as we can.''

The schedule calls for the next show, on Feb. 1, to be ''48 Hours: Stolen Memories,'' about Alzheimer's disease.

-30- 5045

#90022u2596 01/22/1990 ~United Press International

(JAN. 22) UPI - Senior N-double-A-C-P officials met with President Bush today and told him that racism and violence are on the rise in the United States.

Bush has pledged to use Justice Department resources to battle the growing problem of racial intolerance.

Following the meeting, the organization's executive director, Benjamin Hooks, expressed his concern about the current state of race relations. He urged federal agents to establish greater contact with the N-double-A-C-P's 17-hundred chapter leaders.

The group's board of directors chairman, William Gibson, said he suggested to the president that he use his State of the Union address to focus on racism and- quote- ''the scizms between blacks and whites in America.

Attorney General Dick Thornburgh and F-B-I Director William Sessions also sat in on the meeting which was a follow-up to an earlier conference that dealt with the package bombs sent to N-double-A-C-P offices.

The majority of elderly Americans canNOT afford insurance policies that cover long-term nursing home care. That's according to a study done by the Families U-S-A Foundation.

The group's director, speaking in Washington today, said premiums for

basic long-term policies, coupled with existing average medical costs, will take up 10 percent of an elderly person's annual income.

Ron Pollack says insurance companies that claim to protect aging Americans from the high cost of nursing home care are themselves so expensive, only the richest elderly can afford it.

In Pollack's words- ''The fact is that grandma caN'T afford long-term care insurance.

The group says it hopes its findings will influence the bi-partisan Pepper Commission that's scheduled to report in March on how to better pay for long-term care.

In 1987, nursing home care accounted for 56-BILLION dollars or 11 percent of America's total health bill.

-30- 2060

#90022u2635 01/22/1990 ~United Press International

(JAN. 22) UPI - It looks like presidents Bush and Gorbachev may have a basic strategic arms treaty outline to consider at their next super-power summit in June.

U-S and Soviet negotiators in Geneva, Switzerland, have taken an important step towards reducing long-range nuclear arms by reaching an agreement on reciprocal trial inspections of each side's nuclear warheads.

An American delegation statement about today's agreement says it NOT only makes verification of the Strategic Arms Limitation Treaty more effective, it also places the U-S-Soviet relationship on more solid footing.

Today's news is good for Bush and Gorbachev, who both have pressured negotiators to reach an accord outline for June's summit.

An American delegate says- quote- ''There is a good chance of having the major pieces together by June.'' But he adds the formal document to reduce each side's nuclear weaponry will take longer to achieve.

The Soviet army sealed 480 miles of open border with Iran today to stop the cross-border flow of weapons to Azerbaijani nationalists.

Soviet spokesman Gennady Gerasimov says both Iran and the Soviet Union are ''interested in having a calm border.''

Tehran radio- monitored in Athens, Greece- reports Soviet troops are stationed near the Iranian border town of Bileh Sowar and the Caspian port of Astara to stop Azerbaijanis from crossing into Iran.

Also today, an estimated 100-thousand Azerbaijanis crowded a hilltop overlooking the capital of Baku and buried those killed when Soviet troops smashed into the city on Saturday.

An official newspaper revised the death toll from Saturday's violence to 62 civilians dead and more than 200 others wounded. UNofficial figures from Azerbaijani nationalists have much higher casualty numbers.

(JAN. 23)

Baseball

Cincinnati - Signed rookie pitchers Keith Brown, Butch Henry and Tim Layana and rookie infielders Freddie Benavides and Brian Lane to 1-year contracts.

Minnesota - Acquired minor league pitchers Rick Raether and Reggie Dobie.

San Francisco - Signed first baseman Will Clark to 4-year, $15 million contract.

Basketball

Dallas - Reinsated forward Roy Tarpley; released guard Kelvin Upshaw.

Philadelphia - Released swingman Lewis Lloyd and activated forwards Kenny Payne and Lanard Copeland.

Seattle - Signed guard Jim Farmer.

College

Alabama - Named Bill Oliver secondary coach.

Arkansas - Named Jack Crowe football coach.

Houston - Named Larry Coyer defensive coordinator.

Kentucky - Named Rick Smith and Daryl Dickey assistant football coaches.

Temple - Named Steven D. Little head strength coach.

Texsa A&M - Fired basketball coach Shelby Metcalf.

Football

Houston - Named Jim Stanley defensive line coach.

LA Rams - Signed quarterback Jim Everett to 6-year contract.

Hockey

NY Rangers - Assigned defenseman Jeff Bloemberg to Flint of the IHL.

St. Louis - Traded left wing Doug Evans to Winnipeg for center-left wing Ron Wilson.

Winnipeg - Traded goaltender Daniel Berthiaume to Minnesota for future considerations.

#90022u2706 01/22/1990 ~United Press International

LOS ANGELES (JAN. 23) UPI - Entertainment giant MCA Inc. said Monday it expects 1989 profits to top its record set in 1982 when it released ''E.T. - The Extraterrestrial.''

''E.T.'', the top-grossing film of all time, helped MCA post earnings of $176.2 million, or $2.46 a share, on revenues of $1.6 billion in 1982.

MCA, which will release its earnings report Thursday, said it expects the record profits despite taking $53 million in charges against 1989 earnings. The charges include $30 million from the sale of its LJN Toys Ltd. unit and a $23 million write-off for discontinued operations.

MCA's Universal Pictures released several hits in 1989, including ''Back to the Future Part II,'' ''Sea of Love'' and ''Parenthood,'' to capture a 16.6 percent share of the domestic box office gross, second to Warner Bros.' 17 percent share, according to Daily Variety.

The studio's performance was a rebound from the two previous years. In 1988 Universal's share was 9.8 percent and in 1987 it was 7.2 percent.

MCA, which also operates the Universal Studios theme park in Los Angeles and plans to open a similar park in Orlando, Fla. later this year, earned $164.9 million, or $2.26 a share, on revenues of $3 billion in 1988.

#90022u2815 01/22/1990 ~United Press International

(JAN. 22) UPI - Washington, D-C, Mayor Marion Barry left town to enter a Florida alcohol treatment facility today. Barry named City Administrator

Carol Thompson to run the city in his absence. Thompson says the city will continue to run smoothly.

Saying the Bush administration has resorted to- quote- ''one gimmick after another'' to cure America's educational woes, California Congressman Augustus Hawkins is calling for doubling the federal education budget. Hawkins' plan would also require equal per-student spending throughout a given state.

The White House will wear two hats in its attempt to boost Panama's shattered economy. Combining the roles of travel agent and economic booster, the government is sponsoring a trip by American business people to Panama next month to encourage U-S investments.

A nationwide grassroots environmental group today called for a halt to construction of new incinerators in Massachussetts. Clean Water Action says mercury emissions from trash-burning plants threaten marine and human life.

Fresh from talks in Washington, Egypt's foreign minister says Secretary of State Baker is sticking to his five-point plan to mediate Palestinian-Israeli talks. Speaking in Cairo, the minister says- ''we encourage and appreciate'' Baker's position.

A study by a San Francisco magazine says network T-V news programs predominantly relied on conservative East Coast males to interpret news events in 1987 and 1988. It says the 10 men used most often appeared on network television broadcasts 336 times in the two-year period.

The White House says the redecoration of the Oval Office is complete. The president's office sports a new grey-blue carpet featuring the presidential seal, new sofas and new draperies. The cost- 62-thousand 470 dollars.

Life magazine has chosen a 16-month-old, 25-pound blond boy from Pleasanton, California, as America's cutest baby. Andrew Payton Nestler was chosen from among 20-thousand infants whose photos were sent to the magazine.

#90022u3044 01/22/1990 ~United Press International

(JAN. 22) UPI - Washington Mayor Marion Barry was admitted to an alcohol treatment facility in Florida today... just days after his arrest on federal drug charges. Barry will receive treatment at the Hanly-Hazelden Center at St. Mary's Hospital in West Palm Beach. City Administrator Carol Thompson has been left in charge of city government in Barry's absence. Thompson says- ''There will be NO leadership vacuum in this government.''

The annual March for Life rally in Washington, D-C, drew an estimated 35-thousand anti-abortion protesters today. President Bush addressed the gathering via a telephone hook-up and told them ''human life in all forms must be respected.'' But as Bush spoke, some 75 G-O-P supporters of abortion rights marched on the Republican National Committee offices, carrying signs reading- ''We know in her heart Barbara Bush is pro-choice.''

Congress returns from a two-month hiatus tomorrow to begin what political observers say could be a year of both major accomplishments as well as bitter political battles. One of the first skirmishes between Capitol Hill and the White House revolves around President Bush's veto in November of a bill to extend the visas of Chinese students in America.

Bulgaria's fledgling labor movement scored a victory today when a 13-hour walkout by an estimated four-thousand transit workers earned them higher wages. The transit workers' first-ever organized strike also led to the dismissal of the transport director and his deputies.

An estimated 100-thousand people took to the streets of Leipzig and other East German cities today to demand the dissolution of the nation's Communist Party. The rallies follow by one day the resignation of the party's deputy chairman because of what he termed the party's political, moral and economic corruption of the country.

-30- 2010

#90022u3463 01/22/1990 ~United Press International

(JAN. 22) UPI - Federal agents arrived in two southeastern Alabama towns today and searched three locations for evidence possibly linked to recent bombings that killed a federal judge and Georgia attorney. The F-B-I says about 100 agents and law enforcement officials searched a warehouse and a salvage surplus store in downtown Enterprise. Authorities also went to New Brockton and searched a residence. Officials are NOT commenting on the results of the three searches.

Washington, D-C, Mayor Marion Barry left the nation's capital today to enter a Florida alcohol treatment center. Barry was arrested on drug charges in an undercover sting last week, and he has NOT said whether he'll seek re-election to a fourth term. City Administrator Carol Thompson has been named to take charge of city affairs, and she says- quote- ''There will be NO leadership vacuum.''

The official Soviet news agency Tass reports renewed rioting has broken out in several areas in the troubled Azerbaijan republic. Tass says mobs in the town of Pushkino destroyed the Communist Party building and a monument to the founder of the Soviet state, Vladimir Lenin. Also today,

the Soviet Union sealed its border with Iran in an effort to stop the flow of weapons to the Azerbaijan nationalists.

Yugoslavia's ruling party today averted threats to its unity and rejected proposals that would have split the party into independent provincial organizations. The special congress met as the party tries to repair internal rifts stemming from ideological conflicts between reformists and orthodox communists. The delegates are considering several socialist reforms.

#90022u3481 01/22/1990 ~United Press International

(JAN. 22) UPI - Anti-abortion activists marked the 17th anniversary of the Supreme Court decision legalizing abortion with the annual March for Life rally in Washington today. Using a telephone hook-up, President Bush addressed some 35-thousand demonstrators and told them he supports their efforts to overturn the controversial 1973 ruling. Activists on both sides of the issue staged protests and rallies througout the nation.

The turbulent national battle over racial discrimination today moved into the Supreme Court, where the nine justices were deeply divided in a case that concerned blacks being excluded from juries. The court voted 5-4 that the right to a fair trial was NOT violated by the legal practice. But Justice Thurgood Marshall in dissent called the exclusion- in his words- an ''especially invidious form of racial discrimination.''

Dan Quayle championed the Republican Party as ''the party of Lincoln'' in pressing racial equality at a Boston fund-raiser today. The city has recently been torn by racial tensions aroused by the Stuart murder case. Quayle admitted that Republicans failed to provide leadership in the civil rights movement of the '60's and said... ''We cannot have that lapse again.''

The R-J Reynolds Tobacco Company says it has NOT decided whether to try its new Uptown cigarette in a test market other than Philadelphia. Public opposition led by Health and Human Services Secretary Sullivan prompted Reynolds to forego its plans to test Uptown in the City of Brotherly Love. Uptown attracted criticism because it was said to be aimed at African-American smokers.

#90022u3645 01/22/1990 ~United Press International

(JAN. 22) UPI - About 100 federal and local law officers and two U-S Army bomb squads descended on a home, an Army-surplus store and a warehouse in southeastern Alabama today in the investigation into the wave of mail bombings last month. F-B-I officials are giving out NO information about

what the searches turned up, but NO arrests were made. Authorities questioned at least one unidentified man about the case. The F-B-I assigned 50 new agents to the case during the weekend and put them on six-day work weeks in an attempt to solve the case.

Soviet troops have moved in to seal the border with Iran in Azerbaijan. But within the troubled republic, there is both organized and scattered resistance to the Soviet invasion. The Azerbaijani parliament has moved to reject the Soviet-imposed state of emergency. And nationalist leaders are vowing a campaign of civil disobedience against the Red Army occupation.

President Bush addressed some 35-thousand anti-abortion activists at the annual March for Life rally today, the 17th anniversary of the Supreme Court ruling legalizing abortion. Using a telephone hook-up, Bush said- quote- ''Human life in all forms must be respected.'' Nearby, some 75 G-O-P pro-choice demonstrators rallied at the Republican National Committee offices. Some carried signs reading- ''We know in her heart Barbara Bush is pro-choice.''

The White House says plans are in the works for a government-sponsored trip aimed at encouraging American businesses to invest in Panama. Spokesman Marlin Fitzwater says the Oversees Private Investment Corporation will recruit potential investors for the February trip. Fitzwater notes Panama has what he calls ''excellent potential in agriculture, light industry, and tourism.''

-30- 1940

#90022u3894 01/22/1990 ~United Press International

(JAN. 22) UPI - The latest news from across the nation and around the world... from the 'round-the-clock wires of United Press International.

The F-B-I is NOT commenting on the results of three searches that took place in two southeastern Alabama towns today. Federal and local investigators were joined by bomb squads as they searched for evidence linked to mail bombs that killed a federal judge and Georgia civil rights attorney.

Officials searched a surplus store and a warehouse in the town of Enterprise. The also conducted a search at a house in New Brockton. Authorities questioned an unidentified man about the case but NO arrests have been made.

Brenda Douglas, who works at the train depot across from the surplus store in Enterprise, says the man who operates the surplus store arrived at the business with federal agents about one hour after the search had begun.

Douglas says four agents asked her if she had seen any suspicious people

at the store or if the manager had ever displayed a violent temper. Quoting Douglas- ''It sounded to me, the way they were questioning me... that he had harmed somebody.''

The State Department is defending the use of military force to quell the nationalist rebellion in Soviet Azerbaijan .

State Department official Margaret Tutwiler issued a statement today at Foggy Bottom finding- in her words- ''a need for force to restore order.''

She echoed Secretary of State Baker in making a distinction between short-term use of force to restore order and the use of force to supress what she called ''peaceful and legitimiate political expression.'' She went on to say that she hopes the Soviet government and the Azerbaijani people can restore a ''political dialogue'' to resolve their differences.

The latest Soviet figures say 62 civilians have been killed and more than 200 wounded since the Red Army moved into Azerbaijan Saturday.

-30- 2092

#90022u3916 01/22/1990 ~United Press International

(JAN. 22) UPI - A published report says some supporters of Mayor Marion Barry have joined together to persuade Jesse Jackson to run for the Barry's office.

The report says Barry supporters fear losing political clout if the mayor's political future is permanently damaged because of his arrest on a drug possession charge last Thursday night.

Sources behind the scenes report two key Barry supporters- Delano Lewis, president of the Chesapeake and Potomac Telephone Company, and Barry campaign co-chairman Robert Johnson- want the mayor out of office. They reportedly argued forcefully for Barry's resignation when they and other key financial backers met with the mayor at his home Friday.

The mayor left Washington today to enter a Florida alcohol treatment program. A Barry spokesman says the mayor will NOT make any decision regarding his political future for at least 30 days.

Jesse Jackson has said he won't seek the job if Barry runs for a fourth term. Jackson supporters say those who positioned themselves with Barry view Jackson as a multi-purpose candidate who can win the November election and help restore government credibility.

A C-B-S News report says the Secret Service is investigating threats allegedly coming from Colombian drug lords that they will try to

assassinate President Bush when he attends the anti-drug summit in Colombia next month.

The threats are said to be unusually specific, in that they suggest S-Afired anti-aircraft missiles are being smuggled into the South American nation for use in an attack on Air Force One.

The Secret Service is following up all leads- some of which are second-hand and could be attempts by informers simply to curry favor with U-S agents. But the presidential protection agency is said to be looking into other forms of transportation for the president when he makes his one-day trip to Colombia.

-30- 2065

#90022u3947 01/22/1990 ~United Press International

(JAN. 22) UPI - President Bush bowed to the right today on the volatile issues of drugs and abortion.

The president addressed a dinner held by the conservative magazine ''American Spectator'' this evening in the nation's capital. In a city still rocking from the arrest of Mayor Marion Barry on drug charges, Bush pressed a hard-line agenda against drugs, asking that Congress adopt stiff and mandatory sentences for those found guilty of drug crimes.

Earlier in the day, Bush addressed a smaller-than-expected but still sizeable crowd of 35-thousand anti-abortion protesters by telephone in Washington.

The demonstrators- aligned with the group March for Life- were out protesting the 17th anniversary of the Supreme Court decision in the Roe versus Wade case making abortion legal.

Bush told them- quote- ''Human life in all forms must be respected.''

The White House says plans are under way for a government-sponsored trip to Panama to encourage American businesses to invest in the Central American nation.

The United States will act as travel agent and economic booster to help the ailing country that is trying to recover from near economic failure and last month's U-S invasion. Spokesman Marlin Fitzwater say the Overseas Private Investment Corporation will recruit potential investors for the trip.

Fitzwater says Panama ''retains attractive features such as transportation communications, and financial services. The spokesman adds the central American nation has- quote- ''excellent potential in agriculture, light

industry, and tourism.''

The administration is continuing work on an aid package for Panama. It's thought the country will need as much as two-BILLION dollars in foreign assistance to rebuild its economy.

-30- 1942
#90022u3960 01/22/1990 ~United Press International
(JAN. 22) UPI - The case of accused computer hacker Robert Morris has gone to the jury in Syracuse, New York.

The 24-year-old former Cornell University graduate student is accused of being responsible for a computer ''worm'' that infiltrated and crashed computers across the nation in 1988- including NASA computers and those with other defense agencies.

Closing arguments in the trial debated whether Morris created and deployed the ''worm'' deliberately. Morris' defense has been that the ''worm'' was ''a mistake,'' an experiment gone awry, and that it was NOT intended to be released into the nationwide computer network.

If found guilty of all charges, Morris could be sentenced to five years in prison and fined 250-thousand dollars.

A government report forecasts milk prices should fall following a 10 percent rise in retail prices during the last few months. The Agriculture Department says 1989 was the only year milk prices rose quicker than food prices overall.

Last month, the average price for milk sold to dairy plants was a record 12 dollars 40 cents per 100 pounds of milk... an increase of two dollars and 40 cents.

Prices reportedly jumped upward because of lower milk production coupled with a strong demand for cheese and large exports of nonfat dry milk. 1990 projections for milk production indicate an increase of one to three percent. This will mean a larger supply and lower prices.

The department predicts that by late spring or early summer, most wholesale prices are likely to be below a year ago. Dairy prices traditionally are the most stable of food prices, showing only minor increases.

-30- 1816
#90022u4092 01/22/1990 ~United Press International
(JAN. 22) UPI - Federal investigators and Army bomb squads with dogs

searched three locations in two southeast Alabama towns today for evidence in mail bombings that killed a federal judge and civil rights lawyer. At least one man was questioned about the bombings, but the F-B-I said in a terse statement that NO one was arrested.

Norma McCorvey- the Jane Roe of the 1973 Supreme Court decision legalizing abortion- urged women at a Sacramento, California, rally to- quote- ''fight with all we have'' to protect the ruling. Demonstrators on both sides of the abortion issue took to the streets nationwide today to mark the decision's 17th anniversary.

The White House says President Bush still plans to go to Cartagena , Colombia, next month to attend a one-day drug summit. A news report says the Secret Service is investigating intelligence reports that Colombian drug lords will try to kill Bush during the visit.

In Washington, President Bush told a dinner for the conservative ''American Spectator'' magazine that- quote- ''there is NO shortcut to the victory line in the race against drugs and crime.'' He urged Congress to pass harsher penalties to fight the drug war.

The Washington Post says supporters of District of Columbia Mayor Marion Barry, who faces drug charges, have joined a group hoping to persuade Jesse Jackson to run for the office. Barry, who entered a Florida alcohol treatment center today, has NOT said whether he'll run for re-election.

The embattled mayor of Atlantic City, New Jersey, says he'll seek re-election in May... despite being indicted on charges of accepting a 65-hundred-dollar bribe. James Usry is one of the nation's few big-city black Republican mayors.

-30- 1896

#90022u4097 01/22/1990 ~United Press International

(JAN. 22) UPI - The provincial government of Soviet Azerbaijan declared three days of mourning for those killed in the weekend assault by Red Army troops on the capital city of Baku . An estimated 100-thousand Azerbaijanis attended a public funeral ceremony to bury the dead today.

Yugoslavia's massive Communist Party Congress was thrown into disarray today when liberal Slovenian delegates walked out. It's NOT clear if the congress will continue after a late-night intermission or adjourn until a later date.

A federal appeals panel in Richmond, Virginia, has upheld the convictions of Lyndon LaRouche and six followers, rejecting arguments that their trial was unfair. LaRouche was convicted of conspiracy to defraud the I-R-S, while his supporters were found guilty on various counts of mail fraud

conspiracy.

The wife of a cult leader accused in the slayings of a family of five pleaded innocent in a Painesville, Ohio, courtroom today to charges that she was involved in the killings. Her husband and son are fighting extradition from California.

A man accused in an armored car robbery who spent two years on the lam before surrendering in Los Angeles Saturday waived extradition today. Edward Hunt will be returned to Philadelphia to face charges in the 651-thousand-dollar heist.

Officials at Whidbey Island Naval Air Station in Washington state don't know why the pilot and navigator of a Navy jetfighter ejected shortly after takeoff today. The empty plane crashed on the runway. The fliers were injured.

A Sea World spokesman says about 50 employees at the popular marine park in San Diego have been suspended following an investigation of drug use, theft and other misconduct. The spokesman says the problems did NOT affect guest services or animal care.

-30- 1967

#90022u4228 01/22/1990 ~United Press International

(JAN. 22) UPI - The first person to be prosecuted under a portion of the 1986 Computer Fraud and Abuse Act was found guilty tonight. A federal jury in Syracuse, New York, took less than seven-and-one-half hours to convict Robert Morris of creating a computer ''worm'' that crashed a nationwide network of computers in 1988. The 25-year-old Morris had argued the incident was the result of an experiment gone awry. He faces up to five years in prison and a 250-thousand-dollar fine.

Federal agents and Army bomb squads with dogs searched three locations in southeastern Alabama today for evidence connected to two mail bombs that killed a federal judge and a Georgia civil rights attorney. But they apparently came up empty-handed. Authorities questioned Wayne O'Farrell and searched the present and former locations of his surplus and salvage business in Enterprise. O'Farrell's home in nearby New Brockton also was searched. NO arrests were made. F-B-I agent Chuck Archer says agents were looking for ''bomb-making paraphernalia.''

A broadcast report says the Secret Service is investigating a growing number of intelligence reports that Colombian drug lords will try to kill President Bush when he attends a drug summit in Cartagena next month. The report says there've been specific warnings that shoulder-fired anti-aircraft missiles are being smuggled into Colombia in an attempt to shoot down Air Force One. The White House says Bush still plans to go to

the South American country.

U-S and Soviet officials have reached agreement on a trial plan to allow each side to inspect the other's warheads. Letters of agreement were signed and exchanged as arms talks resumed today in Geneva. U-S and Soviet arms negotiators have been under orders to complete a treaty outline for the mutual inspection in time for the next superpower summit, now set for June.

AKRON, OH (JAN. 23) BUSINESS WIRE - Bridgestone/Firestone Inc. announced Tuesday the creation of Bridgestone/Firestone Singapore Pte. Ltd. to unify Bridgestone's worldwide natural rubber purchasing operations.

The new company, a subsidiary of Bridgestone/Firestone Inc., will conduct operations previously performed by Firestone Singapore Private Ltd. and the Singapore Branch Office of Bridgestone Corp.

The move is part of continuing efforts to integrate the operations of Bridgestone Corp. with those of the former Firestone Tire & Rubber Co., with which Bridgestone merged in 1988.

Unification of natural rubber purchasing operations will enhance the company's purchasing power and assure a consistently high quality of all rubber purchased, Bridgestone officials said.

Seike Satomura, currently manager of Bridgestone's Singapore Branch Office will be president of the new company.

Bridgestone/Firestone Singapore Pte. Ltd. will employ more than 20 persons and is targeting first year sales of $134 million (20 billion yen).

Bridgestone/Firestone Inc. of Akron, is a wholly owned subsidiary of Bridgestone Corp., and was created in August 1989, by the consolidation of The Firestone Tire & Rubber Co., Bridgestone (U.S.A.) Inc., and Bridgestone (Canada) Inc.

The company operates 16 plants in North America which manufacture Bridgestone, Firestone and Dayton brand tires, and a wide range of industrial and synthetic rubber goods. In addition, Bridgestone/Firestone operates nearly 1,600 MasterCare tire and automotive service centers in the United States and tire manufacturing plants in Europe and Latin America.

Bridgestone/Firestone Inc. markets passenger, high performance, light truck, truck and bus, off-the-road, industrial, agricultural, rally, kart, motorcycle, and motorsport tires, as well as a variety of industrial and synthetic rubber goods, and aviation tires.

Bridgestone Corp., the parent company, is a global tire and rubber manufacturer with headquarters in Tokyo. Bridgestone Corp. operates some 60 plants in 19 countries, and has research and development facilities in North America, Europe and Asia. Bridgestone Corp. is one of the world's largest tire and rubber companies, and markets its diverse products in more than 150 nations and territories around the world.

#90023b0022 01/23/1990 ~Business Wire

WASHINGTON (JAN. 23) BUSINESS WIRE - Software developer Mt Xinu Inc. Tuesday announced at the Uniforum Conference in Washington the release of supported source versions of the Mach operating system for Sun 3, Digital VAX, and IBM RT computer systems.

Mt Xinu has been working under a contract with Carnegie Mellon University (CMU), the originator of Mach, to prepare supported source releases of Mach for the research and development community. This release, called 2.6 MSD (for "Mach Standard Distribution"), is based on CMU's 2.5 Mach kernel.

2.6 MSD will have the same "Berkeley UNIX" (4.3BSD) interface that is a standard in the research community and will be source-compatible with existing 4.3BSD applications. In addition, many standard 4.3BSD binary applications will run unchanged.

Mach is a multiprocessing operating system designed as a foundation on which to build modern UNIX and UNIX-like software systems on both existing and new computer architectures. Recently adopted as its base technology by the Open Software Foundation, Mach can become the foundation of many systems with different higher-level interfaces.

2.6 MSD includes other software that now works with Mach: NFS, Sun Microsystems Inc.'s Network File System; AFS from Transarc Inc., a long-distance distributed file-sharing package; the X-Window system from MIT; ISIS, a distributed application toolkit; Camelot, a transaction-processing application base; and GNU utilities from the Free Software Foundation.

"With this 2.6 MSD release, leading-edge software developers have a standard set of tools with which to further develop Mach and to build applications that take advantage of Mach's advanced design," said Mt Xinu Marketing Manager Alan Tobey. "Mach, for example, makes possible for the first time the development of multiprocessor applications which can be easily ported among different computer systems. And Mach itself is more easily ported to new systems than is UNIX."

The cost of the distribution is $3,000 for a licensed copy of the source code, distribution media, 20 volumes of documentation, and rights for additional internal use in binary form. An AT&T UNIX source license is required.

Mt Xinu is accepting orders for 2.6 MSD now, with distribution starting in late February. In addition to producing 2.6 MSD, Mt Xinu is creating ports and adaptations of Mach for manufacturers and OEMs and is developing other commercial Mach products of its own.

CONTACT: Mt Xinu, Berkeley, Calif., Alan Tobey, (415) 644-0146.

#90023b0035 01/23/1990 ~Business Wire

SANTA CLARA, CA (BUSINESS WIRE)--Tri-Data Systems Inc. and MITEM Corp. Tuesday introduced MitemView support for Netway, which allows for the creation of intelligent graphical user interfaces to IBM mainframe applications without host code modification, via a LAN-based SNA gateway.

MitemView utilizes Tri-Data's 3270 Application Program Interface (API) capabilities to support multiple host sessions and simultaneous communication with multiple mainframes. MitemView provides a simple and extensive set of communications tools to develop HyperCard applications that simplify access and retrieval from host-based applications.

''This combination offers corporations a significant reduction in application development and maintenance costs, as well as training costs '' according to Barry Margerum, president and chief executive officer of MITEM. ''In our changing world, it is critical for developers to continually create and enhance their end-user applications without having to modify their IBM host code.''

MitemView is a Macintosh software development tool which enables developers to create ''point and click'' graphical user interfaces to mainframe applications without host code modification.

MitemView is able to take a non-invasive, loosely coupled approach to graphical front-ends, since it is based on HyperCard, an event-driven language.

Tri-Data's Netway functions as a 3174 cluster controller on an SNA network and replaces the need for a coax or token-ring card in each Macintosh. The Netway API functions provide a series of procedural calls for establishing 3270 sessions, sending and receiving host screens, manipulating screen data and terminating 3270 host sessions.

Tri-Data Systems, of Santa Clara, is a leader in SNA LAN-based gateways for both Macintosh and IBM PC compatible computers. Tri-Data's major products include the Netway 1000 and Netway 2000 LAN-based SNA gateways.

Based in San Jose, MITEM Corp. develops products to simplify user access and communications with minicomputers, mainframes and other information sources, including CD-ROM and network servers. The privately held company was founded in 1985. Pricing and Availability

The Netway 1000, which supports 16 simultaneous sessions, retails for $3,995; the Netway 2000 supports 64 simultaneous sessions and retails for $9,995. The MitemView developer's toolkit is priced at $995. The personality module required by MitemView to drive the Netway is priced at

$495, and includes the 3270 API.

PHOENIX (JAN. 23) BUSINESS WIRE - Alexander LifeSystems Inc. Tuesday announced that the National Institute of Health of the U.S. Department of Health and Human Services has recommended approval for development funding of the company's Location Information System (LIS).

The LIS meets the needs of healthcare facilities to improve staff productivity, quality of patient care, cost control and management.

The LIS will offer a reliable, accurate low-cost wireless technology that provides for the limited area transmission and reception of staff and patient related data within a healthcare facility. In addition, the system provides information on the location and identification of staff, patient and mobile equipment within the facility.

According to John Laverdier, vice president of engineering for Alexander, the LIS utilizes sophisticated infrared technology to send and receive information on a high speed digital data network.

Jerry Kaufman, president of Alexander LifeSystems, expressed gratification for the NIH's funding recommendation stating that ''we see this as a recognition of the benefit our system can have in the provision of healthcare services.''

The company also intends to offer a similar system to be used in hazardous environments to enhance employee safety. Industries targeted include mining, chemical processing, nuclear reactor and processing facilities, ammunition manufacturing, etc.

National Institute of Health funding is expected to occur in March 1990. The company will announce details of the funding at that time.

The company expects the LIS to be commercially available late 1990.

Alexander LifeSystems Inc. is a start-up based in Scottsdale, Ariz. It designs, develops and markets specialized communications and information systems to the healthcare and other industries.

#90023b0059 01/23/1990 ~Business Wire

SEATTLE (JAN. 23) BUSINESS WIRE - Alaska Airlines Monday announced plans to acquire up to 64 new McDonnell Douglas MD90-30 and Boeing 737-400 aircraft collectively valued at about $2.5 billion.

The acquisition is expected to give Alaska the quietest, youngest and most fuel-efficient fleet in the nation. Chairman Bruce Kennedy said the aircraft will meet much of the company's replacement and growth needs for the next decade.

Alaska has placed firm orders for 20 MD90-30s and secured options for another 20 MD90-30s.

The airline also is leasing 20 new B737-400s from International Lease Finance Corporation (ILFC), and taking lease options from ILFC on four more B737-400s. ILFC, based in Beverly Hills, California, is the leading operating lessor of advanced jet transports.

The Boeing jets are slated for delivery between April 1992 and December 1994 and the McDonnell Douglas aircraft between December 1994 and December 1997.

Kennedy said the acquisition, the largest in the carrier's 58-year history represents a coming of age for the company.

"In the last decade Alaska has grown from a tiny carrier serving two states to an airline that spans the West Coast," Kennedy said. "Our goal of becoming a larger factor in the region now requires a long-term commitment to new aircraft."

The aircraft will be equipped with the quietest and most fuel-efficient engines available. "This commitment is evidence of the priority we place on being a good neighbor at the airports we serve and on conserving precious nonrenewable resources," Kennedy added.

The MD-90 is the newest addition to the McDonnell Douglas family of mid-range twin-jets. Alaska will be one of two launch customers for the aircraft, the first of which is expected off McDonnell's Long Beach, California, production line in 1994. The planes will be equipped with IAE V2500 turbofan engines developed by a consortium led by Pratt & Whitney and Rolls Royce. Alaska will configure the planes with 145 first class and coach seats.

The B737-400, also a mid-range twin-jet, is the largest aircraft in the 737 series. It has been in production at Boeing's Renton, Washington, plant since 1988. The aircraft will be powered by CFM International CFM56-3C turbofan engines. Alaska will outfit the planes with 139 seats in a similar, two-class configuration.

Kennedy said the two models of aircraft are well suited for the Alaska and West Coast marketplace. "Large aircraft have too many seats to be economical in high-frequency service. Smaller jets lack the combination of passenger and cargo capability needed on the long-haul segments of our 4,600-mile route system." In addition, he said, "Quiet, fuel-efficient engines and state-of-the-art flight guidance systems qualify these aircraft as the stars of their class."

The MD-90s will be acquired directly from McDonnell Douglas. With spare engines and parts, Alaska estimates the MD-90 firm orders to be valued at $800 million. If the 20 options are exercised, the total climbs to $1.6 billion. The ILFC leased aircraft and associated parts are valued at $750 million. Exercise of the four options would boost the total to $900 million.

Alaska currently operates 55 aircraft -- 28 B727s, 20 MD-80s and seven B737-200Cs.

In the last two years Alaska has placed orders for 20 new MD-80s. Fourteen of the aircraft, valued at about $420 million, will be delivered between 1990-93. Six were exchanged for six of the 20 firm MD-90 orders.

Alaska Airlines serves 36 cities in Alaska, Mexico and five Western states.

BURBANK, CA (JAN. 23) BUSINESS WIRE - Edward Phillips and Carlos De Mattos, co-chairmen of the board of Matthews Studio Equipment Group (NASDAQ:MATT) Tuesday announced the results for the fiscal year ended Sept. 30, 1989.

Revenues for the year reached a record $14,711,000, compared with revenues for the same period last year of $13,068,000. Net income declined to $138,000, or 2 cents per share, on the larger number of shares oustanding, compared to net income of $233,000, or 5 cents per share, the prior year.

Contributing to the lower current earnings were higher expenses associated with two recently completed acquisitions and a public offering of securities.

On a pro forma basis, taking into consideration the acquisition of Matthews Studio Electronics and Hollywood Rental for the full fiscal year, net income amounted to $231,800, compared with net income of $315,099 for the previous year. Revenues on a pro forma basis reached $15,074,000, compared with revenues of $12,429,000 in fiscal 1988.

In November 1989, after the close of the fiscal year on Sept. 30, the company completed a public offering of 420,000 units at $6 per unit, with each unit comprised of three shares of common stock. The offering provided gross proceeds to the company of $2,520,000.

In addition, in December 1989, the company announced an agreement in principle to acquire Innovative Television Equipment of Newbury Park. ITE designs, manufactures and distributes camera leads, tripods, dollies and accessories for the broadcast, industrial, education and closed circuit television industries.

Matthews Studio Equipment Group designs, manufactures and rents a wide variety of equipment used in the production of film, television, commercials, photography and theatrical production. In addition, the company manufactures, rents and leases electronic Cam-Remote Systems, a remote-controlled camera system for which the company has won a number of awards including one for technical achievement from both the Academy of Motion Picture Arts and Sciences (Oscar) and the Academy of Television Arts and Sciences (Emmy).

Within the film and television industry, the company is considered one of the largest suppliers of grip equipment throughout the world.

GARDEN GROVE, CA. (JAN. 23) BUSINESS WIRE - The U.S. Air Force Operation Contracting Division at Vandenberg Air Force Base has awarded Dense-Pac Microsystems (OTC:DPAC) a contract for $400,000 to provide a Ballistic Missile Instructional System-II (BMIS).

The BMIS-II system is a computer-based instruction system, which allows Air Force instructors, with no computer programming experience, to integrate audio and video information into effective training courses which are used to instruct Intercontinental Ballistic Missile (ICBM) operations. The system allows up to 25 individual students to learn independent maintenance operations at their own work stations.

Under the terms of the contract, Dense-Pac will provide a videodisc-based, networked training system consisting of five instructor stations, three courseware development stations, 25 student stations and a master file server.

The system utilizes commercial off-the-shelf hardware and software components, which will be integrated by Dense-Pac into a self-contained, turn key training system, which will be installed at Vandenberg Air Force Base.

Dense-Pac is a supplier of interactive networked training systems which utilize advanced computer-based video and audio technology to provide cost effective training to the United States government and private industry.

#90023b0072 01/23/1990 ~Business Wire

CAMPBELL, CA (JAN. 23) BUSINESS WIRE - Touch Communications Tuesday announced that it has entered into a strategic partnership with Netwise Inc. to license and market the Netwise RPC TOOL development product.

Under the terms of this partnership, Touch and Netwise will jointly implement the Netwise RPC TOOL on TOUCH/MP FASTPORT/OSI STREAMS, a high performance OSI product running as a streams module under UNIX System V.3. The Netwise RPC TOOL is currently available for TOUCH OSI DOS with availability for other platforms.

This agreement also provides for Touch to license the Netwise RPC TOOL for Touch's internal use in building future OSI applications for TOUCH/MP FASTPORT/OSI STREAMS and the Touch X.400 family of products.

The RPC TOOL provides developers the ability to write sophisticated distributed client/server applications, based on the RPC mechanism, across multiple platforms and multiple networks thus eliminating thousands of hours of in-house development time.

Today's customers require that vendors provide the fastest, most comprehensive products to insure connectivity to the broadest range of platforms. The RPC mechanism extends connectivity by providing network interface software required by an application to extend conventional procedure calls over most popular networks in a transparent manner.

Touch Communications Inc., a privately held company, was founded in March 1985 to develop transparent end-user communications solutions based on Open Systems Interconnection standards such as MAP/TOP and GOSIP. Touch's product line enables systems integrators and large end-users to build complete OSI networks that also allow their existing workgroup solutions to become part of the large corporate network.

Touch has previously announced plans to develop an X.400 gateway engine including gateways to many electronic mail applications including SMTP, UUCP and Action Technologies' MHS. TOUCH OSI end-user products and TOUCH FASTPORT systems integration products are available for DOS, VAX/VMS, Macintosh and UNIX and are distributed worldwide, directly to large end-users, systems integrators and original equipment manufacturers.

Based in Boulder, Colo., Netwise is a leading independent software company producing advanced products that simplify development of client/server applications. For more information, contact Ann Theriault, Netwise Inc. at 303/442-8280.

PORTLAND, MAINE (JAN. 23) BUSINESS WIRE - Peoples Heritage Financial Group Inc. (NASDAQ:PHBK) Tuesday declared a quarterly cash dividend of

24.5 cents per share payable Feb. 13, to shareholders of record Feb. 2.

The dividend represents the 11th consecutive quarterly dividend increase since Peoples Heritage converted to stock ownership in December 1986. In the previous quarter, Peoples Heritage paid 24 cents per share.

This dividend combined with the prior three total 93.5 cents per share, a 28.1 percent increase over the 73 cents per share for the previous four quarters.

As previously reported, Peoples Heritage Financial Group Inc. had record annual earnings of $22,795,000, or $2.70 per share, for the year ended Dec. 31, 1989. This is a 6.3 percent increase over 1988 earnings of $21,435,000, or $2.54 per share.

Net income for the fourth quarter of 1989 was $5,156,000, or 62 cents per share, compared with $5,164,000, or 61 cents per share, for the same period in 1988. The company repurchased 475,000 shares of its common stock during the fourth quarter of 1989. As of Dec. 31, 1989, the holding company had 8,026,849 shares of common stock outstanding.

Peoples Heritage Financial Group Inc. is the largest Maine-based, bank holding company with assets of $2.87 billion as of Dec. 31, 1989.

The holding company is composed of three subsidiaries: Peoples Heritage Bank, which operates 46 banking centers located throughout Maine, and its subsidiaries Heritage Investment Planning Group Inc., and Northeast Leasing Co.; Oxford Bank and Trust Co., with five offices located in western Maine; and First Coastal Banks Inc., a New Hampshire bank holding company, which includes First National Bank of Portsmouth and Merchants National Bank, Dover and their 11 offices in the Portsmouth/Dover area.

BEVERLY HILLS, CA. (JAN. 23) BUSINESS WIRE - International Lease Finance Corp. (NASDAQ:ILFC) Tuesday announced an agreement to make a strategic investment in Alaska Air Group.

ILFC is purchasing $59.4 million of newly issued cumulative preferred stock. Under the specific terms of the agreement, ILFC will realize an effective annual return of 10.75 percent on its investment. The preferred stock is redeemable at 100 percent of the prinicipal value at the end of seven years and may be redeemed earlier, in full or in part, at the discretion of Alaske Air Group after the second year.

The cash dividends, which are cumulative, will be paid quarterly and, under current tax laws, will be subject to a 70 percent dividend exclusion for ILFC. The preferred stock will entitle ILFC to exercise voting rights of approximately 15 percent of the total voting power of Alaska Air Group.

In a related transaction, separately announced, Alaska Airlines will lease 20 Boeing 737-400 aircraft and associated spare engines from ILFC for eight years with options to extend up to 12 years. Deliveries are scheduled between April 1992 and December 1994. These jetliners are part of the $5.04 billion order placed by ILFC in May 1988. The total lease transaction is valued at approximately $900 million.

In commenting on the investment, ILFC Chairman and Chief Executive Officer Leslie L. Gonda, said, ''This investment provides ILFC an excellent return while helping to build a closer relationship with an important ongoing ILFC customer. Alaska Airlines is one of the country's top-rated carriers whose financial performance has been one of the very best in the industry.

''Alaska Airlines' reputation, plus the attractive return and the voting rights provision of this transaction, make this a unique opportunity for ILFC.''

ILFC is the world's premier operating lessor/owner and remarketer of advanced-technology jet transports.

MOUNTAIN VIEW, CA (JAN. 23) BUSINESS WIRE - Allied Telesis Inc., has announced the appointment of Shinkyo Kaku to the position of vice president and director of engineering. Kaku joins the company after ten years with semiconductor manufacturer Advanced Micro Devices (AMD), where he was most recently Section Manager in Strategic Development.

During his tenure with AMD, Kaku was also responsible for product planning and the development of several processors. Kaku's previous industry experience includes four years with NEC and three years with Digital Computer, both based in Tokyo, Japan.

"The appointment of Shinkyo Kaku is a further demonstration of our commitment to become the premier supplier of high quality, standards-based building blocks for networking applications," says Takayoshi Oshima, president and CEO of Allied Telesis. "Shinkyo's breadth of theoretical and practical experience will help us reach our goals faster - and with superior products."

Kaku holds seven US and European patents, and three Japanese patents. For a period of six years he was a researcher in the areas of robotics and computer control systems at the University of Tokyo, Institute of Industrial Science.

Kaku was selected by Science Digest in 1985 as one of the Year's Top 100 Innovators for his work on image compression and expansion processors. Allied Telesis Inc., provides network building blocks based on industry protocols and standards.

The company designs, manufactures and markets products designed and manufactured at its facilities in Japan and in California. For more information, contact: Allied Telesis Inc., 627 National Avenue, Mountain View, CA 94043. Telephone: (415) 964-2771.

#90023b0137 01/23/1990 ~Business Wire
HOUSTON (JAN. 23) BUSINESS WIRE - The Coastal Corp. has announced that its Coastal Chem Inc. subsidiary intends to begin construction this summer on a new low-density ammonium nitrate plant near Elko, Nev.

The $28 million project will have an output capacity of 130,000 tons per year (400 tons per day), and will be modeled after a larger operation at Coastal Chem's Cheyenne, Wyo. facility. A 12-month construction period is anticipated, and the plant will employ 25 persons when completed.

Coastal Chem's low-density ammonium nitrate is marketed under the trade name LoDAN. The product, which is used as a blasting agent and an agricultural fertilizer, has been produced at Coastal Chem's Cheyenne, facility since 1985.

''The Northern Nevada area is a good location for a new plant,'' said Leo C. Smith, president of Coastal Chem, Inc. ''Gold mining activity in this part of the country is growing rapidly, and we'll be better equipped to supply those mines from a new plant in that area.''

The location is also advantageous from the standpoint of proximity to interstate highways and rail lines, Smith pointed out. Primary feedstock for the plant will be ammonia produced by Coastal Chem and others and transported by rail to the Elko facility.

Coastal Chem Inc., based in Cheyenne, produces nitrogen-based fertilizers and livestock-feed supplements, carbon dioxide and low-density ammonium nitrate for industrial uses. Total annual sales are 520,000 tons with 230,000 tons of agricultural products and 290,000 tons of industrial products.

The Coastal Corp. is a Houston-based diversified energy corporation. Together with its subsidiaries, it has assets of $8 billion and operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, trucking and independent power production.

#90023b0144 01/23/1990 ~Business Wire

AUBURN, CA (JAN. 23) BUSINESS WIRE - HeartFed Financial Corp. (NASDAQ:HFED), the holding company formed in 1989 for Heart Federal Savings and Loan Association, Tuesday reported net income for the year ended Dec. 31, 1989, of $7,341,000, or $1.64 per share.

Net income for the association was $7,649,000, or $1.74 per share, for the year ended Dec. 31, 1988.

Net income for the fourth quarter of 1989 amounted to $2,100,000, or 46 cents per share. Net income for the like period a year ago was $2,213,000 or 50 cents per share.

Net interest income rose during both the fourth quarter and the year to $6,358,000 and $24,868,000, respectively. Net interest income was $6,322,000 and $23,451,000, respectively, for the like periods in 1988. Heart Federal's interest rate spread was 2.89 percent and 2.83 percent, respectively, for the year and the quarter ended Dec. 31, 1989, compared to 3.27 percent and 3.35 percent for the like periods a year ago.

Total noninterest income increased to $1,918,000 in the fourth quarter of 1989 from $1,521,000 for the like period a year ago, primarily due to an increase in profit on real estate operations resulting from the real estate development activities of Heart Federal's wholly owned subsidiary, The Heart of California Corp.

Total noninterest expense increased $827,000, or 19.9 percent, in the fourth quarter of 1989 as compared to the like period a year ago, due primarily to increased personnel costs associated with extended banking hours, the costs associated with the installation of automated teller machines, and increased operating expenses associated with the growth in assets and the addition of three branch offices.

During 1989, total assets grew to $879,517,000, a 14.75 percent increase over the last 12 months. Total loans and mortgage-backed securities increased 14.2 percent to $758,501,000 at Dec. 31, 1989. Deposits rose 14 percent, reaching $773,149,000 at Dec. 31, 1989.

Federal Home Loan Bank advances and other borrowings amounted to $25 million at Dec. 31, 1989 compared to $19,771,000 at Dec. 31, 1988. HeartFed's stockholders' equity was $64,136,000 at year-end 1989, representing 7.29 percent of assets, or a book value of $14.92 per share.

Heart Federal Savings, with 29 offices throughout Northern California, offers savings and consumer, mortgage, construction and commercial real estate finance services.

SCOTTSDALE, AZ (JAN. 23) BUSINESS WIRE - Prime Financial Partners L.P. (AMEX:PFP) Tuesday announced that sales of their Prime Benefit Trus product in 1989 was in excess of $30 million, almost double their sales for the year of 1988.

Trust contributions have tripled with total assets approximating $50 million at the close of 1989 vs. a figure of $17 million one year ago. During the past 15 months the Trust has generated commission revenue in excess of $3 million. National insurance marketing relationships now include AIG Life Insurance Co., Alexander Hamilton Life, Bankers Life and Casualty Company of New York, Executive Life Insurance Co., Executive Life Insurance Company of New York, Lincoln Security Life, Massachusetts General Life Insurance Co., MONY Life Insurance Company of America,

Pan-American Life Insurance Co./Pan-American Assurance Co., Security-Connecticut Life Insurance Co. and Western Life Insurance Co. With increasing momentum and national recognition, management believes 1990 offers the potential for another upsurge in sales for the Prime Benefit Trust.

Additionally, the firm has implemented a restructuring plan which will result in substantial cost reductions, streamlined operations and the disposal of non-productive real estate assets. The latter includes the write-off of its real estate investment in Coeur d'Alene, Idaho. While these accounting transactions will impact year end earnings, they will not affect the firm's cash position.

As it is most prudent to capitalize on available cash by investing these funds in the continued expansion of the Prime Benefit Trust, the board of directors has declared a distribution which is to be paid in Class A units. Each Class A unitholder of record on Jan. 31, 1990, will receive a distribution of .125 Class A units; a value of 25 cents per unit based on a market price of $2 per Class A unit. The Class A distribution will be made on March 2, 1990. Each preferred unitholder of record on Jan. 31, 1990 will receive a distribution of .33 Class A units; a value of 60 cents per unit based on a market price of $2 per Class A unit. The preferred distribution will be made on Feb. 15, 1990. Fractional shares will be paid in cash.

Prime has re-focused its efforts to broaden its revenue base while pruning non-productive assets. Management will continue this redirection throughout 1990 and expects to provide the positive investment returns to which Prime believes the unitholders are entitled.

#90023b0179 01/23/1990 ~Business Wire

LONDON (JAN. 23) BUSINESS WIRE - British Satellite Broadcasting Tuesday announced the unanimous agreement in principle of its shareholders to a financing package designed to take the company through to profitability.

BSB's shareholders have approved a proposal to provide guarantees to support $720 million (450 million British pounds) of financing which Barclays Bank PLC has been mandated to syndicate. Barclays has also been mandated to negotiate with a group of leading international banks to underwrite a further $720 million (450 million British pounds) which is being arranged as a ''project'' loan to BSB without shareholder guarantees.

The total resources available to BSB, including the $676.8 million (423

million British pounds) already invested, will thus amount to over $2.08 billion (1.3 billion British pounds).

The guarantees to be provided by shareholders will be attached as an obligation to new shares in BSB to be offered by way of rights to all BSB shareholders. The new shares will represent some 80 percent of BSB's fully diluted share capital. A small cash consideration will be paid to BSB for these shares.

The rights issue, which will be open to all BSB shareholders, will take place on June 1, 1990. If all shareholdcers participate these four underwriters will hold a 57 percent interest in the fully diluted share capital.

BSB will be the first broadcaster in the world to use commercially the new D-MAC transmission standard, which is compatible, via a set top box, with all existing television sets in use in the United Kingdom and which paves the way to wide-screen and high-definition television.

British Satellite Broadcasting was awarded the franchise for three of the United Kingdom's Direct Broadcasting by Satellite (DBS) channels in December 1986 and the two remaining national DBS channels in June 1989. Marcopolo 1, the company's statellite, was successfully launched in August 1989. BSB's franchise will run until 2005, that is, for 15 years from the commencement of broadcasting.

DataVision is BSB's telecommunications subsidiary. DataVision holds one of seven Specialized Satellite Service operators' licences granted by the DTI in 1988. It will offer data, audio and video services to businesses initially through use of the BSB satellite system, subsequently adding capacity through use of a transponder or a Eutelsat II transponder.

DALLAS (JAN. 23) BUSINESS WIRE - Greiner Engineering Inc. Tuesday announced that the board of directors declared a 4-for-3 stock split in the form of a 33 percent dividend for shareholders of record as of Feb. 2, 1990, payable on Feb. 16, 1990.

The board also approved a five-cents-per share cash dividend for the first quarter of 1990, payable March 2, 1990 to shareholders of record on Feb. 16, 1990.

This cash dividend, to be paid on the increased number of shares which will be outstanding after the stock split, is part of the dividend program instituted in October 1988. The program provides for quarterly cash dividends of five cents per share.

Greiner Engineering Inc. was recently named one of the 200 Best Small Companies in America by Forbes magazine. Greiner is one of the largest engineering and architectural service firms in the United States, specializing in meeting the nation's infrastructure challenges.

REDWOOD CITY, CA. (JAN. 23) BUSINESS WIRE - Network Equipment Technologies Inc. Tuesday announced the FT1 Access Intelligent DSU/CSU, a product that supports fractional T1 services on the N.E.T. IDNX family of Transmission Resource Managers.

Developed and manufactured by Cylink Corp. in cooperation with N.E.T., the FT1 Access DSU/CSU gives users a cost-effective means to provide voice and data networking capabilities to low traffic volume sites.

The new product allows these sites to take advantage of the inherent benefits of an IDNX network today, while providing an upgrade path for future network growth.

The FT1 Access can connect two data interfaces, or one voice and one data interface, onto one fractional T1 access trunk.

Data terminal equipment can include IDNX RS-422 trunks, IDNX primary rate interfaces, voice services from the public network, or any other RS-499/422, V.35, or DS1 (D4 or ESF framed) electrical interfaces.

Support is provided for both the ''alternate DS0'' format specified by AT&T 54019, Addendum One, and the ''consecutive DS0'' format currently employed by the majority of inter-exchange carrier fractional T1 offerings.

Both formats can provide apparent 64 kbit/s X N clear channel transmission over either AMI or B8ZS access spans, permitting users to select any IEC for fractional support, regardless of application.

A special network management software package developed by Cylink provides for centralized network management of the FT1 Access product on a IBM PC or PS/2. The FT1 Access will be integrated initially on the N.E.T. Model 3050 Enhanced Operator Console plus (EOCplus) network management system in early 1990.

''The FT1 Access Intelligent DSU/CSU allows users to take advantage of the fractional T1 services now being offered by all of the major domestic IECs and a number of international PTTs,'' said Bill Cartmill, marketing manager for N.E.T.'s Systems Integration Group (SIG).

''By combining voice and data capabilities and giving users the freedom to select from among the many fractional T1 offerings, the FT1 Access product offers maximum user savings and networking flexibility.''

The FT1 Access Intelligent DSU/CSU is priced from $4,500 to $8,500, depending upon configuration. Currently installed in a number of N.E.T. client networks, the FT1 Access is available for immediate shipment. It will be demonstrated publicly for the first time at the Communication Networks (CN) '90 exposition, Feb. 6-8, in Washington, DC.

N.E.T.'s FT1 Access Intelligent DSU/CSU is a private-labeled version of Cylink's 4202 FT1 ACSU. Cylink Corp., of Sunnyvale, Calif., specializes in the design and manufacture of digital communication equipment for T1 and secure network applications.

N.E.T. develops, manufactures, markets and supports advanced communications products and services that enable large, information-intensive organizations to build and manage wide-area networks.

These networks interconnect computer and communications devices among geographically dispersed locations, enabling organizations to utilize their information systems to competitive and economic advantage.

JUNEAU, AK (JAN. 23) BUSINESS WIRE - Byron I. Mallott, chief executive officer of Sealaska Corp., announced the retention of The First Boston Corp. to assist in the sale of Sealaska Corp.'s seafood subsidiary, Ocean

Beauty Seafoods Inc.

The First Boston Corp. is an internationally recognized investment bank specializing in a variety of financial services, including mergers and acquisitions. First Boston has 10 offices in the United States and offices in 14 foreign countries.

Ocean Beauty Seafoods Inc., headquartered in Seattle, has annual sales of approximately $200 million. Ocean Beauty has eight processing facilities in Oregon, Washington and Alaska, and operates seafood distribution and sales facilities in the western part of the United States and Japan.

''Sealaska Corp. expects to complete the sale of Ocean Beauty Seafoods Inc. within 5 to 6 months,'' Mallott said.

''Between now and then, First Boston Corp. will be marketing the business, meeting with potential purchasers, and working with our management and board of directors to consummate a sale.''

Sealaska Corp., headquartered in Juneau, is one of 13 regional corporations formed under the Alaska Native Claims Settlement Act of 1971. Sealaska's primary investments are in seafood processing and marketing, forest products, minerals development and portfolio management.

SAN FRANCISCO (JAN. 23) BUSINESS WIRE - First Nationwide Bank plans to have its new Lake Forest Technical Center in full swing this summer, bringing some 150 jobs to Folsom, near Sacramento.

First Nationwide will begin recruiting employees for the facility this weekend, although the move to the new, $20 million state-of-the-art technical center is months away, said Executive Vice President Tor Folkedal, the bank's chief information officer. The center is in a leased building at the Lake Forest Industrial Park about 20 miles east of Sacramento on Highway 50.

''We will be recruiting people with technical support, computer operations and telecommunications backgrounds, as well as general administrative assignments,'' Folkedal said. Employment inquiries should be directed to First Nationwide Bank in Sacramento at 916/646-2688.

In all, the Lake Forest Technical Center is responsible for more than 30 systems that support the entire bank. One system controls First Nationwide's automated teller machine network, with links to nine other ATM networks, including the Star, PLUS and American Express, First Nationwide provides customers access to more than 35,000 ATMs in the United States and abroad.

Another new system enables branch and loan office staff to access an array of the company's financial products and retail, loan and financial data, from their own desktop terminals, performing such operations as opening and closing accounts, purchasing certificates of deposit, and filing loan applications.

''The new Lake Forest Technical Center will play a strategic role in the future of First Nationwide by helping us providing superior customer service,'' Folkedal said.

First Nationwide Bank, a wholly owned subsidiary of Ford Motor Co., with more than 300 branches and loan offices in 14 states, has assets of more than $31 billion.

SAN FRANCISCO (JAN. 23) BUSINESS WIRE - Sierra Capital Cos., a San Francisco-based real estate asset advisor and sponsor of seven real estate investment trusts, Tuesday announced the schedule for the declaration and payment of dividends for three of those companies.

Each of the three companies, Sierra Capital Realty Trust VI Co., Sierra Capital Realty Trust VII Co., and Sierra Capital Realty Trust VIII Co., is currently on a monthly dividend schedule, having declared and paid monthly dividends through December 1989. Each company has outstanding a class of preferred stock that is entitled to a dividend preference for 1990 based in part on the company's 1989 earnings.

Accordingly, each company will delay considering its declaration of 1990 preference dividends as well as common share dividends until early February 1990, the first month during which the audited 1989 earnings figures will be available.

At that time, dividends allocable to the month of January, February, and March 1990 will be declared, and preference dividends will be declared for the balance of 1990.

In effect, dividends that would have been declared in 1990 under the schedule established in prior years will not be declared until February 1990; however, dividends allocable to the months of February through December 1990 will be declared in accordance with that schedule.

Sierra Capital Cos. is the advisor to a series of seven equity real estate investment trusts specializing in the acquisition and management of light industrial buildings and community shopping center properties for its public and institutional clients. Sierra Capital Cos. manages $600 million dollars of assets on behalf of 45,000 investors.

SAN FRANCISCO (JAN. 23) BUSINESS WIRE - Sharper Image Corp. Tuesday announced preliminary net sales figures for the fourth quarter and year ending Jan. 31, 1990.

''The Sharper Image's sales for the Christmas season and full year increased approximately 10 percent over the prior year,'' said Richard Thalheimer, chairman and chief executive officer of the company.

''While this increase will result in record net sales both for the fourth quarter and the entire year, at present we anticipate that our earnings for the full year will be approximately 10 - 15 percent lower than last year. The decreased earnings reflect increased advertising expenses to stimulate sales in a generally weak retailing environment in the fourth quarter.''

In the fourth quarter last year, The Sharper Image produced net sales of $83.5 million and earnings of $6.9 million or 84 cents per share. For the full year last year, net sales were $191.3 million and net earnings were $4.8 million, or 58 cents per share.

The Sharper Image is a specialty retailer of a unique selection of innovative and high quality products that are marketed through its colorful, monthly catalogs and expanding retail network which now totals 66 stores nationwide and 6 internationally.

The company offers a wide variety of products, including consumer electronics, communications, health and fitness, recreational and novelty items. Its common stock is traded on the NASDAQ under the symbol SHRP.

#90023b0250 01/23/1990 ~Business Wire

SALT LAKE CITY (JAN. 23) BUSINESS WIRE - Questar Corp. (NYSE:STR) Tuesday announced a restructuring of its gas-marketing programs to enhance their effectiveness and respond to regulatory changes.

The restructuring revolves around Questar Energy Co., a marketing affiliate that conducts unregulated gas sales, processing, gathering and brokering activities. Since beginning operations in 1986, Questar Energy has been a subsidiary of Questar Pipeline Co., an interstate gas transmission subsidiary.

Under the restructuring, Questar Energy will be merged, effective Jan. 31, with Universal Resources Corp., another Questar affiliate that engages in oil and gas exploration and production. Questar Energy will continue doing business under its name in its traditional market areas.

In conjunction with the merger, A.J. Marushack resigned as president and chief executive officer of Questar Energy. John B. Carricaburu resigned as vice president, gas supply and marketing, and Lowell F. Gill stepped down as vice president, regulatory affairs, of the marketing affiliate.

All three simultaneously held and will retain those positions with Questar Pipeline.

Michael B. McGinley has been named vice president of Universal Resources and will direct Questar Energy's activities. He formerly was manager of planning and market development for Questar Pipeline. McGinley will report to Gary L. Nordloh, executive vice president and chief operating officer of Universal Resources. Questar Energy has eight employees who will join Universal Resources.

For the first nine months of 1989, Questar Energy had net income of $1 million. Questar Energy in 1988 sold 16 million decatherms of gas, an 88 percent increase over its first full year of operations in 1987.

It helped arrange for the sale of additional gas in the Pacific Northwest through Westar Marketing Co., an innovative partnership with a subsidiary of Northwest Natural Gas Co. in Portland, Ore.

R.D. Cash, Questar Corp. chairman, president and chief executive officer, said the decision to move ahead with the merger was prompted by stringent new regulations from the Federal Energy Regulatory Commission concerning interstate pipelines and their marketing affiliates.

The regulations would have made it unworkable for Questar Energy to continue its growth and development as a pipeline subsidiary, Cash said. Questar Energy will maintain a close working relationship with the pipeline under the new FERC guidelines.

Cash said the restructuring will combine and strengthen gas-marketing activities in Questar Energy and Universal Resources. It also will enhance Questar Energy's competitive position by providing access to Universal Resources reserves.

#90023b0255 01/23/1990 ~Business Wire

DENVER (JAN. 23) BUSINESS WIRE - Forest Oil Corp. Tuesday announced that preliminary results for 1989 indicate that the company has added approximately 25 BCF of natural gas and 1.7 million barrels of oil to its oil and natural gas reserve estimates, before taking into account purchases and sales of reserves in place.

Expressed in natural gas equivalents, using a conversion ratio of one barrel of oil to 6 MCF of gas, the company's additions were equal to

approximately 35 BCF of gas which is approximately 88 percent of the company's 1989 production.

The company also indicated that because of unfavorable production history on some of its oil and gas leases, primarily in Canada, it was necessary to reduce prior reserve estimates by an amount equivalent to approximately 29 BCF of natural gas. This latter reduction did not result in an impairment of the book value of the company's oil and gas properties.

Forest Oil Corp. is engaged in the exploration for and acquisition, development and production of oil and natural gas. The company's principal producing properties are located in Texas, Wyoming, Oklahoma, offshore Louisiana and Canada.

RANCHO SANTA MARGARITA, CA. (JAN. 23) BUSINESS WIRE - An integrated circuit chip, soon to be available, is expected to provide a strong boost to the home electronics market by enabling most audio-based products to produce a dramatic three-dimensional audio effect from conventional mono or stereo recording or broadcast sound sources.

Hughes Aircraft Co.'s Sound Retrieval System is a patented sound reproduction technique that recreates the ambience and dynamic range of an original live performance or studio situation. It was introduced to the home electronics market last fall on selected television receivers by Sony Corp., first licensee for the new technology.

In addition, a number of other consumer electronic manufacturers, who produce various brand names, are currently being licensed by Hughes to incorporate SRS in their products, scheduled to be ready for market shortly.

Hughes disclosed this week that the circuitry involved in creating this true ''3-D'' effect, on which it holds several patents, has now been reduced to a single microchip. This is expected to speed its incorporation into a wide variety of audio products, including hi-fi, musical instrument, computer, video game, automotive and cinema sound.

The new technology is part of Hughes' audio product line at the company's microelectronic systems division, located in Rancho Santa Margarita. Sal Piraino, assistant division manager, sees this latest advance in SRS as a boon to the audio industry.

''The ease with which this circuitry can now be incorporated into a wide variety of products to create a dramatic audio effect should breathe new life into the consumer electronics industry,'' Piraino said. ''We can envision the day when virtually all consumer audio products will be capable of producing 3-D sound.''

He added that the fact that the Hughes SRS is inexpensive and is available today puts it in the lead in this new market.

''SRS does not require prior processing of audio signals,'' Piraino noted. ''It works with current radio or TV broadcast, videotape, cassette or other sound sources, and plays through two ordinary loudspeakers. In addition, a provision in the integrated circuit device produces the 3-D effect from monaural as well as stereo signals. Heretofore, this has not been possible,'' he said.

Key to the new SRS equipment's performance is its ability to retrieve and restore the spacial information that enables the listener to discern the source and location of a sound. To accomplish this, it uses real-time processing techniques that are based on the way the human ear recognizes the direction from which a sound originates.

Following its introduction last year, the Sound Retrieval System was selected as the best audio product of 1989 by Popular Science magazine.

The Sound Retrieval System was invented by Arnold I. Klayman, a senior scientist at the Hughes microelectronic systems division. The new SRS microchip was designed at the Hughes Ground Systems Group in Fullerton, Calif., and will be fabricated at the company's microelectronics circuits division in Newport Beach, Calif.

OAKLAND, CA. (JAN. 23) BUSINESS WIRE - Civic BanCorp announced that its public offering of 520,000 shares of common stock at $13.50 per share was declared effective at 9:30 a.m. Tuesday by the Securities and Exchange Commission.

The offering is being underwritten by Keefe, Bruyette & Woods Inc. in San Francisco.

The common stock of Civic BanCorp, the parent company of CivicBank of Commerce, began trading in the NASDAQ National Market Tuesday, according to Chairman and Chief Executive Officer Claude B. Hutchison Jr.

The trading symbol for Civic BanCorp is CIVC.

CivicBank of Commerce is an East Bay independent regional bank with offices in Oakland, Walnut Creek and San Leandro. The bank provides products and services tailored to the needs of businesses with annual sales of $500,000 to $30 million, their owners and operators and professional practices.

Hutchison said that Civic BanCorp's entry into the NASDAQ National Market provides brokers and others with immediate access to the best bid and asked prices and other information about the company's shares throughout the trading day.

Those prices are available over more than 190,000 electronic terminals in

brokers' offices throughout the United States and the free world. Trading data are also distributed widely through wire services for selective dissemination by newspapers and radio and television stations.

The company reported assets for the third quarter ended Sept. 30, 1989 at $233.8 million, deposits of $205.4 million and shareholders' equity of $19.1 million.

Registered market makers for Civic BanCorp's common stock are Keefe, Bruyette & Woods and Bateman Eichler, Hill Richards Inc.

In addition to increased market visibility, NASDAQ gives Civic BanCorp the advantage of multiple market makers that compete to offer the best bid and asked prices, as opposed to a single specialist on the floor of a stock exchange.

PORTLAND, OR. (JAN. 23) BUSINESS WIRE - WTD Industries Inc. (NASDAQ: WTDI) Tuesday announced that it has acquired a sawmill owned by Cornett Lumber Co. of Central Point, Ore.

Called Central Point Lumber Co., this 100-million board feet annual capacity softwood stud mill can manufacture up to 10-foot lumber. The sawmill becomes part of WTD's South Coast Region headquartered at Glide, Ore., reporting to Mike Barnes, region manager.

''We're very pleased to own this mill,'' Bruce L. Engel, WTD president, stated. ''Central Point is the size and type of sawmill that responds best to our production system. An added customer advantage is its rail service and close proximity to Interstate 5.''

WTD has named an industry veteran, Rick Saunders, general manager of Central Point Lumber Co. Saunders was most recently general manager of Gold Beach Plywood Inc. in Gold Beach, Ore. Previously, he was sawmill manager for South Coast Lumber Co. in Brookings, Ore.

WTD Industries Inc. is America's fastest growing lumber company. With 31 lumber, plywood and veneer facilities in Oregon, Washington, Montana, New York, California, South Dakota and Vermont, WTD is the fourth largest producer of lumber in the United States and the eighth largest in North America according to ''Forest Industries'' magazine's 1988 ranking. WTD products are sold domestically and internationally by TreeSource Inc., WTD's wholly owned subsidiary.

SCOTTS VALLEY, CA. (JAN. 23) BUSINESS WIRE - QUATTRO PRO, a high-end spreadsheet software program from Borland International (NASDAQ:BORL), has received the highest final score from InfoWorld magazine in a product comparison of six leading spreadsheets, including Lotus 1-2-3 releases 2.2 and 3.0, and Microsoft Excel.

''This is the first time QUATTRO PRO has been compared directly with the competition. The comparison demonstrates that QUATTRO PRO is the most advanced spreadsheet for meeting the computing needs of large corporations and small businesses,'' said Philippe Kahn, chairman, president and chief executive officer of Borland.

InfoWorld called QUATTRO PRO ''an outstanding product that mixes some of the best elements of Excel and 1-2-3 Release 3, and fits smoothly into 640K of RAM.''

Six spreadsheets were included in the product comparison: QUATTRO PRO, 1-2-3 releases 2.2 and 3.0, Excel, Plan Perfect from Word Perfect and Computer Associates' Supercalc 5.

QUATTRO PRO earned ''Excellent'' scores in eight categories: compatibility database, graphics, macros, consolidation and linking, documentation, ease of learning and value.

InfoWorld praised QUATTRO PRO as being a ''graphics-intensive powerhouse '' and called its linking and consolidation state of the art.

Borland International Inc. is a leading developer of high-performance software products.

Borland offers in its Professional Business Series some of the world's most widely used business applications such as Paradox, QUATTRO PRO, QUATTRO, SideKick Plus, Reflex and SideKick for Presentation Manager -- the first application for IBM's OS/2 Presentation Manager.

Borland's Professional Language Series includes critically acclaimed developer's tools such as object-oriented Turbo Pascal, Turbo C and Turbo Assembler & Debugger.

#90023b0291 01/23/1990 ~Business Wire

ST. LOUIS (JAN. 23) BUSINESS WIRE - Roosevelt Financial Group Inc. (NASDAQ:RFED), the holding company for Roosevelt Bank, Tuesday reported net income of $1,383,000 for the quarter ended Dec. 31, 1989.

Net income for the same period in 1988 was $4,339,000. This represented earnings of 24 cents per share versus 77 cents a share.

For the year, net income totaled $5,932,000 compared with $16,788,000 in 1988. Earnings per share for the year were $1.05 versus $3.01 in 1988.

Separately, Roosevelt's board of directors declared the regular quarterly dividend of 20 cents a share, payable Feb. 28, 1990, to shareholders of record as of Feb. 15. This represents the eighth consecutive dividend payment since the company declared its initial quarterly cash dividend.

In discussing results for the year, Raymond T. Gusnard, president and chairman of the board, attributed the decline in earnings primarily to adjustments in the bank's high-yield bond portfolio and, to less extent, to revisions in the company's amortization of goodwill.

''Roosevelt remains a strong, well-capitalized savings bank with high-quality assets. Our capital exceeds the requirements imposed by newly enacted regulations,'' Gusnard said. The Financial Institutions Reform, Recovery and Enforcement Act (FIRREA), enacted on Dec. 7, 1989, imposes stricter capital requirements for savings institutions.

''Roosevelt's asset quality remains excellent,'' Gusnard said. ''More than 70 percent of the company's assets consists of government- and agency-insured securities and Roosevelt's ratio of non-performing assets to total assets is about 0.23 percent, an exceptionally low rate.''

Roosevelt has continued to reduce its high-yield bond portfolio. As of Dec. 31, 1989, Roosevelt held $36.1 million in high-yield bonds, down from $88.8 million at Sept. 30 and $168.8 million at the end of 1988. During the fourth quarter, the company sold more than $50 million of bonds, taking an after-tax charge against earnings of $1.4 million, or 25 cents a share in the process.

Roosevelt Bank, a Federal Savings Bank, has 18 full-service offices in Missouri, 16 in the St. Louis area.

LOS ANGELES (JAN. 23) BUSINESS WIRE - Farmers Group Inc. Tuesday learned of Judge Frank Britt's decision to move up the commencement of the California state insurance department hearings, held to examine the takeover bid of Farmers' parent company, B.A.T Industries, from March 19 to Feb. 13.

The California hearing was originally scheduled for Jan. 16, but due to an earlier request from Axa-Midi it was postponed until March 19.

''Judge Britt concluded today that these hearings should move forward as expeditiously as possible,'' said Jeffrey C. Beyer, vice president of Farmers Group. ''Our initial reluctance to accelerate the date was to avoid the logistical difficulty of concurrent hearings.

''Farmers will certainly go forward with its presentation in each of the

relevant states, regardless of concurrent forums.''

The California hearings are being held to determine whether the proposed takeover of B.A.T Industries plc by Sir James Goldsmith's Hoylake Investments, and the subsequent sale of Farmers Group Inc., to his investment partner Axa Midi Assurances of France, would be in the best interest of Farmers' policyholders.

Hearings are currently under way in Illinois and are additionally scheduled in Idaho, Oregon and Washington. Four other states in which a member of the Farmers Group of Companies has headquarters have not yet scheduled their Insurance Department hearings.

LOS ANGELES (JAN. 23) BUSINESS WIRE - Falcon Holding Group Inc., the general partner of the general partner of Falcon Cable Systems Co., a California limited partnership (ASE:FAL)(''Falcon''), Tuesday announced that it had received approval by a majority from unitholders voting at a Special Meeting of Limited Partners held Tuesday to amend the partnership agreement of Falcon to increase the debt limitation from 40 percent of the greater of the cost of all partnership assets, or the fair market value of all partnership assets to 65 percent of the greater of the cost of all partnership assets, or the fair market value of all partnership assets.

As a result, Falcon expects to continue to pay quarterly cash distributions to unitholders at an annual rate of $2.15 per unit through Dec. 31, 1992.

Falcon owns, operates and develops ''classic'' cable television systems in more than 100 communities in California and Oregon that do not receive a wide variety of clear broadcast reception.

REDWOOD CITY, CA (JAN. 23) BUSINESS WIRE - Daniel L. Webb, president and chief executive officer of Redwood City-based Bay Area Bank, Tuesday

announced a second year of record performance for the bank and its parent, Bay Area Bancshares.

Bay Area Bank in 1989 earned $856,000 on assets of $69.7 million for a return on equity of 19 percent and return on assets, the primary measurement for bank performance, of 1.4 percent.

Bay Area Bancshares reported earnings of $501,600, an increase of 16 percent over the previous year, and 68 cents per share versus 65 cents per share for the like period last year.

Webb attributed the company's success to a dedicated staff and the successful implementation of a strategic change begun four years ago.

Bay Area Bank began operations in 1979 and is Redwood City's only independent community bank.

#90023b0310 01/23/1990 ~Business Wire

APPLETON, WI (JAN. 23) BUSINESS WIRE - Valley Bancorporation (NASDAQ/NMS:VYBN) reported record net income for the year ended Dec. 31, 1989 of $29.686 million, compared with $26.510 million in 1988, an increase of 12 percent.

Applicable 1989 earnings per share amounted to $2.50 compared with 1988 earnings per share of $2.27. Net income for the fourth quarter of 1989 amounted to $7.732 million, compared with $7.645 million recorded in the fourth quarter of 1988. On a per-share basis, fourth quarter earnings were 65 cents for 1988 and 1989. Weighted average shares outstanding totaled 11,866,497 in 1989 and 11,690,294 in 1988.

Contributing to the increase in net income for the year was an increase of $8.292 million in net interest income which totaled $114.668 million in 1989, compared with $106.376 million in 1988. Valley's net interest margin in 1989 amounted to 4.53 percent, compared with 4.55 in 1988. A decline in the prime rate in August of 1989 resulted in reduced rates on a portion of the company's loan portfolio.

The net interest margin, however, increased from a 4.43 percent in the third quarter to 4.57 percent in the fourth quarter of 1989 as Valley repriced rate-sensitive liabilities. Valley's earnings in 1989 also benefitted from increases in noninterest income of $3.107 million. This increase was attributable to increased income from service charges, trust services, insurance and credit card operations.

#90023b0342 01/23/1990 ~Business Wire

SAN LEANDRO, CA (JAN. 24) BUSINESS WIRE - Radar Devices Inc. of San Leandro has been awarded a $3.6 million contract with the Navy Broadcasting Service for satellite communication receivers for shipboard reception from the Armed Forces Satellite Transmitted Radio Service.

Radar Devices currently manufactures radar, radar collision avoidance systems, vessel traffic monitoring systems, as well as satellite communications systems for vessels, shore station and transportable communications.

Radar Devices was founded in 1973 by Lawrence F. Anderson, the inventor of the radar collision avoidance technology now mandated worldwide for merchant vessels.

The Navy contract is a natural extension to our satellite communication business.

The company has already installed a complete Inmarsat Satcom System with capability of receiving the Armed Forces Radio Broadcast Service, as well as telephone, fax and data for the USS Blue Ridge, Flagship of the U.S. 7th Fleet.

The Navy contract calls for 284 receive only systems over a four year period.

RDI believes that the potential follow on to upgrade the receive only terminals to complete communication capability could increase revenues to RDI by an additional $10 million over the next five years.

RDI's products meet the requirements for the Global Maritime Distress and Safety System being implemented for some 50,000 vessels worldwide starting in 1992.

This requirement will generate over $6 billion for RDI and its competitors over a seven year period.

#90023b0358 01/23/1990 ~Business Wire

WASHINGTON (JAN. 24) BUSINESS WIRE - Novell Inc. (NASDAQ:NOVL), developer of the NetWare network computing line, Tuesday announced the formation of the LANalyzer Products Division, a dedicated group focusing exclusively on network administration and analysis tools.

The new division is responsible for developing, manufacturing and marketing network analysis products.

''With today's complex and heterogeneous networks, network administration tools are indispensible,'' said Raymond J. Noorda, Novell president and chief executive officer. ''We acquired the leading network administration technology through our 1989 merger with Excelan, which pioneered the first commercially successful network analysis tools in 1984.

''We have formed this division to assure that products of this nature will have the dedicated engineering and marketing staff necessary to extend that leadership.''

The division assumes responsibility for Novell's LANalyzer product line. The LANalyzer network analyzer is aimed at network planners, installers and network managers. It features specialized hardware and software that solve problems typical of a heterogeneous computing environment.

Network software developers have also found the product valuable because of its integrated packet analysis (protocol decodes). Decodes include NetWare, TCP/IP and DECnet.

''LANalyzer, with more than 3,000 units in use worldwide, has the largest installed base of network analysis tools, indicating that the marketplace has recognized the need for network monitoring and diagnosis,'' said Kanwal Rekhi, Novell's executive vice president and acting president and general manager of the division. ''The new division has the resources and expertise to meet those needs now and in the future.''

The LANalyzer Products Division will market its products through reseller channels, OEMs and direct sales. The San Jose, Calif.-based division, which presently employs more than 30 people, expects to grow appreciably within the year.

Novell's LANalyzer Products Division develops, manufactures and markets network monitoring and analysis tools, including the LANalyzer network analyzer and the LANtern network monitor.

Novell Inc. is the leading independent provider of open, high-performance network system software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks.

#90023b0393 01/23/1990 ~Business Wire

WASHINGTON (JAN. 23) BUSINESS WIRE - The LANalyzer Products Division of Novell Inc. (NASDAQ: NOVL) Tuesday introduced the LANtern, the first remote network monitor to use an open standard network management protocol, SNMP.

The LANtern network monitor, designed for Ethernet networks, is available now for OEMs who will add a user interface that allows LANtern-generated network data to appear on their network management consoles.

Novell's LANalyzer Products Division also announced plans to release later this year an end-user version of the product incorporating its own network management console software.

The LANtern network monitor, a combination of high-performance specialized hardware and software, continuously monitors vital network statistics. Additionally, the LANtern network monitor acts as a network characterization tool, tracking usage and traffic patterns on the network.

When attached directly to a network segment, the LANtern network monitor feeds information to a centrally located network management console, tracking network activity and alerting network administrators to cabling malfunctions, common network problems and changes in fundamental network statistics.

The LANtern network monitor is a proactive monitoring device, letting administrators chart a baseline of network activity that allows them to make decisions before a network-disabling situation occurs.

The LANtern network monitor's use of SNMP (Simple Network Management Protocol), the dominant open network management standard protocol, offers three significant advantages over similar but proprietary devices:

- Full SNMP compatibility allows flexibility in choosing management consoles
  now, while also supporting the network management systems of the future.
- System software can be easily updated, ensuring compatibility with
  evolving SNMP specifications.
- The LANtern network monitor can be integrated into large-scale networks
  without conflicting with standards-based gateways and routers.

The LANtern network monitor tracks several distinct network variables, including collision rates and true network utilization. Specific checks for common network problems, such as cable faults and IP address

duplications, are also provided.

An anomaly in any of these events triggers an alarm. The criteria for each alarm are set by the network manager. Alarms can be sent over network cabling or remotely through a built-in serial port and attached modem.

#90023b0604 01/23/1990 ~Business Wire

FREMONT, CA (JAN. 23) BUSINESS WIRE - Headland Technology Inc. Tuesday announced the HIT 486, the first available support logic solution for the 486 microprocessor.

The four-chip set offers designers a highly integrated solution for implementing 486 technology into new systems. It operates at speeds of 25 MHz or 33 MHz for IBM PC/AT compatibles.

"This is the first of our line of 486-based solutions," said Jack Ordway, Headland Technology, senior vice president of sales and marketing. "Integration has always been the key to Headland Technology's success.

"With the HIT 486, we continue to offer the highest levels of functionality and flexibility available. We will increase our 486 offerings in 1990 to provide higher-performance chip sets including support of the EISA bus."

The HIT 486 consists of a peripheral controller chip (GC131), a CPU and memory controller chip (GC132), a bus interface bridge chip (GC133) and a 80486 CPU interface chip (GC135).

The high-performance chip set requires only a microprocessor keyboard controller, real-time clock, memory and six external TTL devices to develop a powerful 486-based computer. The HIT 486 chip set supports up to 24 MB of DRAM, shadow RAM for system and video BIOS, as well as 128K or 64K of EPROM space.

The Intel 80486 microprocesor enhances systems performance with a built-in 8Kb code and data cache, a floating-point co-processor, and paged and virtual memory management. To support this, Headland Technology's chip set provides extensive memory and I/O parameter programmability. Efficient memory access is further enhanced by BIOS shadowing, paging, interleaving and support of the 486 burst mode.

"Our early development and shipment of the HIT 486 will provide manufacturers who are quick on their feet an early lead in bringing 486 technology into new systems," said Joe Nance, product manager. "The chip

set will enable the development of compact, cost-effective and high-performance platforms which will appeal to a broad market."

The HIT 486 is priced at $110 in volume and is available immediately from Headland Technology. The chip set consists of three 160-pin packages and one 84-pin package.

Based in Fremont, Headland Technology Inc. is a provider of highly integrated graphics and logic products for desktop and laptop computers and other electronic products.

WASHINGTON (JAN. 23) BUSINESS WIRE - Sony Microsystems Co. of San Jose, Calif., in attendance at UniForum 1990, demonstrated for the first time its "Worknetting Server."

The server opens Apple Macintosh and MS-DOS networks to the Unix operating system without requiring Unix experience on the part of the users, provides Macintosh networks with the high-performance I/O throughput necessary to handle large network activity and makes accessible the nearly limitless storage provided by Sony's optical products.

The Worknetting Server is an easy-to-install, turnkey, departmental compute and file server. It provides computing resources and stores and retrieves data files in large, heterogeneous, multiple-computer networking environments where Macintosh computers are in use and access to information on minicomputers and mainframes is required.

Target users are corporate, institutional and government workgroups. Applications include office automation, accounting, electronic mail, database management, engineering and electronic publishing.

The Worknetting Server is based on Sony's NEWS family of Unix workstations and uShare, Unix-to-personal-computer networking software from Information Presentation Technologies Inc. (IPT), Calabasas, Calif. The NEWS-based server supports all Macintosh models over the following networks: TCP/IP and Internet and Apple Computer Inc.'s LocalTalk and EtherTalk.

At UniForum, Sony Microsystems also announced a value-added reseller (VAR) agreement with Telephone Technologies Inc. (TTI), Garden City, N.Y. TTI is a vendor of communications systems used by hospital, university, government municipality and Fortune 1,000 corporate workgroups to send and receive voice, data and image information. The company will integrate NEWS

workstations in customer network environments.

"We are taking business solutions into vertical markets such as hospitals and Fortune 1,000 corporations, where the Macintosh is very popular," said Tom Steding, Sony Microsystems vice president of sales and marketing. "Connectivity between Macintosh and Unix computer networks will certainly be a significant part of the coming network-computing wave."

Added Steding, "Sony plans to be the leader in integrating Macintosh computers and Unix machines for business applications, offering the NEWS workstation as a Unix-Macintosh server and focusing on VARs such as TTI who provide connectivity among business systems in the desktop computer and office automation markets."

CONTACT: Sony Microsystems Co., San Jose, Calif., Carol Byram, (408) 434-6644 or dGWB, Irvine, Calif., Ned Madden, (714) 863-0404 or IPT, Calabasas, Calif., Jonathan K. Simonds, (818) 347-7791.

#90023b0608 01/23/1990 ~Business Wire

HUNTINGTON BEACH, CA (JAN. 23) BUSINESS WIRE - Americans love to spend money on laser discs: $150 million in 1988 and almost $200 million in 1989. As sales of compact discs (CDs) and videodiscs continue to rise, so will the number of disc problems.

Solving these problems, Bundee International, a new U.S. company, debuted a system at the 1990 Consumer Electronics Show that actually repairs and protects CDs and videodiscs.

The system protects new discs from scratching by forming a hard outer shell on the surface. Furthermore, it repairs skips by filling and hiding imperfections from the laser eye.

"A few years ago, consumers believed CDs were indestructible," said Dennis Holloway, vice president. "But as disc owners know, it's only a matter of time before discs start skipping. It's much cheaper to repair discs than replace them."

The Bundee International research and development team, called "The Wrecking Crew," scratches discs every day. "We love to throw, step on, even scratch CDs with steel wool," said Kyle Garrett, general manager. "Still, our "Bundeed" discs enjoy a 99 percent repair rate."

The Bundee Disc Repair & Protection System is already available in Asia and the United States and will be distributed worldwide in 1990. For more information, call Bundee International at (800) 233-7522 or (714) 894-8376. Sales figures are from the Recording Industry Association of America.

CONTACT: Garrett Public Relations, Huntington Beach, Kyle Garrett, (714) 894-8376.

#90023b0611 01/23/1990 ~Business Wire

WASHINGTON (JAN. 23) BUSINESS WIRE - Sony Microsystems Co. of San Jose, Calif. Tuesday announced it has signed a strategic agreement with Acucobol Inc., San Diego.

The agreement calls for the use of Acucobol's ACUCOBOL-85 compiler with Sony's NEWS family of Unix workstations. Target customers are professional developers of commercial business application software. The companies are in attendance in Washington at UniForum 1990.

"We need to continue providing software developers - among our principal users - with a basic rich tool set," said Tom Steding, Sony Microsystems' vice president of sales and marketing. "ACUCOBOL-85 offers us a leading COBOL compiler as well as a large number of existing applications."

Said Pamela L. Coker, Ph.D., Acucobol president: "We here at Acucobol are happy to be the first COBOL available on the Sony NEWS, a workstation that provides an excellent platform for sophisticated software development."

Under the terms of the agreement, Acucobol will provide ACUCOBOL-85 directly to Sony end users and resellers of Sony's workstations. Sony and Acucobol will cooperatively market the ACUCOBOL-85 software through Sony's Synergy cooperative marketing program, which includes the Synergy catalog of products available for use with the NEWS workstations.

Members in Acucobol's developer program receive for free a complete ACUCOBOL-85 development system, unlimited maintenance and support, plus all updates during the year.

ACUCOBOL-85 brings to NEWS users thousands of powerful business applications in the areas of banking and finance, business management, construction, development tools, distribution, education administrative, general accounting, health care, insurance, legal, manufacturing, office automation, professional services, retail, telemarketing, and transportation.

COBOL (common business-oriented language), a high-level programming language which features "English-like" statements, is widely used in business applications. The ACUCOBOL-85 compiler computer program translates a program written in COBOL into machine code, the actual binary instructions a computer understands.

Using ACUCOBOL-85 with the NEWS workstations, software developers can create programs with help screens, pop-up windows, pull-down menus, context-sensitive messages and more. ACUCOBOL-85 also allows COBOL users to take advantage of NEWS' multiple windows for testing and debugging programs.

CONTACT: Sony Microsystems Co., San Jose, Carol Byram, (408) 434-6644 or dGWB, Irvine, Ned Madden, (714) 863-0404 or Acucobol Inc., San Diego, Erin Curtis, (619) 271-7097.

#90023b0614 01/23/1990 ~Business Wire

SAN FRANCISCO (JAN. 23) BUSINESS WIRE - Thortec International Inc. (NYSE:THT) announced Tuesday that it has amended the terms of its previously announced tender offers for its 6-1/2 percent Convertible Subordinated Debentures due 2012 (old debentures) and its 8-5/8 percent Senior Subordinated Debentures due 2004 (new debentures).

The tender offers are an integral part of the company's previously announced restructuring plan. The company has increased the net cash purchase price for the old debentures from $170 to $180 per $1,000 of principal amount and the net cash purchase price for the new debentures from $220 to $230 per $1,000 of principal amount.

In addition, the company has reduced the minimum aggregate principal amount of debentures it will accept in the tender offers from $34,000,000 to $30,300,000.

Further, the company has extended the expiration date of the tender offers and related consent solicitation for approval of amendments to the indenture governing the new debentures, from midnight, Jan. 26 to midnight Monday, Feb. 12, to coincide with a special meeting of shareholders.

Thortec, through its subsidiary URS Consultants, is a multi-disciplinary engineering, architecture, planning and consulting firm providing services to governmental, commercial, industrial, educational and health care clients across the United States.

URS Consultants provides a diverse range of professional services to solve complex hazardous material, environmental, seismic, transportation and water treatment problems.

Thortec's subsidiary Mitchell Management Systems develops and implements computerized project management control systems for governmental agencies, major industrial corporations and the architecture, engineering and consulting community.

WASHINGTON (JAN. 23) BUSINESS WIRE - Informix Software Inc., (NASDAQ:IFMX) announced Tuesday that PRC Realty Systems Inc., the nation's largest provider of computer-based information systems for the real estate industry, has selected the Informix-OnLine database engine for use in planned UNIX-based multiple listing service (MLS) system products.

PRC is using a complete information management solution from Informix to develop advanced MLS products. This complete solution includes the Informix-4GL development environment, an advanced fourth generation programming language that dramatically reduces application development time, and OnLine, the first database engine to combine fault tolerant OLTP performance with multimedia capabilities.

PRC's multiple listing service systems simplify the home-buying process by allowing realtors to query the database for listings that meet their clients' specific requirements, such as location, house size, number of bedrooms or price.

PRC Realty Systems selected Informix-OnLine because its OLTP performance will provide PRC's customers with immediate access to data. OnLine's fault tolerance capabilities ensure the availability and integrity of data stored in the system. PRC plans to offer its advanced MLS products to realtors nationwide.

PRC Realty Systems plans to develop advanced products using Informix's line of SQL-based application development tools.

These tools include the Informix-4GL family of fourth generation programming tools that dramatically reduce application development time; Informix-SQL, a menu-driven relational database management system; and the Informix-ESQL family of development tools for embedding SQL into C and COBOL programs.

Informix is providing PRC with training and consulting services to assist in the development and implementation of its advanced products.

Informix Software Inc. is a leading information management software company providing solutions from the database through the desktop.

NEW YORK (JAN. 23) BUSINESS WIRE - ILIO INC. (NASDAQ/NMS Symbols: ILIO, ILIOW, ILIOU) Tuesday announced that it has reached an agreement with Marine Midland Bank to increase the company's credit lines by approximately 38 percent, to $11 million.

Commenting on this development, Jerry Ross, ILIO's chairman of the board and chief executive officer, said, ''Management of ILIO is confident that this agreement will provide sufficient financing to enable the Company to continue our expansion into knitwear, rayons, petites, and large sizes.''

Ross continued, ''As previously reported, the final six months of our fiscal year, representing the spring season, is generally more profitable for ILIO than the first six months. Therefore, we expect that the company's net sales and net income will increase for the six months ending April 30, 1990, as we continue to capture a larger share of the moderately-priced apparel market.''

ILIO INC. designs, markets, sells and distributes women's cotton sportswear and apparel primarily under the ''Ilio'' trademark and through private label arrangements. The company markets its lines of sportswear, which retail for under $30, to moderately priced department stores, specialty stores, specialty chains and mass merchants. ILIO completed its initial public offering in Nov. 1989.

MILPITAS, CA (JAN. 23) BUSINESS WIRE - Cirrus Logic Inc. (NASDAQ: CRUS) Tuesday announced it has acquired Data Systems Technology (DST) of Broomfield, Colo.

According to Cirrus Logic President and Chief Executive Officer Michael L. Hackworth: "With this acquisition, we will be integrating DST's extensive expertise in error correction, recording code and data-compression technologies with our integrated circuit desgin expertise for the development of next-generation VLSI peripheral control products.

"We are particularly excited about this acquisition based on our vision of

the growing importance of sophisticated data compression technology in the industries we serve. We see this as a core technology for future generations of products."

DST will maintain its operations in Colorado and continue to provide algorithmic technology and design services to system and component manufacturers. Founded in 1985, DST established the "de facto" standard for error-correction algorithms for hard-disk drives.

DST also developed the specific code that became the U.S., Japanese and international standard for error correction in rewriteable and WORM optical storage devices. DST holds several patents on innovative error correction design techniques and has considerable expertise with optical-storage device control.

"By working closely together, Cirrus Logic and DST can speed the integration of DST's technologies into new, highly innovative products," stated Neil Glover, president of DST and Cirrus Logic's newest Research Fellow.

"We're particularly excited about applications for our technology to industries we have been closely associated with, such as data communications and graphics, in addition to the mass-storage industry."

Cirrus Logic Inc. develops and markets innovative, advanced standard and semistandard semiconductors. Its products perform complex data communication, display graphic, mass storage and, printer peripheral control functions in high-performance personal computers, workstations, and other office automation products.

Cirrus Logic is the largest producer of interface controllers for the 3-1/2-inch hard-disk drives used in PC/AT-compatible personal computers and has a significant market share in the display-controller market.

CONTACT: Cirrus Logic Inc., Milpitas, Joe Fowler, or Paula Jones, (408) 945-8300 or Acuity, Elizabeth Fairchild, (415) 966-8700.

#90023b0623 01/23/1990 ~Business Wire

SCOTTS VALLEY, CA (JAN. 23) BUSINESS WIRE - Borland International (NASDAQ: BORL) has announced the LAN Pack for its advanced spreadsheet Quattro Pro. The Quattro Pro LAN Pack provides a license that allows an additional user on a local area network to share a single copy of the program.

The Quattro Pro LAN Pack gives network users access to all of the advanced functions of Quattro Pro, as well as data and program files, while

limiting resource requirements.

The LAN Pack saves on disk space because only one copy of the regular product is installed for the entire network. It also represents a significant cost savings when adding additional QUATTRO PRO users to the network.

"The LAN Pack allows users to have Quattro Pro's powerful multiuser capabilities in a package that shares network resources more efficiently," said Rob Dickerson, vice president of product management at Borland.

The Quattro Pro LAN Pack will be available in February for $295. It comes with a complete set of manuals, Network Administrator's Guide, quick-reference guide, registration card, license statement and templates.

The product comes with both 3 1/2-inch and 5 1/4-inch disks. The Quattro Pro LAN Pack provides a license for one additional simultaneous user on the network, but does not include complete product software.

The complete software is provided only on the regular Quattro Pro product. An example of a typical Quattro Pro network is a 10-node LAN with five Quattro Pro users.

The regular Quattro Pro software is installed once on the server, providing a license for one user, and separate Quattro Pro LAN Packs are purchased for each of four additional nodes, allowing any five users to share Quattro Pro simultaneously.

Quattro Pro is network capable right out of the box and does not require a special "server version," as do other spreadsheet products. In addition, it allows users to read, write or query Paradox tables on the network while maintaining data integrity. Quattro Pro provides maximum concurrent multiuser data access.

Borland offers in its Professional Business Series some of the world's most widely used business applications such as Paradox, Quattro Pro, Quattro, SideKick Plus, Reflex and SideKick for Presentation Manager - the first application for IBM's OS/2 Presentation Manager.

CONTACT: Borland International Inc., Scotts Valley, Marguerite Padovani, (408) 439-1622, or Rebecca Furtado, (408) 439-1623.

#90023b0624 01/23/1990 ~Business Wire

NEWARK, NJ (JAN. 23) BUSINESS WIRE - THT Inc. (NASDAQ: TXHI) announced Tuesday changes to its board of directors and corporate officers.

On Dec. 31, 1989, E. Talbot Briddell resigned his position as president and director of THT Inc. in order to pursue other business interests. The remaining directors have elected Frederick A. Rossetti to serve the remainder of Briddell's term as director and to serve as president of the company.

Also, on Dec. 31, 1989, Doreen Yandell resigned as secretary and the board of the company elected Andrew R. Reiser as her replacement to serve until such time as Reiser's successor is elected. Barbara Sweeney was also elected by the board to the position of assistant secretary of the company.

The board authorized the company to enter into a management services agreement as of Jan. 1, 1990 with Eastern Industrial Plant Services Corp. pursuant to which Eastern will be paid a monthly fee of $6,500 plus out-of-pocket expenses for providing day-to-day management of the company.

Eastern's fee for the first month of the contract, Jan. 1990, will be $12,500. For any work performed by Eastern outside the ordinary day-to-day management of the company, Eastern will be paid at the rate of $1,500 per day.

Eastern is an affiliate of Fidelco Capital Group which, in turn, is an affiliate of Marc E. Berson, a director of the company. In connection with the agreement between the company and Eastern, Fidelco Capital Group will receive warrants to purchase 250,000 shares of common stock of the company at the market price of such stock on Jan. 2, 1990.

In connection with the resignation of Briddell and the appointment of Rossetti, the board has authorized the move of the company's offices from Chadds Ford, Pa. to Eastern's office in Newark. The new address for the corporation as of Jan. 1, 1990 is 326 Frelinghuysen Ave., Newark, N.J. 07114.

THT's primary business is the acquisition and operation of one or more enterprises. At the current time, THT is involved in the marketing and distribution of the VF3000 videofax machine which produces video images through facsimile transmission.

#90023b0625 01/23/1990 ~Business Wire

TEMPE, AZ (JAN. 23) BUSINESS WIRE - MicroAge Inc. (NASDAQ: MICA) reported net income of $1.8 million for the first fiscal quarter of 1990 ended Dec. 31, 1989, a 64 percent increase, compared with $1.1 million in the comparable quarter of fiscal 1989.

Earnings per share were reported at 42 cents for the first fiscal quarter, a 62 percent increase over 26 cents per share in the comparable quarter of fiscal 1989. Revenue for the quarter was $146.4 million, a 76 percent increase over $83.3 million reported in the first fiscal quarter of 1989.

Jeffrey D. McKeever, president and chief executive officer, said: "Our increased revenue can be attributed primarily to the additional revenue generated by new sales locations added to our network, as well as increased product purchases by our existing locations. The new franchise and distribution programs we introduced in fiscal 1989 contributed to a significant increase in network locations.

"At Dec. 31, 1989, we had 540 locations, compared to 221 at Dec. 31, 1988. As is evidenced by our results, we experienced strong demand within our network for computer systems and services."

McKeever continued: "We believe our commitment to a value-added strategy has contributed to our strong performance in the first fiscal quarter. Also, we have developed a strong infrastructure upon which we believe we can continue to leverage growth and recognize economies of scale.

"The key element of this infrastructure is our investment in information technology, which should enable us to achieve continued improvements in operating efficiencies.

"For the quarter, our selling, general and administrative expenses as a percentage of revenue were 6.7 percent, compared to 9.0 percent in the first fiscal quarter of 1989. Our gross margin percent for the quarter ended Dec. 31, 1988, was 11.6 percent, compared to 8.8 percent at Dec. 31, 1989.

"This margin decline was expected and primarily due to a substantial increase in sales to affiliate franchisees, as well as conversions of existing franchisees to MicroAge 2000. These franchise programs, which are based on a cost-plus pricing structure, in general have lower margins than our royalty-based franchise program. The margin decline was offset by our increase in revenue and control over expenses during the quarter."

#90023b0626 01/23/1990 ~Business Wire

MILPITAS, CA (JAN. 23) BUSINESS WIRE - Cirrus Logic Inc. (NASDAQ: CRUS) Tuesday announced that net revenues for the third quarter of fiscal 1990, ended Dec. 31, 1989, were $23.7 million, up from $10.1 million for the

corresponding quarter a year ago and up from previous quarter's revenues of $18 million.

Net income for the quarter was $4.3 million, or 28 cents per share, as compared with net income of $1.3 million, or ten cents per share, during last year's third quarter.

This fiscal year's prior quarter had a net income of $3.4 million, or 22 cents per share. Pretax profit was 21 percent of revenues and the after-tax return on average equity was 38 percent.

For the first nine months of fiscal 1990, ended Dec. 31, 1989, revenues were $56.5 million and net income was $10.1 million. For the corresponding period a year ago, revenues were $24.7 million and net income was $2.2 million.

"Our revenue growth reflects the capacity we brought on recently to meet the strong demand for our mass storage and VGA products," stated Michael L. Hackworth, president and chief executive officer. "Our mass storage business, strengthened by increasing business in Japan and Asia, has increased as a percent of revenues on a year-to-date basis.

"Our display graphics business grew this quarter through incremental strength in the LCD VGA market segment. Though we do not expect this percentage of quarterly growth to continue, orders during the quarter were strong and business conditions appear to show continued strength in the markets we serve."

Cirrus Logic provides innovative VLSI products that perform complex peripheral control functions in high-performance personal computers, workstations and other office automation products. The Milpitas-based company develops advanced standard and semistandard VLSI controllers for data communications display graphics, mass storage and printers.

#90023b0630 01/23/1990 ~Business Wire

SALISBURY, NC (JAN. 23) BUSINESS WIRE - Omni Capital Group Inc. (NASDAQ: OCGI) Tuesday announced financial results for the second quarter and the six months ended Dec. 31, 1989.

For the three months ended Dec. 31, 1989, net income was $1,217,000, up 2.3 percent as compared with net income of $1,190,000 recorded in the second quarter of fiscal 1989.

For the six months ended Dec. 31, 1989, net income rose 4.8 percent to $2,306,000, or 92 cents per share compared with net income of $2,200,000, or 88 cents per share, reported in the like period last year. Net income per share for fiscal 1989 has been retroactively adjusted to reflect the 50 percent stock dividend declared in July 1989.

At Dec. 31, 1989, total assets were $515,017,000 (an increase of 3.6 percent over 1988), net loans and mortgage-backed securities were $441,122,000 and deposit accounts were $436,387,000 (an increase of 5.9 percent over 1988). Including the stock offering proceeds from the Home Federal-Kings Mountain conversion, stockholders' equity was $52,443,000, or 10.2 percent of total assets, as of Dec. 31, 1989.

Commenting on the results, David B. Jordan, president and chief executive officer said: "We are pleased with the strength and quality of Omni's results for the second quarter. Our continued earnings growth is attributable to strong loan demand and the investment of the additional capital raised in connection with recent merger/conversion transactions.

Jordan also announced that on Jan. 16, 1990, the board of directors of Omni declared a quarterly cash dividend of six cents per share payable on Feb. 9, 1990 to stockholders of record at the close of business on Jan. 26, 1990.

Jordan reported that the merger/conversion transaction with Home Federal Savings Bank of Kings Mountain, N.C., whereby Omni acquired all the shares of common stock of Home Federal-Kings Mountain issued in its conversion from a mutual to stock charter, was completed on Dec. 21, 1989.

Omni Capital Group Inc. is a multi-thrift holding company headquartered in Salisbury, with three wholly owned subsidiaries: Home Federal Savings Bank of Salisbury, Citizens Savings, FSB of Concord, and Home Federal Savings Bank of Kings Mountain.

Home Federal Salisbury serves Salisbury and the surrounding area through its home office and two full service branch locations, Citizens serves the Concord, Kannapolis, and Harrisburg markets through its main office and four full service branches, and Home Federal-Kings Mountain serves Kings Mountain, Gastonia, and Bessemer City through its home office and two full service branch locations.

#90023b0631 01/23/1990 ~Business Wire

LYNNWOOD, WA (JAN. 23) BUSINESS WIRE - INTERMEC Corp. (NASDAQ:INTR), the

leader in solutions for bar code data collection, Tuesday reported record third quarter and nine month sales and profits.

INTERMEC's net income rose 35 percent to $3,092,000, or $.41 per share, for the quarter ended Dec. 31, 1989, compared with net income of $2,285,000, or $.32 per share, in the third quarter of fiscal 1989. The company reported fiscal 1990 third quarter revenues rose 26 percent to $44.2 million compared to $35.1 million in the like quarter a year ago.

For the first nine months of fiscal 1990, INTERMEC's revenues rose 35 percent to $122.4 million compared to $90.8 million the year before while net income climbed 56 percent to $7,864,000, or $1.07 per share, from $4,960,000, or $.72 per share, a year ago.

''Third quarter results were on plan and we expect a strong fourth quarter to complete a good year,'' said John W. Paxton, chairman and chief executive officer. ''INTERMEC's target markets continue to grow well both domestically and abroad because of the proven productivity-enhancing benefits of automatic data collection and the rapid pay-back to users on their investment.'' Paxton also observed that operating cash flow during the quarter was strong, aided by continued reduction in the company's accounts receivable collection period and by an increase in inventory turnover.

''During the quarter, INTERMEC successfully completed the sale of 1.2 million shares of common stock, with net proceeds to the company of $32.4 million. Approximately $12 million of the proceeds was used to reduce short-term indebtedness and the remaining $20 million has been invested in short-term securities,'' according to Paxton. ''Our strengthened balance sheet positions us to capitalize on the continued growth of the industrial based automatic identification industry.''

In discussing Fiscal 1990 third quarter operations Paxton noted, ''Shipments under the company's LOGMARS NT contract with the Department of Defense were lower than originally forecast, but we expect fourth quarter shipments to be strong.''

Regarding third quarter financial results, David C. Mobile, vice president/finance and chief financial officer, said ''Manufacturing variances as well as product mix, lower average selling price items, contributed to a slight decline in the company's gross margin. These factors were attributable to isolated conditions and we expect the gross margin to improve in the fourth quarter.''

Mobile added: ''The company's third quarter tax rate was adjusted to result in a year-to-date effective rate of 32 percent -- the annual rate we expect for the year. This adjustment, similar to an adjustment in the third quarter of the prior year, results from lower state income taxes and

lower taxes on foreign subsidiaries than were originally anticipated.''

INTERMEC will be relocating its headquarters and manufacturing operations in the first quarter of fiscal 1991 to a new 312,000 square foot building. ''Construction is on plan and within budget, and we anticipate a smooth transition to our new plant with minimal disruption to customers,'' Paxton stated.

INTERMEC Corp. is a leading provider of system solutions for automated data collection and identification. The company designs, manufactures, sells, and services equipment and software for customers located throughout the United States and abroad.

#90023b0632 01/23/1990 ~Business Wire

VANCOUVER, WA (JAN. 23) BUSINESS WIRE - VanFed Bancorp (NASDAQ:VANF), Tuesday reported net earnings for the fourth quarter ended Dec. 31, 1989, of $299,000, or 26 cents per share, compared to $276,000 in the fourth quarter a year ago.

A $768,000 decrease in non-performing assets helped boost fourth quarter earnings.

For all of 1989, VanFed's net income was $726,000, or 63 cents per share, compared to $1,093,000 the year before. Earnings per share comparisons with VanFed's 1988 results are not meaningful since the thrift institution had neither shareholders nor shares outstanding prior to its initial public offering in January 1989.

''Current earnings and the successful stock conversion in January 1989 helped VanFed exceed all new federally imposed capital regulations including the fully phased-in risk based capital requirements,'' said Loren Means, president and CEO. ''1989 pre-tax operating earnings, before third quarter reserves for real estate owned and investments in real estate, was essentially unchanged from the year before.

''Total non-performing assets were $4.4 million at year end, down 18 percent from $5.4 million a year ago,'' Means said. ''We will continue to emphasize the reduction of non-performing assets during 1990.''

The bank's net interest income, after provision for loan losses, increased to $5.8 million in 1989 compared to $5.2 million the year before. Non-interest income was $3.1 million in 1989 unchanged from the prior year and non-interest expense was $7.9 million compared to $6.7 million in 1989. The increase in non-interest expense is primarily due to reserves established in the third quarter of 1989 on real estate owned and investments in real estate.

''Deposits at our recently opened Cascade Park branch, east of Interstate 205, have exceeded our expectations. This branch now gives VanFed a presence in all of the high growth areas of Clark County, which should enable the bank to maintain or expand market share,'' Means added. Total deposits increased to $250.1 million at Dec. 31, 1989, from $234.5 million one year earlier.

Gains from the sale of mortgage backed securities, investments and loans totaled $109,000 in the fourth quarter compared to $134,000 a year ago and $487,000 for the full year compared to $394,000 in 1988.

VanFed's loan originations increased 22 percent to $19.2 million in the fourth quarter compared to $15.7 million in the third quarter this year. In the unusually strong fourth quarter of 1988 VanFed originated $40.2 million in new loans.

VanFed's total assets at Dec. 31, 1989, were $306.0 million. In addition, the bank services a portfolio of loans for others totaling $236.8 million. The bank's capital at Dec. 31, 1989, was $14.1 million, and its capital to assets ratio was 4.6 percent. VanFed's book value was $12.25 per share at the end of the year.

VanFed Bancorp is the holding company for VanFed Savings Bank, the largest publicly held thrift headquartered in Southwest Washington. The $306-million thrift serves its customers through seven full-service branches and a mortgage loan production office in Clark County, Washington.

AUBURN, CA (JAN. 23) BUSINESS WIRE - HeartFed Financial Corp. (NASDAQ:HFFD), the holding company formed in 1989 for Heart Federal Savings and Loan Association, Tuesday reported net income for the year ended Dec. 31, 1989, of $7,341,000, or $1.64 per share.

Net income for the association was $7,649,000, or $1.74 per share, for the year ended Dec. 31, 1988.

Net income for the fourth quarter of 1989 amounted to $2,100,000, or 46 cents per share. Net income for the like period a year ago was $2,213,000 or 50 cents per share.

Real estate loan originations during the fourth quarter of 1989 were $53,129,000, compared to $58,145,000 for the fourth quarter of 1988. Real estate loan originations during 1989 were $194,268,000, compared to $217,429,000 in 1988, a decrease of 10.7 percent.

During 1989, total assets grew to $879,517,000, a 14.75 percent increase over the last 12 months. Total loans and mortgage-backed securities increased 14.2 percent to $758,501,000 at Dec. 31, 1989. Deposits rose 14 percent, reaching $773,149,000 at Dec. 31, 1989.

Federal Home Loan Bank advances and other borrowings amounted to $25 million at Dec. 31, 1989 compared to $19,771,000 at Dec. 31, 1988. HeartFed's stockholders' equity was $64,136,000 at year-end 1989, representing 7.29 percent of assets, or a book value of $14.92 per share.

Heart Federal Savings, with 29 offices throughout Northern California, offers savings and consumer, mortgage, construction and commercial real estate finance services.

LONG BEACH, CA (JAN. 23) BUSINESS WIRE - HQ Office Supplies Warehouse Inc. (NASDAQ:HQOSA/PSE:HQO) announced Tuesday that the company has filed a registration statement with the Securities and Exchange Commission for

a secondary offering of 11,550 units.

The offering is being underwritten by Global America Inc. on a ''best efforts'' basis. Each unit will consist of a $1,000 principal amount 8.75 percent convertible debenture and 182 Class C warrants. The anticipated offering price of the units is $1,000 per unit, with a minimum of 3,000 units required to close the offering.

The company will use a portion of the net proceeds of the offering to continue the company's expansion of office supplies warehouses. In addition, the company will use a portion of the net proceeds to pay off a short term line of credit in the amount of $2 million.

H.Q. Office Supplies currently has over 800,000 square feet of leased and pending leased space comprised of 13 existing stores and 16 stores which the company plans to open in the near future. The company offers a wide selection of quality, brand-name office products including general office supplies, business machines, office furniture and other business-related products at discount prices primarily to small and medium-sized businesses.

WASHINGTON (JAN. 23) BUSINESS WIRE - MIPS Computer Systems Inc. (NASDAQ:MIPS) Tuesday announced the launch of its Federal Marketing program under Frank S. Madren, director.

The program, which targets the $15 billion federal systems and software market, was announced by Charles M. Boesenberg, executive vice president of marketing, at UniForum, a major UNIX(R) trade show held here.

Prior to this, Madren was director of systems marketing for two years at MIPS, where he spearheaded the establishment of the company's broad systems product line and built its systems marketing organization.

''With more than 20 years of experience in the industry, I am confident Frank will enable MIPS to secure the kinds of partnerships that will grow our revenue base in the federal marketplace,'' commented Boesenberg.

Under Madren, MIPS will extend its business model of working with reseller partners to make its products available to government agencies and prime contractors. MIPS Federal Marketing targets leading system integrators, who integrate, install and provide on-going management of large, heterogeneous computer networks.

DENVER (JAN. 23) BUSINESS WIRE - Clancy Systems International Inc. announces the award of a contract from Albany, Calif., for a computerized parking citation issuance system.

The system, which will be installed on Jan. 31, 1990, will provide the city with hardware and software for the issuance of parking citations.

Clancy will provide all hardware, software and customization, training, maintenance and repair, citation forms and ongoing support for a fee of 50 cents per citation issued. The term of the contract is for one year and can be renewed by mutual consent of both parties.

Clancy has extended the exercise period of its Class C warrants for an additional six month period. The Class C warrants, previously due to expire on Jan. 31, 1990, now will expire on July 31, 1990, and are exercisable at $.025 per share.

The company's Class B warrants expired on Oct. 31, 1988, and the company's Class A warrants expired on Sept. 30, 1987. The exercise of the Class C warrants will be temporarily halted until the company's new prospectus is cleared by the SEC and is mailed to all warrant holders.

#90023b0651 01/23/1990 ~Business Wire

MOBILE, AL (JAN. 23) BUSINESS WIRE - QMS Inc. (NYSE:AQM) Tuesday reported that quarterly sales for the three months ended Dec. 29, 1989 totaled $62,808,000, an increase of $14,036,000, or 29 percent over sales of $48,772,000 reported in the first quarter of fiscal year 1989.

Net income increased to $3,350,000, or 30 cents per share, compared with $1,321,000, or 12 cents per share, for the same period one year earlier.

The previous year's results included $558,000, or 5 cents per share, in extraordinary income resutling from utilization of a portion of IMAGEN Corp.'s net operating loss carryforwards.

Contributing to the strong quarter was an increase in income before income taxes from $1,156,000 for the first quarter of fiscal year 1989 to $5,234,000 for the first quarter of fiscal 1990. This improvement is a result of continued strong demand for the company's high-end color and monochrome imaging systems, and improved sales and gross margins in the company's retail, direct and European sales channels.

QMS is a leader in the rapidly expanding non-impact print systems market and is a major producer of enhancement products for impact printers. The company offers the broadest selection of laser and thermal transfer printers available for electronic publishing, office automation, advanced imaging and automatic identification applications.

CLEARWATER, FL (JAN. 23) BUSINESS WIRE - Gov. James Martin of North Carolina announced at a meeting of the State's leading exporters in Raleigh Tuesday, that the Owens International companies of Clearwater, Fla., have been chosen to assist North Carolina manufacturers expand their export activity.

Two U.S. Government programs will be utilized in pursuing this objective: 1) promotion of a specially designed State sponsored Shared/Group FSC; 2) use of an FCIA Export Credit Insurance Umbrella Policy.

FSC, an acronym for Foreign Sales Corp., is a U.S. Government program which gives companies an incentive to export by allowing a tax savings on foreign income of up to 30 percent.

The Foreign Credit Insurance Association (FCIA) is an agency of the Export Import Bank of the United States. Use of its foreign accounts receivable insurances allows exporters to safely increase sales by giving foreign buyers liberal sales terms to compete successfully with foreign exporters.

It also is an aid to secure bank financing of foreign receivables. Owens International Insurance is the only administrator of an FCIA Umbrella Policy in the Southeastern United States.

Mark Owens, executive vice president of Owens International Credit and Robert Thornton, CPA, president of Export FSC International of St. Thomas,

USVI developed a unique FSC design to accommodate all sizes of exporters, making it attractive to state governments wishing to support exporters in a concrete fashion.

William C. Edwards Jr. will be leaving Wachovia Bank as international vice president of Wachovia Bank to manage the Owens International office in Winston-Salem.

#90023b0653 01/23/1990 ~Business Wire
WASHINGTON (JAN. 23) BUSINESS WIRE - MIPS Computer Systems Inc. (NASDAQ:MIPS) Tuesday announced it has broadened its marketing agreement with Falcon Microsystems Inc. to encompass the entire MIP(R) RISComputer(TM) product line.

Last November, Falcon Microsystems announced it would offer MIPS RC324 (TM), an 18-mips deskside server, on the General Services Administration's (GSA) Schedule C, the government's official purchasing catalog for computing products.

Under terms of the agreement, Falcon Microsystems will now offer additional models of UNIX(R)-based servers from MIPS, ranging in performance from 12 mips to 55 mips.

''Having a Macintosh computer as a user interface, networked with powerful RISC-based MIPS servers, gives our government customers the best of all possible worlds,'' said M. Dendy Young, chief executive officer of Falcon Microsystems in Landover, Md.

''MIPS servers provide the high performance necessary to support large numbers of users performing multiple functions on networks of user-friendly Macintosh computers.'' Falcon Microsystems is the leading Macintos(R) reseller to the federal government and is Apple Computer's fifth-largest reseller.

''We are pleased to provide Falcon Microsystems with a broader selection of system integration solutions for the federal marketplace,'' said Frank S. Madren, director of MIPS Federal Marketing. MIPS also announced today that it was launching its Federal Marketing program under Madren.

He added that MIPS expects to develop more relationships with system integrators like Falcon Microsystems, who are known for their technical competence and service. MIPS Computer Systems Inc., of Sunnyvale, Calif., is a leading supplier of RISC-based products, including technology,

computer systems, optimizing compilers and operating systems.

MIPS customers include the industry's leading computer manufacturers and more than 100 VARs and system integrators worldwide.

#90023b0655 01/23/1990 ~Business Wire

RAHWAY, N.J.(JAN. 23) BUSINES WIRE - Merck & Co. Inc. Tuesday announced that earnings per share for the fourth quarter of 1989 were 93 cents, an increase of 21 percent over the fourth quarter of 1988.

Fourth quarter net income increased 20 percent to $367.9 million. Sales for the quarter were $1.8 billion, up 15 percent from the same period last year.

For the year, earnings per share of $3.78 increased 24 percent compared with 1988. Net income increased 24 percent to $1,495.4 million. Sales rose 10 percent to $6.6 billion.

''Sales growth for the year was led by new products, said P. Roy Vagelos, M.D., chairman and chief executive officer of the health products firm. ''Strong unit volume gains were registered by both our domestic and international operations.

''Sales outside the United States accounted for 47 percent of 1989 sales compared to 50 percent last year,'' Dr. Vagelos said.

''The effect of a stronger U.S. dollar relative to foreign currencies reduced sales growth by 3 percentage points in the fourth quarter and for the year,'' Dr. Vagelos said.

The sale of Merck's interest in Torii & Co., Ltd., a former affiliate in Japan, during the second quarter of 1988 reduced sales growth for the year 1989 by 2 percentage points.

Excluding the effects of the Torii divestiture and currency exchange, the sales increase for the year 1989 was 15 percent.

''Income growth for 1989 resulted from strong unit volume gains, a better product mix, expense control actions, productivity improvements and a lower tax rate,'' Dr. Vagelos said.

In 1989, Merck had 17 products in ten therapeutic classes at or above the annual worldwide sales level of $100 million. In the human and animal health products segment of Merck's business, results for the year reflected strong sales gains by 'Mevacor', 'Vasotec', 'Zocor', 'Pepcid', 'Primaxin', 'Prinivil', and ivermectin.

'Mevacor', Merck's new cholesterol-lowering agent, now holds more than 50% of the U.S. market for cholesterol-lowering agents and has been prescribed for more than 1.2 million patients in the U.S. alone. Extensive clinical studies and experience confirm the excellent safety and effectiveness profile of 'Mevacor'.

'Vasotec', Merck's angiotensin converting enzyme (ACE) inhibitor for reducing high blood pressure and treating congestive heart failure, was introduced in 1986 in the United States and Japan, and is being marketed in all major markets. In 1988 'Vasotec' became the first Merck product to reach the annual worldwide sales level of $1 billion and it continues to grow very well.

'Zocor', Merck's second cholesterol-lowering agent, is experiencing strong sales gains after introduction in Sweden in 1988 and in the United Kingdom France, Holland, Italy, Switzerland, and New Zealand in 1989.

'Pepcid', an H2-receptor antagonist for treatment of duodenal and gastric ulcers, is growing rapidly and gaining market share against strong competition.

'Primaxin', an injectable broad-spectrum antibiotic, continues to make market gains against intense competition.

'Prinivil', Merck's second ACE inhibitor for reducing high blood pressure, was introduced in the United States, France, the United Kingdom, and more than ten other countries in 1988, and has been gaining acceptance. 'Prinivil' was introduced in Italy and Germany in the second half of 1989.

Ivermectin, Merck's broad-spectrum antiparasitic, continues its strong performance as the world's leading animal health product. A chewable form of 'Heartgard-30', Merck's once-a-month ivermectin product for the prevention of heartworm disease in dogs, was introduced in the U.S. in the third quarter of 1989.

Due to competition, unit sales declined for a group of longer-established human and animal health products, including 'Aldomet' and 'Indocin'.

The fourth quarter marked the introduction of one new product and the U.S. regulatory approval of another.

'Losec', the first of a new class of gastrointestinal drugs called acid pump inhibitors, was introduced in the United States in the fourth quarter of 1989. It is indicated for short-term treatment of symptomatic gastroesophageal reflux disease (GERD) in patients who respond poorly to conventional medical treatment and for confirmed severe erosive esophagitis. 'Losec' has also been approved for use in treating a serious acid-related disorder called Zollinger-Ellison syndrome. It is licensed to Merck for U.S. marketing by AB Astra, the research-based Swedish firm.

'PedvaxHIB', Merck's Haemophilus influenzae conjugate vaccine for the prevention of bacterial meningitis, was approved in the U.S. in December for use in children 18 months or older, with discretionary use by physicians in children down to 15 months of age.

GOLDEN, CO (JAN. 23) BUSINESS WIRE - Benedict Nuclear Pharmaceuticals Inc. (NASDAQ: BENE) Tuesday announced that it has submitted its filing on the new brain imaging radiopharmaceutical, Iodine 123 HIPDM, that it has been developing on behalf of the State University of New York Research Foundation since 1983.

BNPI's product provides significant advantages over other currently approved radiopharmaceuticals for brain SPECT imaging, as reported by Dr. Michael Devous Sr. on the University of Texas Southwestern Medical Center, Dallas, in the company's informational release of Dec. 19, 1989.

Of significant importance is Dr. Devous' recent discovery of the ability of a new SPECT imaging device (PRISM, Ohio Imaging Inc.) to separate two common nuclear medicine isotopes (Tc-99m and I-123) in the human brain.

Their technique, according to Dr. Michael D. Devous Sr., will for the first time allow two brain states to be imaged at the same time. Examples include resting state and effects of drug therapy, ictal and interictal states in epilepsy, changes in cognition or motor activity.

This important technologic advance depends crucially on the availability of I-123 labelled brain imaging agents with excellent brain uptake and good in vivo stability.

According to Dr. Devous' studies, the best such agent developed to date for this purpose is Benedict Nuclear's I 123 HIPDM. Dr. Devous has used I 123 HIPDM and this new technique in several patients and demonstrated excellent imaging characteristics and clear definition of clinical abnormalities.

The discovery of the "dual isotope" imaging process coupled with the results of BNPI's clinical trial tests indicates that I 123 HIPDM should have a major impact in nuclear medicine imaging and on the future of the company.

Benedict Nuclear Pharmaceuticals Inc. is an established national manufacturer and distributor of ethical radiopharmaceuticals for nuclear medicine. The company presently manufactures Sodium Iodide 123 Capsules used in thyroid disease evaluation, which are either sold directly to hospitals or distributed through Syncor International's national nuclear pharmacy chain.

BNPI has been developing the I 123 HIPDM under license from the State University of New York (SUNY). The filing of the NDA license with the FDA fulfills a major obligation of BNPI's contract with SUNY.

Both SUNY officials and BNPI look forward to an expeditious review for the NDA and are looking forward to commercialization of this important drug product for nuclear medicine.

#90023b0663 01/23/1990 ~Business Wire

SAN DIEGO (JAN. 23) BUSINESS WIRE - TeleSoft and Tektronix Tuesday announced the availability of the TeleGen2 Ada Compilation System for the Tektronix XD88 Series of graphics superworkstations.

Beginning in March, TeleSoft will sell and support the TeleGen 2 Ada compiler and productivity tools on the Tektronix platform. TeleSoft and Tektronix have signed a joint marketing agreement providing for the availability and cooperative marketing initiatives between the companies.

"TeleGen2 is the first Ada compiler available on Tektronix workstations," said Pat Welch, general manager, Tektronix Interactive Technologies Division. "This high performance code generation technology coupled with Tektronix' price/performance opens a new market for Tek platforms in the development and testing of graphics-intensive planning and training, and simulation environments.

"TeleSoft is very pleased to provide Ada-based Software Engineering Productivity solutions to developers using the Tektronix XD88 Series," said Philip B. Baker, president and chief executive officer of TeleSoft. "In doing so, TeleSoft continues to extend its Ada development technology across all major computing platforms. This also is an important part of

TeleSoft's strategic commitment as a member of the 88open Consortium."

Tektronix' and TeleSoft's compliance with the 88open Binary Compatibility Standard gives software engineers creating applications for the Motorola 88000 RISC architecture access to a rich development environment. Compliance with BCS enabled TeleSoft to complete the compiler port and validation in less than four weeks.

Validation is a suite of more than 2,500 tests provided by the U.S. government which must be passed in order for Ada compilation system to be used on Department of Defense programs. Validation testing for TeleGen2 on the XD88 Series was completed in December 1989.

Tek's XD88 superworkstations are based on Motorola's 32-bit 88000 family of RISC processors, the UNIX operating system and standard communications protocols. With speeds of 17 MIPS and a price/performance ratio as low as $900 per MIPS, the XD88 Series includes the world's fastest desktop computer, the XD88/10.

TeleGen2 is a validated, second generation Ada development system that enables developers of mission-critical applications to productively create portable, maintainable Ada applications ranging in size from 100-line programs to complex, multiple-programmer, million-line efforts.

#90023b0669 01/23/1990 ~Business Wire

CAMARILLO, CA (JAN. 23) BUSINESS WIRE - Everest & Jennings International Ltd. (ASE: EJ.A, EJ.B) Tuesday announced that Robert G. Sutherland has been appointed chairman of the board and Michael S. Dreyer has been named a director.

Sutherland, a director of E & J since 1987, replaces Gerald R. Jennings, a member of the company's founding family who died in November after serving as chairman for 25 years.

Sutherland is currently president and chief executive officer of the North American Operations of Industrial Equity (Pacific) Ltd. (IEP), which last month agreed to acquire sufficient shares of E & J stock, subject to certain conditions, to give IEP effective control of the company. IEP is a subsidiary of Brierley Investments Ltd., the second largest company in New Zealand, which has worldwide assets valued at $8 billion.

Dreyer, a tax consultant, is Managing Partner of Dreyer, Edmonds & McGlone an accounting firm. He replaces Lewis J. Whitney, Jr., who retired in December. Also recently named a Director was Barre L. Rorabaugh, who became president of E & J's U.S. operations on Jan. 1.

Whitney A. McFarlin, president and chief executive officer, said, "The combined expertise and experience of these three individuals add substantial strength to E & J's board that will serve the company well.

"And, in the case of Rob Sutherland, during his three years of service on our board, E & J has already benefitted from his counsel and support in our strategic decision to divest our non-medical operations and focus on diversifying and expanding our core medical business."

According to McFarlin, preliminary results for the year ended Dec. 1, 1989 are very disappointing, with losses from operations currently estimated to be in the vicinity of $15 million.

In addition, the company expects to provide reserves of approximately $18.5 million as a consequence of the strategic restructuring of its operations in Europe and North America, including provisions for certain contingencies, liabilities and discontinued operations.

Robert Sutherland, E & J's new chairman, confirmed that IEP is fully supportive of the decision to reposition the company as a dominant player in the healthcare business. Sutherland stated: "Our aim is to become more efficient and improve our market penetration.

"Already we have implemented moves to reduce costs in Europe, Canada, and the U.S., and, with the addition of Smith & Davis' line of hospital/nursing home beds and accessories, we will enhance our product lines."

MENLO PARK, CA (JAN. 23) BUSINESS WIRE - Network General Corp. (NASDAQ:NETG), Tuesday reported revenues for the quarter ended Dec. 31, 1989 of $8,037,000, an increase of 138 percent over revenues of $3,381,000 for the like quarter last year.

For the nine months ended Dec. 31, 1989, the company reported revenues of $20,647,000, an increase of 133 percent over revenues of $8,854,000 reported for the like period last year.

The company posted net income for the quarter of $1,686,000, or 23 cents per share, an increase of 172 percent over net income of $619,000, or 13 cents per share, during the third quarter of fiscal 1989.

For the nine months ended Dec. 31, 1989, Network General recorded net income of $4,200,000, or 62 cents per share, an increase of 136 percent, compared to net income of $1,779,000, or 37 cents per share, reported for the like period last year.

Revenues for the third quarter of fiscal year 1990 represent an increase of 13 percent over revenues of $7,120,000 reported for the previous fiscal quarter ended Sept. 30, 1989. Net income increased 19 percent over the $1,412,000 reported for the previous quarter.

Founded in 1986, Network General designs, develops and markets diagnostic equipment for local area networks.

COSTA MESA, CA (JAN. 23) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), Tuesday announced that its wholly owned subsidiary, CAC Corp., has extended its all cash tender offer for all outstanding shares of common stock of Cipher Data Products Inc. until midnight New York City time on Wednesday, Jan. 31, 1990.

All other terms of the offer remain unchanged. The tender offer was previously scheduled to expire on Jan. 22, 1990.

Archive also announced that as of 6 p.m. California time on Jan. 22, 11,275,974 shares of Cipher Common Stock had been tendered pursuant to the tender offer and not withdrawn. When added to the 675,000 shares already owned by CAC Corp. these shares represent approximately 82 percent of the outstanding shares based on outstanding shares reported in Cipher's most recent public filing.

Archive also announced that it had been contacted Monday evening by representatives of Cipher to propose a prompt meeting to discuss the offer and to provide Archive with information concerning Cipher. It is expected that such meeting will occur shortly. In anticipation of such meeting, Archive and Cipher have executed a confidentiality agreement in mutually

acceptable form. D. Howard Lewis, president and chairman of Archive, stated: ''We are very encouraged by the overwhelming shareholder support for our tender offer. We are also encouraged by the prospect of initial discussions with Cipher.''

Founded in 1980, Archive today is a leading manufacturer and supplier of data backup products to original equipment manufacturers and resellers. Archive and its subsidiary, Maynard Electronics, offer a complete selection of 1/4-inch cartridge and 4MM DAT tape drives, cassette and 8MM helical scanned tape drive subsystems and software for both DOS and Apple Computers.

Archive products provide economical data backup for fixed disc drives and perform additional functions such as program loading, software distribution and archival storage.

#90023b0673 01/23/1990 ~Business Wire

PORTLAND, Ore.(JAN. 23) BUSINESS WIRE - Louisiana-Pacific Corp. (NYSE:LPX) Tuesday reported record 1989 results with sales reaching $2 billion for the first time and earnings up 42.5 percent from last year's record levels.

This is the third consecutive year that the company has attained new highs in sales and earnings.

The company earned $192.6 million in 1989 on sales of $2.0 billion. This compares with 1988 earnings of $135.2 million, before an extraordinary gain, on sales of $1.8 billion. On a per share basis, L-P earned $5.04 in 1989, compared to $3.54, before the extraordinary gain, in 1988.

''Strong building products sales coupled with another record year for our pulp segment led us to this outstanding performance,'' according to Harry A. Merlo, Louisiana-Pacific's chairman and president. ''Structural panel products showed a dramatic surge in 1989 and now account for 36 percent of our building products sales,'' Merlo said. ''In 1989 we reached three billion feet of capacity in our Inner-Seal OSB category with half of our sales volume in higher margin specialty products such as siding and concrete form. We now have 15 plants making this line of products with two more underway,'' he said.

Merlo said that these Inner-Seal products have the added benefit of being made from plentiful, smaller diameter timber species that are not part of the current preservationist debate.

In the fourth quarter, L-P set an earnings record -- the third consecutive quarter earnings have reached new highs. The company earned $52.8 million in the quarter, up 69.8 percent from the $31.1 million earned in the fourth quarter of 1988. On a per share basis, L-P earned $1.38 in the fourth quarter of 1989, compared to $.81 in last year's final quarter. Sales in the fourth quarter totalled $506.3 million, compared to $448.3 million in the fourth quarter of 1988.

Merlo said that although pulp markets are expected to slip in 1990 from the record levels achieved in 1989, L-P is generally encouraged about the company's outlook in the coming year, especially in the building products segment, which represents 85 percent of the company's sales. He said that the company was concerned, however, about recent mixed signals on the direction of interest rates.

''Our continued emphasis on developing innovative, affordable building products should give us a clear edge in securing raw materials, customers and attractive margins in the 1990s,'' he said.

''We're excited about a new fiber gypsum product we will introduce this spring. It's made from gypsum and waste paper and represents a marked improvement over the wallboard currently used in North America,'' Merlo said.

#90023b0674 01/23/1990 ~Business Wire

SAN DIEGO, CA (JAN. 23) BUSINESS WIRE - PSICOR Inc., (NASDAQ/PCOR) Tuesday announced results for the fiscal 1990 first quarter.

For the quarter ended Dec. 31, 1989, earnings were $268,000, or 7 cents per share, on revenues of $13,929,000, compared with earnings of $495,000, or 13 cents per share, on revenues of $10,489,000, reported for the same quarter last year.

Michael W. Dunaway, chairman and chief executive officer, noted that PSICOR had announced last month that despite continuing revenue growth, the company's first quarter earnings would be inmpacted by several strategic actions and operating expenditures that will continue to affect performance through the first half of fiscal 1990.

Dunaway stated: ''PSICOR's management made a strategic decision last year to limit near-term profitability in the interest of laying the groundwork for long-term growth. Therefore, operating margins have been depressed

by expenditures associated with recent acquisitions, geographic expansion of operations, developing internal control systems and aggressively marketing the company's autotransfusion services.

''Additionally, our board of directors voted to set aside reserves in fiscal 1990 for general professional liability and other contingencies, which has further affected results.''

PSICOR, Inc., founded in 1968, is the nation's leading provider of cardiovascular technology and services. The company supplies nearly 400 hospitals with advanced life-sustaining supplies and expert resource management on a cost-effective contract basis.

PHOENIX (JAN. 23) BUSINESS WIRE - Phoenix based America West Airlines, which began operations on August 1, 1983, has been reclassified by the Department of Transportation as a Major carrier, joining the ranks of the largest airlines in the United States. A Major is defined as an airline with annual operating revenues of over $1 billion.

Edward R. Beauvais, chairman and chief executive officer for the airline said, "This is a memorable moment for all of the empoloyee owners at America West." He continued, "Being recognized as a Major carrier is a tremendous achievement, particularly in the time frame this feat was accomplished. This would never have been accomplished without the dedicated employees at America West."

"We are in the final process of compiling our 1989 financial figures and if we do not surpass the $1 billion revenue level, we will be very close," Beauvais stated. A Department of Transportation memorandum stated, "Since the reclassifications are actually effective for the calendar year, 1990 publications, placing them in the Majors will more accurately depict their level of activity."

Beauvais concluded, "This classification means that we rank among the biggest and the best airlines in the world. America's airlines are the world leaders, and we are on the leading edge of efficiency, productivity and product quality. It will also force other airlines to recognize that America West is the number one airline in on-time performance 'among all airlines'."

America West, the national champion in on-time performance since the DOT began reporting, operates the most modern fleet among major airlines utilizing large aircraft. The average age of the carrier's fleet is approximately six years. America West serves 58 destinations throughout the United States and Canada, flying coast-to-coast and across the Pacific with an all Boeing fleet of 747s, 757s, 737s and de Havilland Dash 8s.

WASHINGTON (JAN. 23) BUSINESS WIRE - NCR Corp., a pioneer in open systems computing, Tuesday introduced a set of OSI-compliant network management and communications products for its family of UNIX-based NCR TOWER computers.

The introduction of an OSI-compliant product set is a major component of NCR's open systems strategy for multi-vendor networking, connectivity and interoperability. The benefit to users will be cohesive and enterprise-wide communications from standards-based systems that provide superior reliability and performance.

The NCR OSI network communications products include: --NCR Tower OSI Networking, a full complement of OSI communications products, which allow the NCR TOWER to operate in multi-vendor, wide-area networks. The product set is composed of OSI Network Services; OSI Application Services; X.400 Message Handling Services (MHS); OSI File Transfer, Access and Management (FTAM); and Central X.500 Directory Services.

--NCRMail, a fully featured X.400 compliant message handling system that runs on NCR TOWER and NCR System 10000 ITX-based systems. NCRMail provides a common mail facility for all major NCR platforms operating over multi-vendor, multi-national private or public networks. --NCRNet Manager, an integrated, enterprise-wide network management system for users of Token Ring and EtherNet local-area networks and X.25 wide-area networks. NCRNet Manager is a suite of network management tools that provide local and global network management functions over a wide range of computing platforms.

NCR Corp., with headquarters in Dayton, Ohio, develops, manufactures, markets and services business information processing systems for worldwide markets.

SEATTLE (JAN. 23) BUSINESS WIRE - Celerex Corp. (NASDAQ:CEXY) Tuesday announced that shareholders affiliated with Medallion Partners, an investment and management partnership located in Denver, have committed to invest an additional $2 million in the company.

Thomas R. Kegley, the company's chairman of the board, stated that ''this investment represents a strong vote of confidence in the company and its products and services.'' The investment is being made through the exercise of a substantial portion of certain warrants issued in April 1988 and results in the issuance to the Medallion shareholders of approximately 5,170,000 shares of common stock.

With this investment, the Medallion shareholders will own approximately 48 percent of the company's common stock.

The company also announced that it is postponing its previously announced offering of 600,000 shares of Series 1 Convertible Preferred Stock. The postponement results from the decision by the Medallion shareholders to invest $2 million and the recent decline in the market price of the company's common stock to a level at which the company did not wish to sell its stock.

The company will continue to monitor the market price of its common stock and its financing needs and may choose to complete the offering at a later date.

The company is in the electronic payment systems business specializing in credit card authorization, electronic draft capture and check verification.

PIKEVILLE, KY (JAN. 23) BUSINESS WIRE - Burlin Coleman, chairman of Pikeville National Corp. (NASDAQ:PKVL) and John Mays, president of First American Bank, jointly announced that Pikeville National Corp. has agreed to acquire a majority interest in the capital stock of First Bancorp Investment Corp.

First Bancorp Investment Corp. is a newly organized bank holding company which has entered into an agreement to acquire 100 percent of the outstanding capital stock of First American Bank of Ashland, Ky., from First American Corp. (NASDAQ/NMS:FATN), Nashville, Tenn.

A significant amount of the capital stock of First Bancorp Investment Corp. has been subscribed to by residents of the Ashland area. The merger agreement will provide for the exchange of these shares for Pikeville National Corp. capital stock.

This agreement is subject to approval of all regulatory authorities.

Coleman stated that the directors and management of Pikeville National Corp. are very pleased with the opportunity to combine our banking organizations. ''First American and Pikeville National enjoy a strong base in the Big Sandy Valley. First American Bank has excellent management in place,'' Coleman said. ''We have the highest respect for John Mays' abilities as president and chief executive officer. First American Bank will retain autonomy with respect to its management, employees and directors.

''First American will continue to do business under its present name and its management will continue to respond to the needs of its customers,

employees and community. We welcome all of them to our team and look forward to a great and exciting future.''

First American Bank had assets of $190,000,000 at the close of business on Dec. 31, 1989. Pikeville National Corp. currently has five banks in Pikeville, Whitesburg, West Liberty, Mount Sterling and Williamsburg with assets of $703,000,000. On Jan. 12, 1990, Pikeville National Corp. announced its intent to acquire Farmers Deposit Bank, Flemingsburg, Ky., with assets of $64,000,000. Combined assets of the seven banks were $957,000,000 at Dec. 31, 1989.

#90023b0687 01/23/1990 ~Business Wire

GARDEN CITY, N.Y.(JAN. 23) BUSINESS WIRE - Computer Associates International Inc. (NYSE Symbol: CA) Tuesday announced financial results for the third quarter and the nine months ended December 31, 1989.

Net income for the quarter and nine months ended December 31, 1989 were up over the comparable periods for Fiscal Year 1989 despite the inclusion during first and second quarters of aggregate one-time acquisition and restructuring costs of approximately $30,000,000 before taxes.

The results for all reported periods have been restated to reflect the acquisition of Cullinet which was treated as a ''pooling of interests'' for accounting purposes. Per share amounts reflect the two-for-one stock split which was effected on May 30, 1989.

Revenues for the three months ended December 31, 1989 decreased 4% to $347,083,000 from $362,489,000 for the same period last year. Income before taxes was $104,333,000 versus $100,246,000 a year ago. Net income of $70,529,000 increased 16% from the $60,592,000 for last year's quarter. Net income per share, on a fully diluted basis, for the quarter was $.38 compared with $.33 a year earlier.

For the nine months ended December 31, 1989, revenue was $932,331,000 compared with revenue of $874,445,000, an increase of 7%. Pre-tax income decreased from $151,899,000 in last year's comparable period to $135,554,000 in this fiscal year. Net income was $90,823,000 (or $.49 per share), an increase of 3% from the net income amount of $87,900,000 (or $.49 per share) for the nine month period ended December 31, 1988.

In commenting on the results, Anthony W. Wang, President of Computer Associates, stated that ''Although we would always like to achieve more, the results for the quarter ended December 31, 1989 indicate that many of

the issues affecting us earlier in the year are now behind us, that our business is healthy and that we are well positioned for the years to come.''

Computer Associates is engaged, on a worldwide basis, in the development, marketing and support of systems, applications and database management software products for use on mainframe, mid-range and micro computers of many different manufacturers. SAN DIEGO (JAN. 23) BUSINESS WIRE - Infrasonics Inc. (NASDAQ:IFRA) Tuesday announced that the Food and Drug Administration (FDA) has approved for marketing the company's High Frequency Ventilator, the Infant Star HFV.

Infrasonics President Jim Hitchin said: ''The Infant Star HFV represents new state-of-the-art technology that allows physicians to ventilate and oxygenate certain babies that have become unmanageable with conventional ventilators.

''This represents the conclusion of a four-year investigational study of high-frequency ventilation that showed in certain diseases the odds of a baby surviving increases significantly.''

Infrasonics Inc. is a public company with its common shares traded over the counter. The company manufactures ventilators (respirators) for infants, children and adults as well as other respiratory care products for use in hospitals and the home.

#90023b0689 01/23/1990 ~Business Wire

TUSTIN, CA (JAN. 23) BUSINESS WIRE - Trimedyne Inc. (NASDAQ:TMED) reported Tuesday results for the first quarter of fiscal 1990, ended Dec. 31, 1989.

Revenues for the quarter were $4,418,000, compared to $10,143,000 for the first quarter of fiscal 1989. The net loss for the period was $491,000 or 7 cents per share, compared to income of $1,027,000 or 15 cents per share for the first three months of fiscal 1989. The company's loss for the current quarter would have been larger, had management not implemented a cost reduction program.

''We believe the slowdown in sales is due to uncertainty in the medical community as to whether ''thermal'' or ''cold'' lasers are best suited for treating cardiovascular disease,'' said Howard K. Cooper, president of Trimedyne.

Trimedyne presently markets a broad line of ''thermal'' Nd:YAG and Argon lasers and laser catheters in the United States and 32 foreign countries. A week ago, Trimedyne announced that it had received U.S. FDA approval to begin human clinical trials of a new Holmium ''cold'' laser in peripheral (leg) vessels.

Holmium lasers use a relatively long, infra-red wavelength of light to vaporize plaque (fatty) blockages in blood vessels, even very hard, calcific deposits, without heat.

Only yesterday, Trimedyne announced an agreement with Technolas Laser Technik of West Germany, under which Technolas will manufacture Excimer ''cold'' lasers for Trimedyne. Excimer lasers use a relatively short, ultraviolet wavelength of light to similary vaporize plaque deposits in blood vessels without heat.

Technolas Excimer lasers have been used to treat more than 450 humans in Europe. Trimedyne plans to apply for approval of the FDA to test these Excimer lasers in the United States and will shortly begin marketing them in a number of foreign countries.

Cooper continued, ''Trimedyne's unique ability to offer 'thermal' lasers and both long wave and short wave 'cold' lasers will give physicians the opportunity to choose the laser they believe is best able to treat the patient's condition.''

Trimedyne is the leading manufacturer of proprietary lasers and laser catheters for removing blockages from blood vessels.

ROCHESTER, NY (JAN. 23) BUSINESS WIRE - Voit Corp. (NASDAQ:VOIT) Tuesday announced that it is extending its contract with Patrick Ewing, New York Knicks' basketball superstar, for an additional five-year period commencing October 1, 1990.

Ewing is the spokesperson for Voit's Shooting Star line of basketballs and mini-basketball sets. The Shooting Star line, introduced in 1985 as Ewing's exclusive signature line, has become Voit's most popular basketball product offering.

David Goldman, president, commented, ''We believe Patrick Ewing is one of the premier players in the National Basketball Association today and certainly, a 'most valuable player' contender this season. With Patrick enjoying an extremely successful career, we are very pleased to be renewing our association with him. We are confident that his support of Voit's Shooting Star line will continue to have a valuable effect on sales of these products.''

Voit is a national distributor of sporting goods equipment located in Fairport, N.Y.

#90023b0692 01/23/1990 ~Business Wire

NORWOOD, MA (JAN. 23) BUSINESS WIRE - Phoenix Technologies Ltd. and Matrox Electronic Systems Ltd. Tuesday announced a joint development and marketing agreement to provide Unix users with the ability to run VGA-compatible, DOS-based applications under X-Windows in an IBM PS/2 Micro Channel system.

The Phoenix VP/ix systems software and the Matrox PG2-1281 graphics board fills the void created by the lack of X-Windows applications by bringing the wealth of popular VGA-compatible, DOS-based applications to the Unix/X-Windows marketplace.

VP/ix is an extension to Unix operating systems that allows MS-DOS applications to run under Unix as another task. VP/ix allows users to continue using their familiar DOS applications while simultaneously accessing the power and versatility of the Unix operating system.

''This is the first X Windows product brings to the market VGA MS-DOS capability,'' said Bob McGregor, general manager for the emulation group at Phoenix Technologies. ''It provides for the first time the best of both graphical environments - VGA and X - functioning at exceptional speeds.''

The Matrox PG2-1281 brings a 1280 by 1024 non-interlaced display and high performance graphics to the PS/2. Based on the Texas Instruments TMS34010

processor and several Matrox custom gate arrays, the PG2-1281 incorporates features which accelerate graphic operations commonly found in X-Windows, such as ''backing stores,'' ''save unders''and graphic contexts.

''This new release of VP/ix and the PG2-1281 graphics board provides the oasis in the desert of X-Windows applications. Hundreds of VGA applications written for DOS are instantly available under X-Windows and displayed at VGA resolutions without performance penalties,'' said Phil Colet, product manager at Matrox.

By using the VGA screen capture and rendering capabilities of the Matrox graphics board, the video emulation software in this new version of VP/ix provides 100 percent VGA compatibility within a window on a host's display at speeds comparable to native VGA running under MS-DOS.

Phoenix will be demonstrating the new release of VP/ix during Uniform '90.

BATON ROUGE, LA (JAN. 23) BUSINESS WIRE - Premier Bancorp (NASDAQ/NMS:PRBC) announced that it has received regulatory approvals for its proposed Asset Restructuring and Recapitalization Plan.

The plan is designed to reduce the level of the company's lower quality assets and raise new equity capital. The company can now proceed with the offering of bonds necessary to complete the transaction which is anticipated to close by the end of the first quarter.

Also, Premier announced its fourth quarter financial results, reporting net income of $712,000, or 3 cents per share. The net income for the quarter compares to net income of $374,000, or 2 cents per share, for the third quarter of 1989 and a net loss of $8.1 million, or 33 cents per share, for the fourth quarter of 1988.

The profit for the fourth quarter of 1989 was negatively impacted by $4.6 million of nonperforming asset expenses related to assets that have been identified for possible sale pursuant to the proposed Asset Restructuring Plan and ancillary expenses incurred in connection with the transaction.

Premier reported a loss for the year of $105.6 million, or $4.29 per share compared to a loss in 1988 of $49.7 million, or $2.02 per share. The

loss for 1989 primarily resulted from provisions for possible credit losses and real estate revaluations amounting to $124.1 million.

Net charge-offs and asset write-downs were $89.5 million for 1989, including $44 million taken in the fourth quarter on assets that have been identified for possible sale pursuant to the proposed Asset Restructuring Plan.

Premier's level of nonperforming assets decreased to $248.4 million from the $264.6 million reported at Sept. 30, 1989, and the $254.4 million reported at Dec. 31, 1988. Loans past due 90 days or more and still accruing interest amounted to $18.2 million at Dec. 31, 1989 compared to $13.3 million reported at year-end 1988.

Premier's primary capital at Dec. 31, 1989 totaled $239.7 million which included reserves for credit losses of $93.6 million, approximately $56.6 million of which would be necessary to absorb anticipated write-downs in connection with the proposed Asset Restructuring Plan.

CALGARY, ALBERTA (JAN. 23) BUSINESS WIRE - Sceptre Resources Limited (''Sceptre'') announced today that it has agreed to sell, on a bought-deal basis, 24 million common shares of Sceptre from treasury at a price of $4.20 per common share.

The common share issue will be purchased by an underwriting syndicate

including Gordon Capital Corp., RBC Dominion Securities Inc., Richardson Greenshields of Canada Limited, Midland Capital Corp. and Trilon Securities Corp.

Net proceeds of the issue will be used to reduce bank indebtedness and increase working capital.

Three of Sceptre's major shareholders have expressed an intention to support the transaction. The Caisse de depot et placement du Quebec has expressed an intention to acquire approximately 5.24 million common shares; SOQUIP has expressed an intention to purchase approximately 2.86 million common shares and Noverco Inc. has expressed an intention to purchase approximately 5.24 million common shares.

A preliminary prospectus is expected to be filed in each of the provinces of Canada on Jan. 25, 1990 and the transaction is expected to close on Feb. 15, 1990. The transaction is subject to regulatory approval.

The common share issue may be initially represented by deposit receipts exchangeable on a one for one basis into the underlying common shares of Sceptre in order to allow Sceptre to comply with U.S. regulatory requirements applicable to the issuance of common shares of Sceptre.

Sceptre Resources Limited is a public Canadian oil and gas exploration and production company based in Calgary, Alberta.

ST. PAUL, MN (JAN. 23) BUSINESS WIRE - Preservation activities to save America's historic buildings will be supported with do-it-yourself home products from 3M's DIY Division in a new program aimed at protecting the country's heritage for present and future generations.

The ''3M Saving Our Heritage'' program has begun a nationwide search for historic buildings that require assistance with restoration and maintenance projects.

3M's DIY Division will donate the following products qualified preservation projects: - Caulk - Press-In-Place brand caulk for tubs, sinks, roofs, doors, windows, gutters and window glazing. - Abrasives - sandpaper for drywall, wood and metal, along with hand and power sanding accessories. - Energy Savings - outdoor and indoor Window Insulator Kits and other weather stripping products to seal out winter drafts and summer

heat. - Wood Refinishing - Safest Stripper brand Paint and Varnish Remover that does not contain harmful fumes or abrasive ingredients. It can be used for restoration of period furniture, doors and wood trim. Also included is Scotchgard brand Wipe On Poly Finish to protect bare or newly-stained wood against liquids, chemicals and heat.

The 3M program initally will focus on the most perishable structures - buildings from colonial Amercia and those with a historic relationship to the Revolution and Civil War. But, all historic structures will be considered.

To select Civil War era structures, 3M will be guided by The Civil War Round Table of New York, a Manhattan-based organization that promotes the education and preservation of that period.

Criteria for consideration for the 3M program is as follows: - Structures should be listed as either federal or state historic landmarks, or consideration for such landmark status should be pending.
- An established government or private organization must oversee the daily preservation and historic interpretation of the landmark structure.
- As a schedule for completion of restoration or maintenance work must be submitted. Information about projected costs, available budget, sources of additional capital and volunteer assistance to complete the project must be included. - Structures must be designated as museums open to the public rather than private residences or offices.

MYRTLE BEACH, SC (JAN. 23) BUSINESS WIRE - Anchor Financial Corp., based in Myrtle Beach, and the parent company of the Anchor Bank, Tuesday reported a 22 percent increase in year-to-date income for 1989 of $1,471,334, or $1.54 per share, over the $1,202,424, or $1.25 per share for the like peirod in 1988.

The increase was primarily due to a 12.4 percent increase in net interest income and a 3.8 percent decrease in overhead expense.

Net income for the fourth quarter of 1989 was $319,487, or 33 cents a share, an increase of 6.3 percent over the $300,520, or 31 cents a share a year earlier. A strong net interest margin and tighter expense controls were the major contributors to this increase in earnings.

Return on average assets was 1.32 percent at Dec. 31, 1989 vs. 1.20 percent at Dec. 31, 1988.

Total assets on Dec. 31, 1989 were $118 million, up 9.2 percent from the $108.1 million reported on Dec. 31, 1988. Total deposits were $96.3 million, up 18.8 percent from $81.1 million a year earlier. The company's ratio of common equity to assets was 13.7 percent and book value per share reached $16.92 on Dec. 31, 1989.

WOODBURY, NY (JAN. 23) BUSINESS WIRE - Comverse Technology Inc. (NASDAQ:CMVT) announced that Oki Electric Industry Co. Ltd., the exclusive

distributor of Comverse's TRILOGUE Message Management System in Japan, recently surpassed $1,000,000 in purchases under an OEM agreement signed in March of last year.

Oki TRILOGUE sales have substantially exceeded forecast during the initial period of the contract.

The TRILOGUE system, which is marketed by Oki in Japan as its IOX5150 Voice Management System, was selected by Oki for exclusive distribution in the Japanese market on the basis of its reliability, range of features and adaptability to the requirements of the market.

The system is fully integrated with Oki's leading PBX systems and features bilingual (English and Japanese) prompts.

Kobi Alexander, chairman of the board of Comverse, stated that, ''We are extremely pleased with Oki's results to date and very optimistic regarding the market for our products in Japan. The strength of Oki as a distributor and the excellent working relationship established by the two companies give us a firm foundation on which to build a significant presence in this major market opportunity for our communications processing systems.''

Comverse, located in Woodbury, develops, manufactures and markets high performance computer systems for commerical and defense communications applications, including integrated multi-media message managment systems marketed under the name TRILOGUE.

During the last two years, Comverse has marketed its products directly to major subscriber services provider organizations in the United States and internationally through leading distributors in Western Europe and the Far East, while developing advanced communications processing systems for defense and other users under government contracts.

Its revenues have grown to approximately $12 million for the four quarters ended Sept. 30, 1989, an increase of more than 90 percent over the preceding four quarters.

#90023b0715 01/23/1990 ~Business Wire

WASHINGTON (JAN. 23) BUSINESS WIRE - At the Uniforum '90 trade show, Epoch Systems Inc. Tuesday announced a value-added reseller program for marketing the company's Epoch-1 InfiniteStorage server technology.

Epoch Systems' InfiniteStorage hierarchical storage architecture provides virtually unlimited on-line data storage, eliminates the need for archiving data offline, and automates backup and recovery procedures.

It combines high-speed magnetic disk storage with low-cost, high-capacity optical disk storage to provide fully online data storage and management systems ranging from one gigabyte to one terabyte of storage.

Epoch will be teaming with selected VAR's over the coming months who provide vertical solution to users in data intensive markets. These markets include: M-CAD, Document Management, E-CAD GIS Technical Publications, Seismic Data, Document Imaging, Office Automation, Medical Imaging, Software Development.

Epoch Systems' VARs will be able to offer their customers large on-line storage, high performance, and data management tools at significant cost savings over conventional file servers. The Epoch Systems Processor Unit simply plugs into an NFS network and can be accessed by workstation and

server products such as Sun, DEC, HP, Apollo, IBM, Silicon Graphics, Tektronix, Solbourne, and others.

"Epoch Systems wants to team up with VAR's whose solutions require immediate access to large amounts of data," said Dan Phillips, Epoch Systems' director of Strategic Sales. "Users in this market create many large files that are critical to their business.

"Online access to these files is essential, and management of these files should automated. Epoch Systems, with its Epoch-1 product line, offers these vendors the strategic storage solution they seek."

Headquartered in Marlborough, Mass., Epoch Systems Inc., is a three-year old company that designs, manufactures and sells storage management systems for users of high-performance technical workstation networks.

Sales and support offices are located throughout the United States, with international sales handled by distributors throughout Europe and Japan. The company has an experienced, highly regarded management team, and has been financed by venture capital from Charles River Ventures, Matrix Partners, Sigma Partners, TA Associates, Sierra Ventures, and Ampersand Ventures.

LOUISVILLE, Ky. (JAN. 23) BUSINESS WIRE - H. David Hale, chairman and president of The Cumberland Federal Bancorporation Inc. (NASDAQ/NMS:CMBK) Tuesday announced a net loss of $49,000, (2 cents per share), for the fourth quarter, resulting in a net income of $5 million, ($2.02 per share) for the 12 months ended Dec. 31, 1989.

Hale stated: ''The loss for the quarter is due primarily to the earlier announced $5 million pre-tax charge to earnings in order to increase the bank's valuation allowance on a real estate project in Nashville, Tenn.''

This action is consistent with current management's philosophy of aggressively dealing with problem assets. Hale continued, ''The impact of this charge was reduced due to the bank's strong core earnings and the sale of Federal Home Loan Bank Mortgage Corp. stock.''

The Cumberland Federal Savings Bank is a wholly owned subsidiary of The Cumberland Federal Bancorporation Inc., whose common stock trades on the NASDAQ National Market System under the symbol CMBK. Founded in 1886, The Cumberland has assets of $1.4 billion, and is the largest federal savings

bank and the third largest financial institution headquartered in Kentucky.

Corporate offices are located in Louisville with 43 offices located in 11 cities throughout the state. The Cumberland offers a full line of banking services with special emphasis on real estate and consumer lending.

#90023b0726 01/23/1990 ~Business Wire

WASHINGTON (JAN. 23) BUSINESS WIRE - At the Uniforum '90 trade show, Epoch Systems Inc. Tuesday added to its family of high-capacity Epoch-1 InfiniteStorage servers, announcing support for an erasable optical disk library unit ("jukebox"). The new library unit does double duty, providing:

- online backup service that completely automates backups and eliminates backup tapes, and
- online backing store to the server's Winchester disk drives, so magnetic disk space is always instantly available.

The new erasable library unit, manufactured for Epoch Systems by Hitachi Ltd., can handle up to 48 5.25-inch optical cartridges, for a total capacity of 30.9 billion bytes (GB). The unit is available as part of a new model line of Epoch-1 storage servers, and it can also be added to existing Epoch-1 servers with a simple software option upgrade.

The Epoch-1 is an NFS and TCP/IP-compatible file storage server system that uses hierarchical storage techniques to transparantly integrate the high capacity and low cost of optical disks with the high access speed of magnetic disks.

It is designed to satisfy the expanding storage needs of NFS workstation users - of Sun, HP, Apollo, DEC, IBM, SGI, and other technical workstations and computer servers - who require very fast online access to high-capacity disk storage over an Ethernet network.

The Epoch-1 is designed as a central data storage resource for departmental workstation networks experiencing a chronic shortage of disk space in data intensive engineering, scientific and commercial applications environments. These networks run NCAD, ECAD, CASE, electronic publishing, imaging, engineering and scientific visualization, and computer-generated animation.

Epoch Systems is the first computer manufacturer to offer erasable optical technology as part of an online hierarchical storage architecture. By applying virtual memory concepts to disk storage, infrequently used files

in the server are automatically transferred to optical disk backing-store to free up space on magnetic disks.

"We've taken a limited resource - magnetic disk space- and made it appear unlimited to workstation users," stated Robert Olsen, Epoch Systems' director of marketing. "This process ensures that the magnetic disks never fill, and that plenty of disk space is always available to all client users."

#90023b0727 01/23/1990 ~Business Wire

DALLAS (JAN. 23) BUSINESS WIRE - UNISYS Corp. and VISystems Inc. will jointly market an enterprise-wide distributed processing alternative to traditional on-line transaction processing, under a new cooperative marketing agreement.

VISystems has agreed to become a Marketing Associate through the UNISYS Value Added Marketing Division. This division manages third party relationships with hardware and software vendors.

VISystems has developed a family of transaction processing software products called VIS/TP(TM) that can be used with UNISYS' U Series of UNIX microcomputers. With VIS/TP, CICS software that could previously run only on the IBM mainframe can now run as well on lower-cost UNIX hardware, such as UNISYS' U Series.

CICS (Customer Information Control System) is an IBM mainframe environment for transaction processing.

This teaming of VISystems software and UNISYS hardware offers corporations a cost-effective alternative to developing, testing and running transaction processing software on the corporate mainframe, said Dr. Kirit Talati, co-founder, chairman and chief technical officer at VISystems.

''A great deal of transaction processing applications software has been developed under CICS,'' explained Talati. ''Because VIS/TP is totally compatible with CICS, companies can now run their existing mainframe applications without modification on the lower-cost UNISYS hardware. The result is improved productivity and reduced costs.''

The VISystems software can also be used for CICS software development on the UNISYS U Series.

Larry Osborne, a UNISYS Area Marketing Manager for Marketing Associates, noted, ''This gives companies an inexpensive way to use the same CICS/COBOL applications with less expensive, state-of-the-art hardware under an open architecture.''

Under terms of the agreement, UNISYS and VISystems each will independently market their own products, but will combine marketing efforts to existing or prospective customers, said Osborne.

CLEVELAND, OH (JAN. 23) BUSINESS WIRE - Brush Wellman Inc. (NYSE:BW) announced today that, by agreement with the Board of Directors, Dr. Raymond A. Foos, 61, has resigned as chairman, president, chief executive officer and director.

Dr. Foos concluded, and the Board of Directors agreed, that as the Company positions itself to capitalize on the opportunities of a global marketplace, this is an appropriate time for a transition in the Company's leadership.

Until the Board of Directors has selected a new chief executive officer, Henry G. Piper, 67, former chairman and chief executive officer of the Company, and presently a director, will assume the duties of president and chief executive officer on an interim basis. The Board of Directors, acknowledging Dr. Foos' technical and scientific leadership over 29 years of service to the Company, is pleased that Dr. Foos will be available to consult with the Company, particularly in the areas of the commercialization of beryllium and beryllium-based products.

Dr. Foos was elected president and chief executive officer of the Company in January, 1988, and was elected chairman in December of that year when Mr. Piper retired.

Brush Wellman Inc., with headquarters in Cleveland, Ohio, is a manufacturer of engineered materials. The Company and its subsidiaries supply worldwide markets with beryllium, beryllium alloys, beryllia ceramic, precious metal products and specialty metal systems.

NORTH MIAMI BEACH, FL. (JAN. 23) BUSINESS WIRE - Home Intensive Care Inc. 1/8NASDAQ/NMS:KDNY (common stock) and KDNYW (warrants)3/8 Tuesday announced that Judge Stanley Sporkin will hold an evidentiary hearing on January 29, 1990 regarding the size of the security bond it posted pertaining to a preliminary injunction granted to the company by the United States District Court for the District of Columbia in December 1988.

The injunction prohibited a reduction in the company's home dialysis reimbursement rates and is currently under appeal.

As Home Intensive Care previously announced, when the preliminary injunction was granted, the District Court required Home Intensive Care to post a nominal $1,000 security bond to protect the government against possible damages caused by the injunction. The United States Court of Appeals for the District of Columbia Circuit remanded the preliminary injunction to the District Court with instructions that a bond be set that reflects retrospective as well as prospective injuries. The Court of Appeals continues to retain jurisdiction over the appeal.

In his order, Judge Sporkin further noted that the company should not make any extraordinary expenditures including any distribution of dividends to its shareholders, materially increase the salary of its officers, or otherwise make significant expenditures out of the regular course of business. Should the company desire to make expenditures greater than $200,000, the company should advise the federal defendants who may apply for protection against dissipation of assets.

James P. Cefaratti, president of Home Intensive Care noted, ''In light of the pending reduction in reimbursement rates for home dialysis, effective February 1, 1990, we have transferred over approximately 1,200 patient profiles to the Health Care Financing Administration (''HCFA'') describing the needs of each Dialysis at Home patient who will be affected. We are gravely concerned about the welfare of these patients and are hopeful that HCFA will find suitable treatment alternatives for them.''

Separately, the Company also announced that on January 3, 1990, Allan I. Jacob, M.D. resigned from the company's board of directors.

Home Intensive Care Inc. provides high-tech home health care including supervised chronic home hemodialysis services and home infusion therapy. The company also operates two kidney dialysis centers and 24-hour acute kidney dialysis services in many metropolitan areas.

Its Lifeline Water Systems subsidiary markets water purification systems for commercial, industrial and residential use, while Medi-Sure Testing Inc. provides testing services for the insurance industry and pre-employment screening services.

COSTA MESA, CA. (JAN. 23) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), a leading manufacturer of tape drive products, Tuesday announced worldwide sales of $47 million for the fiscal 1990 first quarter which ended Dec. 29 1989, an increase of 31 percent over the $36 million recorded in the comparable fiscal 1989 period.

Net income for the first fiscal quarter was $3.5 million, up nine percent from the first fiscal quarter 1989 results of $3.2 million. Earnings per share at 26 cents, are up from 1989's 25 cents first fiscal quarter earnings per share.

The first fiscal quarter results mark the eleventh consecutive quarter of increased revenues and earnings over the same quarter of the prior year.

''Despite these favorable results, orders slowed somewhat during the first fiscal quarter; however, we have seen improvements in the second fiscal quarter order rate,'' said D. Howard Lewis, Archive chairman and president.

''Looking ahead to the remaining three quarters of fiscal 1990, we expect Archive's new Python family of DAT drives to contribute to the company's revenue growth,'' said Lewis. The Archive family of Python DAT drives offer storage capacities of 1.3 gigabytes. ''Presently, the Python DAT drives are being evaluated by such companies as UNISYS, NCR, Compaq, and others. We expect production shipments to start in late February,'' stated Lewis.

In the first fiscal quarter, the company began the integration of its domestic Data Storage Division and its European distribution business units into Maynard Electronics. Also, Archive operations in London were doubled in staff and space in December, 1989 to meet the growing demand for backup products in Europe. ''These changes will enable us to improve our ability to serve the reseller market. Archive's reseller business will be headquartered in Orlando, Florida under Mr. Henry Caplan as president. From an operation point of view, this action will enable us to accelerate product development and gain efficiencies under a common management team '' commented Lewis.

Excellent progress was made in the first fiscal quarter of 1990 towards

Archive's goal of attaining 100 percent customer satisfaction with all Archive products. In November 1989 Silicon Graphics Computer Systems awarded Archive its World Class Quality Award for, ''...tireless efforts and commitment to quality that was demonstrated by the on-time delivery of defect free products.''

Founded in 1980, Archive today is a leading manufacturer and supplier of computer data products to original equipment manufacturers and resellers. Archive and Maynard Electronics, an Archive company, offer a complete selection of 1/4-inch cartridge, cassette and 4MM/8MM helical scan tape drives, subsystems and software for DOS and Apple computer systems.

Archvie and Maynard provide economical computer data backup for fixed disk drives and perform additional functions such as program loading, software distribution, data exchange and archival storage.

WASHINGTON, DC (JAN. 23) BUSINESS WIRE - Codenoll Technology Corp. (NASDAQ: CODN) Tuesday announced it is shipping Ethernet network components that support the UNIX operating system supplied by the Santa Cruz Operations (SCO). The drivers are included with Codenoll's CodeNet-8300 Series of Ethernet Network interface cards at no additional cost.

The CodeNet-8330 Series Ethernet Network Interface Cards (NIC) that support the new SCO UNIX Drivers cost only $595, which is about $400 less than the previous generation of fiber optic Ethernet NICs. This makes fiber optic Ethernet from Codenoll directly competitive with Ethernet on twisted pair copper wire.

The 8300-Series cards and SCO/UNIX drivers were demonstrated in the network installed in SCO's display at Uniforum 90. The drivers have been tested and approved by SCO.

"We have supported UNIX for years as an integral part of our strategy for client-server networking," said Michael H. Coden, president of Codenoll Technology.

"UNIX multitasking ability uses the high performance of Codenoll fiber optic Ethernet systems in dstributing applications across the system. This gives the user true distributed processing, matching the performance of traditional mainframes.

"In addition, the high reliability and physical security of Codenoll fiber optics is a perfect compliment to the security features of SCO UNIX Version 3.2 This is extremely important in financial and government networks where security is a critical requirement."

Codenoll recently announced FDDI networking systems that will ship during the first quarter of 1990. Those FDDI systems will also be supplied with drivers for SCO UNIX, as well as with drivers for other major network systems including Novell NetWare 2.1X and NetWare 386, LAN Manager from Compaq, IBM and Microsoft, and 3Com's 3+ Open.

Codenoll Technology is the leading supplier of fiber optic Ethernet systems with thousands of installations worldwide. CodeNet systems are used and distributed by: Bull, C&P Telephone, Computrol, Contel, Digital Equipment, Eurolan (Italy), GTE, Infotec (Germany), Network One (Japan), Southwestern Bell, 3Com, Yrel (France), and many others.

#90023b0740 01/23/1990 ~Business Wire

WESTBORO, MA (JAN. 23) BUSINESS WIRE - Data General Corp. Tuesday announced three new series of AViiON systems, representing ten new products.

The new systems include the AV 400 series of 2-D/3-D mid-range graphics workstations and the AV 4000 series of entry-level server or multi-user systems. The workstations and servers are available for under $500/MIPS and $600/MIPS respectively, offering the industry's best price/performance. Also announced is the new AViiON 5200/6200 series of high-end servers performing at up to 50 Dhrystone MIPS.

The new AV 400 series workstations are available in four models. The AV 400 incorporates a 16.7Mhz 88000 chip performing at 17 Dhrystone MIPS. The AV 402 incorporates two 16.7Mhz 88000 chips performing at 34 Dhrystone MIPS. The AV 412 incorporates two 20Mhz 88000 chips performing at 40 Dhrystones MIPS.

"Running DG/UX the new AV 402 is the industry's first fully-symmetric, dual-processor workstation available for under $20,000," said Stephen P. Baxter, vice president of corporate marketing.

The AV 400 series features a two-slot, industry-standard, VME chassis and user-installable 8-bit, 24-bit or 24-bit Z-buffer graphics processors for applications such as imaging and 3D modeling. The system comes with 8 MB of memory and an integrated Ethernet controller for low-cost LAN

connection. A 70HZ, high-resolution, 1280x1024 flicker-free, color monitor is also available.

The new AV 4000 systems are entry-level, high-performance servers or multi-user systems. The AV 4000 uses the 16Mhz Motorola 88000 chip performing at 17 Dhrystone MIPS. The AV 4020 uses two 16Mhz 88000 chips performing at 34 MIPS.

The base system includes 8 MB of memory, a two-slot, industry-standard, VME chassis and an integrated Ethernet controller for low-cost LAN connection. "The AV 4000 is user configurable for a spectrum of time-sharing and server environments, especially small business and low-end commercial UNIX users," continued Baxter.

The AV 4000 and AV 400 are available in a compact, deskside package. Both systems are based on a single board, increasing reliability and system maintenance. The systems are available in single- and dual-processor configurations. Single-processor configurations can be upgraded to a dual-processor system by simply attaching an option board to the main board.

#90023b0743 01/23/1990 ~Business Wire

WAYLAND, MA (JAN. 23) BUSINESS WIRE - Candela Laser Corp. (CLZR) Tuesday announced its third consecutive profitable quarter.

Revenues for the second fiscal quarter of 1990 were a record $7,575,000, as compared to $3,406,000 for the same quarter one year ago, an increase of 122 percent. Net income for the quarter was a record $1,164,000, or $.25 per share, vs. a loss of ($2,194,000), or ($.62) per share for the same quarter last year.

Revenues for the first six months of fiscal year 1990 were $13,884,000, vs. $5,808,000 for the comparable period last year, an increase of 139 percent. Net income for the first six months of fiscal year 1990 was $2,049,000, as compared to a loss of ($3,578,000) for the same period last year.

Dr. Horace W. Furumoto, chairman and chief Executive officer, commented, ''Our second quarter results are quite encouraging. We are committed to continued growth and profitability.''

''During this quarter, we received a United States Patent covering the use of pulsed lasers to break down objects within the body. This patent

further solidifies our market position. Also, during the quarter, we negotiated and received a $5,000,000 credit line with a major New England bank.

#90023b0750 01/23/1990 ~Business Wire
JACKSON, MI (JAN. 23) BUSINESS WIRE - KLLM Transport Services Inc. (NASDAQ/NMS:KLLM) Tuesday reported results for the fourth quarter and year ended Dec. 31, 1989.

For the year, revenues increased 19 percent to a record level of $115,745,000, compared with $97,410,000 in 1988. Net income for 1989 was $1,391,000, or 54 cents per share, compared with $2,943,000, or $1.15 per share, for the previous year.

For the fourth quarter, revenues increased 11 percent to $29,108,000 compared with $26,271,000 in the like period of 1988. The company recorded a net loss of $373,000, or 15 cents per share, compared with net income of $743,000, or 29 cents per share, in the fourth quarter of 1988.

William J. Liles Jr., chairman and chief executive officer, indicated that higher fuel prices were the primary reason for the fourth quarter loss. He remarked: ''Diesel fuel prices are linked to prices for home heating oil which rose dramatically in the fourth quarter as unusually cold weather was experienced throughout the eastern U.S.

''Our fuel costs for the period were 27 percent higher on average than in the fourth quarter of 1988. In response to the escalations in fuel prices we instituted a combination of rate increases and fuel surcharges that went into effect in early January. Although the outlook for fuel prices for the remainder of the winter is uncertain, the increases in our revenue per mile should provide some relief in the first quarter.''

KLLM Transport Services Inc. is an irregular-route common carrier that specializes in temperature-controlled transportation of various commodities throughout the United States.

AUSTIN, TX (JAN. 23) BUSINESS WIRE - Tracor Aerospace Inc., a subsidiary

of Tracor Inc., has received U.S. government orders totaling $5.7 million for the design, development, and production of inflatable radar, optical, and infrared targets and deployment systems.

David A. Rossi, group vice president for Tracor Aerospace, said the inflatable targets and their associated deployment systems are to be used for a variety of space phenomenology and SDI testing applications. Flight tests were held in 1989 and are scheduled in 1990 and 1991.

Tracor Aerospace is a leader in the development and production of advanced countermeasures products for air, land, sea, and space applications. In addition, the company produces OMEGA/VLF airborne navigation systems and other avionics products for military, general aviation, and commercial airline aircraft.

Tracor Inc., owned by privately held Westmark Systems Inc., is an international technological products and services company with headquarters in Austin, Texas.

In addition to advanced countermeasures and other advanced defense electronics systems, the company is a significant research and engineering services contractor in sonar, communications, and aviation; a major commercial and government aircraft modification contractor; and a major manufacturer of analytical instruments and electrical components.

#90023b0758 01/23/1990 ~Business Wire
MARLBORO, MA. (JAN. 23) BUSINESS WIRE - Stratus Computer Inc. Monday reported that revenue for fiscal year 1989 totaled $341.3 million, up 29 percent from $265.3 million in 1988.

Earnings and earnings per share for the year were $35.4 million and $1.71, gains of 21 percent and 18 percent from $29.3 million and $1.45 for 1988.

Revenue for the fourth quarter of 1989, ended Dec. 31, 1989, was $98.1 million, up 24 percent from $79.4 million for the fourth quarter of 1988. Earnings and earnings per share for Q4 1989 were $10.2 million and 50 cents, each gains of 11 percent from $9.2 million and 45 cents for Q4 1988.

''We are very pleased with the results for the year,'' said William E. Foster, president and chief executive officer of Stratus Computer, ''particularly in light of the current downturn in the computer industry. During 1989 we made great progress into key markets throughout the world.

''We successfully competed for more new business than ever before, winning a total of 136 new customer accounts during the year. This number is more than twice the 57 new accounts we won in 1988, and demonstrates the long-term vitality of our business.

''Contributing to these gains are investments in our worldwide direct sales force and continued healthy relationships with our alternate distribution channels. Business during the fourth quarter, again, reflected the balanced nature of our distribution strategy.

''The core of our business, direct sales, showed good growth in the quarter, particularly on the international side. Our indirect sales channels were also solid contributors to the quarter and remain an important part of our overall distribution strategy,'' added Foster.

''We are confident in the fundamental strengths and direction of the company as we enter the 1990s. It has been an exciting and successful first decade for Stratus, one in which we have made a clear and focused commitment to the on-line processing marketplace. As we enter our second decade we will continue to provide our customers with the best solutions for their critical on-line computing requirements,'' he concluded.

The first shipments of the entry-level XA2000 Model 30 began on schedule in December. The system, introduced in October, has expanded sales opportunities for Stratus by bringing fault tolerance to the low-cost computing range for the first time. Starting at $37,000, the Model 30 enables larger customers to build broader networks of on-line systems, and opens the benefits of continuously available computing to an entirely new and growing class of on-line applications.

During 1989 Stratus announced new products and strategic agreements that extended its reach in key markets including telecommunications and retail, and that strengthened its position across the overall market for critical on-line computing.

Stratus announced three strategic agreements in the telecommunications industry during the year. Under an agreement with AT&T, the company embarked on a co-development program to integrate the Stratus XA2000 product line with AT&T DEFINITY PBX Systems. The program is part of Stratus' overall plan to expand its markets with ISDN (Integrated Services Digital Network) applications, an advanced generation of telecommunications services for businesses.

U S West (Portland, Ore.) and Stratus announced the development of an affordable, Enhanced 911 (E9-1-1) emergency system, running on Stratus computers, geared to small and medium-sized communities. Also announced was a joint marketing agreement between Stratus and Voicetek Corp. (Chelmsford, Mass.), under which the companies are combining XA2000

Systems and Voicetek voice computers as a platform for telecommunications-based services such as voice mail, reservation hotlines and banking or investing by phone.

In the retail pharmacy industry, Stratus launched a marketing program in conjunction with Dallas-based software developer Shared Financial Systems. This effort resulted in the first sales of HealthNet/2, on-line insurance eligibility verification software, on Stratus XA2000 Systems.

Stratus made its implementation of the Pick operating environment available on XA2000 Systems in 1989, and at year end 10 value-added resellers in the Pick market had entered into agreements to resell Stratus systems packaged with their applications.

A series of new networking and communications products increased the appeal of XA2000 Systems among customers in all of Stratus' core industry markets. Software for international Open Systems Interconnect (OSI) communications, DECnet-compatible communications, workstation interconnectivity, and IBM SNA (Systems Network Architecture) network management, enhanced the role of XA2000 Systems in processing critical on-line applications for companies whose networks include a mix of systems from different vendors.

Based in Marlboro, Mass., Stratus Computer Inc. supplies the XA2000 family of continuously available, fault-tolerant computer systems for on-line transaction processing and communications control. The company offers the most technologically advanced architecture for on-line, distributed, and networked applications, and has set a new standard for computer reliability.

WASHINGTON (JAN. 23) BUSINESS WIRE - ParcPlace Systems Tuesday announced Objectworks for C++ on the Sun SPARCstation family.

Objectworks for C++ is the first fully integrated development system that allows the programmer to exploit the object-oriented features of C++. Objectworks for C++, initially announced in June 1989 on the Sun-3, integrates the AT&T C++ Language System, Release 2.0, with a set of tools

designed specifically for the C++ language development.

With this new release ParcPlace's Objectworks for C++ is now available on both CISC- and RISC-based platforms. "We are delighted that ParcPlace is porting its advanced object-oriented C++ development system to RISC platforms like SPARC," stated Mike DeFazio, director of System Software at UNIX Software Operation at AT&T.

"The UNIX Software Operation is committed to supporting C++ and encourages its use among developers. We believe that C++ can provide significant productivity gains in programming graphical and high-performance applications as well as system software."

The integrated set of object-oriented development tools addresses key phases of C++ application development from original design through reuse and maintenance. Objectworks for C++ includes five essential components: a source code browser with multiple code views; an incremental C++ compiler including AT&T's C++ Language System 2.0; an incremental linker, a source level process inspector for debugging code; and a mouse-oriented editor.

"The advanced functionality of Objectworks for C++ is indicative of a new class of high performance graphically-oriented systems that take advantage of Sun's powerful new SPARC technology," said Jennifer Heggie, CASE Market Segment manager at Sun Microsystems Inc.

"Sun's SPARC-based systems provide our customers with the performance necessary for high-end distributed applications, like ParcPlace's object-oriented programming systems."

President and Chief Executive Officer of ParcPlace Systems, Adele Goldberg, observed that, "With the availability of Objectworks for C++ on the SPARCstation family, ParcPlace is demonstrating its commitment to the growing C++ community by providing object-oriented programming technologies to C++ programmers on a variety of computer systems. Moreover we are keeping pace with Sun's development of new workstation technologies."

Objectworks for C++ will be available on the SPARCstation family during the second quarter of 1990. Pricing is set at $2,495 for both the Sun-3 and SPARCstation platforms. Software support is available, including a customer hotline, upgrades to new software releases, an electronic bulletin board and newsletter.

NEW ORLEANS (JAN. 23) BUSINESS WIRE - Hibernia Corp. (NYSE:HIB) Tuesday increased its quarterly cash dividend from 23 cents per share to 25 cents per share, or 8.7 percent.

The new annual dividend rate is now $1. The dividend is payable on Feb. 22, 1990, to shareholders of record on Feb. 8, 1990.

The announcement was made by Charles J. Shaw Jr., president of Hibernia National Bank.

Since 1976 Hibernia's dividend has been raised 18 times and has increased almost eight-fold. In addition the market price of Hibernia's stock increased 26.4 percent from year-end 1988 to year-end 1989, and the average monthly trading volume of the company's common stock reached 900,000 shares. Market capitalization of the corporation was $600 million at the end of 1989.

Hibernia reported on Jan. 17 that net income for 1989 rose 16.3 percent to $61.6 million compared to $53 million reported a year earlier. Earnings per share for 1989 increased 10.6 percent to $2.30 compared to per share earnings of $2.08 for 1988. Assets of the corporation at Dec. 31, 1989, were $6.7 billion.

Hibernia's banks serve customers in major markets in Louisiana and Texas.

The common stock of Hibernia Corp. is traded on the New York Stock Exchange under the trading symbol HIB. At Dec. 31, 1989, Hibernia Corp. had 27 million shares of common stock outstanding.

HAUPPAUGE, NY (JAN. 23) BUSINESS WIRE - The board of directors of North Atlantic Industries Inc. (NASDAQ:NATL) Tuesday announced the appointments of Shelton James and Stephen Barre to the company's board of directors.

The election of James and Barre increases North Atlantic's board from five to seven directors. Commenting on the new appointments, Robert A. Carlson, president and chief executive officer, stated, ''Messrs. James' and Barre's wide and varied experience will be of great value to North Atlantic as it pursues its growth and profitability objectives in the 1990s.''

Barre is currently chairman, president and chief executive officer of

Servo Corp. of America, a high technology manufacturing company. He holds an engineering degree from Rensselaer Polytechnic Institute and a graduate business degree from Harvard University.

James, an associate of Fundamental Management Corp., was executive vice president of Gould Inc. until 1989. Currently, James is chairman of Computer General Inc., an international sales and marketing company. He holds an undergraduate degree from Clarkson and an MBA from New York University.

North Atlantic Industries is a computer products company supplying computer and communicaiton peripherals to both military and commercial users and instrument products to the aerospace industry. The company is a leading supplier of TEMPEST dot-matrix and TEMPEST laser printers, along with the AN-USH-26 (V) Navy Standard Tape Storage System, and the AN-UGC-143A (V) Navy Standard Teleprinter.

#90023b0793 01/23/1990 ~Business Wire
ALBANY, NY (JAN. 23) BUSINESS WIRE - Home and City Savings Bank (NASDAQ:HCSB) announced Tuesday the results for the year ended Dec. 31, 1989.

Net income for the year was $6.3 million, or $2.18 per share, which compares with net income of $6.7 million, or $2.32 per share for the prior year.

Net income for the fourth quarter was $1.2 million, or 41 cents per share. This compares with net income of $1.9 million or 66 cents per share in the year-ago quarter.

''With net interest income for 1989 up $2.4 million over 1988 and our strong capital position, we strengthened our allowance for loan losses by increasing the 1989 provision to $1.3 million over the 1988 level,'' said John J. Brunner, president and chief executive officer.

''The extra provision increased the balance in our allowance for loan losses account to $3.1 million, a level we feel is appropriate under the current economic conditions.''

Brunner noted: ''During the fourth quarter, our non-interest expense included the recognition of an unusual loss on uncollectible checks in the amount of $616,000. We would not expect the same level of check losses to continue and are encouraged by the core earnings outlook for 1990.''

Home & City's total assets at Dec. 31, 1989, were $838.6 million and deposits totaled $718.4 million. Stockholders' equity grew to $93.8 million, resulting in a book value per share of $32.61. The Bank's equity-to-asset ratio was 11.18 percent at Dec. 31, 1989.

Home and City Savings Bank is the largest New York State-chartered savings bank headquartered in Albany, providing retail and commercial financial services in upstate New York. Home and City has 2,875,500 shares of common stock outstanding and is listed on the NASDAQ National Market System under the ticker symbol ''HCSB.''

ORANGE, CT (JAN. 23) BUSINESS WIRE - Hubbell Inc. (AMEX) Tuesday reported fourth quarter and full year 1989 results which established the highest levels of sales and profit in the company's history.

In announcing the results, the company noted that 1989 marked the 29th consecutive year in which Hubbell has reported increased income from continuing operations.

For the fourth quarter of 1989, net income rose by 10 percent to $20,233,000 or 71 cents per share vs. fourth quarter 1988 net income of $18,444,000 or 64 cents per share.

Earnings per share results in both periods are adjusted for the 5 percent common stock dividend declared in December, 1989 and which will be distributed on Feb. 2, 1990.

Sales in the fourth quarter of 1989 were 13 percent higher at $174,407,000 vs. $154,861,000 reported for the period in the prior year.

For the full year 1989, net income increased by more than 11 percent to $79,364,000 vs. $71,288,000 reported in the prior year. Earnings per share for the full year periods, again adjusted for the 5 percent stock dividend rose by more than 12 percent to $2.78 as compared to $2.48. Sales in 1989 were $668,765,000 vs. $614,237,000 in 1988.

In an analysis of Hubbell's operating experience during the year, the company noted that virtually every one of its operating units in each of Hubbell's three segments - Low Voltage, High Voltage and Other - reported increases in both sales and operating profits by comparison with their 1988 results.

In the Low Voltage segment, the company's core of operations with virtually all sales made through electrical distributors, the strongest growth was achieved by the Killark and Hubbell Canada subsidiaries, but the Wiring Device, Lighting and Hubbell Ltd. units also reoprted positive year-to-year comparisons.

Hubbell Inc., which celebrated its 100th anniversary in 1988, is an international manufacturer of quality electrical and electronic products for commerical, industrial, utility, and telecommunications markets.

BEVERLY HILLS, CA (JAN. 23) BUSINESS WIRE - Litton's Aero Products division (NYSE:LIT), Moorpark, Calif., has been selected by the Lockheed Aeronautical Systems Co. to provide the laser gyro navigation systems for the P-7A, the U.S. Navy's next-generation antisubmarine aircraft.

Lockheed said that potential production value to Litton could total as much as $40 million.

This special application of Litton's LTN-92 system will provide superior reliability and higher accuracy than conventional inertial navigation systems, Litton officials said.

The system also provides increased computer memory capacity and the capability to update position data from the new satellite-based Global Positioning System.

The P-7A is in development at Lockheed's Burbank, Calif., facility. The aircraft will assume the Navy's antisubmarine mission now being performed

by the Lockheed-built P3C Orion.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for United States and world markets.

BAKERSFIELD, CA (JAN. 23) PR NEWSWIRE - Nahama & Weagant Energy Co. (NASDAQ: NAWE), announced a new gas field discovery in the Sacramento Valley of California.

The company said its initial discovery well can deliver 15 million cubic feet of gas a day and anticipates first sales to commence in March 1990. The company plans to drill additional locations in the field during the second and third quarters of 1990.

Because of the deliverability potential and locale of the field, the company has received offers to purchase gas from the field at rates in excess of the average prices being paid for California gas. Unlike other areas of the United States, California producers are presently able to sell all the gas they produce in the state.

The company owns a 38.25 percent interest in the field with the majority of the remaining interest owned by its partner, John Hancock Mutual Life Insurance Co.

The Bakersfield, Calif., independent engages in oil and gas exploration and production, primarily in California. The company is also currently seeking to acquire other oil and gas companies.

BIRMINGHAM, AL (JAN. 23) BUSINESS WIRE - Birmingham Steel Corp. (NYSE: BIR) Tuesday announced that it had received the following letter today from Duffey Holdings Inc., an affiliate of Harbert Corp., concerning the pending merger agreement contemplating the acquisition of Birmingham for $30 cash per share:

DUFFY HOLDINGS, INC.
DUFFEY ACQUISITION, INC.
No. One Riverchase Parkway South
Birmingham, Alabama 35244

Birmingham Steel Corporation
3000 Riverchase Galleria, Suite 1000
Birmingham, Alabama 35244
Attention: Board of Directors

January 23, 1990

Gentlemen:

As we indicated to you this morning, Continental Bank, N.A. (the "Bank") has expressed increasing concern during the past two weeks about the feasibility of financing the proposed acquisition of Birmingham Steel Corporation (the "Company") on the basis of its Commitment Letter dated September 18, 1989.

At your direction, we have sought further clarification from the Bank as to the status of its review of the company's recent financial results and its position on the proposed financing. In response to our inquiry, the Bank sent us the attached letter and we accept and agree with the conclusions contained therein.

Our financial adviser, Bear Stearns, has indicated to us that in light of

recent trends in the Company's operating results, it does not believe that the acquisition is financable under the current terms and circumstances, including the requirements for closing under the terms of Bear Stearns' Bridge Loan Commitment.

Sincerely,
DUFFY HOLDINGS, INC.
DUFFEY ACQUISITION, INC.

WALLINGFORD, CT. (JAN. 23) BUSINESS WIRE - NOVAMETRIX MEDICAL SYSTEMS INC. (NASDAQ/NMS Symbol: NMTX) Tuesday announced it has completed the sale of its Magnetic Stimulator business for approximately $500,000 to the management group of its subsidiary, Novametrix Medical Systems Ltd.

As a result of the sale, the Company will receive an expense reduction greater than $100,000 from savings of redundancy payments, lease obligations, etc. Revenues from the MagstimR product for fiscal 1990 were estimated to be less than 3% of the Company's net sales.

The Company stated it was pleased that the Welsh management group decided to purchase the Magnetic Stimulator business which will provide NOVAMETRIX savings and a cash infusion. The sale is part of the Company's plan to facilitate debt restructuring and generate cash in order to put NOVAMETRIX on sound financial footing for the future. NOVAMETRIX MEDICAL SYSTEMS INC. is a leading designer, developer, manufacturer and marketer of medical electronic instruments which non-invasively and continuously assess a critically ill patient's oxygen and carbon dioxide status. The Company's products are primarily used in operating rooms, intensive care units and respiratory therapy departments.

BOSTON (JAN. 23) BUSINESS WIRE - BayBanks Inc. announced Tuesday that it issued 800,000 shares of its common stock to a newly established employee stock ownership plan (ESOP) as of the close of business yesterday.

As a result of this transaction, the ESOP holds 5 percent of the company's

16,008,952 outstanding shares.

The transaction also utilizes the 800,000 shares acquired by the company in a share repurchase program completed in late 1989. The ESOP was established through the conversion of a portion of the company's profit sharing plan. The ESOP in conjunction with the share repurchase program is expected to have little effect on earnings per share.

The ESOP's financing of $18,600,000 was provided by Westpac Banking Corp., New York.

#90023b0833 01/23/1990 ~Business Wire

MATTITUCK, NY (JAN. 23) BUSINESS WIRE - North Fork Bancorporation Inc. (NASDAQ:NFBC) Tuesday reported net earnings of $20.9 million for 1989, compared with $14.7 million for the previous year.

Earnings per share rose to $2.25, an increase of 5.6 percent from the $2.13 reported for 1988.

Dividends declared in 1989 were 81 cents per share, a 24.6 percent increase from a year ago.

The company achieved fourth quarter net earnings and earnings per share of $5.6 million and 60 cents, respectively, compared with $5.5 million and 60 cents for the 1988 fourth quarter. The fourth quarter of 1989 is the first quarterly period in which comparitive prior year data fully reflect the results of operations of Southold Savings Bank, which was acquired on August 1, 1988.

Taxable equivalent net interest income rose 43.0 percent to $69.0 million for the year and was up 6.75 percent to $17.9 million for the fourth quarter. The net interest margin was 4.40 percent for 1989 and 4.39 percent for the three months ended Dec. 31, 1989, compared with 4.84 percent in 1988 and 4.63 percent for the 1988 fourth quarter.

The decrease year over year is principally attributable to the lower net interest margins realized by Southold Savings Bank which, as a savings bank, traditionally operates at a lower net interest margin. The decrease in net interest margin when comparing the fourth quarters of 1989 and 1988 is due in part to the increase in market interest rates in the latter part of 1988.

Initially, this increase had a positive effect on earnings as prime-based loans reset higher. However, as rates continued to increase in 1989, margins were pressured as liabilities reset and depositors redirected their funds into higher yielding certificates of deposit.

Securities gains of $1.4 million in the fourth quarter of 1989 increased other operating revenue 75 percent from the fourth quarter of 1988 to $3.0 million. Net securities gains of $1.9 million and $.6 million were recognized in 1989 and 1988, respectively.

The results of the implementation of stringent cost cutting measures by the company are evidenced by the significant decrease in the annualized ratio of operating expenses to average assets, from 2.67 percent in 1988 to 2.43 percent in 1989. In addition, this ratio decreased from 2.52 percent in the third quarter to 2.27 percent this current quarter.

These efficiencies were achieved despite the incurrence of costs relating to the company's expansion of its operations into western Suffolk and Nassau Counties. This program, contemplated to add eight new branch locations, is expected to be fully implemented during 1990.

As of Dec. 31, 1989, the company's reserve for loan losses was $9.7 million or .75 percent of loans, increasing from $8.6 million or .68 percent of loans at Sept. 30, 1989. At year end 1988 the reserve was $8.2 million or .71 percent of loans.

The ratio of the reserve for loan losses to non-performing assets improved to 39.24 percent in the fourth quarter of 1989 from 38.14 percent in the third quarter. Non-performing assets totaled $24.8 million at Dec. 31, 1989 vs. $22.6 million at Sept. 30, 1989 and $11.0 million at Dec. 31, 1988. The company's ratio of non-performing assets to total loans and ORE was 1.91 percent and .95 percent for 1989 and 1988, respectively. Net charge offs for 1989 and 1988 were $2.1 million and $.9 million, or .17 percent and .11 percent of average total loans, respectively.

NEW YORK (JAN. 23) BUSINESS WIRE - Restaurant Associates Industries (RAI) has announced that Kyotaru Company Ltd. has agreed to acquire an important equity interest in the company.

Further, Kyotaru will make a significant investment in RAI. Kyotaru is among Japan's ten largest restaurant companies, with an annual sales volume of approximately $500 million.

The announcement was made by Martin Brody, chairman, and Max Pine, president and CEO of Restaurant Associates Industries Inc. Pine said that the entire RAI management team will continue to manage the company with added financial incentives to aggressively expand RAI's theme and management contract businesses and three restaurant chains.

RAI presently operates 120 restaurants with nearly 40,000 seats in several key markets concentrated on the east and west coasts. In New York City, the company operates restaurants at such prestigious locations as Rockefeller Plaza and Lincoln Center, as well as the United Nations.

Among its highly popular and well established restaurants are The SeaGrill Mamma Leone's, Trattoria and the round-the-clock Brasserie.

Through its management contract division, RAI operates successfully in cultural institutions such as The American Museum of Natural History and The Metropolitan Museum of Art. It also provides restaurant-quality food service for executive dining at clients such as the Chemical Bank World Headquarters, the Ford Foundation and U.S. Trust.

Additionally, RAI is the second largest operator of full-service Mexican restaurants in California, with 41 Acapulco dinnerhouse restaurants. The company is the largest operator of full-service restaurants in New Jersey, with 26 Charlie Brown's and 5 The Office Restaurants.

Kyotaru Co. Ltd., headed by Chairman and CEO Hiroshi Tanaka, is headquartered in Tokyo and is a public corporation listed on the Tokyo Stock Exchange.

Begun in 1932, Kyotaru is a dominant restaurant operator, with approximately 780 locations, most of them in department stores, railroad stations and shopping centers. The company also operates seven food plants and two distribution centers. In addition to its operations in Japan, Kyotaru has restaurants in China, Hawaii and the United States mainland. Its business in California consists of 10 El Paso Cantina Restaurants, 50 Arby's and several other Japanese style and seafood restaurants. Kyotaru American Corporation is headquartered in Torrance, Calif.

WASHINGTON (JAN. 23) BUSINESS WIRE - Stratus Computer Inc. Tuesday entered the UNIX marketplace by introducing FTX, a UNIX System V, Release 3.2-compatible operating system for its family of fault-tolerant XA2000 Continuous Processing Systems.

With this announcement, Stratus now offers users the industry's broadest range of fault-tolerant UNIX-based systems.

''Stratus is forging a union between two different markets: the industry-standard world of UNIX and the world of commercial, critical on-line applications,'' said William E. Foster, president and CEO of Stratus Computer. ''Stratus' field-proven Continuous Processing technology, not to mention our symmetric multiprocessing, adds significant value to UNIX.

''Stratus' unique technology, combined with UNIX, will tear down the walls that previously prevented businesses from running their critical on-line applications on an industry-standard operating system.''

Support of an industry-standard operating system expands Stratus' business beyond the markets served by its proprietary operating system, VOS, and by the PICK applications environment, which also runs on Stratus XA2000 Systems.

FTX will allow Stratus to sell its systems in industries where UNIX is becoming an absolute requirement (such as in telecommunications and government) and in particular segments (such as the low end) of its traditional commerical markets where UNIX applications are becoming more popular.

For example, FTX addresses the rapidly growing demand need for UNIX-based fault-tolerant systems to run ''intelligent network'' database applications (such as voice processing, 911 numbers for emergency services and 800 number services for telemarketing) for the telecommunications industry.

The FTX-XA2000 combination is also suited for on-line information services for government, factory floor and warehouse/distribution center control, in-store processing for retailers, and local area network-based applications for the financial service industries.

FTX allows standard UNIX applications to take advantage of the same features that have made Stratus XA2000 Systems -- since the early 1980s -- a leading platform for critical, commercial on-line applications. These features include: hardware-based fault tolerance, multiprocessing, on-line performance and capacity upgrade, user-replaceable parts, advanced remote, on-line service networking.

Stratus has also added significant reliability features to the UNIX operating itself, making it more resistant to the failures which previously prevented it from widespread use for commercial on-line applications.

''FTX expands the customer base for Stratus,'' explained Foster. ''Meanwhile, our VOS operating system offers different features that address our traditional markets -- markets which are still growing at a rapid pace.''

The FTX operating system will be offered on the range of Stratus XA2000 Systems, from the low-end, uniprocessor Model 30 (whose price starts at $37,000) to the very-high-end, symmetric multiprocessor Model 160 (whose price starts at $750,000). FTX software is included in the base price of each XA2000 System and will be generally available in April 1990.

Based in Marlboro, Mass., Status Computer Inc. supplies the XA2000 family of of continuously available, fault-tolerant computer systems for on-line transactioin processing and communications control. The company offers the most technologically advanced architecture for on-line, distributed and networked applications, and has set a new standard for computer reliability.

One of the fastest-growing companies in the industry, Stratus reported revenues of $341.3 million for fiscal year 1989, up 29 percent from $265.3 million in 1988.

CANTON, MA (JAN. 23) BUSINESS WIRE - Bay State Gas Co. (NYSE:BGC) expects

to relocate its corporate headquarters from Canton to Westborough, Mass., during the fourth quarter of calendar 1990, the company announced Tuesday.

The company has purchased an 88,000 sq. ft. office facility known as The Westborough Building at 300 Friberg Parkway. The building is situated on 14 acres of land strategically located at the junction of I-495 and Route 9.

C. W. Whittier's Charles Kenny, Michael Sherman and Charles Detwiller represented Bay State Gas. Lenny Owens and Rob Griffen with Coldwell Banker's Wellesley, Mass., office represented the seller, Westborough Inc. a subsidiary of Shawmut Worcester County Bank.

''Westborough is an ideal location for Bay State Gas because of its outstanding accessibility to our operating divisions, which extend southeast to Brockton and the South Shore, west to Springfield and northeast through New Hampshire into southern Maine,'' said Roger A. Young president.

Bay State Gas provides natural gas service to approximately 257,000 customers in Massachusetts and, through its Northern Utilities Inc. subsidiary, in New Hampshire and Maine. The company is also involved in natural gas transmission and retail sales of propane and home improvement products.

#90023b0849 01/23/1990 ~Business Wire

BEVERLY HILLS, CA. (JAN. 23) BUSINESS WIRE - International Lease Finance Corp. (NASDAQ:ILFC) Tuesday announced aircraft placements of 42 of the world's newest commercial jet aircraft in transactions valued at $1.7 billion.

Steven F. Udvar-Hazy, ILFC president, said, ''These placements demonstrate the success of our on-going efforts to find airline customers for our previously ordered aircraft substantially in advance of their scheduled delivery dates.

''We continue to secure and place the most modern, cost-efficient aircraft in the industry. With these transactions, ILFC now has signed agreements covering all of our 1990 and 1991 committed deliveries as well as approximately 85 percent and 50 percent of our respective 1992 and 1993 delivery slots of new aircraft.''

ILFC is the world's premier owner, lessor and remarketer of advanced-technology commercial jets. The company'a aircraft portfolio has an average age of less than three years with a market value of $3 billion.

Details of individual airline placements, together with a tabulation of aircraft leased, follows:

AIR ATLANTIS

AIR ATLANTIS (Lisbon, Portugal) has leased three new Boeing 737-300 aircraft to be configured with 148 seats. The lease term is for 10 years. Deliveries are scheduled for January and April 1992 and May 1993. Air Atlantis, a subsidiary of Air Portugal, is a new ILFC customer.

AIR PACIFIC

AIR PACIFIC (Suva, Fiji) Fiji's international airline, leased one new Boeing 767-300ER for seven years beginning in September 1994. In addition the carrier leased one used 767-200ER for five years with delivery in July 1990. Air Pacific is a new ILFC customer.

ALASKA AIRLINES

ALASKA AIRLINES (Seattle) has leased 20 new Boeing 737-400 jetliners with options to lease four additional 737-400s. The lease contracts are for eight-year initial terms with multiple extension options. Seven aircraft will be delivered starting in April 1992, seven in 1993 and six in 1994. The four option planes, if exercised, will be delivered two each in 1995 and 1996.

The aircraft will be fitted with 139 mixed-class seating.

ASIANA AIRLINES

ASIANA AIRLINES (Seoul, Korea) has leased a new Boeing 767-300ER for seven years with multiple extension options. This aircraft will be delivered in March 1992 for use in Asiana's international operations to major Asian destinations.

DAN-AIR

DAN-AIR (London) has leased three new Boeing 737-300s on an initial five-year period with one-year extension options. The new technology aircraft will be delivered in February and May 1992 and February 1993.

As part of the transaction, ILFC purchased four British Aerospace BAC-111 jet transports from Dan-Air with two-year leaseback arrangements. ILFC will dispose of these aircraft in the near future.

SOLOMON AIRLINES

SOLOMON AIRLINES (Honiara, Solomon Islands) has leased a new Boeing 737-300 aircraft for delivery in May 1992 for an initial six-year period with option extensions for two years. In addition, the national carrier of this Pacific Island nation has leased for two years a used 737-200A, contracted for a May 1990 delivery. Solomon is a new ILFC customer.

TAP-AIR PORTUGAL

TAP-AIR PORTUGAL (Lisbon, Portugal) the national airline of Portugal, leased a new Boeing 737-300 for 10 years beginning in March 1992. When delivered, this will by TAP-AIR Portugal's seventh ILFC aircraft.

VARIG

VARIG (Rio de Janeiro, Brazil) the Brazilian international carrier, leased two new Boeing 747-400s from ILFC for delivery in April 1992 and April 1993 on initial five-year leases with extension options for up to an

additional five years.

BUFFALO, NY (JAN. 23) BUSINESS WIRE - Posting its first profitable quarter in two years, Goldome (NYSE:GDM) Tuesday reported net income of $18.5 million, or 63 cents per share, for the quarter ended Dec. 31, 1989, compared to a loss of $63.1 million, or $2.27 per share, for the fourth quarter of 1988.

President and Chief Executive Officer Thomas A. Cooper, who joined Goldome in April 1989, said, ''Goldome has come a long distance in a very short time, and the journey was made possible by the dedication of everyone at Goldome and the positive public response to our customer-first approach to banking.''

Results for the quarter include a gain in excess of $40 million from the sale of selected New York City branches and charge-offs of commercial loans and other real estate amounting to $16 million as part of the bank's more stringent credit portfolio review.

Goldome's net interest income has continued to improve following a major restructuring of the bank's investment portfolio which began in the second quarter of 1989.

In the fourth quarter, net interest income rose to $33.9 million, up from $29.6 million in the third quarter and $22.1 million in the second quarter of the year. Net interest income for the fourth quarter of 1988 was $37.1 million.

In the fourth quarter, combined expenses for personnel, occupancy, and equipment were 34 percent below the comparable level of such expenses in the fourth quarter of 1988.

Total operating and other expenses in the quarter amounted to $87.6 million, 36 percent below the $137.8 million recorded in the fourth quarter of 1988.

During the fourth quarter, the bank sold nearly $1 billion in fixed-rate securities and used the proceeds to reduce its reliance on borrowed funds, particularly interest-sensitive repurchase agreements.

This action lowered the bank's vulnerability to interest rate changes and reduced the asset and liability repricing gap from 31 percent at the end of 1988 to less than 20 percent at the end of 1989.

Goldome (NYSE:GDM) is a consumer bank with substantial franchises in New York State and Florida.

CHICAGO (JAN. 23) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) announced Tuesday the acquisition of a hotel hospitality software package from Lodgistix Inc. of Wichita, Kan.

Bally will market the software through its Bally Systems Division headquartered in Reno, Nev.

Traditionally, Bally has provided gaming-related software programs for casino marketing, player tracking, slot management, marker tracking, games reporting, credit and vault management and food and beverage management.

With the acquisition of the Lodgistix software, Bally has expanded its capabilities to provide a complete software package for its casino hotel customers. The software is compatible with the IBM 36 and AS 400

mainframes.

In commenting on the acquisition, Roger N. Keesee, president of Bally Manufacturing Corp., said, ''This acquisition positions Bally as the only single source provider of software, hardware and related services for the casino hotel industry.''

Bally Manufacturing is a world leader in the leisure industry with four casino hotels, a nationwide network of fitness centers and a complete line of gaming equipment, fitness products and lottery products and services.

BURLINGTON, VT (JAN. 23) BUSINESS WIRE - At todays regular board of directors meeting, John H. Barry, president and chief executive officer announced net income for Banknorth Group Inc. for 1989 of $17.8 million, or $2.62 per share, up $1.3 million or 19 cents per share, a 7.8 percent increase over 1988.

Net income for the fourth quarter was $4.2 million, or 61 cents per share, up $13,000 from the fourth quarter of 1988. The board also declared a regular first quarter dividend of 27 cents per share, payable March 30, 1990, to shareholders of record March 16, 1990.

Increased levels of provision for possible loan losses for 1989 had a significant impact on the results of both the year and the fourth quarter. A provision of $7.2 million for the year, up $2.2 million or 44.5 percent over 1988, and $3.2 million for the fourth quarter, up $1.3 million or 68.3 percent from last years fourth quarter were, according to Barry, a response to the weakening New England economy.

Real estate construction and development loans are approximately 3 percent of Banknorth's loan portfolio at year end. The allowance for possible loan losses at Dec. 31, 1989, stood at 1.17 percent of total year-end loans giving 104 percent coverage of non-performing loans.

Shareholder's equity, $128.9 million at Dec. 31, 1989, is well in excess of minimum regulatory requirements and is further evidence of the company's strong financial position.

Net interest income, a major contributor to earnings results, is up $7.5 million, or 11.6 percent, from the 1988 level. While net interest income was flat for the fourth quarter of this year compared to last year, it was up 3.9 percent from the third quarter of 1989 reflecting a more stable

rate environment in the fourth quarter.

Banknorth Group Inc., the largest commercial banking company in Vermont, was formed on Dec. 1, 1989, with the merger of Banknorth Group Inc. and Howard Bancorp and is comprised of First Vermont Bank and Trust Co., Franklin Lamoille Bank, Granite Savings Bank and Trust Co., The Howard Bank, N.A. and Woodstock National Bank.

Banknorth Group Inc. common stock is traded on the NASDAQ National Market System under the symbol BKNG. Information published prior to Dec. 1, 1989, does not relate to the new BKNG stock.

NEW YORK (JAN. 23) BUSINESS WIRE - Tiffany & Co., (NYSE:TIF) has completed its previously announced acquisition of the assets and business of Howard H. Sweet & Son Inc., from Designcraft Industries Inc., it was announced by William R. Chaney, Tiffany's chairman.

The acquisition was originally announced on Dec. 1, 1989 by both companies. Sweet, located in Attleboro, Mass., is a manufacturer of gold and silver jewelry. The company was founded in 1955 and was acquired by Designcraft in 1985.

Chaney said,''Sweet's reputation for quality and service is recognized throughout the jewelry industry. They will continue to operated as Howard H. Sweet & Son with their present management and workforce. They will continue to serve their traditional customers and increase their manufacturing support for Tiffany.

''This acquisition will help to ensure a proper supply of consistently high quality product to Tiffany as we continue to pursue our worldwide expansion.''

Tiffany is an internationally renowned retailer with locations in the United States, the Far East and Europe. The company's merchandise offerings include an extensive selection of fine jewelry, sterling silverware, china, crystal, watches, clocks, stationery, leather goods, scarves and fragrance.

In addition to its flagship New York store, Tiffany operates retail stores in Atlanta, Beverly Hills, Calif., Boston, Chicago, Costa Mesa, Calif. Dallas, Houston and San Francisco.

Exclusive Tiffany merchandise is also offered through a select group of prestigious jewelers and specialty retailers in other cities.

Direct marketing is carried out through the corporate division and the Tiffany Selections catalog. International retail sales are made through Mitsukoshi department stores and a wholesale distributor in Japan, and the Tiffany stores in London, Munich, Germany; Zurich, Switzerland; and Hong Kong, and through Faraone stores in Milan and Florence, Italy.

#90023b0879 01/23/1990 ~Business Wire

RALEIGH, NC (JAN. 23) BUSINESS WIRE - Carolina Power & Light Co. (NYSE: CPL) Tuesday reported earnings of $4.20 per share of common stock for the year ending Dec. 31, 1989.

Net income for the year was $376.1 million.

''A comparison of our company's 1989 and 1988 earnings needs to include the effect of write-offs required in 1988,'' said CP&L Executive Vice President Edward G. Lilly Jr. ''Our 1988 earnings were reduced in the third and fourth quarters due to one-time write-offs that were required by regulatory treatment of a portion of the company's investment in the Harris plant.''

Earnings per share for the fourth quarter 1989 were 61 cents. In 1988, earnings per share were 44 cents for the fourth quarter and $2.04 for the year. Without the write-offs, 1988 earnings per share would have been 67 cents for the fourth quarter and $3.93 for the year. Earnings for the fourth quarter 1988 were positively impacted by a net 14 cents per share related to one-time accounting adjustments.

Net income for 1989 was $61.1 million for the fourth quarter. In 1988, net income was $43.7 million for the fourth quarter, after reduction of $18.6 million due to the regulatory treatment of a portion of CP&L's Harris plant investment. Net income for the 12 months ended Dec. 31, 1988 was $196.8 million, after reduction of $152.3 million of Harris plant write-offs.

For the year, the average number of common shares increased from 80.4 million to 82.1 million.

#90023b0886 01/23/1990 ~Business Wire

DAYTON, OH (JAN. 23) BUSINESS WIRE - Philips Industries Tuesday announced net earnings for the third quarter ended Dec. 31, 1989, were $3,700,000, or 13 cents per share, down from last year's third quarter net earnings of $9,085,000, or 32 cents per sahre.

Sales in the third quarter were $205,841,000, compared to last year's third quarter sales of $225,839,000. Although sales in the quarter declined 9 percent from last year, the company believes that most of its key operating units outperformed their relevant markets.

Net earnings for the nine months ended Dec. 31, 1989, were $30,729,000, or $1.07 per share, compared to $37,858,000, or $1.32 per share for the prior year. Sales for the nine month period were $707,809,000, vs. $696,166,000 for the like period last year.

A major portion of the quarter's earnings decrease is attributable to poor results in the company's Mid-West Conveyor and Shelby Wheel subsidiaries.

Shelby sustained an operating loss of approximately $2 million, for the quarter compared to income last year of $1.6 million, due to a weaker automotive market and a decrease in contractual selling prices without a comparable decrease in material costs.

The company's Industrial Components Group recorded an 18 percent sales decline and nominal operating income for the quarter compared to last year's income of $5.7 million. This decrease in income was largely attributable to Mid-West Conveyor, which incurred cost overruns on several large projects, as well as lower sales volume.

The company's Transportation Group, excluding Shelby, reported a 3 percent sales increase for the quarter. Operating income for the group, however, was off by approximately 20 percent due to higher costs and very competitive market conditions.

The company's Lasco Products Group's sales declined 3 percent in the quarter, less than the overall decline in housing starts. At the same time, its operating income declined by 9 percent, as a result of very competitive pricing in the plastic fittings business.

The Shelter Products Group's sales volume dropped 16 percent from last year's third quarter, due to weakening demand for conventional and

manufactured housing, as well as for recreational vehicles. Operating income was down primarily as a result of the lower volume.

The Air Distribution Products Group reported record third fiscal quarter sales and earnings. Despite somewhat weaker demand from the commercial and industrial construction markets, group sales increased by 7 percent with a 26 percent increase in operating income.

The board of directors will consider declaration of a dividend on its common shares at its next meeting, currently scheduled for mid-February.

Philips Industries is a leading manufacturer of components for the building and transportation industries and provides quality material handling systems to manufacturers. The company is listed on the New York Stock Exchange under the ticker symbol PHL.

DAYTON, OH (JAN. 23) BUSINESS WIRE - Philips Industries announced Tuesday that the Special Meeting of its Shareholders to consider its proposed merger with an affiliate of Merrill Lynch Capital Partners (MLCP) has been adjourned until 10 a.m. on Feb. 10, 1990.

Philips noted that it had announced on Jan. 11, 1990, that MLCP's proposed financing sources had indicated that they would be unable to participate in the financing of the transaction as currently structured. At that time Philips also announced that MLCP had said that MLCP remained interested in completing an acquisition of Philips and was evaluating whether an alternative structure could be arranged which would be acceptable to all parties.

Philips stated that MLCP had not made any further proposals to Philips and Philips was unable to predict whether the acquisition would be consummated or any alternative transaction would be proposed.

BURLINGTON, MA (JAN. 23) BUSINESS WIRE - Dynatech Corp. (NASDAQ:DYTC) reported its operating results for the third quarter of fiscal 1990 which ended December 31, 1989.

Sales of $111.7 million were up from $98.0 million in the third quarter of the prior year.

Net income of $2.5 million, or $.24 per share, which included an unusual item charge of $.17 per share, was down relative to $5.1 million, or $.42 per share in the same quarter a year ago.

Excluding the unusual item, net income per share for the current quarter was $.41, compared to $.37 and $.39 in the first and second quarters of fiscal 1990, respectively.

J.P. Barger, president and chief executive officer, commented on the results: ''Strong revenues from the test technologies, radar detector, and video-related businesses contributed to continued quarter-to-quarter improvement in recurring earnings per share in the third period.

"This strength was somewhat offset by lackluster performance in our data communications business.''

Barger added: ''Reported earnings for the quarter included an unusual item for liquidation and severance costs resulting from the closure of a diagnostic plastics injection-molding production facility.

"The mid-January decision to close this West German subsidiary is consistent with our aggressive pursuit of activities which will demonstrably strengthen the long-term prospects of Dynatech.

''Overall, signs of generally sluggish activity across patches of the economy have led to our cautious posture for the coming months. Ending backlog for the quarter was $82.3 million.'' With reported fiscal 1989 sales of $400 million, Dynatech Corporation is a diversified high technology company supplying products and systems to selected niches of the communications, scientific, automotive, aviation and medical markets.

Headquartered in Burlington, Mass., Dynatech sells its products worldwide through subsidiaries located throughout North America, Europe and Asia.

#90023b0903 01/23/1990 ~Business Wire
GREENVILLE, SC (JAN. 23) BUSINESS WIRE - First Federal Savings and Loan Association of South Carolina ("The First"), the largest thrift institution

in the Carolinas, Tuesday reported net earnings of $1.4 million or 30 cents per share for the second fiscal quarter of 1990, compared to $1.4 million or 29 cents per share for the second quarter of fiscal 1989.

Earnings for the fiscal year-to-date amounted to $1.1 million or 23 cents per share, compared to $2.6 million or 55 cents per share for the comparable six-month period in fiscal 1989.

"We are pleased with the second quarter earnings, the highest in three consecutive quarters, in light of a somewhat sluggish economy which impacted consumer and commercial loan volume. It is also significant to note that we have completed the major portion of the software conversion and the increased expenses relating to this process should now decrease," stated H. Ray Davis, chairman of the board and chief executive officer.

Average net interest spread during the quarter was 2.49 percent, compared to 2.93 percent last year, and net interest income was $12.3 million for the quarter, compared to $13.8 million for second quarter 1989.

Combined mortgage, commercial and consumer loan volume was $222.8 million for the quarter and $423.7 million for the fiscal year-to-date, vs. $226.2 million and $449.1 million, respectively, last year - operating with three less mortgage loan origination offices during the quarter.

At Dec. 31, 1989, the association's risk-based regulatory capital amounted to $103.1 million with stockholders' equity of $92.4 million or $19.72 book value per share at quarter's end, an increase of $3.6 million and 71 cents per share from Dec. 31, 1988.

Based on management's interpretation of the new capital requirements established by the Office of Thrift Supervision, the first is in compliance with all three categories: tangible capital, core capital and risk-based capital.

With assets of $2.27 billion and deposits of $1.77 billion, First Federal of South Carolina is the second largest financial institution headquartered in South Carolina. The common stock of First Federal of South Carolina is traded on the NASDAQ market under the symbol "FTSC."

NORWOOD, MA (JAN. 23) BUSINESS WIRE - Phoenix Technologies Ltd. (NASDAQ: PTEC) Tuesday reported a net loss of $4,936,000, or 49 cents per share,

for its first quarter of fiscal 1990, ending Dec. 31, 1989, compared with net income of $2,865,000, or 26 cents per share, for the same quarter ended Dec. 31, 1988. Revenues for its first quarter of fiscal 1990 were $7,791,000, compared with $14,626,000 for the same quarter of fiscal 1989.

"Our first quarter results include a number of positive indicators that, we believe, should help us reach our stated goal of returning to profitability in the second half of fiscal 1990," said Ted Joseph, the company's acting president and chief executive officer.

"For the quarter, the company is cash positive, we're building a base of recurring revenues, as evidenced by our first quarter ending backlog of $8,300,000, and our product strategies have been refocused on those markets where we have customers shipping product in volume. Also, Ron Fisher officially begins with the company on Jan. 29 as its new president and chief executive officer."

Phoenix Technologies Ltd. designs, develops, and markets systems software products for personal computers, workstations, and laser printers.

#90023b0908 01/23/1990 ~Business Wire

UPPER SADDLE RIVER, NJ (JAN. 23) BUSINESS WIRE - In a first for the electronic messaging industry, Western Union Tuesday hosted a meeting of the major electronic mail service providers in North America in an effort to hasten the development of a universal messaging directory based on the X.500 protocol.

"Now that Western Union 400 service has made interconnection between networks a realty, our customers are eagerly awaiting a fast, reliable

electronic directory," said Doanld Casey, director - external affairs for Western Union's Business Services unit.

"We are taking an aggressive approach to the development of an internetwork X.500 directory by proposing the formation of an action group within the messaging industry to indentify and address the issues that need to be resolved before a workable directory can be produced."

Led by Western Union, with the assistance of Rapport Communications Inc., the meeting was attended by representives from AT&T, SPRINT International, BT Tymnet, GE Information Services, MCI, Pacific Bell, IBM Information Network, Teleglobe Canada and CNCP Canada.

Participants discussed such topics as, "How X.500 directories will share information," and "What transition planning is necessary to achieve a successful directory service?"

Western Union proposed the formation of an X.500 VAN consortium as the first step in what Casey expects to be an ongoing effort spearheaded by the company. The goal is to achieve full implementation of the directory protocol developed by the Consultative Committee for International Telephone and Telegraph. Western Union is an active member of CCITT.

"We expect to export items directly into CCITT's development effort," Casey added. "To make X.500 as ubiquitous as the phone book, the proposed consortium would meet regularly to advance the directory's introduction and ensure optimal utility," he emphasized.

Western Union Corp. provides a broad range of messaging, financial and other services, both domestically and internationally, to meet specific needs of business customers and individual consumers.

The company is the leading provider of public electronic mail services, which enable its business customers to reach more than seven million electronic mail, fax and telex users worldwide.

NEW ORLEANS (JAN. 23) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE: FRP), an affiliate of Freeport-McMoRan Inc. (NYSE: FTX), Tuesday reported fourth-quarter 1989 net income of $16,995,000, or 21 cents per unit on an average 81,550,000 units outstanding, compared with fourth-quarter 1988 net income of $43,921,000, or 55 cents per unit on an average 79,966,000 units outstanding.

Fourth-quarter 1989 and 1988 revenues totaled $265,928,000 and $312,464,000, respectively.

FRP reported 1989 net income of $133,583,000, or $1.65 per unit on an average 81,041,000 units outstanding, compared with 1988 net income of $207,255,000, or $2.77 per unit on an average 74,905,000 units outstanding. Revenues in 1989 and 1988 totaled $1,156,281,000 and $1,159,505,000, respectively.

Fourth-quarter 1989 cash available for distribution totaled $51.2 million, or the equivalent of 62 cents per unit anticipated to be outstanding on Jan. 31, 1990. In addition to cash flow from ongoing operations, fourth-quarter 1989 cash available for distribution includes proceeds from the sale of certain non-strategic assets and related working capital totaling $11.4 million.

On Jan. 22, 1990, FRP declared a cash distribution for the fourth quarter of 1989 of 60 cents per unit, payable Feb. 15, 1990, to unitholders of record on Jan. 31, 1990. The partnership is making quarterly cash distributions of at least 60 cents per unit through the second quarter of 1991.

The level of cash available for distribution in excess of 60 cents per unit during the fourth quarter of 1989 will enable the partnership to reduce from $8.8 million to $7 million the amount of cash distributions previously deferred by Freeport-McMoRanInc.

#90023b0927 01/23/1990 ~Business Wire

NEW ORLEANS (JAN. 23) BUSINESS WIRE - Freeport-McMoRan Energy Partners Ltd. (NYSE:FMP), an affiliate of Freeport-McMoRan Inc. (NYSE:FTX), Tuesday reported fourth-quarter 1989 net income of $5,095,000 or 5 cents per unit on an average 110,569,000 units outstanding compared with fourth-quarter 1988 net income of $7,688,000 or 8 cents per unit on an average 96,135,000 units outstanding. Fourth-quarter 1989 and 1988 revenues totaled $57,320,000 and $67,819,000, respectively.

FMP reported 1989 net income of $45,664,000 or 43 cents per unit on an average 105,098,000 units outstanding compared with 1988 net income of $25,102,000 or 28 cents per unit on an average 89,974,000 units outstanding. Revenues during 1989 and 1988 totaled $254,835,000 and $233,689,000, respectively.

James R. Moffett, chairman and chief executive officer of McMoRan Oil & Gas Co., managing general partner of FMP, said: ''FMP's 1989 financial performance benefited from higher crude oil prices, increased natural gas realizations resulting primarily from settlements in late 1988 of contract disputes with pipeline purchasers, and additional natural gas contract settlements in 1989.''

Although FMP's production and sales capabilities increased following the transfer into the partnership of former Petro-Lewis Corporation and American Royalty Trust assets in May 1988, oil and natural gas sales volumes were negatively affected during the fourth quarter of 1989 by lower production resulting in part from the July 1989 shut-in of an offshore field for redevelopment, which is scheduled to be completed by mid-1990, and from asset sales. During 1989, FMP sold several of its less strategic oil and natural gas properties for approximately $80.7 million. Proved reserves included in these sales totaled 5.9 million barrels of liquids and 57.4 billion cubic feet (bcf) of natural gas, and proceeds from the sale were used to reduce debt.

Oil and condensate sales totaled 1,381,000 barrels during the three months ended December 31, 1989, compared with 1,882,000 barrels during the corresponding 1988 quarter. Oil and condensate sales in 1989 and 1988 totaled 6,480,000 barrels and 6,634,000 barrels, respectively. Prices for oil and condensate averaged $17.64 per barrel during the fourth quarter of 1989, or 42 percent greater than the $12.39 per barrel averaged during the comparable 1988 quarter.

The average oil and condensate price realized during 1989 was $17.09 per barrel, or approximately 22 percent greater than the average $14.05 per barrel realized during 1988. The stability of future world oil prices will depend largely on whether members of the Organization of Petroleum Exporting Countries adhere substantially to quota limits and benchmark prices.

#90023b0932 01/23/1990 ~Business Wire

MILWAUKEE (JAN. 23) BUSINESS WIRE - Federated Financial Savings and Loan (NASDAQ:FEDF) announced Tuesday it had completed the preliminary due diligence analysis of Hopkins Savings and Loan Association, a Wauwatosa-based thrift.

Federated had earlier announced its intention to acquire Hopkins through a

merger conversion.

Hopkins Tuesday reported an unaudited $4.8 million loss for its fiscal year ended Dec. 31, 1989. This result includes a $5.6 million addition to its reserves for potential losses on loans and real estate, which reduced net worth, or capital, to $1.2 million.

Robert B. Pieters, president of Federated, reported ''We believe that the additions to the loan and real estate reserves, while significant, are conservative and adequate to protect the merged association from further losses on Hopkins' loan and real estate portfolios. Our due diligence analysis concurs with the assessment of Hopkins' management.

''Operating earnings for the last three months of 1989 showed a profit of $217,000.''

Federated and Hopkins expect to file its application for merger conversion in February 1990, with the transaction to be completed by mid 1990. Federated, with $21.5 million in capital, currently meets all three of the recently established capital requirements of the FDIC.

The combined association also expects to exceed these requirements after the completion of the merger.

Hopkins and Federated have 18 branch offices in southeastern Wisconsin and will have nearly $500 million in assets, combined. Based on assets, this would make the association the ninth largest savings and loan in Wisconsin.

Federated is a stockholder-owned association and is traded on the NASDAQ market under the symbol FEDF. Hopkins Savings is a state chartered mutual savings and loan. Deposits of both associations are fully insured to $100,000 by the FDIC.

#90023b0933 01/23/1990 ~Business Wire

NEW ORLEANS (JAN. 24) BUSINESS WIRE - Freeport-McMoRan Gold Company (NYSE: FAU), an affiliate of Freeport-McMoRan Inc. (NYSE: FTX), Tuesday reported fourth-quarter 1989 net income of $6,266,000 or 15 cents per share on an average 41,413,000 shares outstanding compared with fourth-quarter 1988 net income of $3,985,000 or 10 cents per share on an average 41,380,000 shares outstanding. Fourth-quarter 1989 and 1988 revenues totaled $27,939,000 and $24,358,000, respectively.

FAU reported 1989 net income of $12,768,000 or 31 cents per share on an

average 41,410,000 shares outstanding compared with 1988 net income of $28,519,000 or 69 cents per share on an average 41,380,000 shares outstanding. Total 1989 and 1988 revenues were $87,865,000 and $106,070,000, respectively.

FAU's 1989 net income was positively affected by a revision in the company's method for computing depreciation and amortization, effective January 1, 1989, resulting from completion of new fluid-bed roasting facilities. This revision increased 1989 net income by $2.1 million, or 5 cents per share.

In November 1989, Freeport-McMoRan Inc. announced a major restructuring plan which will enable it to focus more on its principal business assets, reduce outstanding indebtedness, and develop its world-class sulphur and copper/gold mineral discoveries. Pursuant to that plan, Freeport-McMoRan Inc. announced that it would seek a buyer in 1990 for the FAU common shares which it and the public own. At December 31, 1989, Freeport-McMoRan Inc. owned approximately 61 percent of the outstanding FAU shares.

#90023c0049 01/23/1990 ~Comtex

STAMFORD, CT (JAN. 24) COMTEX - Pinnacle West Capital Corp., the Phoenix-based utility and thrift holding company, is exploring the sale of its Malapai Resources Co. uranium mining concern to help it through its current financial difficulties.

The company, which has been trying to sell its troubled MeraBank savings and loan subsidiary, has reached agreements with its lenders to extend repayment deadlines, according to a filing with the Securities and Exchange Commission.

However, the expiration date on a $150 million credit facility, which had been extended from Jan. 8, is due to expire today.

Pinnacle West hired Warrior International Ltd., a London-based financial advisor, on Jan. 18 to seek a possible buyer for Malapai.

In addition, the company said Malapai will temporarily suspend production of uranium concentrates beginning Feb. 15.

The company decided to suspend production because existing inventory is sufficient to satisfy current contractual obligations, not because of the possible sale of Malapai.

Because key technical and management personnel will be retained, production operations could be resumed within 30 to 45 days after a decision to do so.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 22, 1990

STAMFORD, CT (JAN. 24) COMTEX - Cipher Data Products Inc., the San Diego computer disc drive maker that is being pursued for a takeover, has signed "golden parachute" agreements with several top managers.

The agreements would take effect if there was a change in control of the company.

The agreements, totaling $2.7 million, would apply to Gary E. Liebl ($1.26 million), Herbert S. Amster ($665,000), Thomas R. Anderson ($159,642), Henry G. Kohlman ($175,868), Donald R. Lundell ($277,222) and Richard P. Ottaviano ($196,534), according to a filing with the Securities and Exchange Commission.

Archive Corp. has made a $7.50-a-share tender offer for all the common shares outstanding of Cipher Data.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 22, 1990

-30- 975

#90023c0053 01/23/1990 ~Comtex

STAMFORD, CT (JAN. 24) COMTEX - Occidental Petroleum Corp. has settled a shareholder suit challenging its charitable contribution and funding of the Armand Hammer Museum of Art and Cultural Center, a Los Angeles foundation endowed by the founder and chairman of the energy company.

Under the settlement, which must still be finalized, Occidental will limit its contributions to the foundation to 1.33 percent of its common stock cash dividends paid in the prior year.

Based on $672 million in common stock dividends paid in 1989, the amount of contributions allowed for 1990 would be $8.9 million.

This stipulation will run from Jan. 1, 1990, until three years after the

death of Hammer.

The museum will be named the Armand Hammer Museum of Art and Cultural Center, and the structure will be called the Occidental Petroleum Cultural Center Building, according to the January settlement.

The museum and a subsidiary of Occidental have entered an agreement to lease, with an option to purchase, the city block at the corner of Wilshire Boulevard, Lindbrook Avenue, Glendon Avenue and Westwood Boulevard, where the facility will be located.

The settlement will also allow Occidental to fund the cost of constructing a new museum building and renovating four floors of the Occidental Petroleum Center for use by the museum under a 30-year free lease.

It will also fund construction of an expanded parking garage beneath the building.

The estimated cost of the construction and expansion is $60 million.

As long as the museum building is leased from Occidental, the company may designate four of the museum's directors, or no less than one-third of the total number.

Hammer has agreed to donate his art collection to the museum.

#90023c0062 01/23/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The 8-K report filed at the SEC shows in March, 1989 Fairbank Farms Inc., a wholly owned subsidiary of Entree Corp. suffered the loss of its principal operating assets to fire. At April 1, 1989, insurance claims receivable from the fire were listed at $4.07 million within current assets. At that time, the remaining principal opperating assets and the insurance claims receivable were reclassified as

assets offered for resale.

In June of 1989 all Fairbank assets were sold or assigned to the former owner and proceeds less liabilities approximated its equity at the date of sale.

In fiscal 1989, the wholly owned subsidiary Ben Kozloff Inc. reported aggregate charges of $5.41 million to provide for estimated losses anticipated from the disposition of all of Ben Kozloff's assets and business. In June of 1989, the business and supplies of Ben Kozloff in total were sold to an independent party for $3.50 million, and the aggregate charges were sufficient to cover losses suffered through the sale as well as all operating losses sustained between April 1, 1989, and the date of sale.

#90023c0080 01/23/1990 ~Comtex

WASHINGTON (JAN. 23) COMTEX - The form S-18 registration statement filed at the SEC shows Park Group Ltd. intends to distribute 627,600 shares of IDK Ventures Inc. to Park shareholders and to sell 40,000 units.

IDK was organized with a view to the distribution of a portion of the common stock owned by Park to Park's shareholders of record on Jan. 31, 1990, as a dividend in kind.

This is a blind pool/blank check offering in that neither the use of the proceeds nor the business of the company is specified.

Each unit is proposed to consist of one share of common stock, one reedeemable Class A common stock purchase warrant, one redeemable Class B

common stock purchase warrant, and one redeemable Class C common stock purchase warrant. Each warrant entitles the holder to purchase one share of IDK common stock.

Each Class A warrant entitles the bearer to purchase one share of common stock for $1.00, each Class B entitles a purchase at $1.50, and each Class C entitles a purchase at $2.00. All warrants are good until June 30, 1991.

The corporate headquarters of the company are located at 112 Biscayne Avenue, Tampa, FL 33606. Its telephone number is (813) 254-5508.

WASHINGTON (JAN. 23) COMTEX - VMS Mortgage Investors LP, VMS Mortgage Investors LP I1, VMS Mortgage Investors LP III, VMS Strategic Land Fund II and VMS Strategic Land Fund have filed identical 8-K reports with the SEC.

The 8-K filings state that a lawsuit was commenced on Jan. 11, 1990, through the filing of a class action complaint in the U.S. District Court for the Northern District of Illinois. The action was brought by M. Budd Mittleman on behalf of himself and all other persons who purchased securities in the above firms, VMS Realty Partners and various other affiliated and unaffiliated parties, as defendants.

The class action complaint alleges common law fraud resulting from defendants' alleged false statements and alleged omissions, breach of fiduciary duty, waste and mismanagement.

The plaintiffs seek as relief that defendants, jointly and severally, pay damages in an amount to be proven at trial and punitive damages and prejudgment interest at the maximum rate allowed by law, and plaintiffs be awarded their costs and expenses incurred in this action.

The defendants report they believe their actions have been proper and intend to vigorusly defend this action.

MANILA (JAN. 24) - The Philippine Amanah Bank, the only Islamic bank in the country, posted a 229 percent increase in net profits in 1989, company spokesmen said here Wednesday.

Amanah, a government-controlled commercial bank, posted a net income of 8.5 million pesos (378,000 dollars) in 1989, 229 percent more compared with the previous year's loss of 6.6 million pesos (293,000 U.S. dollars), they said.

The bank's resources in 1989 totalled 246.6 million pesos (10.96 million dollars), 68 percent of which have been classified as earning asssets, the spokesmen said.

Deposits in 1989 totalled 174.8 million pesos (7.8 million dollars).

Amanah, which began operations in 1973, has nine branches mostly located in the south, where the bulk of the country's Moslem minority lives.

TOKYO (JAN. 23) - Sony Corporation plans to market within a year a new compact digital tape recorder using cassettes the size of a postage stamp, a company spokesman said here Tuesday.

The company has just finished developing the compact recorder, which uses cassettes of two-hour duration measuring 2.15 by 3.0 centimeters (0.97 by 1.17 inches).

The recorder was designed for students, stenographers and journalists, a

spokesman for the international electronics firm said.

The new product will hit the shelves at a starting price of less than 100,000 yen (about 685 dollars), the spokesman said.

#90023d5130 01/23/1990 ~French/German News Agency

TOKYO (JAN. 23) - Japan's Bridgestone Corp., the world's third-biggest tyremaker, said Tuesday it was merging its Singapore branch office with Firestone Singapore Pte. Ltd. to form a new rubber-buying company.

Sales of the new company, Bridgestone Firestone Pte. Ltd., were expected to reach 20 billion yen (138 million U.S. dollars) in the first year. Bridgestone units in Indonesia, Thailand and Australia will deal directly with the new company, while other affiliates will go through Tokyo, a company spokesman said.

The formation of the new company follows Bridgestone's purchase of Firestone Tire and Rubber Co. of the United States for 2.6 billion dollars in 1988.

Bridgestone accounts for about 50 percent of Japanese purchases of natural rubber, estimated at around 568,000 tons last year, the company said.

#90023d5140 01/23/1990 ~French/German News Agency

TOKYO (JAN. 23) - Japan's Toshiba Corp. said Tuesday it planned to build a five-billion-yen (36 million dollar) plant in western Japan to produce colour picture tubes for high-definition television.

The plant, located at Himjei, was expected to start producing 32 and 36-inch tubes in August with a monthly capacity of 20,000 units, it said.

A spokesman for the company, Japan's second-largest producer of electric machinery, said the decision followed similar moves by Hitachi Ltd. and Matsushita Electrical Industrial Co. Ltd.

Hitachi is Japan's leading producer of electric machinery, while Matsushita ranks first in consumer electronics.

High-definition television is considered as the next-generation of television due to its superior picture quality, made possible by doubling the number of scanning lines used in current picture tubes.

Regular broadcasting is expected to start in Japan towards the end of this year.

#90023d5270 01/23/1990 ~French/German News Agency
HONG KONG (JAN. 23) - Hong Kong's inflation averaged 10.1 percent in 1989 the worst in seven years, the government said Tuesday.

Inflation stayed high in December with prices 9.7 percent more than in the same month a year earlier.

This brought the average monthly rate for the whole of 1989 to 10.1 per cent, the first double-digit reading since the 10.5 percent in 1982.

December's increase, largely due to higher transportation fares and restaurant bills, was recorded in the government's Consumer Price Index "A" covering 50 percent of urban households.

The private-sector Hang Seng Consumer Price Index put the December rate of inflation at 11.1 percent. The index applies to 10 percent of urban households made up of higher-income families.

Government economists have said that inflationary pressure has been largely generated domestically.

#90023d5390 01/23/1990 ~French/German News Agency
Tokyo (JAN. 23) - Export orders received by Japanese shipbuilders in 1989 increased 91.1 percent from the previous year to total 204 ships for 7.89 million gross register tons (Grt), the Japan Ship Exporters' Association announced Tuesday.

The sharp gain in export ship orders reflected a fast recovery in demand particularly from American and European shipowners which tripled to 2.66 million Grt, association officials said.

The backlog of orders for ship deliveries recovered to 265 ships for around 10.27 million Grt, at the end of December, restoring the 10-million Grt level for the first time in five years, they said.

TOKYO (JAN. 23) - The Japanese government Tuesday pledged continued economic assistance to China but failed to say when it would lift a freeze on a large new loan to Beijing.

Japanese Foreign Minister Taro Nakayama told visiting Chinese state

planning minister Zou Jiahua that Japan would continue helping China's modernization programs, a Foreign Ministry official said.

Prime Minister Toshiki Kaifu later told Mr. Zou in a separate meeting that he hoped Tokyo and Beijing would be able to overcome their "difficult problems," a ministry official said.

Mr. Kaifu was quoted as telling Mr. Zou that he had asked European leaders during a recent tour not to "isolate" China.

The prime minister returned to Tokyo on Thursday after visiting West Germany, France, Britain, Italy, Belgium, Poland and Hungary.

Mr. Nakayama was quoted as telling Mr. Zou that "there are some restrictions to economic cooperation with China."

The Japanese minister was apparently referring to the Japanese government's third yen loan of 810 billion yen (5.5 billion dollars) to China for industrial projects for 1990-1995.

Japan froze the projected loan following the military crackdown on pro-democracy protestors in Beijing in June.

"We will make a final decision after studying further developments (in the Chinese situation)," Mr. Nakayama said of new official economic aid to China.

Mr. Zou was quoted as assuring Mr. Kaifu and Mr. Nakayama that China would maintain its reform and open-door policy.

"The policy has contributed to the Chinese people and we can no longer change it," he told the foreign minister.

Ongoing adjustments to the Chinese economy would not lead to a change in the open-door policy, Mr. Zou said.

Mr. Zou, who arrived in Osaka last Tuesday for a 10-day visit to Japan, also met Sumiko Takahara, director general of the Japanese government's Economic Planning Agency, in Tokyo Tuesday, an agency official said.

#90023d5730 01/23/1990 ~French/German News Agency

Manila (JAN. 23) - The Philippines and West Germany signed here Tuesday an agreement to reschedule 90 million marks (52.9 million dollars) in Manila debts to Bonn.

West German sources here said the rescheduling falls under the May 1989

agreement which Manila achieved with the ''Paris Club'' of creditors.

The money now rescheduled were credits which were to be repaid between September 1988 and June 1992.

The Philippines, with an estimated foreign debt burden of 28 billion dollars, hopes to reach debt rescheduling agreements in February with Italy, Finland, Denmark, Japan, Australia and Britain.

A study published recently by the Philippines' central bank predicted that Manila's debt load could climb to almost 30 billion dollars by the end of the year.

JAKARTA (JAN. 23) - Indonesia's economy, once heavily dependent on oil, has undergone major restructuring in recent years and faces much better prospects in 1990 and beyond, the country's central bank chief has said.

Bank Indonesia governor Adrianus Mooy said that the fruits of government adjustment policies were now being seen in stronger growth and investment, healthier balance of payments, low inflation and decreased dependency upon oil.

"We enter the year 1990 with strong confidence that the years ahead will have better prospects than 1989," Mr. Mooy said at an annual bankers' dinner Monday.

President Suharto's government embarked on a series of policy reforms in the 1980's to reduce the economy's reliance on oil, which at one time accounted for some two-thirds of export income and state revenue.

The measures, prompted by plunging oil prices during the decade, included major tax reforms, and a series of deregulations and incentives for export and investment in the non-oil sector.

Oil and gas currently account for about one-third of the government's income, according to a recent estimate.

Mr. Mooy said the government's "bottom-up" development approach, giving the private sector greater initiatives, would continue, replacing the old "top-down" planning where it was the dominant force in the economy.

He said gross domestic product grew last year by at least the 5.7 per cent registered in 1988, while investment by both local and foreign businessmen surged, indicating more growth in the years ahead.

Export earnings rose to 22.3 billion U.S. dollars last year, just short of the 1981 record of 23.7 billion dollars, but had a much better mix as non-oil commodities accounted for 60 percent, he said.

#90023d6110 01/23/1990 ~French/German News Agency

MANILA (JAN. 23) - Large foreign investment firms were deferring their entry into the Philippine mutual funds industry, possibly due to political uncertainty here, the Securities and Exchange Commission (SEC) said Tuesday.

SEC chief Rosario Lopez said the firms would not be able to enter the local mutual fund industry for at least one year after the SEC liberalizes it in February.

The Philippines banned mutual-fund operations in the 1960's and has been laying the groundwork for their revival since 1988.

Miss Lopez said Japan's Nomura, Yamaichi and Daiwa securities companies, Britain's Lloyds and Bering and several unidentified U.S. firms have said they were deferring their decision to apply to enter the mutual funds market for about three months.

Asked if they were deferring their applications due to the bloody coup attempt by renegade soldiers last month, Miss Lopez said: "It could be. Maybe they would like to see what would happen later."

Three foreign firms, Fidelity Securities of Boston and Hong Kong's Jardine Fleming and Sung Hung Kai, have expressed interest in entering the mutual fund industry, she said.

Several local firms including Far East Bank and Trust Co., Philippine Commercial and Industrial Bank and All-Asia Capital were also applying to open mutual fund operations.

Miss Lopez said that the SEC would open up the market to only four firms in February, expanding it if the industry proved itself viable.

LONDON (JAN. 23) - British North Sea oil production fell 20 per cent in 1989, but is likely to show a rise of 10 to 15 percent in 1990, the Royal Bank of Scotland has said.

Average daily production last year was 1.85 million barrels a day, 20 per cent less than in 1988 and 30 percent down on the 1985 record level,

largely due to several accidents in the North Sea field.

But output in value terms rose by some 1.12 million pounds (1.86 million dollars) a day due to a rise in oil prices and an eight percent appreciation of the U.S. dollar against the pound.

#90023d6530 01/23/1990 ~French/German News Agency

EAST BERLIN (JAN. 23) - East Germany had an economic growth rate of two percent in 1989, only half the targeted rise of four percent, the central statistics administration said here Tuesday.

No major sector of the economy achieved its targets under the state economic plan during the year, the ADN news agency cited the statistics administration as saying, with industrial production, for example, rising only 2.5 percent against a target of 4.2 percent.

National revenue product - roughly equivalent to gross national product in capitalist economies - in 1989 reached "slightly more than 273.5 billion Ost marks (160.8 billion dollars)," up some 1.9 percent from 268.4 billion the previous year.

According to East German official figures the economic growth rate has been falling steadily since 1986, when it stood at 4.3 percent. It was three per cent in 1988 and 3.6 percent in 1987. Western experts question the accuracy of the official figures.

Frankfurt (JAN. 23) - The West German automotive industry posted new records in production and exports in 1989, the Automobile Industry Association (Vda) said Tuesday.

The Vda said a total of 4.85 million vehicles left German production lines last year, up five percent from 1988, while exports surged eight per cent to 2.89 million vehicles.

Cars contributed to the records for both production and exports, the Vda said. Car production increased five percent to 4.56 million, while car exports rose by nine percent to 2.72 million in 1989.

#90023d8800 01/23/1990 ~French/German News Agency

TOKYO (JAN. 23) - Japan and the United States may hold talks soon on easing curbs on high-technology exports to East European nations, a Foreign Ministry spokesman said Tuesday.

Taizo Watanabe said Japan was expected to be "duly informed by the U.S. government when they have finished their talks with their European friends" on such exports.

He was commenting on a visit to Europe by a U.S. delegation with what the Washington Post described as a "new administration position" in support of sales of advanced computers and their high-technology items to Eastern Europe.

He added that a U.S. envoy might visit Japan for consultations before a meeting in mid-February of the Coordinating Committee for Multilateral Export Controls (COCOM), a Western grouping which monitors strategic exports to the communist bloc.

A senior foreign trade official was quoted by the Kyodo news agency as saying Japan would cooperate with Western countries on easing cotrols on high-tech exports to Eastern Europe "with full consideration given to the security issues involved."

-30- 1261

#90023d8810 01/23/1990 ~French/German News Agency

MADRID (JAN. 23) - Spain signed a contract with French group Matra Tuesday for the construction of its first satellite communications system, Hispasat, with a potential market of 227 million dollars.

The Satcom consortium headed by Matra won the contract to provide two orbiting multi-purpose communications satellites handling telecommunications, data transmission and television for both civil and military use, plus spare parts in June.

Satcom also involves Fokker of the Netherlands and British Aerospace. Other bidders were Hughes Aircraft of the United States and the Eurosatellit

consortium involving MBB of West Germany, and Alcatel and Aerospatiale of France.

The two satellites are to be launched at four-month intervals from July 1, 1992, Spanish Transport and Telecommunications Minister Jose Barrionuevo said after Tuesday's signing.

The satellites will enable Spain's three leading private networks to broadcast nationwide, but will also enable two Spanish channels to broadcast to the whole of the United States and Chile.

The satellites are to be launched by the Ariane system of the European Arianespace consortium.

#90023d8990 01/23/1990 ~French/German News Agency

LONDON (JAN. 23) - British Corporate Affairs Minister John Redwood confirmed Tuesday that the government had expressed reservations last year over the Hoylake consortium's bid for tobacco and services conglomerate BAT.

The confirmation came after the release in the United States Monday of a letter sent to Hoylake by the British Department of Trade and Industry in September.

The letter expressed concern over the future of policies issued by insurance interests of British American Tobacco if Hoylake's 13.5 billion pound (22.5 billion dollars) bid were successful.

Hoylake, headed by financiers Sir James Goldsmith, Jacob Rothschild and Kerry Packer, had said it would sell BAT's British insurance interests Eagle Star and Allied Dunbar as part of a strategy of selling off non-tobacco interests to help finance the takeover.

"The main area to be explored was the extent to which the viability of Hoylake's proposals was dependent on the subsequent disposal of BAT's assets wihin a comparatively short period, and the degree of any risk for policy-holders," Mr. Redwood said.

A Hoylake spokesman said Tuesday said that the fact that the letter was sent showed that "the protection of policyholders from highly leveraged bids is of course every bit as much an issue in the United Kingdom as it is in the United States."

The British government did not refer the Hoylake bid to the monopolies commission, but it lapsed before U.S. authorities had ruled on the takeover of BAT's U.S. insurance company, Farmers.

Britain has said Hoylake can re-launch its bid once Washington gives the green light, and Mr. Redwood stressed Tuesday that the September letter did not necessarily imply that the government would try to block the takeover in future.

But the stock market saw the news of the British government's reservations and a further obstacle to an eventual new bid by Hoylake, and BAT shares fell 12 pence to 805 in early afternoon trading in London.

#90023d9500 01/23/1990 ~French/German News Agency

EAST BERLIN (JAN. 23) - East Germany, in a fresh move to facilitate travel, announced Tuesday that West German visitors will no longer be required to fill in forms when entering.

East German government spokesman Wolfgang Meyer told reporters the move would take effect Wednesday.

East Germany introduced the controversial forms shortly before Christmas when it scrapped travel restrictions for West Germans, including the compulsory exchange of cash.

East Germany at the time said the forms were introduced to record the number of West German visitors. Tourists had to hand the forms back to border guards before leaving the country.

The introduction of the entry forms had angered travellors because it had caused delays at border crossing points.

In line with the 1971 bilateral agreement on transit travel, transit travellors to West Berlin remain required to fill in the forms, which ask for name, passport number and place of residence in East Germany.

#90023d9600 01/23/1990 ~French/German News Agency

BUCAREST (JAN. 23) - Romania is to hold general elections on May 20 and will ask the United Nations to send observers to monitor the vote, Silviu Brucan, a member of the provisional government, announced Tuesday.

Mr. Brucan told a press conference that the ruling National Salvation Front (NSF) would field candidates in the elections.

"The campaign has begun here and now," he said following a plenary session of the executive council of the NSF, which took power following the overthrow of president Nicolae Ceausescu a month ago.

Mr. Brucan said the provisional government had accepted a request from some of Romania's other fledgling political parties that the elections, originally scheduled for April, be put back.

Opposition parties, including the Peasants' Party, which existed before the communists took power in 1946, had asked that voting take place in June or September to give them more time for preparation.

Responding to criticism that the NSF had unilaterally decided on when the elections are to be held, Mr. Brucan said: "All around the world it is those in power who decide the date of elections."

The NSF official said that the "Front, as a show of goodwill, is ready to accept a group of observers from the United Nations" to monitor the May 20 vote. "A request along these lines is to be made to the secretary general of the United Nations (Javier Perez de Cuellar)," he said.

The U.N. observers would make sure "procedures are strictly followed," he said.

Mr. Brucan said "round-table" talks between the NSF and other independent groups would be held Saturday to discuss questions such as electoral law and "distribution of funds."

He said the NSF would "find the necessary funds (to conduct its election campaign) from the state budget."

Defending the NSF's decision to take part in the elections, Mr. Brucan said "if the NSF did not participate, there would be a political void in Romania."

TORRANCE, CA (JAN. 23) PR NEWSWIRE - Ashton-Tate Corporation (NASDAQ: TATE) and Sun Microsystems (NASDAQ: SUNW) today announced the signing of a joint development and marketing agreement to make dBASE IV available for Sun computer systems.

Terms of the agreement were not disclosed.

This announcement marks Ashton-Tate's entry into the Sun workstation market with dBASE IV, a productivity data management and application development environment. dBASE software is the PC industry standard for data management with more than 2.5 million users worldwide and in excess of 10,000 applications programs. dBASE IV includes 4GL (4th Generation Language) tools such a query, report, form, symbolic debugger, template language and automatic code generator.

The agreement also supports Sun Microsystems' strategy of offering industry-standard, shrink-wrapped UNIX software to users of its powerful desktop systems such as the SPARCStation 1. Product development has been underway since June 1988.

dBASE IV for Sun will allow current dBASE users to leverage their investments in applications, data and training by enabling them to port applications and share data between PCs and workstations. For those customers who are not currently using dBASE products, dBASE IV for Sun will complement their existing database system with an easy-to-use and productive languange and tool set. dBASE IV for Sun brings the power of UNIX to a wider group of people.

Ashton-Tate's commitment to the UNIX market can also be seen in the company's investment in Interbase Software Corp. of Bedford, Mass. Interbase is a Sun Catalyst Advantage Vendor that designs advanced database management systems for workstations and minicomputers.

Sun Microsystems Inc., headquartered in Moutain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and

productivity software.

Ashton-Tate Corp., based in Torrance, Calif., is one of the largest developers and marketers of business software worldwide. Its products cover five application areas including database management systems, word processing, business graphics, integrated decision support systems and spreadsheets.

COSTA MESA, CA (JAN. 23) PR NEWSWIRE - Arthur E. Svendsen, chairman of the board of the managing general partner of Standard Pacific L.P. (NYSE: SPF) today announced record 1989 year-end and fourth quarter results.

Earnings for the year climbed 41 percent to a record $106,298,763 or $3.87 per limited partner unit on revenues of $486,402,967, compared to earnings of $75,418,888 or $2.75 per limited partner unit on revenues of $492,490,503 for the prior year.

For the fourth quarter, earnings rose 11 percent to $36,016,970 or $1.31 per limited partner unit on revenues of $171,326,363 compared to earnings of $32,416,275 or $1.19 per limited partner unit on revenues of $165,228,648 recorded for the fourth quarter of 1988.

Svendsen attributed 1989 results to strong across-the-board demand for homes at the company's California projects.

In the first quarter, earnings were positively impacted by approximately $.06 per unit resulting from the gain in February on the sale of an industrial building located in Orange County, Calif. In the fourth quarter, earnings were negatively impacted by approximately $4.1 million ($.15 per unit) resulting from the board's previously announced decision in October 1989 to undertake the refinancing of its existing subordinated debentures.

In announcing the results, Svendsen also reported that the estimated taxable income for the year ended Dec. 31, 1989 was $3.39 per unit (approximately 88 percent of reported earnings for the year). The estimated taxable income for the quarter ended Dec. 31, 1989 was $1.14 per unit (approximately 87 percent of reported earnings for the fourth quarter). Taxable income estimates are based on the partnership's inside basis.

The board of directors will meet on Jan. 24, 1990 to consider the matter

of the cash distribution and to declare the amount of the February distribution to be paid. The company's 1989 guidelines call for total cash distributions to approximate 60 percent of the company's 1989 earnings.

PITTSFORD, NY (JAN. 23) PR NEWSWIRE - SelecTronics, Inc. (NASDAQ: SELE) announced it has completed its merger with Microlytics, Inc. of Pittsford, N.Y., a privately-held company backed by Xerox Venture Capital, a unit of Xerox Corporation (NYSE: XRX).

Details are as follows:

TERMS: In exchange for all of Microlytics common stock, SelecTronics has issued 21.3 million shares, 4.2 million warrants, and has reserved 2.5 million shares for all outstanding Microlytics options, and Microlytics has returned the 3.3 million SelecTronics common shares that it owned to SelecTronics' treasury.

SHARES OUTSTANDING: SelecTronics' shares outstanding have increased to 35.4 million with an additional 8.4 million shares reserved for options and warrants. Prior to the merger, SelecTronics had 17.4 million shares outstanding with 1.6 million shares reserved for options and warrants.

OWNERSHIP: Xerox owns 33% of SelecTronics; SelecTronics/Microlytics management/founders own 38%; pre-merger public SelecTronics shareholders own 18 percent; and outside Microlytics investors own 11 percent. Prior to the merger, Xerox owned 18 percent of SelecTronics and 39 percent of Microlytics.

STRUCTURE: Under the new organization, SelecTronics, the parent company, is concentrating on handheld electronic publishing, and Microlytics, a wholly-owned subsidiary, is concentrating on software licensing and development.

SELECTRONICS: With facilities in Minnesota, Arizona, New York and Hong Kong, SelecTronics is a leader in the growing market for licensed, proprietary and OEM handheld electronic publishing products.

Products include The Electronic Bible, licensed from Zondervan; The Electronic Encyclopedia, licensed from Random House; a line of Berlitz European and Asian language electronic translators; and series of European and English language WordFinders.

SelecTronics was No. 49 on Inc. Magazine's most recent list of the top 100 fastest growing small public companies.

CAMBRIDGE, MA (JAN. 23) PR NEWSWIRE - BioTechnica International, Inc. (NASDAQ: BIOT) announced today that its agricultural research subsidiary, Plant Science Research, Inc., located in Minnetonka, Minn., has achieved the transformation of corn, marking the first successful demonstration that corn plants possessing an introduced gene were stable, fertile and capable of transmitting the gene to the next generation of plants.

"We see this breakthrough as a technological and commercial milestone that will allow us to enter the $1.5 billion U.S. seed corn market with genetically engineered corn hybrids," said John Hunt, chairman and chief executive officer of BioTechnica International. "Our progress to date with commercially valuable genes positions us to implement the new technology immediately and opens the way to the market for improved higher-value seeds."

BioTechnica also announced that it has filed a patent application for its corn transformation technology and will be applying to the USDA to field test transformed plants.

The transformation of corn is viewed by BioTechnica as a critical link in a chain of developments leading to the commercialization of genetically engineered corn hybrids with specific traits, such as insect resistance and improved nutritional quality.

"Useful corn transformation with the production of fertile plants that transmit the gene to succeeding generations has been an insurmountable roadblock for agricultural biotechnology," said Ralph Hardy, president of the Boyce Thompson Institute for Plant Research at Cornell University.

"BioTechnica's breakthrough integrated both sophisticated molecular and cellular skills to overcome this roadblock. For the first time, the Company's scientists can now apply the tools of genetic engineering to the most important U.S. grain crop, corn," Hardy added.

BioTechnica International is a diversified biotechnology company with established commercial subsidiaries in the fields of crop agriculture and DNA probe diagnostics, and is an emerging leader in industrial

applications of biotechnology. BioTechnica's plant agricultural research is conducted within Plant Science Research, Inc., a wholly owned subsidiary.

CONTACTS: Roger A. Kleese, President, Plant Science Research, Inc., 612-936-6113; Charles H. Baker, President, BioTechnica Agriculture, Inc., 913-661-0611; David Glass, Vice President, Government and Regulatory Affairs, BioTechnica International, Inc., 617-864-0040; Marcia A. #90023p0031 01/23/1990 ~PR Newswire

PLUMSTEADVILLE, PA (JAN. 23) PR NEWSWIRE - Global Environmental Corp. (NASDAQ: GLEN), a full service environmental company, reported today a sharp increase in both sales and net income for fiscal 1989. Net income, for the year which ended Oct. 31, rose to $241,932, or $0.11 a share (on 2.28 million shares outstanding), compared to the $16,993, or $0.01 a share (on 1.85 million shares outstanding), in 1988. Earnings per share and the number of shares outstanding for 1988 have been adjusted to reflect a reverse split of 100-for-1 effective Oct. 20, 1989.

Sales accelerated from $3.28 million in 1988 to $13.96 million in 1989. In reporting the figures, William V. Rice, president, said, "The comparison included for the first time in 1989 Texcon, Inc., acquired in November 1988, and Rage Engineering, acquired in December 1988, and also included a full year's operations of Danzer Metal Works.

"Since being acquired by Global, both Danzer and Rage have shown dramatic increases in sales and profits. We expect sales and earnings to continue increasing in fiscal 1990. Backlog for Global currently stands at approximately $5 million, which includes the recently announced $1.7 million biomass odor control project at a food plant in New Jersey. The biomass technology is successfully used in Europe and Global's installation will be its first use in the U.S. We believe that the market for this technology can be developed further in this country."

Global Environmental Corp., headquartered in Plumsteadville, provides engineering, manufacturing, installation and testing of environmental systems, including conveying systems for industrial plants. The company has three wholly owned subsidiaries: Danzer Metal Works, Hagerstown, Md.; Texcon, Inc., an engineering firm located in Greenville, S.C.; and Rage, Inc., a pneumatic conveying company loacted in Plumsteadville, Pa.

ATLANTA (JAN. 23) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) said today that its wholly owned subsidiary, NM Acquisition Corp., has extended its tender offer for all outstanding shares of common stock (including the associated preferred share purchase rights) of Great Northern Nekoosa Corp. (NYSE: GNN) for $63 in cash for each share and associated right.

The offer and withdrawal rights of the offer will now expire at 5 p.m., New York City time, Monday, Feb. 5, 1990, unless extended.

The offer was previously scheduled to expire Jan. 22. As of 5 p.m. Jan 22 42,735,934 shares of Great Northern Nekoosa stock had been validly tendered and not withdrawn, including shares tendered pursuant to notices of guaranteed delivery. The tendered shares represent more than 77 percent of Great Northern's outstanding common stock.

T. Marshall Hahn Jr., chairman and chief executive officer of Georgia-Pacific, said, "We believe Great Northern's shareholders, in substantial numbers, are sending the strong message that they don't want the board to stand between them and their right to receive $63 per share in cash."

ANN ARBOR, MI (JAN. 23) PR NEWSWIRE - In order to keep up with rapidly expanding business needs, Schumaker & Company, an Ann Arbor- based management consulting firm, has moved its main office to 455 East Eisenhower Parkway, Suite 220, Ann Arbor, MI 48108. The telephone number remains the same: 313-769-5812.

The spacious quarters in the Concord Center office complex are convenient to downtown Ann Arbor, the major expressways, and both Ann Arbor and Metro airports. In addition to accommodating the bigger business influx and expansion of their sophisticated computer systems, the new space has also allowed for the hire of two new employees. Suzanne Green joined Schumaker & Company in July of 1989 and serves as office administrator. Her primary responsibilities are to manage the company's accounting functions and computer databases. Green was previously employed at Guardian Industries, and has substantial experience in the areas of finance, customer service and office management.

Schumaker & Company's new administrative analyst is Sara Cadiz, who has

extensive PC knowledge and experience in employee training and motivation. In her present position, she acts as a database administrator and assists in the management audit information flow process. Cadiz, who joined the company last November, also works in graphic production.

The company also maintains an office in Princeton, N.J., which is soon to be moved to Philadelphia.

NEW YORK (JAN. 23) PR NEWSWIRE - Advanced Medical Technologies, Inc. (AMEX: AMA) and The Henley Group, Inc (NASDAQ: HENG) jointly announced today that as a result of intensive negotiations over the weekend, they have signed a definitive agreement for the previously announced acquisition of the IMED Division of Henley's Fisher Scientific company subsidiary by a newly organized corporation to be formed by Advanced Medical and Fisher. As a result of the acquisition, Fisher will receive $106 million in cash and 7 percent of the common stock of the acquisition company.

The agreement contains customary conditions, including conditions that Advanced Medical and the acquisition company obtain financing sufficient to consummate the transaction. Advanced Medical has obtained a financing commitment to enable Advanced Medical to make an equity contribution of approximately $40 million to the acquisition company. Advanced Medical has also received financing proposals from institutional lenders for approximately $70 million of additional senior financing required to complete the transaction and is currently negotiating commitment letters for such financing with such lenders.

Advanced Medical has delivered to Fisher a deposit of $10 million to secure its obligations under the acquisition agreement. Closing of the acquisition agreement is scheduled to occur on or before March 23, 1990.

CAMBRIDGE, MA (JAN. 23) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI) announced today that the Japanese Ministry of Health and Welfare has approved its recombinant erythropoeitin (EPO) for the treatment of anemia in patients with end-stage renal disease.

The product, EPOGIN, will be marketed by Chugai Pharmaceutical, Ltd.

Genetics Institute's licensee for EPO in Japan and other Far East countries.

Genetics Institute will receive royalties on Chugai's sales of EPOGIN in such Far East countries.

EPO is a naturally occurring protein which stimulates the body's production of red blood cells. Patients suffering from kidney disease and kidney failure are often unable to produce sufficient levels of natural EPO and thus suffer from depressed red blood cell levels, or anemia. EPOGIN is expected to be useful in treating the 50,000 patients in Japan suffering from anemia associated with kidney failure.

"We are especially pleased with the EPOGIN approval since it represents our first pharmaceutical product approved for commercial sale," said Gabriel Schmergel, President and Chief Executive Officer of Genetics Institute; "Chugai is recognized as one of the leaders in the Japanese pharmaceutical industry and we expect that they will achieve a strong position in the Japanese EPO market."

Chugai will begin to sell EPOGIN as soon as it receives a price listing under the Japanese National Health Insurance reimbursement system.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and related technologies. The Company has a diversified portfolio of licensed and proprietary pharmaceutical products.

Chugai Pharmaceutical is a leading Japanese pharmaceutical firm. The company develops, manufactures and markets a range of pharmaceuticals to treat cancer, ulcers, arthritis, cardiovascular diseases and other conditions.

BRUSSELS (JAN. 23) PR NEWSWIRE - Reuters today announced it will become the exclusive worldwide electronic distributor and marketing agent of Agence Europe's news bulletin, "Europe," covering the European Community.

The daily bulletin provides comprehensive coverage of the European Communities (EC) and its institutions, including the development of

policies and regulations relating to the integration of the EC economies into a single market by the end of 1992.

The service, which is expected to be available within three months, is designed to serve a wide international audience including government departments, diplomatic missions, corporations, trade associations, analysts, traders, lawyers, accountants, lobbyists and consultants.

"Europe" will be distributed over Reuter networks at 8:00 p.m. Brussels time the evening prior to publication. It will be made available to Reuter clients, including corporations, through satellite or discreet landline delivered services and via computer dial-up from the Reuter Textline historical information service.

David Ure, managing director, Reuters Europe, Middle East and Africa, said: "This agreement is important because of Agence Europe's long-standing reputation for comprehensive and authoritative reporting of European Community Affairs."

Emanuele Gazzo, executive vice chairman, Agence Europe S.A., said: "As we enter the 1990's, this agreement marks an exciting new era for Agence Europe, which I launched in March 1953. By delivering the 'Europe' news bulletin via the Reuter global network, in addition to the printed edition we will be in a unique position jointly to satisfy the growing world demand for a regular, totally independent, source of objective European, and specifically EC-related, information."

Agence Europe S.A. was established in December 1952 in Luxembourg. It is a leading publisher of European bulletins, reviews and economic statistics. These are available in English, French and Italian. Its principal editorial bureau in Brussels consists of 12 journalists and specialist reporters working with translators.

"Europe" news and information will complement Reuter coverage of the EC. Reuters maintains the largest non-Belgian agency presence in Brussels covering the Community.

Reuters Holdings PLC (NASDAQ: RTRSY) supplies a wide range of services to both business subscribers and to the news media. It obtains its information from around 159 exchanges and over-the-counter markets, from data contributed directly by more than 3,680 subscribers in 80 countries and from a network of 1,210 journalists, photographers and cameramen. Reuters distributes information via some 184,300 video terminals and teleprinters, and directly into clients' computers.

#90023p0049 01/23/1990 ~PR Newswire

WASHINGTON (JAN. 23) PR NEWSWIRE - UNIX International today released the initial version of the UNIX System V Roadmap, outlining the strategic goals, plans and time frames for the future development of the operating system. The Roadmap represents the evolution of UNIX System V-based market requirements from systems manufacturers, systems integrators, software houses, end-users and academic institutions. The Roadmap and its process provides the entire open systems market with an unprecedented degree of security and strategic flexibility.

The Roadmap document was developed during the last year by UNIX International with the active participation of UI members and international standards bodies, and with input from X/Open. AT&T's UNIX Software Operation, which develops and licenses the software itself, announced that it already has begun development on most requirements specified in the Roadmap. The organization will review a multi-year requirements plan during the first quarter of 1990, and present UNIX International with a proposed development plan by the end of the first quarter.

"The Roadmap process represents an enormous step forward for the open systems market," said Peter Cunningham, president of UNIX International. "Our initial release offers an extraordinarily clear vision of the future of UNIX System V and we will continue to evolve and sharpen that vision. That means that all of the participants in the UNIX System V market will be able to make intelligent, informed decisions about their product development plans and information strategies."

"This is the first time that future requirements of an operating system have been formally defined by the users of the system and made available to all members of the industry," said Larry Dooling, president of AT&T's UNIX Software Operation (USO). "USO applauds UNIX International for developing such a complete and technically rigorous definition of the requirements."

The existence of explicit long-term requirements for UNIX System V offers a measure of security and stability as a development base that no major operating system ever has enjoyed.

Moreover, this cooperative system used to develop the Roadmap is unique in the computer industry, allowing UNIX System vendors, software developers, and users to play a decisive role in determining the future of the standard.

The UNIX International Roadmap process specifies continual review of System V specifications to ensure that the ongoing evolution of the operating system remains open and corresponds to current and anticipated

needs of the user community. Through this dynamic process, UNIX International works closely with AT&T's USO in driving the development of UNIX System V to shape the future of the information industry.

UNIX International is the independent open membership organization of UNIX System V users, vendors and developers chartered to direct the continuing evolution of UNIX System V. UNIX International members jointly create specifications for the UNIX Software Operation (USO), a separate business unit of AT&T.

#90023p0055 01/23/1990 ~PR Newswire

WHITE PLAINS, NY (JAN. 23) PR NEWSWIRE - A&W Brands, Inc. (NASDAQ: SODA), today announced record fourth quarter net earnings of $3,261,000 or $.36 per share before an extraordinary charge of $.06 per share for the premium on the repurchased subordinated notes, on net sales of $23,214,000. Net earnings after the extraordinary charge were $2,761,000 or $.30 per share, for the three-month period ended Dec. 31, 1989. In the fourth quarter of 1988, A&W reported net earnings of $2,348,000 or $.26 per share, on net sales of $20,832,000. Operating cash flow for the fourth quarter of 1989 was $7,877,000 compared with $6,659,000 in the fourth quarter of last year.

For the full year 1989, A&W reported net earnings of $10,460,000 or $1.14 per share before the extraordinary charge, and net earnings after the extraordinary charge of $9,960,000 or $1.08 per share, on net sales of $110,924,000. For the same period in 1988, A&W reported net income of $7,454,000 or $.81 per share, on net sales of $102,354,000. Operating cash flow for the full year 1989 was $28,316,000 compared with $24,013,000 in 1988.

"1989 was another great year for A&W," said M.L. Lowenkron, president and chief executive officer. "On the strength of continued volume growth, our net earnings before and after the extraordinary charge were 40 percent and 34 percent higher, respectively, than 1988, with the increase almost exclusively from our base business. Our fourth quarter results were particularly impressive as A&W's domestic concentrate volume increased 10 percent. This contributed to a net earnings increase before and after the extraordinary charge of 39 percent and 18 percent, respectively, versus 1988."

Lowenkron added, "Despite the fact our industry recorded below- normal domestic growth of about 2 percent, our brands recorded an impressive 7 percent increase in bottler sales for the year. For the second year in a row, A&W was the only major soft drink company to realize volume growth on each of its brands. A&W Root Beer, our flagship product, increased 2 percent for the year and A&W Cream Soda, after completing its successful national roll-out in 1988, finished its first full year with a 4 percent increase. Our Squirt brand continued on a double-digit roll, growing 19 percent. Vernors, completing its second full year under our ownership, recorded an 11 percent increase, the third consecutive year of double-digit growth, while Country Time showed an overall 10 percent increase. Our international operations increased a substantial 35 percent over 1988 results.

"We had two significant financial achievements in 1989," Lowenkron continued. "First, we repaid the balance on our senior debt nearly five years ahead of schedule. Second, we repurchased $12,750,000 of our 12-3/4 percent subordinated notes, resulting in a one-time after-tax cost of $500,000 which was absorbed in the fourth quarter. The repurchase eliminates $1,626,000 in annual interest expense, which will be offset partially in 1990 by borrowed funds used to finance the transaction. A&W's outstanding operating results and strong cash flows enabled us to make these advantageous transactions.

"The company's excellent 1989 sales and earnings growth, generated from our base business, clearly establishes the strength of our category-leading brands. We expect 1990 to be a year of further increases in both sales and profits as we anticipate continued growth in existing markets as well as territory expansion for Squirt and Vernors. With the acquisition in 1989 of Squirt International, we expect further growth in our international markets. And, we will continue to seek opportunities to increase profits and shareholder value through the development, acquisition or licensing of products that fit within the strategic plans of the company."

A&W Brands, Inc., headquartered in White Plains, markets nine soft drinks in five flavor categories. The brands include A&W Root Beer, diet A&W

Root Beer, A&W Cream Soda, A&W diet Cream Soda, Squirt, Diet Squirt, Vernors, diet Vernors and Country Time Lemonade in ready-to- drink form.

#90023p0056 01/23/1990 ~PR Newswire

STAMFORD, CT (JAN. 23) PR NEWSWIRE - IBM Credit Corporation today reported preliminary financial results for the 12 months ended Dec. 31, 1989.

The Credit Corporation had a strong 1989, reporting a record performance in financing volumes and earnings. The company originated financing for $9.3 billion of equipment, software and services for IBM's direct

customers and distribution channels, an increase of $3.0 billion or 47 percent over 1988. Equipment financed for end-users increased by 55 percent for 1989 as compared to 1988, and short-term equipment financing for IBM industry remarketers increased by 40 percent over 1988. Primarily as a result of these volume increases, assets grew by 28 percent to $9.5 billion as of Dec. 31, 1989, up from $7.4 billion at year end 1988.

Finance and other income exceeded $1 billion for the first time in 1989, an increase of 47 percent from 1988. Net earnings for the year increased to $137.0 million, as compared with $130.5 million in 1988. Included in 1988 net earnings was a one-time cumulative adjustment of $52.3 million, related to the adoption of Statement of Financial Accounting Standards No. 96, Accounting for Income Taxes. This adjustment reflects the aggregate tax benefits earned by the company due to the Tax Reform Act of 1986.

When 1989 net earnings are compared to 1988 net earnings before the cumulative effect of this accounting change, net earnings increased by 75 percent. The return on average equity was 18.1 percent in 1989, compared to 18.5 percent in 1988.

The company is well positioned to carry out its primary objective: supporting customers in their acquisition of IBM products and services by providing competitive financing, while contributing to the growth and stability of IBM earnings.

#90023p0057 01/23/1990 ~PR Newswire

JACKSON, MI (JAN. 23) PR NEWSWIRE - Consumers Power Company has become one of the first utilities in the country to propose that a study of the impact of hydroelectric generating facilities on people be part of the Federal relicensing process. The Michigan utility, which has 11 hydroelectric plants up for new federal licenses, has proposed the socioeconomic study to the Federal Energy Regulatory Commission (FERC).

"This is a major step in Consumers Power Company's effort to obtain new licenses for these hydroelectric plants," said Gordon L. Heins, the utility's senior vice president for energy supply. "By this step, we are saying that the impact these hydro facilities have on people -- on their quality of life, their livelihood, their recreation, their communities -- must also be considered as part of the overall licensing effort," Heins said.

"During 12 public meetings and open houses for the hydro plants last summer, more than 3,300 people attended. The vast majority voiced in the clearest possible terms their support for new licenses for these

facilities, and their serious concern of negative consequences if these plants are not relicensed. This study is our response to the people's request," said Heins.

The 11 hydro facilities for which Consumers Power is seeking new licenses are located on the Au Sable, Manistee and Muskegon rivers. Applications for new licenses will be filed in 1991. Present licenses for the facilities expire in 1993.

The objective of the human impact study will be to assess the social and economic benefits of the hydroelectric facilities on local communities. These benefits include direct and indirect employment created by the units taxes paid by Consumers Power on these facilities to local governmental units and school districts, tourism and recreation opportunities created by the hydro impoundments, and economic development prospects afforded by the dams in contrast with elimination j6Pthese facilities.

Separate socioeconomic studies will be conducted for the Au Sable, Manistee and Muskegon rivers. The studies will take place in 1990 and will later be presented during public workshops in communities near the hydro dams.

"Michigan's north country would not be the beautiful land it is today, with its magnificent rivers, stable riverbanks and stable communities, were it not for these hydroelectric plants," said Heins. "Removing these dams -- as some have urged -- would have adverse impacts on the people of this region and those impacts need to be considered by the FERC in relicensing decisions," Heins added.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90023p0060 01/23/1990 ~PR Newswire
CLEVELAND (JAN. 23) PR NEWSWIRE - The Standard Products Co. (NYSE: SPD) today reported sales of $166,849,000 and net income of $3,615,000, equal to 36 cents per share, for the second quarter of its 1990 fiscal year.

These results were well above the Company's first quarter performance but net income was down from the second quarter a year ago when the Company had earnings of $7,180,000, or 67 cents a share, on sales of $131,408,000.

For the 1990 first half, sales were $317,885,000 versus $245,303,000 in the comparable year-earlier period. Net income for this fiscal year's first half totaled $5,010,000, or 49 cents a share, compared with $12,234,000, or $1.15 a share, last year.

The Company said that its Holm Industries and Long Mile Rubber acquisitions, General Motors four-door "W" car models and increased military track volume all contributed to the sales gains.

Second quarter sales to North American original equipment manufacturers increased to $105,728,000 compared to $94,328,000 a year ago. At the same time, the North American car build decreased 12 percent, with the "big three" domestic manufacturers off 18 percent. Sales and earnings at the Company's Canadian plants continued to improve as production of the new Chevrolet "Lumina" stayed at good levels during the quarter.

Sales of the Company's Oliver Rubber subsidiary increased 48 percent to $30,243,000, bolstered by the additional Long Mile volume and operating earnings, while ahead of last year, were adversely affected by raw material cost increases. Military track sales rose to $14,366,000, compared to $3,064,000 a year earlier, and the Company said it remains on target for volume of $60,000,000 for the current fiscal year. Holm Industry sales were $5,184,000, representing additional volume for the Company though somewhat below expectations as the appliance industry made inventory adjustments.

James S. Reid, Jr., Standard Products chairman and chief executive, said several reasons contributed to the earnings decrease. He pointed to the significant decline in North American and European car production. He also said the Company continued to incur start-up problems on new GM "W" car parts, particularly at its Winnsboro, South Carolina plants.

Reid also said start-up costs on the Honda Accord model continued at high levels at Standard Products' Nisco joint venture plants in Topeka and Bremen, Indiana. In addition, he said there were heavy expenses for the

start-up of the 1992 Ford Grand Marquis and Crown Victoria models, although manufacturing for these cars won't begin until late next fall.

Cleveland-based Standard Products manufactures rubber and plastic parts for the automotive original equipment industry, rubberized track for military vehicles, and plastic and magnetic door seals for home appliances. Its Oliver Rubber subsidiary is a major producer of tread rubber for truck tire retreading.

NEW YORK (JAN. 23) PR NEWSWIRE - Alexandra Clarke, a DRX Inc. (NASDAQ: DTRH) shareholder, filed a complaint Friday in Federal Court, Southern District of New York, against FennoScandia Bank, Ltd., a United Kingdom banking corporation with offices in London and New York.

The complaint alleges that FennoScandia acted improperly in connection with a loan which had previously been extended to finance the acquisition and retention of control stock of DRX, resulting in a major fall in the DRX share price that damaged DRX's ability to raise additional funds and make contractual relationships on reasonable and normal terms.

Robert A. Clarke, a DRX director who until recently was also the company's chairman, president and chief executive officer, had requested that DRX's board of directors commence action against FennoScandia in this matter, but the board of directors failed to take action.

As a result, the present action has been commenced to remedy the damage done to DRX and its shareholders, which is estimated at $40,000,000.

MILFORD, OH (JAN. 23) PR NEWSWIRE - Structural Dynamics Research Corporation (NASDAQ: SDRC) today reported record earnings and revenue for the fourth quarter ended Dec. 31, 1989.

Net earnings for the fourth quarter of 1989 increased 83 percent to $4,001,000 compared to $2,186,000 for 1988's fourth quarter. Revenue rose 21 percent to $26,072,000 compared to $21,559,000 for the same period last year. Earnings per share were $.59 compared with $.34 per share for the same period in 1988. Common shares outstanding, including equivalents, were 6,739,000 and 6,518,000 for 1989 and 1988, respectively.

Earnings before income taxes for the fourth quarter increased 81 percent to $6,166,000 compared to $3,411,000 for 1988's fourth quarter.

Included in the 1989 fourth quarter and full year earnings is a one- time pre-tax gain of $1,144,000, and a one-time net gain of $766,000 or $.11 per share resulting from the sale of the company's automotive engineering validation center in October.

Net earnings for the year ended Dec. 31 increased 64 percent to $9,771,000 compared to $5,940,000 for the same period in 1988. Earnings per share were $1.46 for the year compared with $.92 per share for the same period in 1988. Common shares outstanding, including equivalents, were 6,695,000 and 6,464,000 for 1989 and 1988, respectively.

Earnings before income taxes for the year increased 64 percent to $15,173,000 compared to $9,226,000 for the same period in 1988.

Ronald J. Friedsam, SDRC chairman and chief executive officer said, "The company demonstrated continued growth in revenue and profit during the fourth quarter. Earnings have now increased in each of the last fourteen consecutive quarters when compared to each of the prior years' quarters."

During the fourth quarter, SDRC announced the formation of a joint venture

company with Vickers, Inc., a Trinova Company. The new company, Test Systems and Simulation, Inc., provides engineering services and systems for automotive durability testing in North America. The automotive engineering validation center, a unit of SDRC's engineering services division located in the Detroit area, was sold to the joint venture.

This announcement also highlights the record results for the year. "We are extremely pleased with our many accomplishments in 1989. Significant advances were made in software products, customer service, and marketing and distribution channels. SDRC's financial performance was very strong, and we further expanded our position of industry leadership. By year-end, we had an installed base of more than 19,000 software licenses at over 3,700 different customer sites around the world," said Friedsam.

SDRC is a leading international supplier of mechanical computer- aided engineering software and engineering services used by automotive, aerospace, and industrial manufacturers for the design, analysis and testing of sophisticated mechanical products. The company's products and services significantly reduce product development time and cost, and result in superior product quality by enabling customers to optimize product designs prior to production. SDRC employs more than 800 people and has 31 offices in ten countries throughout North America, Europe and the Far East.

LOS ANGELES (JAN. 23) PR NEWSWIRE - Newbridge Networks (NASDAQ: NNCXF) announced today that it has signed a $2.68 million agreement with Los Angeles County to provide a communications backbone network.

The network will be used for emergency and administrative services and will utilize T-1 lines as well as digital microwave for maximum reliability during emergencies.

"Reliability was the key word in choosing a vendor for this network. Not only did we want to pull together our existing voice network and data application, but we needed to create a network that would keep on running in the event of an emergency, such as an earthquake," said Dennis Shelley, Los Angeles County's division chief, Telecommunications Engineering. "The combination of reliability, product supportability, and impressive price/performance led us to our decision to go with Newbridge."

"We are very excited to be working with Los Angeles County," said Newbridge President Peter Madsen. "Not only will this network carry vital information to thousands of people on a daily basis, it will provide a life-saving link between police and emergency services in the event of a disaster."

To ensure maximum reliability, the network will utilize route diversity, optimizing both T-1 lines and digital microwave to keep the network running even during the most difficult set of circumstances. Future installations will include such emergency services as video teleconferencing.

L.A. County will use the 3600 MainStreet T-1 bandwidth manager and the 3645 MainStreet High Capacity Multiplexer. Many of the multiplexers will be configured as Digital Access Cross-connect Systems (DACS), while several locations will also take advantage of multi-drop data bridging. Three 4602 MainStreet Network Management Systems will monitor and control the network from three separate locations. Multiple network management systems distributed around the country will not only provide redundancy

and regional partitioning, but are essential for disaster recovery when responsibility for the entire network must be passed from region to region.

Installation of the network will take place over the next three to five years. Twelve nodes are currently being installed, with 10 more to follow immediately. Upon completion, the network is projected to be between 50 and 100 nodes.

There are approximately 8.6 million people living in the 4,083 square mile county of Los Angeles. Services for the county citizens are provided by over 70,000 county employees who must rely on prompt and accurate information that is transported over the various county networks. The new system will raise the county's information transport capability to a significantly higher level than what is available to the county work force today.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in the United States, Canada and the United Kingdom.

Newbridge Networks is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

RICHMOND, VA (JAN. 23) PR NEWSWIRE - Tredegar Industries, Inc. (NYSE: TG) reported today its sales, net income and earnings per share for the 12 months and fourth quarter of 1989.

Tredegar became an independent company following a spin-off from Ethyl Corporation (NYSE: EY) at the end of the second quarter of 1989. While fourth-quarter 1989 results reflect actual performance, comparative figures for 1988 and the first half of 1989 were reported on a pro forma basis in order to illustrate how Tredegar might have performed as an independent company during those periods.

The pro forma figures assume that Tredegar would have incurred expenses of approximately $3 million per quarter on an after-tax basis. These expenses relate primarily to interest on Tredegar's debt and incremental administrative expenses.

Tredegar's sales for the year totaled $637,883,000, up two percent from $624,478,000 in 1988. Fourth-quarter sales for 1989 were $151,531,000,

down two percent from $154,428,000 a year earlier.

On a pro forma basis, Tredegar's 1989 net income decreased 30 percent to $11,253,000, or 94 cents per share, from $16,120,000, or $1.33 per share, in 1988. For comparative purposes, the 1988 figures exclude an after-tax gain of $8.8 million, or 73 cents per share, from the settlement of a plastics segment patent infringement lawsuit in the third quarter of 1988.

In the fourth quarter of 1989, net income was $989,000, down 11 percent from $1,113,000 a year earlier. Earnings per share were 9 cents in both quarters, with about two percent fewer shares outstanding at the end of 1989 due to Tredegar common stock repurchases.

John D. Gottwald, Tredegar's president and chief executive officer, said: "Fourth-quarter results show improved earnings in plastics and energy, offset by a loss in aluminum due to higher costs and reduced demand. At this time, the near-term outlook for improved aluminum profits is not favorable."

Tredegar Industries is a manufacturer of plastics and aluminum products and has interests in coal, oil and gas.

FARMINGTON HILLS, MI (JAN. 23) PR NEWSWIRE - Michigan National Corp. (OTC: MNCO) announced earnings for the year ended Dec. 31, 1989, of $187.3 million.

Earnings for 1989, which include the cumulative effect of an accounting change in the first quarter and a gain in the third quarter from the sale of the corporation's credit card portfolio, represent an increase of $94.1 million from 1988 earnings. Net income per share on a fully diluted basis was $12.13 compared with $6.07 in 1988. The return on average assets in 1989 was 1.69 percent compared with 1.05 percent a year ago. The return on average equity increased to 28.87 percent from the 17.18 percent reported in 1988.

Chairman and Chief Executive Officer Robert J. Mylod commented, "This year marked a period of transition for the corporation during which we made considerable progress toward our goal of building a stronger balance sheet. The sale of the corporation's credit card portfolio, along with a substantial increase in the loan loss allowance, contributed significantly toward the attainment of an 8.10 percent primary capital ratio and a 6.40 percent equity to asset ratio at Dec. 31, 1989. While these strategies

had a negative impact on core earnings in 1989, they have aided in positioning the corporation to better protect itself in an economic downturn and to be prepared to make judicious expansion moves which will strengthen future earnings power."

The significant increase in earnings is primarily attributable to the $225 million pre-tax gain on the sale of the credit card portfolio in July 1989. In addition, the corporation adopted Financial Accounting Standards Board Statement No. 96, "Accounting for Income Taxes." The cumulative effect of this accounting change increased net income by $8.3 million in the first quarter. Net income for the year was also favorably impacted by a significant reduction in federal income tax expense. Profit before tax increased 59 percent while federal income tax expense decreased 24 percent. The reduction is primarily attributable to tax losses recognized by the corporation's savings and loan subsidiary.

The net interest margin percentage for 1989 was 4.41 percent compared to 5.02 percent in 1988. The decrease was due primarily to the effects of the corporation's increased dependency on wholesale deposits to fund asset growth in the first half of the year and the impact of the sale of the corporation's high yield credit card portfolio in the second half of the year. Partially offsetting these decreases was the effect of the Dec. 31, 1988, acquisition of the corporation's savings and loan subsidiary's covered assets and FSLIC note receivable. During the year, steps were taken to strengthen the net interest margin by replacing lower yielding securities with longer term, higher yielding securities. These transactions resulted in net securities losses of $11.7 million.

Earnings for the three months ended Dec. 31, 1989, were $24.2 million compared to the $23.4 million reported for the same period of 1988. Net interest income for the three months was $88.1 million, a $10.9 million decrease from that reported for the fourth quarter of 1988. The decrease was primarily due to the higher percentage of investments in the asset mix which resulted from the sale of the high yield credit card portfolio, and a higher cost of funds, all of which negatively impacted the interest rate spread.

Other operating income for the three months was approximately even with that earned in the same period last year after adjusting for a $5.8 million gain from the sale of mortgage servicing rights during the fourth quarter of 1988. Other operating expense increased 8 percent over the fourth quarter of 1988, 6 percent of which is attributable to the inclusion of the savings and loan subsidiary operations in 1989.

The corporation recognized net federal income tax credits of $24.2 million in the fourth quarter 1989 compared to federal income tax expense of $9.7 million in 1988. Of the $24.2 million net federal income tax credits recognized in the fourth quarter 1989, approximately $16 million were

attributable to non-recurring tax losses recognized by the corporation's savings and loan subsidiary.

The provision for possible credit losses during the fourth quarter was $24.0 million, a 52 percent increase over the same period in 1988. The principal reason for the increase in the provision is the corporation's commitment to better protect itself in the event of an economic downturn. The allowance for possible credit losses at Dec. 31, 1989, was $124.7 million, or 1.84 percent of total loans and 165 percent of non-performing loans. This compares to an allowance of $97.1 million, or 1.31 percent of total loans and 110 percent of non- performing loans at Dec. 31, 1988. Non-performing loans at Dec. 31, 1989, were $75.6 million or 1.11 percent of total loans compared to 1.19 percent at Dec. 31, 1988. The value of property from defaulted loans included in the corporation's total assets was $49.8 million at Dec. 31, 1989, compared to $20.7 million at Dec. 31, 1988. The increases in non- performing loans and in property from defaulted loans have occurred primarily in the commercial real estate and commercial financing portfolios. This experience is consistent with that of many financial institutions throughout the country. The corporation has addressed the concern over increasing exposure in these portfolios through increases in the provision for possible credit losses this year.

Michigan National Corp. is a diversified financial services corporation with total assets of approximately $11.5 billion. It is a bank holding company and a savings andZoan holding company.

Michigan National Corporation's principal subsidiary, Michigan National Bank, has 200 branches throughout Michigan and operates the state's largest automated teller machine network. Among its other affiliates are: Beverly Hills Federal Savings Bank, which operates six branch offices in southern California; Independence One Mortgage Corporation, which originates residential mortgages through 22 offices in 11 states; Independence One Investment Services Corporation, which provides investment services through its two subsidiaries; Morison Asset Management Inc.; Pattern Recognition Investment Management (PRIMA) Corporation; Independence One Brokerage Services, Inc., which offers brokerage services for stocks, bonds, mutual funds, unit investment trusts, government securities and other investments; and Independence One Financial Services, Inc., a commercial lender serving small businesses in the Northeast. Michigan National Corporation has its headquarters in Farmington Hills.

CLEVELAND (JAN. 23) PR NEWSWIRE - M.A. Hanna Company (NYSE/MSE: MAH) today reported record sales and earnings in the fourth quarter and fiscal year ended Dec. 31, 1989.

Before one-time gains, net income from operations in 1989 was $71.9 million ($2.55 per share fully diluted), a 25 percent increase from $57.7 million ($2.07 per share fully diluted) in 1988. One-time gains of $15.0 million from asset sales raised net income for 1989 to $86.9 million ($3.08 per share fully diluted). In 1988, one-time gains from asset sales and other non-operating items raised net income to $83.2 million ($2.98 per share fully diluted).

Net sales and operating revenues increased 9 percent to $1.1 billion in 1989 from $1.0 billion in 1988.

In the fourth quarter of 1989, Hanna earned $15.6 million ($.55 per share fully diluted), a 19 percent increase from $13.1 million ($.47 per share fully diluted) in the fourth quarter of 1988.

Net sales and operating revenues increased to $271.6 million in the fourth quarter of 1989, up 13 percent from net sales of $241.2 million in the corresponding period of 1988.

"We had an excellent year in a less than robust economy, which is a tribute to the strength of Hanna's business and financial base and to the

diligence of all Hanna associates," said Martin D. Walker, chairman and chief executive officer. "The results are particularly impressive considering that Hanna's tax rate was five percentage points higher in 1989 than in 1988."

The formulated polymers segment recorded operating income of $88.1 million in 1989, compared with $75.5 million in 1988. Excluding non-operating income, the natural resources segment in 1989 had operating and equity income of $36.1 million, compared with $29.1 million in 1988.

Hanna benefitted in both years from the utilization of tax-loss carryforwards accumulated in the early and mid-1980s when the company suffered significant tax losses during a restructuring program. Results included tax credits of $20.3 million in 1989 and $23.7 million in 1988.

HAUPPAUGE, NY (JAN. 23) PR NEWSWIRE - Robotic Vision Systems, Inc. (NASDAQ: ROBV), a leading supplier of machine vision-based equipment for process guidance and quality control, announced today that Motorola Government Electronics Group has ordered the company's new product, the HR-2000, for automated printed circuit board solder quality control.

Robotic Vision Systems' Chairman Pat V. Costa said, "We expect Motorola's selection of the HR-2000 to support its solder quality control efforts to attract considerable attention throughout the electronics industry. Motorola's international reputation for excellence in manufacturing quality means that its activities, especially in the area of quality control, are closely watched and frequently emulated." In 1988, Motorola was one of the three inaugural recipients of the prestigious Malcolm Baldrige National Quality Award.

RVSI's HR-2000 uses the company's proprietary three-dimensional machine vision technology to rapidly obtain thousands of high-resolution 3-D measurements from each printed circuit board solder joint. This geometric information is used to prevent the occurence of solder defects through trend analysis and statistical process control. Introduced in 1989, the first three HR-2000 units are now installed and operating in the field.

Separately, RVSI announced that it will be demonstrating the HR-2000 at the Nepcon West Exhibition, Anaheim, Calif., in the Marriott Pavillion, Booth No. 8349, Feb. 27 - March 1, 1990.

Robotic Vision Systems, Inc., designs, develops, manufactures and markets advanced three-dimensional vision-based intelligent robotic and inspection

systems for industrial and military purposes.

LANDOVER (JAN. 23) PR NEWSWIRE - Hechinger Company (NASDAQ-NMS: HECH.A, HECH.B), a chain of specialty retail do-it-yourself home centers, today announced quarterly cash dividends of $.04 per share on its outstanding Class A Common Stock and $.016 per share on its outstanding Class B Common Stock.

Both dividends are payable on Feb. 23, l990, to stockholders of record on Feb. 2, l990. Hechinger recently announced plans to enter the Greater Cincinnati, Ohio market with its Home Quarters Warehouse division as part of an expansion program which calls for the opening of approximately 30 new HQ warehouse stores over the next three years. A significant portion of these new warehouse stores will be in the Boston metropolitan area, with the first four scheduled for l990. Plans also include entering the Birmingham and Montgomery, Alabama markets. During the fourth quarter, the company opened seven new units. New Hechinger stores opened in Reston, Annandale, and Fairfax, Va.; Wilmington, Del.; and Fort Washington, Md. New Home Quarters Warehouse stores opened in Birmingham, Ala.; and Richmond, Va. The company currently operates 86 stores, 15 Home Quarters Warehouse stores, and six Triangle Building Centers stores.

NEW YORK (JAN. 23) PR NEWSWIRE - AT&T (NYSE: T) will offer economy rates on calls to Australia from New York City, and six other metropolitan areas for a four-day celebration of Australia Day, all day Thursday, Jan. 25, through Sunday, Jan. 28. A five-minute call at any time will cost only $4.98.

Australia Day is celebrated Jan. 26, the date in 1788 when Capt. Arthur Phillip landed at Sydney Harbor with his First Fleet. The 11 ships carrying 1,030 people had sailed for eight months from England to Botany Bay in Australia.

For Australian school children, the day also marks the end of a long summer vacation and a return to school.

The special Australia Day rates will also be available in San Francisco,

Los Angeles, Chicago, San Diego, Denver and Seattle, Jan. 25 through Jan. 28.

#90023p0084 01/23/1990 ~PR Newswire

LOWELL, MA (JAN. 23) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) today introduced a set of UNIX(R) hardware and software products that reflect the company's product strategy of applying Wang innovation to industry standards.

The announcement includes the first two members of a new line of Wang UNIX mid-range systems, the OPEN/Server family. Based on industry-standard processor technology from Intel Corporation and operating systems from the Santa Cruz Operation (SCO(tm)), the new systems support up to 128 users.

The announcement also includes two software packages -- UNIX ClearView and WP/x -- that bring Wang's information processing capabilities and ease of use to the UNIX environment. UNIX ClearView provides tools for managing files and applications in a UNIX windowing environment. WP/x brings Wang's word processing features to UNIX systems users.

Pricing for a base-level OPEN/Server system starts at $22,690 or $27,690, depending on the microprocessor used. UNIX ClearView will be bundled with all Wang UNIX systems running SCO Open Desktop software. Pricing for WP/x starts at $995 for four users. All products will be available in the second quarter of calender year 1990. Initially targeted at the worldwide government market, the new products will be unveiled at the UniForum 1990 Conference in Washington, D.C.

"These new UNIX products demonstrate Wang's strategy of making the innovative and easy-to-use Wang applications available on industry-standard computer systems," said Paul Demko, vice president of Government Applications Engineering at Wang.

"This approach will enable our customers to apply the most effective information processing solution to their business needs," said Demko. "It makes information in many different forms and located across many operating environments available to any authorized user's workstation. By allowing users to run applications on the platform of their choice, this approach also helps them protect their investment in applications and training."

Wang's new OPEN/Server systems employ Intel's 386 and 1486 microprocessors and Multibus II technology, as well as the SCO UNIX System V/386 Release

3.2 operating system. They support a variety of industry-standard communications options.

This open, industry-standard architecture offers customers several benefits: It allows them to run any UNIX-based application on any member of the product family without change. It also allows them to use any of the wide variety of off-the-shelf applications written for Intel microprocessors.

In addition, it provides customers using personal computers (PCs) with the SCO XENIX operating system with a smooth growth path, access to thousands of applications provided by SCO and third-party developers for the SCO XENIX System V and SCO UNIX System V/386 Release 3.2 operating environments, and powerful system security features. Furthermore, it ensures compliance with major industry standards.

UNIX ClearView and WP/x are designed to reduce the complexity of the UNIX environment to allow even novice users to become productive quickly on a UNIX system.

WILMINGTON, DE (JAN. 23) PR NEWSWIRE - Du Pont (NYSE: DD) today announced it has acquired the electro-optic products group of the Siecor Corp.

The group is based in Research Triangle Park, N.C. Terms were not disclosed.

"The acquisition will enable Du Pont to expand its line of electronic and optoelectronic components and systems used by businesses for internal computer networks," said Michael B. Hartnagel, Du Pont's director of information storage.

The Siecor group designs, manufactures and markets products for worldwide local area network markets that permit customers to integrate a variety of network protocols into a single communications system. The systems are compatible with copper-wire or fiber-optic cabling systems.

Du Pont entered the local area network market in 1987 with a fiber- optic system that permitted replacement or extension of the standard copper-wire system.

"The Du Pont acquistion represents an opportunity for the electro- optic products team and its customers," said Ghias Massarani, business manager

of the electro-optic group. "Access to Du Pont's resources will let us offer customers a more complete, high-quality product line at a competitive price."

Siecor is a joint venture of Siemens AG of West Germany and the Corning Corp. It is a leading supplier of wire, cable and related products to the worldwide telephone, computer and elevator markets.

Du Pont is a leading worldwide supplier of materials, components and information storage products to the electronics industry. Sales of electronic products are about $2 billion.

#90023p0086 01/23/1990 ~PR Newswire

KING OF PRUSSIA, PA (JAN. 23) PR NEWSWIRE - The Nuclear Regulatory Commission (NRC) staff has cited GPU Nuclear Corp. (GPUN) for its apparent failure to promptly document and correct a discrepancy involving certain safety systems at its Oyster Creek nuclear power plant near Toms River, N.J.

The staff proposes to fine the company $25,000.

The alleged violation stems from the mispositioning of a switch in the plant's electric power distribution system and the company's failure to take adequate action after workers made several reports of the error to supervisors. The switch had been inadvertently left in the wrong position while the plant was in a maintenance outage in 1986.

Six times, starting in February 1989, the discrepancy was brought to the attention of plant supervisory personnel. Not until September 1989 was it formally documented and corrective action taken. Despite the discrepancy, the plant was never in an unsafe condition because of a back-up alarm system that would have alerted control room operators to the need to reposition the switch in an emergency.

The function of the switch in question is to select one of two sources of D.C. control power for remote and automatic operation of safety-related breakers. The switch can be positioned to either a safety-related power source or a non-safety-related power source. It had been incorrectly positioned to the non-safety-related power source. The breakers could have been locally operated manually regardless of the position of the switch in question.

In a letter notifying GPUN management of the proposed fine, William T. Russell, regional administrator of NRC Region I, said, "The NRC is

concerned that this incident represents another example of management's continuing failure to ensure that the plant staff understand and implement procedures for promptly identifying, documenting, reporting and correcting deficiencies...this violation demonstrates the importance of...management oversight."

Although the usual fine for this type of violation is $50,000, NRC has reduced the proposed fine to $25,000 because once made known to site management, the company took prompt and thorough corrective action.

GPUN has 30 days to either pay the proposed fine or to request, in writing that part or all of it be withdrawn, giving its reasons for any such request. The company also has 30 days to admit or deny the alleged violations, and if admitted, to give the reasons behind them, indicate what it has done or intends to do to prevent their recurrence, and specify the date by which it expects to be in full compliance with NRC requirements.

The state of New Jersey has been informed of the proposed enforcement action.

ROCKVILLE, MD (JAN. 23,) PR NEWSWIRE - The GEnie service has added the SoftServ RoundTable, a new RT devoted to the electronic distribution of current and out-of-print books, to its menu of online service offerings.

The GEnie service is an online consumer information service for personal computer enthusiasts offered by GE Information Services.

J. Neil Schulman, manager of the SoftServ RT, said, "This RoundTable is the first full attempt to use computer and data communications technology to create a new distribution medium for the 'stuff' that up until now has been available only as bound books. This 'stuff' is now called 'paperless' books since only the text of a book is received electronically." Of the total 200 titles currently available on SoftServe, about 100 titles are currently in print; nearly 70 are out-of-print except for the SoftServ edition; and about 30 titles are originals that have never been published. Half of these works are fiction and half non-fiction.

The SoftServ RT Catalog allows a GEnie service subscriber to browse through the titles or search by author, title, publisher, fiction, non-fiction, or a descriptive keyword. The SoftServ RT allows the subscriber to examine online sample chapters of a book, and, if desired,

order a copy of the whole book for electronic delivery to a GE Mail address on the GEnie service.

The cost for each title will approximate the price of a paperback edition of the work, under $5 for most works. The GEnie service subscriber pays SoftServ Publishing directly for works ordered for electronic delivery.

The SoftServ RT on the GEnie service is also an electronic forum for the electronic and desktop publishing industry where authors, readers, editors publishers, booksellers, literary agents, reviewers, and technical experts can get together online.

NEW YORK (JAN. 23) PR NEWSWIRE - The Greater New York Savings Bank (NASDAQ: GRTR) announced today that its board of directors voted a dividend of twelve cents per common share. It is the ninth consecutive quarterly dividend since the bank converted from mutual to stock ownership on June 24, 1987. The dividend is payable on March 1, 1990 to stockholders of record at the close of business on February 9, 1990.

Charles J. Ohlig, chairman and chief executive officer of The Greater, stated: "The consistency of our dividends despite the uncertainty of this year's economic environment reflects The Greater's strong capital position."

The Greater New York Savings Bank is an FDIC-insured, New York- chartered stock savings bank with assets of $3.1 billion, deposits of $2.2 billion and total stockholders' equity of $210 million, or 6.76 percent of total assets, at Dec. 31, 1989. Nine of its 12 banking offices are located in Brooklyn, where The Greater was originally chartered in 1897, and its three other offices are located in Manhattan, Queens and Nassau County. The shares are traded on the over-the-counter market under the symbol "GRTR".

NEW YORK (JAN. 23) PR NEWSWIRE - Advanced Medical Technologies, Inc. (AMEX: AMA) and The Henley Group, Inc (NASDAQ: HENG) jointly announced today that as a result of intensive negotiations over the weekend, they

have signed a definitive agreement for the previously announced acquisition of the IMED Division of Henley's Fisher Scientific company subsidiary by a newly organized corporation to be formed by Advanced Medical and Fisher. As a result of the acquisition, Fisher will receive $106 million in cash and 7 percent of the common stock of the acquisition company.

The agreement contains customary conditions, including conditions that Advanced Medical and the acquisition company obtain financing sufficient to consummate the transaction. Advanced Medical has obtained a financing commitment to enable Advanced Medical to make an equity contribution of approximately $40 million to the acquisition company. Advanced Medical has also received financing proposals from institutional lenders for approximately $70 million of additional senior financing required to complete the transaction and is currently negotiating commitment letters for such financing with such lenders.

Advanced Medical has delivered to Fisher a deposit of $10 million to secure its obligations under the acquisition agreement. Closing of the acquisition agreement is scheduled to occur on or before March 23, 1990.

#90023p0095 01/23/1990 ~PR Newswire

FORKED RIVER, N.J. (JAN. 23) PR NEWSWIRE - GPU Nuclear Corp. announced today will pay $25,000 in civil penalties to the Nuclear Regulatory Commission (NRC) resulting from a safety-related electrical system switch being left in the wrong position for an extended period of time at Oyster Creek Nuclear Generating Station.

As it was found, the switch connected the plant's safety-related electrical supply to a battery system that is not certified to withstand earthquakes. The switch was repositioned to a safety-related battery system that is "seismically qualified" as capable of withstanding an earthquake.

Detailed investigations by GPU Nuclear and the NRC determined that the problem had been identified to on-shift management Feb. 26, 1989, but it was not properly documented and no remedial action was taken until Sept. 16, 1989, when senior-level site management was informed and advised the NRC.

The switch apparently had been placed in the wrong position in October 1986, when electrical system modifications were underway during a refueling outage.

The NRC and GPU Nuclear concur that the safety signficance of the event is low. In addition, the NRC gave consideration to GPU Nuclear's comprehensive corrective actions and reduced the fine by 50 percent of the possible amount, to $25,000.

Prior to the identification of this violation, GPU Nuclear had embarked on a series of efforts specifically designed to strengthen corrective action programs including revisions to procedures dealing with corrective actions and restructuring documents used to report deficiencies.

Remedial actions for this and related events discovered in the several months prior included revising the operating procedures for positioning the switch; reviewing procedures and electrical schematic drawings to identify similar switches, which were inspected for proper positioning; investigating technical aspects of incidents, and briefing operators on lessons learned from events.

Oyster Creek is operated by GPU Nuclear and owned by Jersey Central Power & Light (JCP&L).

#90023p0096 01/23/1990 ~PR Newswire

WOODCLIFF LAKE, N.J. (JAN. 23) PR NEWSWIRE - Ingersoll-Rand today announced that the company achieved record sales for 1989 of $3.4 billion, a 14-percent increase over 1988. Operating income was $361.2 million, or 27 percent higher than the 1988 level of $285.5 million. Net earnings for the year before the effect of an extraordinary tax benefit totalled $202.2 million and established a new record for the company. Net earnings in 1989 including the extraordinary tax benefit reached $210.7 million, or $3.95 per share. The prior year's net earnings were $161.6 million, or $3.00 per share.

Sales for the fourth quarter were $893.0 million, a 10-percent increase over 1988's fourth quarter. Operating income was $114.0 million, or 31 percent higher than the $87.1 million reported in the comparable 1988 quarter. Net earnings for the quarter were $64.8 million, or $1.22 per share, compared to 1988 fourth quarter net earnings of $58.3 million, or $1.09 per share.

Incoming orders in the 1989 fourth quarter were $844 million, six percent higher than the $794 million booked in last year's comparable quarter. Total bookings for 1989 were $3.5 billion, an increase of eight percent over the $3.2 billion reported in the prior year.

The extraordinary tax benefit of approximately $8.5 million, or $.17 per share, during the first quarter of 1989 resulted from the reduction of income taxes through the utilization of a capital loss carryforward.

In announcing the 1989 results, Theodore H. Black, chairman and chief executive officer of the New Jersey-based manufacturer, stated that the improvements were broad based from both an operational and geographical point of view. While every major unit surpassed 1988 sales levels, Black cited record sales and operating income in the company's Construction Equipment, Air Compressor and Bearings and Components groups.

"Operating income for the year was up 27 percent as a result of increased volume, productivity and cost savings from improved factory operations and the lowest selling and administrative expense ratio ever achieved by the company. Pretax profits were further enhanced by significant improvements in the earnings of the Dresser-Rand partnership. The record year was achieved in spite of a 1989 fourth quarter 35-percent tax rate as compared to 24 percent applied to pretax earnings in the last quarter of 1988," Black continued.

In reviewing the segments, Black said he was pleased by the performance of the individual operating units. He pointed out that, "Fourth-quarter and full-year results were significantly better than last year for each segment."

WASHINGTON (JAN. 23) PR NEWSWIRE - Atlantic Coast Airlines/United Express in its first major expansion since its Dec. 15 initiation of service, announced today that it will substantially increase its operations by inaugurating non-stop service to Washington's Dulles International Airport from both White Plains/Westchester County Airport and Binghamton, N.Y. The service will begin March 2 from White Plains/Westchester County and March 15 from Binghamton.

Washington-based United Express which is operated by Atlantic Coast Airlines, said it will offer four daily non-stop roundtrips to both cities. This will allow customers convenient access to both the Washington-Dulles area and also timely connections to United Airlines flights across the country and around the world.

Additionally, the airlines' March expansion includes increasing flights from Dulles to both Newport News, Va., and Raleigh/Durham, N.C., to a total of five roundtrips each business day, up from the present four daily roundtrips. In all, this expansion of service will bring to 68 the total number of flights United Express offers daily, up from the present 48 flights. This represents an increase of 33 percent.

United Express will serve the White Plains market with its new pressurized Embraer Brasilia jet-props. The Brasilia is one of the fastest and most technologically advanced aircraft in regional airline service today. The 30-passenger aircraft is operated by two pilots and a flight attendant, and has a cruising speed of 350 miles per hour. For its Binghamton service, the airline will use its British Aerospace Jetstream aircraft. These new aircraft seat 19 passengers in pressurized comfort, and have a cruising speed of 270 miles per hour.

As a marketing partner with United Airlines, United Express offers its customers many United Airlines benefits, including worldwide reservations, advance seat selection and boarding passes. Members of United's popular Mileage Plus frequent flier program earn mileage credits on all United Express flights, and senior citizens may participate in United's Silver Wings Plus program, which offers a variety of travel-related discounts.

Washington Dulles-based Atlantic Coast Airlines/United Express is a division of WestAir Holding Inc. (AMEX: WAH), headquartered in Fresno, Calif. WestAir Holding Inc. is the largest regional airline company in the United States, operating 780 daily flights to 50 cities in 12 states and the District of Columbia. In 1988, the company was named "Regional Airline of the Year" by Air Transport World Magazine.

#90023p0103 01/23/1990 ~PR Newswire

WASHINGTON (JAN. 23) PR NEWSWIRE - An estimated 150 low- and moderate-income families, mainly first-time home buyers, will find home ownership easier through below-market mortgage rates resulting from a city of Atlanta bond purchase by the Federal National Mortgage Association (Fannie Mae) (NYSE: FNM).

Fannie Mae's purchase of the $6.5 million single-family mortgage revenue bond issued by Atlanta's Urban Residential Finance Authority (URFA), when combined with another $3.5 million URFA bond issue, will provide qualified home buyers with 30-year fixed-rate federal government-backed mortgages at an interest rate of 7.5 percent.

The initiative underscores Fannie Mae's commitment to Atlanta's affordable housing efforts. These currently include the Vine City Community Development Program, an initiative to revitalize neighborhoods near the planned Georgia Dome Stadium.

Marty Nance, executive director of URFA, said, "Fannie Mae's bond purchase will play a vital role in URFA's $10 million initiative to provide

affordable housing for residents of the Vine City community."

Earlier, Fannie Mae efforts in Atlanta included a $43.5 mortgage bond purchase in 1987, which generated below-market home financing for an estimated 660 low- and moderate-income families.

Glenn T. Austin, Jr., senior vice president of Fannie Mae's Southeastern Regional Office based in Atlanta, said: "This mortgage revenue bond purchase heightens Fannie Mae's commitment to low- and moderate-income housing in Atlanta and across the country. Such bond purchases are an integral part of our low- and moderate-income housing effort -- which also includes participation in initiatives like the home buyers' program recently announced by the Atlanta Mortgage Consortium."

Fannie Mae's Office of Low- and Moderate-Income Housing, has, since its inception in 1987, dedicated some $3.5 billion to help finance housing for more than 70,000 low- and moderate-income families nationwide.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company, and the nation's largest investor in home mortgages.

#90023p0104 01/23/1990 ~PR Newswire

MT. LAUREL, NJ (JAN. 22) PR NEWSWIRE - Tyco Toys, Inc. (NASDAQ: TTOY), today announced sales of $332,000,000 for the year ended Dec. 31, 1989, compared to $219,300,000 for 1988, an increase of 51 percent. Sales for the fourth quarter were $109,200,000 compared to $55,700,000, reflecting strong retail sales of Tyco products during the holiday season.

All figures exclude sales of Nasta International, Inc., the company's 63 percent owned subsidiary, the sale of which Tyco expects to complete in the first quarter of 1990. Had Nasta been included, the sales comparison would have been $383,000,000 in 1989 compared to $263,800,000 in 1988.

Richard E. Grey, president and chief executive officer of Tyco, stated: "The acquisition of View-Master-Ideal, Inc., in June 1989 and strong sales of Tyco's dolls and electronic toys accounted for much of the sales increase.

"Based on strong trade acceptance of our 1990 line," Grey added, "we expect another record sales year in 1990. Our order backlog at year-end was $48 million, compared with $30 million a year ago, so our first quarter 1990 sales comparison should be excellent."

Tyco expects to release 1989 earnings Feb. 20. Tyco, now the fifth largest U.S. toy company, markets a broad line of toy products.

CONTACT: Harry J. Pearce, executive vice president of Tyco, 609-234-7400; or Bruce Maguire or Rick Anguilla of Gerald Freeman, Inc., 201-470-0400 or 212-489-8585, for Tyco

#90023p0105 01/23/1990 ~PR Newswire

CHARLOTTE, N.C. (JAN. 18) PR NEWSWIRE - NCNB Corp. (NYSE: NCB) today reported net income for 1989 of $447.1 million, an increase of 77 percent over net income of $252.5 million in 1988. Earnings per share rose 59 percent to $4.62, compared to $2.90 per share the previous year. NCNB achieved a return on equity of 20.45 percent in 1989, a substantial increase from the return on equity of 15.55 percent in 1988. The company increased its dividend per common share by 17 percent in 1989, from 94 cents to $1.10 per share.

"I am pleased to announce another excellent earnings performance by NCNB in 1989," said Hugh McColl, chairman. "NCNB vaulted into the top ranks of U.S. banking companies not only on the basis of assets, which now total $66.2 billion, but by the more important measures of sheer earnings power and profitability.

"This strong earnings performance was only one of NCNB's many tremendous accomplishments in 1989," continued McColl. "We completed the acquisition of NCNB Texas four years ahead of schedule. The profitability and successful integration of NCNB Texas exceeded our most ambitious expectations. At the same time, our southeastern bank turned in another record year. Loan quality at NCNB improved in 1989, even in the face of a slowing economy. We greatly expanded our capital base, raising $1.7 billion of new capital in 1989, including nearly $700 million of common equity. And we further strengthened our liquidity position through strong core deposit growth. NCNB enters the 1990s with dynamic earnings momentum and proven financial strength."

In the fourth quarter of 1989 NCNB earned $136.2 million, a 112-percent increase from $64.3 million in the same period of 1988. Earnings per share rose 88 percent to $1.30.

Improved credit quality was a factor in NCNB's strong performance in 1989. Net charge-offs declined to $147.1 million, or .45 percent of average loans and leases in 1989, compared to net charge-offs of $147.5 million, or .83 percent of average loans, in 1988. This decline was achieved despite an increase in loans of $15.5 billion in 1989 to $34.4 billion at year end.

Nonperforming assets declined to $446.1 million at the end of 1989, down from $461.3 million at the end of the third quarter. Nonperforming assets also decreased as a percent of net loans and leases to 1.30 percent at the end of the year, a decline from 1.39 percent at the end of the third quarter.

NCNB increased its allowance for loan and lease losses to $465.5 million, or 1.35 percent of net loans and leases at the end of 1989, up from 1.22 percent one year earlier. The allowance provided 118-percent coverage of nonperforming loans and leases at the end of 1989.

NCNB Corp. is a Charlotte-based bank holding company with $66.2 billion in assets. NCNB has more than 850 banking offices in seven southern states.

NEW YORK (JAN. 23) PR NEWSWIRE - NYNEX today announced the creation of "Office Futures," a new business unit designed to offer a complete range of office furniture systems and associated business furniture products. The new unit will also offer a full range of furniture- related consulting and support services.

Office Futures(sm) will sell, distribute and service these products through a network of sales offices located in Boston, Hartford, Conn., and New York City. Additional satellite offices are expected to be opened throughout 1990 and beyond.

Headquartered in Manhattan, Office Futures is a new division reporting to NYNEX Enterprises, a subsidiary of NYNEX Corporation (NYSE: NYN).

Industry veteran R. Peter Van Gytenbeek has been named vice president and general manager-Office Futures. "This new business unit is a particularly interesting venture for NYNEX Enterprises," Van Gytenbeek noted.

"NYNEX Enterprises has made substantial furniture sales within the NYNEX family of companies over the last few years, and I see the creation of Office Futures and the move into external markets as a natural outgrowth of that activity," he added.

As part of the unit's launch, Van Gytenbeek announced that Office Futures has signed a three-year Letter of Intent authorizing Office Futures as a dealer of Haworth business furniture products in the Northeast.

Terms of the agreement were not disclosed.

Haworth, Inc., is headquartered in Holland, Mich., and is one of the top three manufacturers of office furniture in the country.

Haworth is a full-line manufacturer of office furniture. Products include UniGroup(R) and Places(R) open plan systems, free-standing and panel-hung electronic office furniture, wood and metal desks and credenzas modular furniture, files and chairs. Haworth also owns Comforto, a European-based seating manufacturer known for its world- class products.

NYNEX Corporation, a U.S.-based provider of information and telecommunications products and services, has revenues of more than $12 billion and assets of over $25 billion.

#90023p0107 01/23/1990 ~PR Newswire

ST. LOUIS (JAN. 23) PR NEWSWIRE - Southwestern Bell Corporation (NYSE: SBC) today reported net income of $1,092.8 million for 1989, compared with $1,060.1 million in 1988. Revenues for the year increased 3.3 percent to $8.7 billion, compared with $8.5 billion in 1988.

Earnings per share were $3.64, up from $3.53. Return on shareowners' equity for the year was 12.90 percent, up from 12.69 percent in 1988.

"Last year was one of excellent growth for our business. Our Mobile Systems subsidiary set a record for addition of new customers and our telephone company added 78 percent more telephone access lines in 1989 than in the previous year," said Edward E. Whitacre, Jr., chairman and chief executive officer.

Net income growth was partially offset by various year-end adjustments which reduced earnings by approximately 8 to 9 cents per share. In addition, net income comparisons to 1988 were negatively affected by the Missouri rate settlement and a franchise tax refund Southwestern Bell Telephone received in 1988.

For the fourth quarter ended December 31, earnings per share were $.99. The corporation earned $297.2 million on revenues of $2.3 billion, compared with $305.2 million and $2.2 billion in the same period a year ago. Return on equity for the quarter was 14.19 percent, down from 14.41 percent.

Southwestern Bell Mobile Systems set its third record for quarterly

customer growth in the fourth quarter and experienced an annual customer growth rate of 57 percent in 1989. Mobile Systems added more than 49,000 customers during the fourth quarter and for the year showed a growth of nearly 138,000 new customers, bringing its total customer base to 382,000.

Southwestern Bell Telephone Company experienced its best growth year since 1978 with a gain of nearly 419,000 telephone access lines compared with 235,000 lines in 1988. During the fourth quarter, the telephone company added more than 110,000 lines. About one-third of the 1989 gain was the result of the telephone company's aggressive efforts to market second lines to residential customers.

Southwestern Bell Publications advertising sales were up as a result of enhanced marketing efforts and improvements in the economy. There were also positive net income effects associated with the 1988 shutdown of Silver Pages and Yellow Pages directories in New York and Chicago, and an improvement in uncollectibles in 1989.

Southwestern Bell Corporation, based in St. Louis, is an international communications corporation with 1.1 million shareowners.

NEW YORK (JAN. 23) PR NEWSWIRE - R. Peter Van Gytenbeek is vice president and General Manager of the NYNEX Office Futures (SM) Division. He was named to the position in October 1989.

Van Gytenbeek brings more than 15 years of experience in the office products and business systems furniture field to NYNEX. He also has extensive experience in creating, building and expanding office product dealerships, as well as launching other start-up business ventures and managing corporate acquisitions.

Van Gytenbeek, a Princeton University graduate, previously served as president of Yukon, a major Washington-based office products company serving the northwest U.S. He has also served as vice president of Marketing for Seal Furniture and Systems of Denver, and as vice president of sales and marketing for James Hill and Company of San Francisco, a west coast contract furniture dealer.

The newly created Office Futures business unit is designed to offer a complete range of office furniture systems and associated business furniture products, as well as a full range of furniture-related consulting and support services. Office Futures reports to NYNEX Enterprises, a subsidiary of NYNEX Corporation (NYSE: NYN), and is

headquartered in Manhattan at 441 Ninth Ave.

According to Van Gytenbeek, "This new business unit is a particularly exciting venture for NYNEX because even though Enterprises has been gaining momentum in the area of office furniture sales during the last few years, until 1989 Enterprises had to limit its sales to within the NYNEX family of companies. Office Futures will go beyond the NYNEX family, so it opens up new possibilities for us."

NYNEX Corporation, a U.S.-based provider of information and telecommunications products and services, has revenues of more than $12 billion and assets of over $25 billion.

COLORADO SPRINGS, COL (JAN. 23) PR NEWSWIRE - Analytical Surveys, Inc. (NASDAQ: ANLT), announced today sales for the first quarter ended Dec. 31, 1989, of $1,786,900 compared with sales of $1,749,332 for the same quarter last year.

Earnings for the quarter showed a $49,035 loss, or $.02 loss per common share, compared with net income last year of $101,690, or $.04 per share for the same period last year.

The company said that performance of its core business continues to be on target with projections. It attributed the decline in the first quarter to lack of sales in the Southeast division.

John Thorpe, Analytical Surveys president, commented, "During first quarter of fiscal 1990, we cut our losses in half compared with the fourth quarter of fiscal 1989, in spite of lower sales."

"The problems we had in the fourth quarter relating to lack of revenue in the Southeast division continued into the first quarter. By securing the Cobb Electric Membership Corporation contract for $1.2 million in December 1989, we have now put the Southeast division in a position to be profitable in the second quarter," continued Thorpe.

"As a result of this and other continued progress, we expect the second quarter results to be much improved," concluded Thorpe.

Analytical Surveys, Inc., is a professional services company providing digital mapping and geographic information systems (GIS) database services. The company is an industry leader in innovative technological advances and productivity. Its clients include cities, counties, utility

companies and others making use of the emerging technologies related to digital mapping.

The company's common stock is traded nationally over-the-counter under the NASDAQ symbol ANLT.

#90023p0116 01/23/1990 ~PR Newswire

READING, PA (JAN. 23) PR NEWSWIRE - Meridian Bancorp Inc. (NASDAQ: MRDN) today announced a corporate reorganization which includes the creation of a two-major-business-unit structure and a streamlined holding company support staff, according to Samuel A. McCullough, Meridian's chairman and chief executive officer.

Shifting positions in the reorganization will be Meridian Vice Chairman and Chief Financial Officer, Terry L. Troupe, who will relinquish his present role as chief financial officer to serve as vice chairman and head of the new, non-bank Financial Services Group. The group will include Meridian Asset Management Inc., Delaware Trust Capital Management Inc., American Title Insurance Co., Meridian Mortgage Corp., Meridian Securities Inc and Meridian Automation and Technology Corp.

Ezekiel S. Ketchum, president and chief operating officer, will direct the newly structured banking group. The group will include Meridian's three banking subsidiaries, Meridian Bank, Delaware Trust Co. and First National Bank of Pike County, and all related functions including loan administration, operations, consumer lending, consumer and corporate market management, Meridian Equipment Leasing and Meridian Capital Corp., SBIC.

Joining Meridian as its new vice chairman and chief financial officer will be David E. Sparks, 45, formerly executive vice president of Midlantic Corp., parent company of Midlantic Banks Inc. and Continental Bancorp Inc. of Edison, N.J.

Sparks has been with Midlantic since 1984. Prior to joining Midlantic, Sparks was treasurer of PNC Financial Corp., Pittsburgh, and executive vice president and chief financial officer of Provident National Corp. He also has worked with the Vanguard Financial Group as its chief financial officer.

Sparks was graduated from Furman University in Greenville, S.C., with a bachelor of arts degree in 1966. He also attended Harvard University's Advanced Management Program in 1980.

McCullough said that these changes will position Meridian to compete more effectively in the financial services environment of the 1990's, citing the new structure as one which is parallel to other major financial service holding companies across the country.

"The banking and non-banking subsidiary support functions will tie more directly to the customer contact areas which they serve," said McCullough. "More importantly," he continued, "the structural changes will give the control of these support expenses directly to the line managers responsible for the bottom-line results of the business units."

Sparks, in commenting on his decision to join Meridian, said, "Meridian is a fast moving and forward thinking organization which is extremely well positioned for the future. I've known and respected their senior management for quite a few years and look forward to working with them."

Sparks will be in charge of Meridian's Financial, Corporate Development, Investor Relations and Funds Management Departments. McCullough said, "Sparks is well respected on Wall Street for his experience in managing mergers and acquisitions, and for his extreme efficiency in managing the cost of delivering products and services."

Meridian Bancorp Inc., based in Reading, is a multibank holding company with nearly $12 billion in assets. The company operates its three banking subsidiaries in 19 counties in Pennsylvania and the state of Delaware, and 13 non-bank subsidiaries throughout the United States.

#90023p0117 01/23/1990 ~PR Newswire

DALLAS (JAN. 23) PR NEWSWIRE - Chili's Inc. (NYSE: EAT), reported record revenues and net income for its second fiscal quarter ended Dec. 31, 1989. Revenues were $82.5 million, an increase of 23 percent over the $67.3 million reported for the same quarter of fiscal 1989. Net income rose 48 percent, to $4.0 million in the second fiscal quarter of 1990 from $2.7 million during the second fiscal quarter of 1989. Primary earnings per share increased 37 percent to $.37 per share from the $.27 reported for the second quarter of fiscal 1989.

For the six months period ended Dec. 31, 1989 revenues rose 21 percent to $165.9 million over the $137.6 million reported for the same period last year. Net income increased 44 percent to $8.8 million from $6.1 million between the two six-month periods, while primary earnings per share increased 35 percent from $.60 to $.81.

Revenues for restaurants open for all of both second quarter periods (comparable store sales) rose 3.6 percent. Fiscal 1990 to date comparable store sales have increased 3.5 percent over the same period of fiscal 1989. Severe weather during December impacted sales for the second fiscal quarter slightly, but revenues have recovered nicely since the very cold weather period.

Chili's opened seven company-operated restaurants and an additional three joint venture and franchised units began operation during the quarter, bringing the total number of company-operated Chili's restaurants to 148, and the total number of restaurants in the Chili's system to 192 operating in 31 states.

Grady's, Inc., a subsidiary of Chili's, Inc., operates seven restaurants in Tennessee, Alabama, Georgia and North Carolina. One of these restaurants was opened in the second fiscal quarter of 1990, and Grady's plans to open three additional restaurants in fiscal 1990 in Little Rock, Dallas and Southern Florida under its new operating name of Regas Grill.

On Nov. 22, 1989, Chili's issued 152,000 shares of its common stock to acquire Romano's Macaroni Grill, an upscale casual Italian theme restaurant in the San Antonio, Texas area.

Chili's operates full service restaurants featuring a casual atmosphere and a limited menu of freshly prepared chicken, beef and seafood entrees, hamburgers, fajitas, sandwiches, appetizers, desserts and a full-service bar. Grady's/Regas Grill operates full service upscale dinner house restaurants serving fresh seafood, prime rib, steak, chicken and pasta entrees, appetizers, salads, desserts and a full-service bar.

#90023p0118 01/23/1990 ~PR Newswire

WASHINGTON (JAN. 23) PR NEWSWIRE - Trading in the shares of CenTrust Savings Bank (AMEX: DLP), a state savings bank, Miami, was ordered suspended today for five trading days by the Office of Thrift Supervision (OTS).

The suspension became effective for five trading days beginning at 9 a.m. (EST) today and ends at midnight (EST) Monday, Jan. 29, 1990. OTS took action under the Securities Exchange Act of 1934. Depositors are not affected by this action.

The suspension was ordered because of OTS concerns about CenTrust's failure to provide full, fair and accurate disclosure in its securities

filings. If properly reported, OTS said, CenTrust would be insolvent. CenTrust is traded on the American Stock Exchange in New York and the Midwest Stock Exchange in Chicago.

CenTrust's annual report on form 10-K for the fiscal year ended Sept. 30, 1989, filed Jan. 16, 1990, does not contain the required three full years of audited financial statements. Despite repeated directives, the thrift continues to present its financial statements in a manner inconsistent with generally accepted accounting principles (GAAP), OTS said. For example, the regulator pointed out, CenTrust characterizes the bulk of its portfolio of below investment grade corporate debt securities as "commercial loans," rather than as securities.

OTS also contended the thrift improperly characterizes certain securities that are actively traded as securities held for investment. It carries both types of securities on its books at cost, OTS said.

According to OTS, the thrift fails to recognize losses that cumulatively would eliminate its reported shareholder's equity. CenTrust also continues to "publicly obfuscate its true financial condition, failing to apprise its shareholders of the impact of these issues and their impact on shareholders and the association," and to disclose the magnitude of the dispute between OTS and CenTrust.

The charges contained in the suspension order are identical with those violations of the Securities Exchange Act of 1934 contained in a notice of charges filed on Dec. 8, 1989. A hearing regarding the notice is currently set for March.

OTS cautions broker-dealers, shareholders and prospective purchasers that they should carefully consider the foregoing information along with all other currently available information and any information subsequently issued by CenTrust. Furthermore, brokers and dealers should be alert to the fact that, pursuant to Rule 15c2-11 under the Securities Exchange Act of 1934, at the termination of the trading suspension, no quotation may be entered unless and until they have strictly complied with all of the provisions of such rule. Any broker or dealer uncertain as to what is required by Rule 15c2-11 should refrain from entering quotations relating to the securities in question until such time as he/she becomes familiar with such rule and is certain that all of its provisions have been met. If any broker or dealer enters any quotation which is in violation of such rule, OTS will consider the need for prompt enforcement action.

#90023p0119 01/23/1990 ~PR Newswire

SAN DIEGO (JAN. 23) PR NEWSWIRE - Robert F. Adelizzi has been named chief executive officer of HomeFed Corp. (NYSE: HFD) and its principal subsidiary, HomeFed Bank, the nation's seventh largest savings institution. He succeeds Charles K. (Kim) Fletcher Jr., who will remain as chairman of the boards of both the holding company and the bank.

Fletcher, 62, HomeFed Bank president from 1964 to 1981 and CEO since 1979, will also remain chairman of the executive committees of the boards of directors of both companies. Adelizzi, 54, will retain his position as president, a post he has held since 1981.

Since becoming a public company in 1983, HomeFed has recorded steady earnings growth and expanded its retail banking network exclusively within California. Among the nation's most highly capitalized institutions, HomeFed meets all the stringent capital requirements.

Further, Fletcher noted, the company expects to report strong performance in 1989. HomeFed's 1989 earnings are set for release in early February.

Fletcher, who celebrates his 40th anniversary with HomeFed this year, joined the company in 1950 upon graduation from Stanford University. He served in a variety of positions before becoming president in 1964.

At that time, HomeFed had assets of approximately $350 million and a branch network of six offices in San Diego County. Fletcher steered the company through a series of acquisitions and expansion in to new businesses, including an insurance agency, a trust company and a real estate development company.

Adelizzi, a graduate of both Dartmouth College and the University of San Diego School of Law, joined HomeFed in 1962. He served as the company's general counsel before becoming president in 1981. In 1983, he and Fletcher led conversion of HomeFed from a mutual to a stock charter.

Today, with assets of $18 billion, the company operates more than 200 branch offices throughout California.

SAN RAFAEL, CA (JAN. 23) PR NEWSWIRE - Supercuts, Inc., the nation's leading franchiser of no-frills hair cutting salons, has acquired Atlanta, Ga.-based The Prime Cut - a 17-unit, full-service chain - for an undisclosed amount from Belue Corp.

With seven Supercuts salons already operating in Atlanta, this acquisition

gives the company the lion's share of the market.

Executives of Supercuts, Inc., headquartered in San Rafael, Calif., and The Prime Cut of Atlanta closed the deal in Atlanta.

According to Betsy Burton, president and CEO of the 577-unit chain, "Fourteen of the 17 newly acquired salons will be converted into Supercuts shops, no longer offering chemical services such as perms and coloring. All Prime Cut employees will be trained in our precision cutting and unique styling methods. The three remaining salons, all located in shopping malls, will continue to operate as The Prime Cut, offering a complete line of haircare services."

Allen Smith, Supercuts vice president of corporate shops, points out that "moving from 7 to 21 shops allows us to be the significant competitor and the dominant supplier of convenience hair styling in the Atlanta market. Our projections calling for 30 Supercuts salons in Atlanta by 1992 have been appreciably accelerated."

Burton, who plans to expand the nationwide chain to 1,000 units by 1995, says, "We're assuming a more aggressive growth posture as we enter the nineties. This transaction marks the first in a series of acquisitions in our efforts to grow the Supercuts system." She predicts that the company's "increased emphasis on franchise sales and exploration of similar acquisitions of regional chains in other markets will enable us to reach our goal well ahead of schedule."

Supercuts, which popularized the precision-cut concept 15 years ago, reported systemwide volume of $140 million in 1988, with a 1989 predicted year-end of $150 million. Per-shop volume of Supercuts salons far surpasses that of any chain in the $30-billion haircare industry.

NEW YORK (JAN. 23) PR NEWSWIRE - BFS Bankorp, Inc. (NASDAQ-NMS: BFSI), announced today that its board of directors has unanimously voted to reject an unsolicited, conditional acquisition proposal by First Capital Group Inc. of Redondo Beach, Calif., to acquire BFS Bankorp at a price of $16 per share. In reaching its conclusion BFS Bankorp's board considered a variety of financial and regulatory factors, including the terms of First Capital Group's proposal, BFS Bankorp's overall financial strength and future prospects, the value of BFS Bankorp's New York franchise, and the opinion of its financial advisor Merrill Lynch Capital Markets that the proposal was clearly inadequate from a financial point of view.

BFS Bankorp, Inc., is the holding company for Bankers Federal Savings, FSB a community oriented financial institution with five retail banking offices located in the New York City boroughs of Manhattan, Brooklyn and Queens. As of Sept. 30, 1989, BFS Bankorp, Inc., had assets of $434 million, deposits of $323 million, and stockholders' equity of $23 million. For the year ended Sept. 30, 1989, BFS Bankorp earned $3.96 million or $2.76 per share.

SAN FRANCISCO (JAN. 23) PR NEWSWIRE - BEI Electronics Inc. (NASDAQ: BEII) a San Francisco based technology company, achieved record sales and earnings for the first quarter of fiscal year 1990 ended Dec. 31, 1989, George S. Brown, president and chief executive officer, announced today.

Sales were $19,172,000, up 29.8 percent from the $14,769,000 reported for the first quarter of fiscal 1989. Net income was $1,861,000, a 25.6 percent increase from the $1,482,000 posted in the prior year. "Earnings per share with approximately 2 million additional shares outstanding were 27 cents in the first quarter of 1990 as compared with 30 cents recorded in the 1989 first quarter,"

"The results for the first quarter of fiscal 1990 were primarily generated by increased sales of Defense Systems products and Motion Systems industrial optical encoders," Brown stated.

BEI designs, manufactures and markets electronics, ordnance and motion control systems and components used in military, commercial, industrial and aerospace applications. The company has major operations in California, Texas and Arkansas.

MADRID, SPAIN (JAN. 23) PR NEWSWIRE - Endesa (NYSE: ELE), the major electric utility in Spain, announced today that the Spanish government has approved a rate increase for the electric utility industry of 5.5 percent on average, effective Jan. 21, 1990.

The increase is made up of a 1.85 percent increase to correct for deviations from assumptions made in 1989 estimates, and a 3.65 percent increase to cover estimated cost increases.

Return on investment for 1990 has been established at 9.72 percent, while the revised rate of return for 1989 has been 11.18 percent. The official assumption of inflation and demand growth during 1990 for the calculation of the new rate have been 5.5 percent and 4 percent respectively.

PHILADELPHIA (JAN. 23) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) said today it purchased $96 million in goods and services from 329 minority and women-owned businesses in 1989, representing nearly 13 percent of Conrail's total purchases for the year.

Conrail also had deposits and other transactions valued at more than $113 million with minority banks at the close of 1989.

The purchases from minority and women-owned businesses surpassed Conrail's 1989 goal of $86.9 million and its 1988 level of $86 million. Conrail also expanded the number of minority-owned businesses from which it made purchases last year, adding 28 new companies to its minority vendor program.

Conrail provides high-quality freight transportation service over its 13,100 route-mile rail system in the Northeast and Midwest, and connecting service nationally and internationally in cooperation with other carriers.

"We actively support minority business development because the increased competition among suppliers benefits Conrail with higher quality products and better service at lower cost," said James A. Hagen, Conrail's chairman president and chief executive officer.

Conrail has saved nearly $15 million on materials, fuels and services purchased through the program since 1981.

Products and services Conrail purchased from minority and women- owned

business enterprises last year included: fuels and lubricants, railroad ties and other track materials, locomotive parts, chemicals and industrial products, communications and signals products, auto repairs, heavy equipment seasonal rentals, office supplies, printing, insurance, legal services, and numerous other items.

As part of its program, Conrail held its Minority Vendor Program Trade Fair in early 1989, providing an opportunity for representatives from 200 minority and women-owned businesses to meet with Conrail purchasing officials. Conrail also publishes a quarterly newsletter sent to minority businesses.

Conrail encourages minority business development both through its own program and through its support of the New-Penn-Del Minority Supplier Development Council, a Philadelphia-area non-profit organization of about 150 locally based corporations and 500 minority business enterprises working together to increase the amount and variety of goods and services purchased from minority businesses. The council honored Conrail in 1988 as its "Corporation of the Year."

Since 1981, Conrail's program also has been recognized by the New York/New Jersey Regional Minority Purchasing Council, the National Bar Association, the Greater Philadelphia Chamber of Commerce, the U.S. Small Business Administration and the U.S. Department of Commerce.

HOUSTON (JAN. 23) PR NEWSWIRE - CRSS Inc. (NYSE: CRX), today announced earnings for the second quarter and first six months of fiscal 1990. The company reported a 77 percent increase in second quarter earnings from the year earlier amount.

Net earnings for the second quarter ended Dec. 31, 1989, were $4.6 million or $0.35 per share (fully diluted) on gross revenues of $125.4 million, and operating revenues of $72.1 million. Comparable amounts for the same period of the previous year were net earnings of $2.6 million or $0.21 per share on gross revenues of $155.8 million, and operating revenues of $68.4 million.

For the six months ended Dec. 31, 1989, net earnings were $8.7 million or $0.68 per share on gross revenues of $265.9 million and operating revenues of $142.7 million. For the first half of the prior fiscal year, net earnings were $4.7 million or $0.38 per share on gross revenues of $312.6 million, and operating revenues of $132.4 million.

Operating revenue backlog at Dec. 31, 1989, was $227.7 million, compared to the record level of $255.8 million at the end of the second quarter of the prior fiscal year, and $243.4 million at Sept. 30, 1989.

Bruce Wilkinson, chairman, president and CEO of CRSS, noted that several important events occurred during the second quarter of the current year including the successful completion of a public offering of 2,295,633 additional shares yielding the company about $36.7 million.

In October, CRSS Capital, Inc., the company's independent power subsidiary purchased the remaining 51 percent interest in three independent power projects increasing its ownership position to 100 percent of each of the projects. All three projects are 16-MW wood- fired facilities currently operational or in start-up and testing.

Also in October, the company exchanged its 50 percent interest in NaTec, Ltd. plus cash of approximately $6.1 million for 44.8 percent of the common stock of NaTec Resources, Inc. (formerly Industrial Resources, Inc.). NaTec stock is offered on the over-the-counter market under the NASDAQ symbol NATC.

CRSS is a diversified design and construction services company and is involved in the independent power/cogeneration industry. CRSS has also expanded through its interest in NaTec Resources, Inc., into the acid rain pollution control market.

#90023p0135 01/23/1990 ~PR Newswire

PHILADELPHIA (JAN. 23) PR NEWSWIRE - Bell Atlantic Corp. (NYSE: BEL) today reported 1989 earnings of $5.43 per share, compared with $6.65 per share for 1988, a decrease of 18 percent. The 1989 earnings include charges consistent with management's previously announced (on Sept. 14, 1989) initiatives to streamline the corporation's organization, control costs, and achieve greater efficiencies.

Operating revenues were strong: $11.45 billion for 1989, compared with $10.88 billion for 1988, an increase of 5.2 percent.

The fourth-quarter charges -- which were of a one-time nature --were associated with the revaluation of assets at some of the company's unregulated subsidiaries, the cost of an organizational realignment that included incentives for managers to retire early or voluntarily leave the business, and debt refinancings at several of the company's telephone subsidiaries. In addition, the company began to accrue for and fund a

trust to help cover the future costs of medical and dental benefits for non-management retirees.

Net income of $1,074.5 million for the year compares to $1,072.8 million previously reported for the nine months ended Sept. 30, 1989. Since the fourth-quarter change in accounting associated with the establishment of the benefit trust required a restatement of the previously reported first three quarters of 1989, reported net income for the fourth quarter was $57.9 million (or $.29 per share). Operating revenue for the quarter was $2.89 billion versus $2.77 billion for the corresponding quarter of 1988, up 4.2 percent.

Philadelphia-based Bell Atlantic is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone (Delaware), and the Chesapeake and Potomac Telephone Companies serving Maryland, Virginia, West Virginia, and Washington, D.C.

The corporation also is the parent company of businesses that provide mobile communications in the mid-Atlantic region as well as computer maintenance and financial services in national and international markets.

WINDER, GA (JAN. 23) PR NEWSWIRE - First Federal Savings Bank of Georgia (NASDAQ: FSBG) has announced net earnings of $4,350 on gross revenues of $13.30 million for the first nine months ended Dec. 31, 1989.

This compares to net earnings of $1,033,401 or $1.05 per share on gross revenues of $13.94 million during the year-earlier period.

Adjusted for a recently announced $300,000 reserve for general potential losses on loans and real estate, the bank reported a net loss of $233,574 or 24 cents per share on gross revenues of $4,085,575 during the three months ended Dec. 31, 1989.

"This performance is consistent with our announcement of Jan. 16, and reflects near double-digit mortgage rates and rising housing inventories, which have precipitated several small business failures in our market, and contributed to a high general bankruptcy rate," explained Jerry H. Lassiter, chairman and chief executive officer. "These conditions obliged us to create the general reserve.

"To offset a previously announced $300,000 fourth-quarter charge required to complete this reserve, we plan to sell a portion of our $167 million third-party mortgage origination portfolio. When announced, this

off-balance sheet-sale will provide immediate revenues, increasing our net worth, and helping us meet our long-term capital requirement."

Lassiter added that First Federal Savings Bank of Georgia is among a viable group of thrift institutions which has been profitable since 1983 and which meet federal capital requirements through 1992. He noted tha bank has nearly doubled its net worth from $5.9 million in 1986 to $9.9 million entirely from prior earnings.

First Federal Savings Bank of Georgia is a major provider of commercial and residential real estate loans in the 15 counties located between Atlanta, Gainesville, Ga., and Athens, Ga.

WEST CHESTER, PA (JAN. 23) PR NEWSWIRE - Weston Services Inc., (WSI), a wholly owned subsidiary of Roy F. Weston Inc. (NASDAQ: WSTNA), will receive an Achievement Award recognizing its engineering excellence from the Consulting Engineers Council of Illinois during the annual competition awards luncheon on Jan. 26 at the Ramada Renaissance Hotel in Springfield.

WSI will be recognized for its entry, "Mobile Incineration of PCB-Contaminated Soils." This project involved the use of WSI's Transportable Incineration System (TIS), a rotary kiln system with an afterburner, to treat more than 8,500 tons of PCB-contaminated soil at the Lauder Salvage Yard near Beardstown, Ill. The project client was the Illinois EPA.

The TIS successfully processed contaminated soil, which was backfilled on the site, restoring it to a useful condition. By destroying the PCBs on-site, and avoiding off-site transportation, the possibility of future PCB contamination of groundwater and life sources was eliminated.

The TIS is one of three thermal treatment technologies available from WSI. Its Low Temperature Thermal Treatment (LT3)(SM) is a patented process (U.S. Patent No. 4,738,206) which removes volatile organic compounds from soil. WSI also has exclusive license to a new patented process called In situ Radio-Frequency (IRF) decontamination, a technology that treats the soil in place, without excavation.

Headquartered in West Chester, WSI provides comprehensive remediation and environmental construction services through offices across the country. Services provided include hazardous waste site remediation, facility decontamination and demolition, transportable thermal treatment, landfill

and TSD facility construction, storage tank management and renovation programs, municipal and industrial water/wastewater treatment facility construction, and facility contract operations.

Weston, WSI's parent company, is a recognized leader in the environmental engineering, design and consulting industry. Weston provides nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management and major program management services. Its clients include many Fortune 500 companies and all levels of government from the municipal to federal level.

Weston is headquartered in West Chester and operates a network of four analytical laboratories and 42 offices, including Los Angeles, Houston, Chicago, Atlanta, Boston, New York and Washington, D.C.

#90023p0141 01/23/1990 ~PR Newswire

POUGHKEEPSIE, NY (JAN. 23) PR NEWSWIRE - Sono-Tek Corporation (NASDAQ: SOTK) announced today that for the nine months ended Nov. 30, 1989, revenues increased by $468,135 or 28 percent to $2,127,742 from $1,659,607 for the nine months ended Nov. 30, 1988. For the three months ended Nov. 30, 1989, revenues increased $107,366 or 18 percent to $712,734 compared to $605,368 for the three months ended Nov. 30, 1988.

For the nine months ended Nov. 30, 1989, the company earned $390,065 or 10 cents per share as compared to earnings of $376,317 or 10 cents per share for the nine months ended Nov. 30, 1988. For the three months ended Nov. 30, 1989, the company earned $119,681 or 3 cents per share as compared with earnings of $133,540 or 4 cents per share for the three months ended Nov. 30, 1988.

The earnings for the quarter and for the year to date have been affected by increased legal fees incurred primarily as a result of litigations, and in particular a litigation involving a breach of contract claim in which the company is the plaintiff. Such fees to date have aggregated $80,000 or 2 cents per share.

COATESVILLE, PA (JAN. 23) PR NEWSWIRE - Lukens Inc. (NYSE: LUC) today reported its third consecutive year of record sales and earnings.

Lukens, which is a steel-based diversified company with subsidiaries in corrosion protection, safety products and materials handling equipment businesses, announced 1989 sales of $644,964,000 and earnings of $41,494,000. By comparison, 1988 sales were $605,294,000 and earnings were $33,388,000. Primary earnings per share for 1989 were $4.73. By comparison earnings for 1988 were $3.91 a share.

Fourth quarter sales were $155,901,000 -- slightly ahead of the $155,591,000 in the fourth quarter of 1988. Earnings were $13,794,000 compared to $9,603,000 in the same quarter a year ago. Primary earnings per share were $1.57 compared to earnings per share of $1.12 in the fourth quarter of 1988.

Earnings for the year and fourth quarter benefited from a $5.9 million gain from the sale of assets. The gain added $3.6 million to net earnings, or $.43 a share for the quarter and $.42 for the year. In addition, lower interest expense for the year benefited earnings.

Lukens Inc. is a diversified company with subsidiaries providing plate steels, pipe coating services, cathodic corrosion protection services, heavy materials handling equipment, industrial screening products and highway construction-zone safety products.

NEW YORK (JAN. 23) PR NEWSWIRE - Fiat Group (NYSE: FIA), Italy's largest private sector automotive and industrial concern, today reported preliminary results for 1989.

Net sales exceeded the $41 billion (Lire 52,000 billion) mark, an increase of approximately 18 percent over 1988. Also improved was the profitability of Fiat's operations with operating income matching $3.9 billion, or 29.4 percent more than the previous year. Operating income amounted to 9.5 percent of sales, as compared with 8.6 percent in 1988. Cashflow was $4.8 billion in 1989, a 9.7 percent increase over the previous year. Capital expenditures and research and development totaled $4.2 billion, an 8.3 percent gain over 1988.

In 1989, Fiat Auto, the group's automobile sector, (which comprises the five nameplates Alfa Romeo, Ferrari, Fiat and Lancia/Autobianchi), recorded total sales of 2,008,000 units (plus 4.2 percent) in Europe. This represents a market share of 15 percent, reconfirming Fiat Auto's position among the leaders in Europe.

All of the Fiat operating sectors contributed to a further significant increase of the group's revenues. Especially worth noting were the gains registered by the automobile sector (plus 10.9 percent), industrial vehicles (plus 8.8 percent), industrial components (plus 21.3 percent), vehicle components (plus 10.8 percent), telecommunications (plus 46.5 percent), and civil engineering (plus 87 percent), as well as the consolidation of the financial and real estate services sector ($1.49 billion).

Fiat's own shares were repurchased as resolved at the ordinary annual stockholders meeting held on June 30, 1989. The shares held at year-end 1989, with the average cost per share, are as follows: 22,280,000 common shares, purchased at Lire 10,912.50 ($8.59) each; 5,882,000 preferred shares, purchased at Lire 6,719.92 ($5.28) each; 5,552,000 savings (non-voting) shares, purchased at Lire 6,870.72 ($5.40) each; for a total amount of Lire 320 billion ($251 million).

PEAPACK, N.J. (JAN. 23) PR NEWSWIRE - The board of directors of Fedders Corporation (NYSE: FJQ), the manufacturer of room air conditioners, today voted to increase its regular quarterly dividend by 20 percent to 12 cents per share of common stock and to 10.8 cents per share of Class B stock.

Today's dividend action raises the indicated annual dividend for the fifth consecutive year. The indicated rate of 48 cents per share of Fedders common in 1990 compares with dividends of 40 cents per share paid in 1989 and 30 cents paid in 1988.

Chairman of the Board Salvatore Giordano said the dividend increase reflects Fedders' "record results in 1989 and the company's expectations for 1990."

The increased dividend will be paid March 1 to stockholders of record as of Feb. 15, 1990. The previous quarterly dividend paid since March 1989 was 10 cents per common share and 9 cents per share of Class B stock.

WILMINGTON, DE (JAN. 23) PR NEWSWIRE - The Trustees of BRNF Liquidating Trust (BRNF) announced today that on Jan. 22, the U.S. Bankruptcy Court, Middle District of Florida, Orlando Division, ruled that Section 1110 of the Bankruptcy Code applies to the lease between BRNF and Braniff Inc.

The effect of the ruling is that the right of BRNF to take possession of the leased property in accordance with the terms of the lease is not affected by the automatic stay of the Bankruptcy Code.

Also, on Jan. 22, BRNF notified Braniff that the lease was terminated and that BRNF intends to take possession of the leased property as soon as possible.

Once it has taken possession, BRNF said it intends to proceed with an orderly sale of leased property.

That property includes 20 727-200 aircraft, 19 spare engines, and an inventory of rotable spare parts.

EAGLEVILLE, PA (JAN. 23) PR NEWSWIRE - On Friday, Jan. 26, at 2 p.m., in the Louchheim Building, Eagleville Hospital, a 159-bed inpatient drug and alcohol addictions treatment facility in Montgomery County, will cut the ribbon to open a newly refurbished and expanded Women's Unit to serve more public-sector funded women.

Notable guests include the following: U.S. Rep. R. Lawrence Coughlin of the 13th District, who is vice-chairman of the House Select Committee on Narcotics Abuse and Control; state Rep. Joseph A. Lashinger of the 150th District of Montgomery County and co-author of Pennsylvania's Drunk Driving Bill; state Rep. George E. Saurman of the 151st Disrict of Montgomery County; Michael J. Marino Jr., the district attorney of Montgomery County; Mary Ralston, Lower Providence Township supervisor; William McCauley III, Lower Providence Township manager; and Judith Rubin, co-chair, Delaware Valley Task Force on Women and Addiction.

Eagleville said it has responded to the need for increased service and treatment for Medicaid-funded women. By this expansion, the hospital now has 36 inpatient beds in its Women's Unit and 16 beds for women in the Program for Employed Persons (PEP), a separate treatment model for women who currently are or who have recently been employed. Eagleville said it has always been its mission to offer treatment for those who manifest the greatest need, and the hospital is well-known for its successful treatment of the most complex cases because it is a fully accredited hospital suitable for treating the many medical complications associated with addiction.

NEW YORK (JAN. 23) PR NEWSWIRE - Morgan Stanley Group Inc. (NYSE: MS) today announced net income of $443.0 million for the year ended Dec. 31, 1989, compared to $394.6 million in 1988. Net revenues (gross revenues less interest expense) for 1989 were $2,452.6 million vs. 1988 net revenues of $2,204.2 million. Revenues include pre-tax investment gains of $246.5 million in 1989 and $159.3 million in 1988. Earnings per common share, based on average shares and share equivalents outstanding during the period of 37,866,161, were $11.21 vs. $10.26 in 1988.

The company also announced the declaration by its board of directors of a quarterly dividend of 37-1/2 cents per share, a 36 percent increase from its previous dividend rate. The dividend is payable Feb. 23, 1990, to holders of record Feb. 2, 1990.

Net income for the fourth quarter of 1989 was $148.6 million compared to $108.3 million for the prior year. Net revenues for the last quarter of 1989 were $704.5 million vs. $594.9 million in the same period of 1988. Earnings per common share were $3.80 for the final quarter of 1989 and $2.84 for 1988. Fourth quarter 1989 revenues include pre-tax investment gains of $137.7 million resulting principally from the restructuring of the company's investment in Container Corporation of America.

Morgan Stanley Group Inc. is a major international securities firm with offices in New York, London, Tokyo and other major financial centers.

#90023p0163 01/23/1990 ~PR Newswire

SOUTHFIELD, MI (JAN. 23) PR NEWSWIRE - Franklin Savings Bank (NASDAQ: FSVB) reports net income of $230,917, or $0.24 per share for the three months ended Dec. 31, 1989. For the same quarter ended Dec. 31, 1988, Franklin reported net income of $1,304. Earnings for the six months ended Dec. 31, 1989, were $382,721, or $.40 per share compared to $142,551, or $.15 per share for the comparable six-month period in 1988.

Franklin's net income of $382,721 for the first six months of the current fiscal year exceeds net income of $303,266 for the entire fiscal year ended June 30, 1989, by 26 percent.

"We are extremely pleased with Franklin's remarkable earnings improvement " said President and CEO Read P. Dunn. "Franklin is benefiting from aggressive strategies relative to both cost containment and interest margin improvement initiated last year to improve our performance," he continued.

Net income for the quarter ended Dec. 31, 1989, was favorably affected by significant improvements in net interest income, personnel cost containment, and a non-interest income item.

Net interest income, a traditional benchmark of banking profitability, reached a record $1,972,961 for the quarter ended Dec. 31, 1989. This figure is up 21 percent from $1,636,146 during the comparable quarter in 1988.

"Improving Franklin's net interest margin has been a top priority," explained Dunn. "We've aggressively pursued both loan and deposit products that would contribute to higher margin improvements rather than passively wait for a general return to normalcy in interest rates. The result has been a steady, quarter-by-quarter correction of a problem that continues to negatively affect many of our peers."

Compensation and benefits were $724,562 for the quarter ended Dec. 31, 1989, an 11-percent reduction from $817,602 for the comparable quarter last year. This reduction is the continued result of cost- cutting efforts taken last year. Non-interest income increased during the quarter ended Dec. 31, 1989, due to the receipt of proceeds from a life insurance policy in the amount of $500,000.

Franklin's non-performing assets remained below 1 percent of total assets at Dec. 31, 1989. At Dec. 31, 1989, the bank had no commercial properties in foreclosure, and only one residential mortgage in foreclosure. Franklin's problem loans have been and continue to be well below industry average.

Despite Franklin's excellent asset quality, the bank increased its budgeted non-specific loan loss allowance during the quarter by approximately $370,000. "We are cognizant of general industry concerns regarding asset quality and regional real estate problems," explained Dunn. "We took this conservative step in anticipation of our conversion to a commercial bank charter," Dunn continued. Franklin is awaiting approval of its application submitted in September 1989 to convert to a commercial bank charter.

Franklin's assets grew to $421 million at Dec. 31, 1989, up $20 million from the fiscal year end total of $401 million at June 30, 1989. Deposits at Dec. 31, 1989, increased $25 million since fiscal year end, reaching $361 million.

Fiscal year to date, shareholders' equity increased 3.2 percent to reach $13.3 million at Dec. 31, 1989, from $12.9 million at June 30, 1989. Book value per share at Dec. 31, 1989, was $14.01.

Franklin Savings Bank, Michigan's 11th-largest savings institution, has

administrative offices and a regional branch office in Southfield, with additional regional offices in Grosse Pointe Woods and Birmingham.

MINNEAPOLIS (JAN. 23) PR NEWSWIRE - Piper Jaffray Incorporated (NASDAQ: PIPR), parent company of the Minneapolis-based investment firm of Piper, Jaffray & Hopwood Incorporated, today reported earnings for the first quarter ended Dec. 31, 1989, that were approximately double those of the same quarter last year.

Revenues of $48,804,000 increased 20.3 percent over revenues of $40,571,000 for the first quarter of last year. Net income of $3,183,000 or 79 cents a share represents a 97.2-percent increase over net income of $1,614,000 or 41 cents a share for the same quarter last year.

"Our revenue growth this quarter is principally due to an almost 50-percent increase in commission revenues," said Charles N. Hayssen, Piper Jaffray chief financial officer. "Mutual fund commissions were up more than 80 percent from last year's levels, an encouraging sign that signifies the continuing return of the individual investor to the stock market.

"Piper Jaffray's first quarter results also can be attributed in part to gains in institutional equity commissions," Hayssen continued. "Institutions are increasing their business with firms that offer value-added research, timely investment advice and strong trading capability. This has allowed top non-New York-based firms like Piper Jaffray to capture more market share."

Piper Jaffray's revenues from institutional equity sales during the first quarter of fiscal 1990 were more than twice those of the same quarter last year, Hayssen said.

"Although we are not insulated from many of the problems affecting national brokerage firms, we have a more modest and more disciplined cost structure which allows a larger portion of our revenue growth to be reflected in the bottom line," Hayssen said.

Piper, Jaffray & Hopwood Incorporated is a full service investment firm with 64 offices in 16 Midwest, Mountain and Pacific Northwest states, with institutional sales offices in Minneapolis, New York and London. Founded in 1895, the firm is a member of the New York Stock Exchange and other major stock, futures and options exchanges. Affiliates include Piper Capital Management Incorporated, an asset management company with more than $3 billion under management, and Piper Jaffray Trust Company.

NEW YORK (JAN. 23) PR NEWSWIRE - Bankers Trust New York Corporation (NYSE: BT) earned $101.2 million for the fourth quarter of 1989, a decrease of $84.3 million, or 45 percent, from the $185.5 million earned in last year's fourth quarter. On a per common share basis, earnings were $1.17, as compared with $2.29 a year ago.

For the year 1989, the corporation reported a net loss of $979.9 million, compared with record net income of $647.7 million a year earlier, reflecting $1.652 billion of provisions for refinancing country credit losses, which included the $1.600 billion special provision recorded in the third quarter of 1989. The loss per common share was $12.10, compared with earnings of $8.09 in 1988.

Excluding the $1.600 billion special provision for credit losses, net income for the year would have been $620.1 million, a decrease of $27.6 million, or 4 percent, from 1988. Net income per common share would have been $7.51, compared with $8.09 for 1988, or a decline of 7 percent.

#90023p0167 01/23/1990 ~PR Newswire

MINNEAPOLIS (JAN. 23) PR NEWSWIRE - On Monday, Jan. 22, 1990, the board of directors of Tennant (NASDAQ: TANT) authorized the immediate establishment of a leveraged Employee Stock Ownership Plan (ESOP) that will become a part of an existing tax-qualified employee benefit plan. The ESOP trustee will acquire $17.5 million of Tennant common stock for the ESOP. It is anticipated that the stock will be acquired primarily through open market purchase by the trustee occurring from time to time during the next 12 months with the remainder to be purchased from Tennant in January 1991.

The ESOP's $17.5 million stock acquisition program will be financed by a 20-year interest bearing loan from the company that will be drawn upon as the trustee purchases shares. The loan will be repaid from dividends on

the ESOP shares and Tennant's future contributions to the ESOP. It is anticipated that the company will obtain appropriate long-term financing resulting in a debt-to-capital ratio in the range of 20 to 30 percent.

Tennant CEO, Roger L. Hale, said, "Tennant has a long history of encouraging employee ownership. We believe employee shareholders have a strong commitment to the future success of the company and, as owners, they share in the value created by their efforts. The ESOP should provide a cost-effective method of acquiring company stock for employee ownership purposes."

Employees presently hold more than 3 percent of total shares outstanding in Tennant's existing tax-qualified benefit plan. Based on current market prices, the ESOP is expected to increase employee ownership under the plan to about 13 percent of shares outstanding when purchases are completed.

There are approximately 4.9 million shares of Tennant common stock currently outstanding. The board of directors has cancelled the company's open market repurchase program announced in July of 1989.

The company expects the ESOP to have a positive effect on cash flow and profitability over the long term. For the next several years, however, earnings per share will be lowered somewhat primarily due to the "shares allocated method" of accounting for ESOP expense which was recently pronounced by the Emerging Issues Task Force of the Financial Accounting Standards Board.

Tennant is the world's leading manufacturer of floor maintenance equipment.

#90023p0171 01/23/1990 ~PR Newswire

PHILADELPHIA (JAN. 23) PR NEWSWIRE - The Ben Franklin Technology Center yesterday elected new directors and officers at its annual meeting of the board of directors.

New directors of the board:
-- Edward G. Boehne, president, Federal Reserve Bank of Philadelphia
-- Patricia Garrison-Corbin, president, P.G. Corbin & Co. Inc.
-- Patrick Gillespie, business manager, Philadelphia, PA Building and Construction Trades Council
-- William J. Marrazzo, executive vice president, Roy F. Weston Inc.

Directors re-elected to the board:
-- Barbara Brownstein, provost, Temple University
-- Victor Coppola, partner, Coopers & Lybrand

-- Darragh Muldoon, president, Migrant Software
-- Niara Sudarkasa, president, Lincoln University Officers of the board:
-- Max H. Kraus, Electro-Nite Co., chairman of the board
-- Victor Coppola, partner, Coopers & Lybrand, vice chairman of the board
-- Richard D. DeCosmo, president, Delaware County Community College, vice chairman of the board
-- Albert Soffa, Kulicke & Soffa Industries Inc., honorary chairman of the board

The Ben Franklin Technology Center board manages the Commonwealth's nationally recognized Ben Franklin Partnership Challenge Program for Technological Innovation. The Challenge Program is the state's only program exclusively devoted to the support of economic development through high technology and is one of the few state development programs in which local boards have discretionary investment authority. In 1989-90 the Technology Center received more than $6 million from the state.

Max Kraus, newly elected chairman of the board, stated: "We are delighted by the expertise of the individuals who have agreed to serve on the Technology Center board of directors. The board fully represents the broad-based strength of the region's diverse technology sector. With Mr. Coppola, head of his firm's national group for emerging business, and Dr. DeCosmo, the president of a premier community college, I am confident that the center will have energetic and visionary board leadership."

The 25-member board of directors has a majority of members which represent the private sector. Other members of the board represent universities and colleges, economic development organizations and organized labor.

SIMI VALLEY, CA (JAN. 23) PR NEWSWIRE - Datron Systems Inc. (NASDAQ: DTSI) today reported that earnings per share rose 29 percent during the third quarter of fiscal 1990, ended Dec. 31, 1989.

For the three months, Datron generated record net income of $1,146,000 or 40 cents per share, on revenues of $11,664,000. During the like period one year ago, the company reported net income of $947,000, or 31 cents per share on revenues of $8,935,000. Backlog as of Dec. 31, 1989 was $33 million.

For the nine months ended Dec. 31, 1989, the company reported record net income and earnings per share of $3,035,000 and $1.03, respectively, on record revenues of $32,891,000. This compares to net income and earnings per share of $2,398,000 and 81 cents respectively, on revenues of $25,542,000 for the first nine months of fiscal 1989.

"The excellent third quarter results were expected," said David Derby, president and chief executive officer, "and we remain highly confident that results for fiscal 1990 will meet analysts' projections," he added.

Datron Systems Inc. is a leading designer/manufacturer of specialized communications systems and subsystems and high quality radio products.

MENLO PARK, CA (JAN. 23) PR NEWSWIRE - Consolidated Freightways Inc. (NYSE: CNF) has named John D. Combs, Jr. as corporate Director of Hazardous Materials Activities.

Combs, 46, is a 29-year veteran of the freight transportation industry. In his new position, he is responsible for maintaining hazardous materials guidelines and compliance among all CF companies; conducting training programs at company facilities and for customers on safe packaging, labeling, handling and movement of hazardous materials shipments; providing day-to-day counsel on hazardous material handling activities; and coordinating company policy with local, state and federal regulatory agencies.

Combs joined Consolidated Freightways Inc. in 1976 in Hayward, Calif., as supervisor of line-haul operations for the company's nationwide long-haul trucking unit, CF Motor Freight. In 1979, he was named sales representative in San Jose, and was promoted three years later to manager of volume sales. He became an account manager in 1983, and was named manager of hazardous materials activities in 1987.

Combs, who is based at the company's executive office in Menlo Park, has completed advance training in hazardous materials transportation and has been certified by the Hazardous Materials Advisory Council and the Government Services Institute as a field specialist.

He is a member of the hazardous material committees of the American Trucking Associations, the National Motor Freight Traffic Association and the Commercial Vehicle Safety Alliance; and the education and training committee of the Hazardous Materials Advisory Council.

Combs resides in Fremont, Calif., with his wife, Carol.

RALEIGH, NC (JAN. 23) PR NEWSWIRE - Athey Products Corporation (NASDAQ-NMS: ATPC) announced today that their new $500,000 paint shop is now in full operation.

This new facility which was designed to be environmentally state-of-the-art uses filtered air both in and out of the paint room.

This process substantially reduces the contaminants previously present in

the painting and drying process.

The "through-put" capacity for painting their mobile sweepers and other Athey products has more than doubled by adding this separate building. Painting time has improved in this brightly lighted booth, and the controlled air system greatly improves the finish quality. Drying time has been reduced to 45 minutes as compared to more than 4 hours in the old facility.

Athey Products Corporation designs and manufactures heavy duty loading and hauling equipment, conveyors, refuse packers, and street sweepers.

#90023p0182 01/23/1990 ~PR Newswire

CHICAGO (JAN. 23) PR NEWSWIRE - Centel Corp. (NYSE: CNT) announced today net income of $229.5 million, or $2.71 per share, on a post-split basis in the fourth quarter 1989, compared with $34.5 million, or 39 cents per share, in the same period a year ago. The 1989 results reflect a $239.2 million gain from the sale of three cable television units in the quarter.

Income from continuing operations was $8.6 million in the quarter, compared with $21.2 million in 1988. Fourth quarter 1988 results included an after-tax gain of $17.1 million on the sale of the company's investment in long-distance networks. Revenues from continuing operations were up 7.3 percent to $305.2 million from $284.3 million a year ago.

For the full year, net income was $445.3 million, or $5.11 per share post-split, which includes the total gain of $440 million from the sale of cable operations, compared with net income of $135.1 million, or $1.42 per share post-split, in 1988. Income from continuing operations was $11 million, compared with $109.8 million in 1988, and revenues increased 8.5 percent to $1.19 billion from $1.09 billion in 1988.

Access line growth in the company's telephone operations remained strong through the end of the year, increasing 5.8 percent in the last 12 months to 1.59 million lines. Long-distance calling volume for the quarter also rose 13.8 percent compared to the same period last year.

Fourth quarter revenues were up 5.2 percent to $228 million from $216.7 million a year ago. Operating income declined three percent to $48.7 million from $50.1 million.

The positive revenue impact of access line and calling volume growth was partially offset by revenue requirement shifts from interstate to

intrastate jurisdictions, and the continued loss of operator services previously provided to AT&T. Additional costs associated with enhancements to data systems and outside plant maintenance programs to improve service, as well as increased employee benefit costs, contributed to the rise in operating expenses.

The cellular operation ended the year with 113,300 access lines, an increase of 51,900 from year-end 1988. Fourth quarter revenues were $32.8 million, up 40.6 percent from $23.3 million a year ago. The group had an operating loss of $8.1 million, compared to a loss of $5.7 million for the same quarter in 1988.

The revenue gains reflect the strong growth in access lines, but operating results were impacted by several one-time adjustments totalling nearly $4 million.

CASPER, WY (JAN. 23) PR NEWSWIRE - Wyoming National Bancorporation (NASDAQ: WYNB) today reported its financial results through Dec. 31, 1989. For the fourth quarter of 1989, the company posted net income of $990,000 compared to $1,057,000 for the like period last year.

On a per share basis, fully diluted earnings were 47 cents for the quarter as compared with 53 cents earned in the like quarter last year. For the twelve months ended Dec. 31, 1989, fully diluted earnings per share were $1.90 compared to $2.08 for 1988. Primary earnings per common share were calculated on 1,777,408 shares for 1989, while the 1988 calculations were based on a weighted average of 1,185,345 shares through June 15, 1988 and 1,777,408 shares thereafter.

The company also announced today at its board of directors meeting the declaration of a quarterly cash dividend of 12 cents per share on the company's common stock, payable Feb. 20, 1990 to shareholders of record on Feb. 5, 1990. This represents an increase over the 10 cents per share

dividend declared and paid in the last quarter.

Net interest income was $4,930,000 for the fourth quarter, up $254,000 from the third quarter of 1989. Net interest income for the full year 1989 stood at $19,509,000 or a $48,000 increase from 1988. Net interest margin, which is the difference between the rate earned on all earning assets and the average rate of funding these assets, was 4.22 percent at Dec. 31, 1989, up from 4.14 percent for the year ended 1988.

Non-interest income for the quarter was $1,898,000, up $729,000 from the fourth quarter of 1988, primarily reflecting an increase in net securities gains. Non-interest expense for the fourth quarter was $5,610,000, a modest increase over $5,518,000 shown in the like period one year ago.

Non-performing loans at year end stood at $5,575,000, down from 7,871,000 and $9,726,000 respectively, at the end of the third quarter in 1989 and at year end 1988. The ratio of non-performing loans to total loans was improved to 2.42 percent at Dec. 31, 1989 from 4.41 percent at Dec. 31, 1988.

The allowance for loan losses was $4,502,000, representing 1.95 percent of outstanding loans, and is 161.76 percent on non-accrual loans at Dec. 31, 1989. Provisions for loan losses of $203,000 were added to the reserve in the fourth quarter of 1989. Net loan recoveries for the fourth quarter equal $37,000, while the fourth quarter of 1988 had net charge-offs of $1,196,000.

Wyoming National Bancorporation operates six banks with nine banking offices in Casper, Cheyenne, Gillette, Kemmerer, Lovell and Wheatland, Wyo.

#90023p0192 01/23/1990 ~PR Newswire

MELBOURNE, FL (JAN. 23) PR NEWSWIRE - Harris Corporation (NYSE: HRS) reported that net income in the second quarter ended Dec. 29 was $30.8 million, an increase of 10 percent from last year's income from continuing operations $27.9 million. Earnings per share were 78 cents versus 72 cents. Sales for the quarter were $761.1 million, compared with sales from continuing operations of $491.2 million last year.

The second quarter included three months operating results of GE Solid State (GESS), compared with one month in last year's quarter. GESS was acquired on Nov. 30, 1988, and is now part of the Harris Semiconductor Sector. This year's second quarter also included the results of Lanier

Worldwide (formerly Harris/3M), which became a wholly owned Harris subsidiary effective April 28, 1989.

Net income for the six months was $56.4 million or $1.44 per share, compared with income from continuing operations of $50.9 million or $1.31 per share the previous year. Sales in the six-month period were $1,483.8 million, compared with sales from continuing operations of $921.2 million last year.

Reporting on the company's four major businesses, John T. Hartley, Harris chairman and chief executive, said that the Lanier Worldwide subsidiary posted strong sales and earnings in the second quarter, and the Semiconductor Sector reported increased earnings on substantially higher sales. Electronic Systems Sector earnings were down moderately on level sales, and the Communications Sector's sales and earnings were relatively unchanged from last year's quarter.

Hartley reported that total orders from continuing operations in the second quarter were up substantially over last year's quarter and exceeded shipments. In addition to increased order volumes resulting from the acquisition of GESS and from Lanier Worldwide, orders were up strongly in the Electronic Systems Sector. Communications Sector orders were down slightly for the quarter.

Looking to the second half of the company's fiscal year, Hartley said, "Order levels in our Semiconductor Sector are running lower than anticipated, and the strong competitive acitivity in this market is putting pressure on margins. As a result, while we expect Harris Semiconductor earnings in the second half to be higher than the first six months, they will probably be relatively flat compared with last year's strong third and fourth quarters. Similarly, because first-half orders in our Communications Sector were lower than planned, we expect flat to modest earnings growth in the second half compared with a strong performance last year.

"However, we are encouraged by a strong earnings outlook for the Electronic Systems Sector and Lanier Worldwide in the second half of this year. The net result is that, for the company as a whole, we continue to expect good growth in earnings for fiscal 1990."

#90023p0193 01/23/1990 ~PR Newswire

NEW YORK (JAN. 23) PR NEWSWIRE - The Dime Savings Bank of New York FSB (NYSE: DME) today reported a net loss of $92.3 million, or $4.05 per share for 1989, compared with net income of $80.1 million, or $3.52 per share,

in 1988.

For the three months ended Dec. 31, 1989, the bank had a net loss of $109.9 million, or $4.82 per share, compared with net income of $15 million, or $0.66 per share, in the year-earlier period.

Harry W. Albright Jr., chairman and chief executive officer of The Dime, said, "Despite the net loss for 1989, at year-end The Dime was in full compliance with the FDIC's 6 percent of assets regulatory capital requirement as well as the regulatory capital requirements of the Office of Thrift Supervision and we have continued our regular quarterly dividend of $0.15 per share. In the fourth quarter of 1989, we also completed our acquisition of New Jersey-based Starpoints Savings Bank, with deposits in excess of $420 million, which has been renamed The Dime Savings Bank of New Jersey."

The bank reported that, at Dec. 31, 1989, it had stockholders' equity of $631.9 million, or $27.66 per share. Tangible capital totaled $593.4 million. At the end of 1988, The Dime's stockholders' equity was $729.4 million, or $31.97 per share.

The loss for 1989 is primarily attributable to the addition of loan loss reserve and restructuring actions announced on Dec. 20, 1989, which included: a special addition of $80 million to the loan loss reserve; the sale of $293 million of low-yielding, fixed-rate investment securities at a pre-tax loss of $35 million; and facilities restructuring resulting in the write-off of excess office space and closing of loan offices outside of its core market at a pre-tax cost of $23.9 million. In addition, the bank announced the sale of its credit card portfolio, with receivables outstanding of $80.6 million, for a pre-tax gain of $16.4 million.

"These steps strengthen The Dime's balance sheet and improve the earnings outlook for 1990 and beyond," added Albright.

The bank reported that the interest rate margin was 1.39 percent for the year 1989 and 1.54 percent for the 1989 fourth quarter, compared with 2.06 percent and 1.87 percent, respectively, in the 1988 periods.

The bank's interest rate margin at Dec. 31, 1989, was 1.89 percent, while its net yield on interest-earning assets was 2.07 percent. "Our spreads are improving as lower market interest rates are being reflected in the cost of our liabilities. Also contributing to spread improvement is the repricing to full index of loans originated with introductory rates. In fact, our spreads at year-end are more than 50 basis points higher than they were six months earlier," Albright said.

The Dime reported that non-performing assets were $550.6 million, or 4.72 percent of total assets, at Dec. 31, 1989, compared with $300.4 million,

or 2.50 percent of total assets, at Dec. 31, 1988. The increase in non-performing assets includes $12.3 million held by The Dime Savings Bank of New Jersey. However, as a result of the special provision of $80 million in the fourth quarter, the reserve for loan losses at year-end 1989 was $116.4 million, or 1.12 percent of total loans at that time, up from $25 million, or .25 percent of total loans at the end of 1988.

#90023p0197 01/23/1990 ~PR Newswire

CHICAGO (JAN. 23) PR NEWSWIRE - Whitman Corp. had record sales and record earnings from continuing operations for the fourth quarter and the full year of 1989 (excluding significant non-recurring items), it was announced today.

Consolidated sales and revenues for the quarter were $1,147.8 million, up 13.6 percent from last year. Income from continuing operations was $80.7 million for the fourth quarter, up 18.9 percent from last year. Income per share from continuing operations, after the payment of preferred dividends, was 69 cents, up 4.5 percent from last year's fourth quarter.

For the full year, sales and revenues were $3,985.9 million, up 14.7 percent from 1988. Income from continuing operations in 1989 was $228.2 million, up 30.9 percent from past year. Income per share from continuing operations, after the payment of preferred dividends, was $1.87, up 14.7 percent.

Net income per share for the year was $1.50, down 31.5 percent from 1988, when the company had a 24-cent gain from the sale of Pneumo Abex, 10 cents of income from discontinued operations, and a 22-cent gain from an accounting change.

By comparison, in 1989, net income per share was reduced by an 8-cent loss from discontinued operations and a 29-cent loss on one-time dispositions.

Pet Inc. and Midas International set records for sales and earnings in both the fourth quarter and the full year. For 1989, Pet's sales were $1,801.9 million, up 24 percent. Pet's operating income was $280 million, up 15.6 percent from 1988. Midas had sales of $433.7 million, up 9.9 percent, and operating income of $73.5 million, up 13.1 percent.

In 1989, Pepsi-Cola General Bottlers had sales of $961.4 million, up 6.8 percent from 1988. Pepsi General's operating income was $125.8 million, down 3 percent from 1988 because of severe price discounting in the

soft-drink business. Hussman had $788.9 million in sales, up 8.3 percent from 1988, and operating income of $66 million, up 10.4 percent from the year before.

#90023p0200 01/23/1990 ~PR Newswire

BRIDGEPORT, CT (JAN. 23) PR NEWSWIRE - The Hydraulic Company (NYSE: THC) today announced a major consolidation of its public water supply business under one senior officer and named several members of upper management to new assignments.

James S. McInerney, 52, has been named to head THC's public water supply operations, which include Bridgeport Hydraulic Company (BHC) and BHC's Stamford Water Company (SWC) subsidiary.

THC President and Chief Executive Officer Jack E. McGregor said McInerney will succeed Raymond C. Smedberg as BHC's executive vice president and chief operating officer, with that post expanded to include the overall direction of SWC as its chief executive officer and of several other key functions previously assigned elsewhere.

Smedberg, 45, who has served in that position since 1986, considered other positions within the utility, but has decided to pursue currently available career alternatives, McGregor said.

Three officers, all of whom will report to McInerney, were given new BHC assignments, They are: Glenn Thornhill, 43, vice president- engineering and development, expanded position; Mark L. Johnson, 35, president and chief operating officer of SWC, as well as BHC vice president-environmental management, a new position; and Charles V. Firlotte, 35, vice president-customer and administrative services, also a new post. A fourth key position that also will report to McInerney is that of Jay W. Shutt, 38, vice president-operations.

The changes are effective immediately, McGregor said.

THC, whose core business is public water supply, serves a population of approximately 460,000 in 18 Connecticut communities through BHC and SWC. THC is engaged in nonutility enterprises through its Hydrocorp, Inc. subsidiary, which is involved in diversified water management, environmental and utility services ventures; through its Timco, Inc. subsidiary, which operates forest products and electricity cogeneration facilities; and through Main Street South Corporation, a real estate subsidiary.
